NASA SP-7037 (26)	593-649	January 1973	December 1972

This bibliography was prepared by the NASA Scientific and Technical Information Facility, operated for the National Aeronautics and Space Administration by Informatics Tisco, Inc.

The Administrator of the National Aeronautics and Space Administration has determined that the publication of this periodical is necessary in the transaction of the public business required by law of this Agency. Use of funds for printing this periodical has been approved by the Director of the Office of Management and Budget through July 1, 1974.

## **SPECIAL NOTICE**

The abstract sections of the monthly supplements of *Aeronautical Engineering* can be bound separately. Individual abstracts can be located readily by means of the page numbers given at each entry, e.g., p0319 N72-20013. To assist the user in binding Supplements SP-7037 (15) through SP-7037 (26), a title page is included in the back of this Cumulative Index.

**NASA SP-7037 (27)**

**A CUMULATIVE INDEX  
TO  
AERONAUTICAL ENGINEERING  
A Special Bibliography**

**This Cumulative Index supersedes the indexes  
contained in supplements SP-7037 (15) through  
SP-7037 (26).**

*Scientific and Technical Information Office*  
**NATIONAL AERONAUTICS AND SPACE ADMINISTRATION**  
*Washington, D.C.*

**JANUARY 1973**

**This Supplement is available from the National Technical Information Service (NTIS), Springfield, Virginia 22151 for \$9.00.**

**For copies mailed to addresses outside the United States, add \$2.50 per copy for handling and postage.**

# INTRODUCTION

## WHAT THIS CUMULATIVE INDEX IS

This publication is a cumulative index to the abstracts contained in NASA SP-7037 (15) through NASA SP-7037 (26) of *Aeronautical Engineering: A Special Bibliography*. NASA SP-7037 and its supplements have been compiled through the cooperative efforts of the American Institute of Aeronautics and Astronautics (AIAA) and the National Aeronautics and Space Administration (NASA).

Entries prepared by the two contributing organizations are identified as follows:

1. NASA entries by their STAR accession numbers (N72-10000 series).
2. AIAA entries by their IAA accession numbers (A72-10000 series).

## HOW THIS CUMULATIVE INDEX IS ORGANIZED

This Cumulative Index includes a subject index, a personal author index, a corporate source index, a contract number index, and a report/accession number index.

## HOW TO USE THE SUBJECT INDEX

Two types of cross-references appear in the subject index:

1. Use (U) references indicate that the subject term is not "postable," i.e., not a valid term, and the following term or terms are used instead. For example:

AIRCRAFT PROTUBERANCES

U PROTUBERANCES

FLIGHT PERFORMANCE

U FLIGHT CHARACTERISTICS

2. Narrower Term (NT) references refer the user to more specific headings in the same subject area, under which additional material on the subject may be found.

For example:

FLOW RESISTANCE

NT AERODYNAMIC DRAG

NT FRICTION DRAG

NT SUPERSONIC DRAG

In addition, a searcher may use the notations of content in the index to narrow further his quest for particular items. This is because subject terms can readily include more than one class of document. For example:

AIRLINE OPERATIONS

All-weather operations, including  
pilot role, instrument landing  
systems and guidance aids.

Airport congestion as constraint on  
air travel, considering runway  
capacity and adjusted demand.

illustrates a case where two references on different topics are listed under the same subject term.

## HOW TO USE THE PERSONAL AUTHOR INDEX

All personal authors used in the abstract-section citations in the individual Supplements appear in the index. Differences in transliteration schemes may require multiple searching of the index for variants of an author's name. For example:

EMELIANOV, M.D.

and

YEMELYANOV, M.D.

## HOW TO USE THE CORPORATE SOURCE INDEX

The corporate source index entries are abridged versions of the corporate sources used in the abstract-section citations in the individual Supplements. The corporate source supplementary (organizational component) does not appear in the index. For example:

BOEING CO., SEATTLE, WASH. MILITARY AIRCRAFT SYSTEMS  
DIV. (Corporate source at citation)

BOEING CO., SEATTLE, WASH.

(Corporate source index entry)

## HOW TO USE THE CONTRACT NUMBER INDEX

All contract numbers that are identified in the abstract-section citations in the individual Supplements appear in this index. Changes by agencies in the style in which contract numbers are presented may require multiple searching for variants. For example:

AF 33(615)-71-C-1758

F33615-71-C-1758

## HOW TO USE THE REPORT/ACCESSION NUMBER INDEX

All report numbers that have been assigned by the corporate source, monitoring agency or cataloging activity appear in this index. Variations in initial cataloging may result in different report number series. For example:

TP-924

ONERA-TP-924

## IDENTIFICATION OF DESIRED SUPPLEMENT

The abstract and descriptive cataloging for any accession number selected from the indexes may be found in the appropriate Supplement. The page-number range of each Supplement appears on the inside front cover of this index. Once the range of page numbers containing the selected accession number is located in the second column, the desired Supplement number will be found in the first column. For example:

Page 195 will be found in Supplement 18.

## AVAILABILITY OF DOCUMENTS

Information concerning the availability of documents announced in the *Aeronautical Engineering* supplements is found in the Introduction to the most currently issued monthly supplement.

# TABLE OF CONTENTS

<b>Subject Index</b> .....	<b>A-1</b>
<b>Personal Author Index</b> .....	<b>B-1</b>
<b>Corporate Source Index</b> .....	<b>C-1</b>
<b>Contract Number Index</b> .....	<b>D-1</b>
<b>Report/Accession Number Index</b> .....	<b>E-1</b>

# SUBJECT INDEX

AERONAUTICAL ENGINEERING / A Special Bibliography

JANUARY 1973

1972 Cumulative Index

## Typical Subject Index Listing

The subject heading is a key to the subject content of the document. The Notation of Content (NOC), rather than the title of the document, is usually used to provide a more exact description of the subject matter. (AIAA occasionally uses the title in lieu of the NOC.) The report number helps to indicate the type of document cited (e.g., NASA report, translation, NASA contractor report). The page and accession numbers are located beneath and to the right of the Notation of Content, e.g., p0089 N72-11968. Under any one subject heading, the accession numbers are arranged in sequence with the IAA accession numbers appearing first.

## A

### A-3 AIRCRAFT

U.S. Navy cartography, describing RA-3B Skywarrior capabilities and photographic instrumentation  
p0196 A72-21699

### A-4 AIRCRAFT

A-4 Skyhawk horizontal stabilizer experimental graphite-epoxy composite construction, describing design, manufacturing and testing techniques  
[AIAA PAPER 72-358] p0350 A72-28954  
Development, stress analysis, and manufacturing of horizontal stabilizer for A-4 aircraft using graphite-epoxy laminates in primary structure  
[AD-738900] p0481 N72-27040

### A-6 AIRCRAFT

Sound pressure levels and acoustic fatigue tests for 11,200 and 9,300 pound thrust J-52 engines comparison in A-6A aircraft  
p0176 A72-18757  
Performance tests of A-6 aircraft during landing arrestment evaluation at high gross weight for two thousand arrestments  
[AD-745300] p0642 N72-33049

### A-7 AIRCRAFT

A-7 D/E navigation/weapon delivery system flight testing, using photogrammetric technique  
p0124 A72-16656  
Flight test evaluation of A-7D/E emergency backup flight control system, describing hydraulic power control systems design and function  
p0125 A72-16664  
Catapult steam ingestion test of turbofan engines in A-7 aircraft, correlating compressor stall occurrences with temperature increase rate in distorted region  
p0176 A72-18760  
Nongunfire and gunfire data obtained from M61 rapid fire gun in A-7D aircraft  
p0173 N72-15836  
Structural response of A-7 aircraft to rapid fire from M61 under various flight conditions  
p0215 N72-16815

### A-9 AIRCRAFT

Northrop A-9A attack aircraft production planning, discussing design features and management/engineering organizational changes in anticipation of USAF production contract  
p0442 A72-34391

### A-10 AIRCRAFT

A-10 prototype designed for production.  
p0443 A72-34392

### A-37 AIRCRAFT

Development of techniques and equipment for determining moment of inertia of aircraft as applied to A-37 and P-1127 aircraft  
[FTC-TIH-71-1001] p0331 N72-21007

### A-300 AIRCRAFT

European A300B airbus flying control hydraulic system and landing gear design for safety and reliability, fatigue life, weight and maintenance  
p0009 A72-10728  
European A300B airbus flap and slat systems and tailplane actuator for longitudinal pitch trim control  
p0009 A72-10725  
A-300B European Airbus cantilever wing design and manufacture, discussing skin forming, skin-stringer and torsion-box assembly, automatic riveting and root-end profile machining procedures  
p0062 A72-14301  
Airbus A-300 B design and characteristics for passenger transport on short and medium haul routes  
p0125 A72-16694

### ABLATION

Ablation phase duration during spacecraft decelerated hypersonic reentry flight, using theoretical model based on quasi-steady assumptions  
p0300 A72-25815

### ABLATIVE MATERIALS

Surface patterns from ablating, melting and flowing materials in supersonic flow of wind tunnel, rocket motor and flight test environments, comparing with theory  
[AIAA PAPER 72-313] p0285 A72-25247  
Fabrication and installation of heat shields with various curvatures to airframe sections of DC-3 aircraft  
[NASA-CR-112109] p0581 N72-30946

### ABNORMALITIES

#### NT MAGNETIC ANOMALIES

#### ABORTED MISSIONS

Booster launch vehicle guidance scheme for critical aborts from staging through burnout, minimizing aerodynamic phases for different landing sites  
p0397 A72-32182

### ABSTRACTS

Abstracts and summaries of aerospace research for 1971  
p0378 N72-22973

### AC GENERATORS

Aircraft turbo-alternator speed control for constant frequency power supply, presenting theoretical relationships for electrohydraulic or mechanohydraulic control loops  
p0071 A72-15462  
Aircraft turboalternator governing theory for frequency error detection, comparing performance of mechanical- and electro-hydraulic governors  
p0143 A72-18249  
Aircraft cockpit electrical heating system, converting three phase ac energy from alternator with economy and safety  
[SAE PAPER 720329] p0291 A72-25591  
Silicon carbide rotating rectifier alternator with solid lubricated bearings for high altitude environments, noting applicability to supersonic aircraft  
p0453 A72-35565

### ACCELERATED LIFE TESTS

Accelerated full scale aircraft turbine engine corrosion tests in controlled environment, simulating salt, high temperature and humidity

## ACCELERATION

## SUBJECT INDEX

conditions  
[NACE PAPER 76] p0241 A72-24320  
Accelerated life tests to determine effects of  
arrested landing stresses on C-2 aircraft  
structure  
[AD-739331] p0480 A72-27036

**ACCELERATION**  
Normal acceleration data for jet aircraft and  
trainers  
[AD-725840] p0089 A72-11968

**ACCELERATION (PHYSICS)**  
**NT ANGULAR ACCELERATION**  
**NT DECELERATION**  
Dynamic manned vehicle cockpit simulator for  
visual and aural effects and acceleration  
changes, discussing STOL and VTOL characteristics  
p0143 A72-18246  
Nonlinear longitudinal aerodynamic characteristics  
effect on rigid aircraft response to normal  
acceleration due to atmospheric turbulence,  
using power spectral technique p0236 A72-23461  
Pneumatically assisted parachute deployment at  
high altitudes with low accelerations  
p0240 A72-24273  
On the prediction of acceleration response of air  
cushion vehicles to random seaways and the  
distortion effects of the cushion inherent in  
scale models.  
[AIAA PAPER 72-598] p0458 A72-36538  
The development of dynamic flight test techniques  
for the extraction of aircraft performance.  
[AIAA PAPER 72-785] p0495 A72-38102  
Maneuver acceleration measured for estimating  
loads during civil aircraft training and test  
flying  
[ARC-CP-1176] p0042 A72-11043  
Linear and angular acceleration terminology, human  
acceleration simulation, airplane airbag  
restraint systems, and mathematical models of  
automobile crash loads  
p0274 A72-19155  
Effects of gusts, maneuvers, and landing impacts  
on four-engine cargo aircraft during commercial  
airlines operation  
[NASA-TN-D-6790] p0421 A72-24015  
Effects of longitudinal acceleration and Magnus  
forces and moments on stability of aircraft with  
constant velocity around longitudinal axis  
[AD-738231] p0424 A72-24394  
Device for applying simulated g-forces to arm of  
aircraft simulator pilot  
[NASA-CASE-LAR-10550-1] p0482 A72-27271  
Gyropendulums for precision vertical indicators  
considering velocities and accelerations in  
earth gravitational field  
p0589 A72-31453

**ACCELERATION PROTECTION**  
Dynamic deceleration anthropomorphic dummy tests  
of general aviation occupant lap belt/shoulder  
harness restraint systems  
[SAE PAPER 720325] p0291 A72-25588  
Acceleration protection system design, impact  
testing of restraint harnesses and ejection seat  
cushions, and implications  
p0275 A72-19157

**ACCELERATION STRESSES (PHYSIOLOGY)**  
**NT CENTRIFUGING STRESS**

**ACCELEROMETERS**  
Passenger aircraft onboard automated inertial,  
navigation devices, emphasizing accelerometer  
and gyroscope design and construction  
p0001 A72-10070  
Flight vehicle angular velocity measurement by  
accelerometers, deriving equations of motion  
p0241 A72-24497  
Mathematical models of rate gyros, servo  
accelerometers, pressure transducers, and  
telemetry systems and analog computer simulation  
programs  
[NASA-CR-1768] p0034 A72-10401  
Statistical analysis of counting accelerometer  
data for normal acceleration of fleet aircraft  
[AD-733678] p0259 A72-18468  
Wind tunnel tests of full-scale flight path  
accelerometer to determine transonic aerodynamic  
characteristics and to eliminate interaction  
effects between angle of attack and sideslip vanes  
[AD-736456] p0371 A72-22328

Application of lasers to rotary gyroscope  
vibration interferometry, gyroscope balancing,  
and gravimetric accelerometers  
[REPT-59] p0372 A72-22524  
Design, fabrication, and test of full scale angle  
of attack and sideslip vanes used with flight  
path accelerometer in high speed wind tunnel  
[AD-736819] p0388 A72-23490  
Evaluation of accelerometer and strain gage data  
obtained by counting methods of load-time  
histories for jet fighter aircraft  
p0541 A72-29912  
Analysis of normal acceleration data obtained  
during operation of military aircraft using  
counting accelerometers  
[AD-743067] p0587 A72-31036  
Miniature capacitive accelerometer for use in free  
flight wind tunnel telemetry  
[NASA-TN-X-2644] p0589 A72-31460  
Wind tunnel tests to determine damping  
characteristics of vanes and to calibrate flight  
path accelerometer at subsonic and supersonic  
speeds  
[AD-742994] p0589 A72-31480

**ACCEPTABILITY**  
Acceptance tests for intercity air transportation  
effectiveness computer programs  
[PB-200476] p0106 A72-13030  
Acceptance test of Kearfott gyroflex gyroscope  
model 2  
[LRBA-E-209-WT-1/SIE] p0521 A72-28479

**ACCEPTANCE**  
**U ACCEPTABILITY**  
**ACCESSORIES**  
High strength Ti alloys for aircraft accessories  
structural materials, comparing room temperature  
physical properties of ultrahigh tensile steels  
and other alloys

# SUBJECT INDEX

# ACOUSTIC MEASUREMENTS

## ACCRETION

### U DEPOSITION

### ACCURACY

Development of model to determine effects of pilot performance and aircraft dynamics on accuracy of tactical weapon delivery  
[AD-728324] p0091 A72-12037

### ACOUSTIC ATTENUATION

#### NT SHOCK WAVE ATTENUATION

Liquid-base foam sound absorbing properties for jet aircraft noise reduction p0001 A72-10160

Sound attenuation in lined rectangular ducts with uniform steady flow, considering aircraft engine noise reduction p0070 A72-15267

Atmospheric acoustic attenuation measurement on sailplane, assessing turbulence backscattering cross section p0189 A72-20597

Building soundproofing codes for airport zoning ordinances, emphasizing wider latitude in land use options p0354 A72-29561

Acoustic attenuation and thrust loss incurred by shrouded multistage supersonic jet noise suppressor [AIAA PAPER 72-642] p0416 A72-34090

Optimization of acoustic linings in presence of wall shear layers p0548 A72-40334

### ACOUSTIC COMBUSTION

#### U COMBUSTION STABILITY

### ACOUSTIC DUCTS

Measurement, in a duct, of the space-structure of the discrete-frequency noise generated by an axial compressor. p0567 A72-42913

### ACOUSTIC EXCITATION

Endurance tests of D16AlNO alloy sheets under high intensity acoustic, harmonic and electrodynamic vibrator loading p0056 A72-13470

Silicone based elastomers acoustic excitation damping properties at 213-423 K, discussing testing technique and results at 200-1000 Hz p0351 A72-29090

Aircraft structures fatigue-life expectancy under random acoustic excitation, describing testing methods and equipment p0609 A72-44739

Endurance tests of D16AlNO alloy sheets under high intensity acoustic, harmonic and electrodynamic vibrator loading p0610 A72-44945

### ACOUSTIC FATIGUE

Sound pressure levels and acoustic fatigue tests for 11,200 and 9,300 pound thrust J-52 engines comparison in A-6A aircraft p0176 A72-18757

Testing for acoustic fatigue in aircraft structures p0172 A72-15797

Vibration damping and acoustic fatigue resistance of aircraft structural composites with viscoelastic core p0216 A72-16865

Analysis of acoustic fatigue life of structures subjected to jet noise and application to design of aircraft structures - Part 1 p0539 A72-29893

### ACOUSTIC GENERATORS

#### U SOUND GENERATORS

### ACOUSTIC MEASUREMENTS

Portable detector-recorder for automobile, blast furnace, railroad car, engine room and helicopter infrasonic noise measurements, discussing peak frequencies and subjective effects p0001 A72-10157

Acoustic echo sounder as real time monitor of airport environmental meteorological parameters p0013 A72-11137

Aircraft engine noise effects in airport vicinities, discussing measurement scales, turbofan sources, noise reduction and future air traffic p0016 A72-12022

French jet aircraft noise reduction research facilities, discussing in-flight and overfly noise measurements, various silencer configurations and Concorde engine tests

p0059 A72-13680

Intense noise measurement device for heat flow environments, discussing applications to jet engines, nozzle exits, turbine exhausts and volcanic craters [ONERA, TP NO. 1010] p0118 A72-16025

Aerodynamic noise measurement, discussing physical units, spectral analysis, conversion and correction formulas p0136 A72-17195

JT8D engine exhaust noise field, considering internal noise sources contribution from exhaust duct sound pressure measurements p0184 A72-19331

California airport noise standards instrumentation, discussing battery operated measurement of hourly and community noise equivalent levels p0184 A72-19490

Jet noise intensity reduction by screen across nozzle exit, using acoustic and hot wire measurements p0185 A72-19873

Structural Acoustic Monitor system for airframe structural proof testing, providing multichannel recording and aural monitoring of acoustic data derived from aircraft mounted accelerometers p0240 A72-24146

Subsonic jet noise directivity prediction from acoustic pressure measurements p0301 A72-26041

Measurement of spatially coherent and incoherent structure of axial compressor-generated noise modes propagating in duct [ONERA, TP NO. 1045] p0311 A72-28049

Low flight altitude atmospheric parameters spatial and temporal variability effects on aircraft flyover noise measurement p0347 A72-28841

Acoustic measurements for STOL turboprop transport aircraft propeller configurations under static, taxi and flyover conditions, discussing quiet propeller noise signature p0355 A72-29571

Bibliography on noise control covering surface transportation, machinery and aircraft noise, industrial criteria, biodynamics, legislation and measurement p0356 A72-29588

Tu-104 turboprop aircraft flight noise measurements and spectral changes at different distances from landing strip, evaluating public nuisance and resident reactions p0360 A72-30446

Noise measurements during shock free and underexpanded operation modes of supersonic cold model jet at moderate exit Mach number p0395 A72-32017

Externally blown flap impingement noise. [AIAA PAPER 72-664] p0455 A72-35961

Flyover noise testing of commercial jet airplanes. [AIAA PAPER 72-786] p0495 A72-38103

Noise generated by STOL core-jet thrust reversers. [AIAA PAPER 72-791] p0496 A72-38108

A time-frequency localization system applied to acoustic certification of aircraft. [AIAA PAPER 72-836] p0505 A72-39091

Design and development of the United Aircraft Research Laboratories acoustic research tunnel. [AIAA PAPER 72-1005] p0558 A72-41589

Low flying aircraft wake vortices tracking, describing sensing techniques based on acoustic pulse deflection and velocity field measurements p0565 A72-42709

Measurement, in a duct, of the space-structure of the discrete-frequency noise generated by an axial compressor. p0567 A72-42913

Tone noise from rotor/stator interactions in high speed fans. p0610 A72-44917

Incremental value of noise pollution level as basis for aircraft noise rating [NPL-AERO-AC-49] p0030 A72-10035

Ground noise measurements during landing, takeoff, and flyby operations of four-engine turboprop STOL aircraft [NASA-TN-D-6486] p0086 A72-11948

Data acquisition and analysis of atmospheric absorption coefficients from acoustic flight tests of commercial aircraft  
[NASA-CR-18911] p0087 N72-11957

Analysis of noise levels created by military aircraft, ground support equipment, and terminal facilities  
[AD-728454] p0090 N72-11972

Human factors engineering to determine effectiveness of auditory display for aircraft collision warning and avoidance system  
[AD-729765] p0153 N72-14005

Measurement of impulsive noise, rotor noise, rotor blade dynamics, and rotor blade pressure of CH-53 helicopter under cruise and hover conditions  
[AD-730359] p0155 N72-14018

Acoustic measurements of T-41 trainer aircraft during ground and airborne operation  
[AD-731128] p0167 N72-15014

Measurement of aircraft noise generated by F-4E aircraft during ground and airborne operation  
[AD-731092] p0167 N72-15016

Flight tests to determine feasibility of detecting vortices from low flying aircraft with acoustic radar  
[TR-7] p0168 N72-15140

Measurement of externally blown flap noise for determining noise criteria of STOL aircraft  
[NASA-TM-X-67991] p0203 N72-15959

Sound measurements and noise level in OH-58 helicopter  
[AD-731467] p0206 N72-15985

Noise measurement of deflected jet VTOL aircraft for determining design configurations and selecting propulsion systems  
p0215 N72-16817

Inflight vibration and noise study of several helicopters for upgrading environmental design criteria and verifying dynamic prediction techniques  
p0215 N72-16823

Investigating lift fan noise reduction by configuration modifications in LP336/A  
[NASA-CR-1934] p0218 N72-17004

Flight tests to determine methods for reducing airport community noise based on operationally optimum approach profiles  
[NASA-CR-114417] p0250 N72-18001

Acoustic tests of fans used with fan jet engine and measurement of far field noise for several configurations  
[NASA-TM-X-2528] p0282 N72-19845

Acoustic measurements of aerodynamic noise in low supersonic operation of axial flow compressor  
[NASA-CR-125811] p0282 N72-19849

Noise measurements of jet augmented lift systems for use on proposed STOL aircraft  
[NASA-TM-D-6710] p0319 N72-20011

Acoustic measurements to determine aerodynamic noise characteristics of single stage fan with 1.5 pressure ratio and 1160 feet per second tip speed  
[NASA-CR-120789] p0365 N72-21994

Spectral methods for analyzing jet noise and numerical analysis of sound pressure components and sound generation by wave-type jet turbulence  
p0383 N72-23022

Acoustic properties of STOL aircraft with engine over wing configuration and effects of nozzle location, wing shielding, flap leakage, and internally generated exhaust noise  
[NASA-TM-X-68032] p0420 N72-24008

Acceptability of VTOL aircraft noise determined by test subjects evaluating simulated sounds of helicopter, tilt wing aircraft, and turbojet aircraft  
[NASA-CR-2043] p0422 N72-24025

Wind tunnel investigation of acoustic characteristics of STOL aircraft  
[NASA-TM-X-62164] p0464 N72-26008

Analysis of noise generated by target type thrust reversers used on augmentor-wing short takeoff aircraft  
[NASA-TM-X-68082] p0477 N72-27012

Acoustic measurement tests to determine reduction of aerodynamic noise by engine-over-wing concept for conventional and STOL aircraft  
[NASA-TM-X-68104] p0479 N72-27030

Measurement of aircraft noise generated by YOV-10A short takeoff aircraft and comparison with wind tunnel data  
[NASA-TM-X-62166] p0480 N72-27031

Analysis of data on land uses around airports and application of computer program for data processing  
p0532 N72-29210

Static and flight acoustic and aerodynamic tests to determine flight velocity effect on jet noise of conical ejector, annular plug, and segmented suppressor nozzles  
[NASA-CR-120961] p0571 N72-30000

Design of anechoic chamber for studying supersonic and subsonic jet noise generation  
[NASA-CR-128038] p0576 N72-30249

Analysis of aircraft noise generation and optimization of flight paths to minimize effects of aircraft noise during takeoff  
[NASA-TT-F-14468] p0622 N72-32042

Numerical analysis of total sound pressure field emitted by stationary rotating jet and sound field from same jet in motion observed at fixed point on ground  
[NASA-TT-F-14489] p0623 N72-32047

Procedures for estimating near field sound pressure levels caused by jet engine noise  
[ESDU-72002] p0637 N72-33009

Research report on sound and vibration measurement in turbomachinery, aircraft structures, and building structures  
p0649 N72-33976

## ACOUSTIC PROPAGATION

Atmospheric stratification irregularities effects on sonic boom propagation, obtaining probability density functions  
p0198 A72-21905

Maximum overpressures of supersonic aircraft maneuvering-produced sonic booms occurring at geometrical acoustic ray focus points/caustic cusps/  
p0355 A72-29586

The estimation of nonstationary spectra from moving acoustic source distributions.  
[AIAA PAPER 72-667] p0452 A72-35486

Acoustic ray deflection by aircraft wake vortices with viscous core, observing maximum deflection angles during large aircraft landing  
p0457 A72-36417

Linear acoustic model to predict axial flow turbomachinery aerodynamic sound generation including flow effects on radiation  
p0503 A72-38568

Closed form solution for the sonic boom in a polytropic atmosphere.  
p0556 A72-41258

Measurement, in a duct, of the space-structure of the discrete-frequency noise generated by an axial compressor.  
p0567 A72-42913

Acoustic properties of radiated sound for near and far-field conditions and numerical analysis of aerodynamic sound production  
p0382 N72-23020

## ACOUSTIC PROPERTIES

## NT ACOUSTIC SCATTERING

## NT SOUND INTENSITY

Jet flap type exhaust flows acoustic and fluid dynamic characteristics, measuring sound power output and noise spectra for various configurations  
[AIAA PAPER 72-130] p0131 A72-16920

Jet noise reduction by screen placed across jet flow, investigating acoustic properties, velocity and pressure in mixing zone  
[AIAA PAPER 72-644] p0416 A72-34088

Application of multiple pure tone noise properties to determination of nonuniformities in turbojet aircraft engines - Part 1  
[NASA-CR-1831] p0092 N72-12223

Analytical and experimental investigation of vortex noise generated by propellers with low tip speeds  
[AD-731156] p0167 N72-15015

Acoustic tests of fans used with fan jet engine and measurement of far field noise for several configurations  
[NASA-TM-X-2528] p0282 N72-19845

- Theory of aerodynamic sound generation and numerical analysis of inhomogeneous wave equations to include effects of boundaries - conference [DLR-MITT-71-20] p0382 N72-23018
- Derivation of equations for flow noise theory and numerical analysis of special flow configurations and boundaries p0382 N72-23019
- Acoustic properties of radiated sound for near and far-field conditions and numerical analysis of aerodynamic sound production p0382 N72-23020
- Characteristics of free turbulence as source of aerodynamic noise and application to analysis of noise created by jet engines p0383 N72-23021
- Spectral methods for analyzing jet noise and numerical analysis of sound pressure components and sound generation by wave-type jet turbulence p0383 N72-23022
- Analysis of effect of aerodynamically-induced fluctuation forces on sound produced by axial flow compressor rotor and stator combinations [NASA-CR-2012] p0419 N72-23991

- Adaptive narrow band, frequency modulation, voice communication system p0437 N72-25783

Development of controller synthesis techniques for large aircraft using distributive parameters and time delays  
[AD-740873] p0529 A72-29013

Identification of linear stochastic systems using state variable formulation for discrete linear stochastic system  
[AD-741437] p0536 A72-29632

Decision and control theory for large scale and uncertain systems for aerospace applications  
[AD-740869] p0536 A72-29633

Development of algorithm for solving problem of controlling time-varying linear avionic system with random parameters based on adaptive dual control strategy - Part 1  
[AD-744115] p0625 A72-32064

Development of theory for designing optimal inputs to identify parameters in linear dynamic systems and application to avionics installations - Part 2  
[AD-744116] p0625 A72-32065

Development of controller design procedure for aircraft throughout entire flight envelope based on quadratic optimal control technology  
[AD-744491] p0626 A72-32068

**ADAPTIVE CONTROL SYSTEMS**

U ADAPTIVE CONTROL

**ADDITION RESINS**

NT ACRYLIC RESINS

**ADDITIVES**

NT PROPELLANT ADDITIVES

Viscosity and additive effects on jet engine fuel antiwear properties improvement  
p0016 A72-11968

Aviation fuels and additives effect on steel endurance limit at room temperature  
p0354 A72-29487

Effects of additives on hydrocarbon jet fuel stability  
[AD-737833] p0427 A72-24806

**ADDRESSING**

Air traffic density effect on secondary surveillance radar operation in ATC for aircraft identification and position determination, proposing selective address system  
p0547 A72-40289

**ADHEROMETERS**

U ADHESION TESTS

**ADHESION TESTS**

NDT techniques selection, economics and organization for aircraft industry, considering ultrasonic holographic and adhesion tests  
p0612 A72-45292

**ADHESIVE BONDING**

Metal-skin honeycomb composite structure design and manufacture for Concorde rudder, noting structural adhesive bonding in aircraft construction  
p0069 A72-15090

Adhesive bonded components in aircraft and aerospace structures, discussing manufacturing, metal surface preparation, inspection and environmental exposure  
[SAE PAPER 720118] p0136 A72-17325

Adhesive bonding of L-1011 body shell panels for improved fatigue strength and corrosion resistance  
p0400 A72-32429

Combined spot weld-adhesive bonding to join sheet metal parts with applications to propellant tanks and spacecraft and aircraft structures  
[SME PAPER AD 72-710] p0458 A72-36526

Stress distribution and displacements in adhesive bonded lap-jointed aerospace structures, presenting approximate solution  
p0462 A72-37214

Evaluation of experimental membranes, nonskid compounds, adhesives, and earth anchors used in constructing assault type runways for military aircraft  
[AD-729803] p0157 A72-14286

Nondestructive tests and their application for inspection of adhesive bonded structures, welded joints, and riveted or bolted joints  
p0278 A72-19542

Fabrication and installation of heat shields with various curvatures to airframe sections of DC-3 aircraft  
[NASA-CR-112109] p0581 A72-30946

**ADHESIVES**

Ethylene terpolymer material used as thermoplastic

transparent adhesive for bonding polycarbonate to glass  
[AD-728174] p0094 A72-12520

**ADIABATIC CONDITIONS**

Compressor exergetic efficiency calculation from gas exergy losses caused by pressure drop and cooling, noting relations to isothermal, adiabatic and polytropic efficiencies  
p0491 A72-37668

**ADIABATIC FLOW**

Pressure recovery calculation for subsonic adiabatic air flow through diffusers with tail pipes, assuming turbulent inlet boundary layer  
p0237 A72-23855

**ADJOINTS**

Galerkin method application to nonconservative nonself-adjoint aeroelasticity problems based on interpretation as mathematical formulation of virtual work principle  
p0178 A72-18788

**AGGREGATION**

Combined centrifugal oil filter, pump and deaerator for gas turbine engine lubrication systems, noting heat transfer effectiveness increase  
p0456 A72-36050

**AERIAL EXPLOSIONS**

Effects of air blast on performance of gas turbine engines  
p0172 A72-15824

**AERIAL IMAGERY**

U AERIAL PHOTOGRAPHY

**AERIAL PHOTOGRAPHY**

Cathode ray tube recorder for remote airborne photographic mission  
p0060 A72-13711

U.S. Navy cartography, describing EA-3B Skywarrior capabilities and photographic instrumentation  
p0196 A72-21699

Correlation functions for angular vibrations of operating aerial camera during working cycle  
p0232 A72-22947

Optical image filtering to simplify and facilitate automatic aerial photointerpretation processes  
p0233 A72-23310

Approach and landing flight simulator based on intermediary photography on transparent material  
p0207 A72-16186

Selection of optimum exposure and its automatic adjustment during air photography  
[AD-740196] p0577 A72-30420

Radar altimeters and large scale aerial photography for forest inventory  
p0588 A72-31447

**AERIAL RECONNAISSANCE**

Aerial expedition for studying conditions of atmospheric boundary layer over oasis and semiarid region  
[AD-727535] p0034 A72-10332

Use of multisensors in aerial reconnaissance/surveillance missions  
[AD-733347] p0259 A72-18464

Experimental aerial gravimetry program to determine feasibility of large scale aerial gravity surveys  
[AD-735266] p0337 A72-21394

Flight tests of air navigation equipment to determine accuracy of position location for small area mapping and aerial reconnaissance in Arctic regions  
[AD-740607] p0579 A72-30596

**AERIAL RUDDERS**

Metal-skin honeycomb composite structure design and manufacture for Concorde rudder, noting structural adhesive bonding in aircraft construction  
p0069 A72-15090

Flight test of direct side force control by rudder deflection and asymmetrical drag on T-33 airplane, noting use in dive bombing  
p0310 A72-27520

Jaguar powered flight controls, discussing wing spoilers, slab tailplane, rudder, autostabilization system and integrated packaging of actuators  
p0417 A72-34144

Development of direct side force control on aircraft during flight and application to improved bombing accuracy

# SUBJECT INDEX

# AERODYNAMIC CHARACTERISTICS CONTD

- Aerodynamic characteristics and performance of helicopter rotary wings [AD-729587] p0152 N72-13999
- Wind tunnel measurements to determine stability and drag of parachutes with varying effective porosity [AD-729858] p0152 N72-14000
- Development of techniques for predicting aircraft stability and control aspects of V/STOL aircraft [AD-730121] p0153 N72-14004
- Aerodynamic and control characteristics of helicopters in level flight and steep descents at low speeds [AD-729847] p0154 N72-14010
- Helicopter model tests for determining ground proximity aerodynamics in level and descending forward flight [AD-730364] p0155 N72-14021
- Wind tunnel tests to determine drag characteristics of airfoil covered with compliant coating of polyvinyl chloride membrane over polyurethane damping layer [AD-729921] p0160 N72-14607
- Mathematical models for helicopter rotary wing near wake and influence on rotary wing lifting characteristics [RAE-TR-71046] p0164 N72-14996
- Wind tunnel tests to determine static longitudinal aerodynamic characteristics of close-coupled wing-canard configurations at Mach numbers from 1.60 to 2.86 [NASA-TN-D-6597] p0165 N72-15000
- Flight tests of parafoil glider and comparison of flight test data with wind tunnel data using small scale and full scale models [AD-731143] p0167 N72-15012
- Analysis of inviscid flow field on expansion side of flat delta wing at supersonic speed [VTR-167] p0169 N72-15277
- Analysis of aerodynamic characteristics of delta planform, high cross range, shuttle orbiter space vehicle [NASA-CR-115357] p0201 N72-15941
- Numerical analysis of influence of camber and nonplanar wake on change of lift, vortex drag, and center of pressure of airfoil in ground effect [TT-71-12] p0201 N72-15947
- Analysis of inviscid flow on windward side of flat, sharp-edged delta wing at hypersonic speed and angles of attack near maximum lift [AD-731763] p0202 N72-15955
- Airflow characteristics of unsteady flow around bluff bodies, spheres, disks, and autorotating two dimensional airfoil [AD-731862] p0203 N72-15956
- Aerodynamic characteristics of flat-bottomed, semicircular wing in close proximity to ground or solid boundary [PB-203602] p0218 N72-17003
- Influence of aerodynamic characteristics on handling of amphibious hovercraft [CRANFIELD-AERO-7] p0249 N72-17992
- Wind tunnel tests to determine aerodynamic characteristics of vertical takeoff jet fighter aircraft with six jet engines in transition speed range [NASA-TM-X-2060] p0251 N72-18007
- Wind tunnel tests to determine effects of ground proximity on aerodynamic characteristics of V/STOL aircraft model [NASA-TM-X-2212] p0251 N72-18008
- Wind tunnel tests to determine dynamic characteristics of hingeless rotors with hub moment feedback controls and rotor frequency response - Vol. 1 [NASA-CR-114427] p0253 N72-18024
- Compilation of data obtained from wind tunnel tests of hingeless rotors with hub moment feedback controls and rotor frequency response - Vol. 2 [NASA-CR-114428] p0253 N72-18025
- Aerodynamic characteristics of bomb in steady, incompressible, potential flow based on model [AD-733325] p0254 N72-18037
- Turbine engine aerodynamics research on higher inlet temperature and blade loading [NASA-TM-X-68016] p0264 N72-18782
- Flight test analysis of flow characteristics of air intake system of P-111A aircraft at supersonic speed [NASA-TN-D-6679] p0265 N72-18996
- Aerodynamic design and performance of axial flow compressor rotor with tip speed of 1380 feet per second and 1.1 blade tip solidity [NASA-TM-X-2449] p0266 N72-18998
- Aerodynamic performance of lifting helicopter rotor during vertical descent [AD-734229] p0267 N72-19011
- Application of ring vortex method for determining aerodynamic characteristics of rotary wings and design of lifting rotor systems [AD-735018] p0267 N72-19013
- Maximum likelihood technique used to extract aerodynamic parameters of Navion airplane from flight data [NASA-TN-D-6643] p0268 N72-19019
- Aerodynamic characteristics and flow phenomena of supercritical wings near Mach one conditions [NASA-TT-F-14242] p0317 N72-19994
- Aerodynamic characteristics of Dornier DO-31 VTOL transport under visual and simulated instrument flight conditions [NASA-TN-D-6754] p0319 N72-20012
- Aerodynamic characteristics of experimental aircraft FA-200XS [BAE-LIB-TRANS-1606] p0319 N72-20013
- Aerodynamic characteristics and problems encountered in design of TU-144 supersonic aircraft [NASA-TT-F-14206] p0320 N72-20014
- Aerodynamic and mechanical design of two-stage, highly-loaded fan for advanced aircraft, and tests with uniform and distorted inlet flow [NASA-CR-120859] p0326 N72-20763
- Vortex ring method used for calculations of aerodynamic characteristics of helicopter lifting rotors at any angle of attack in flow with comparatively high velocity [AD-735439] p0327 N72-20973
- Flight test procedures for determining stall and spin characteristics of high performance aircraft p0328 N72-20979
- Development of flight test procedures for use with advanced aircraft to determine cruise performance characteristics p0329 N72-20985
- Techniques and procedures for conducting flight tests of lifting body type aircraft during transonic and supersonic flight conditions [NASA-TM-X-68306] p0329 N72-20986
- Determination of performance data and stability and control characteristics from aircraft performance under nonsteady flight conditions p0330 N72-20992
- Wind tunnel tests of M2-P2 lifting body entry configuration at transonic and supersonic speeds and selected Reynolds numbers [NASA-TM-X-2511] p0331 N72-21005
- Blade stress analysis, wind tunnel models, and test procedures for investigating conversion process of folding tilt-rotor aircraft - Vol. 4 [AD-735733] p0334 N72-21028
- Characteristics of aircraft using supercritical aerodynamics and analysis of turbofan engine performance with single and double stage configurations [NASA-TM-X-68031] p0340 N72-21816
- Aerodynamic characteristics of delta wing orbiter in close proximity to synchronously oscillating canard booster at Mach 2 [LTR-UA-18] p0365 N72-21992
- Numerical analysis of factors affecting aerodynamic stability of aircraft and development of concept of dynamic derivatives [ARL/A-NOTE-330] p0365 N72-21996
- Numerical analysis of velocity potential of subsonic flow past semi-infinite plane sector based on linearized theory of subsonic flow [ARC-R/M-3630] p0366 N72-22002
- Structural design criteria and aerodynamic prediction techniques applied to stowed tilt rotor concept - Vol. 8 [AD-736021] p0366 N72-22011
- Aerodynamic characteristics and configuration of De Havilland C-8A aircraft modified for STOL operation [NASA-CR-114435] p0367 N72-22014

Development of theory for optimum performance of rotary wing hovering out of ground effect  
[NASA-TM-X-62138] p0367 N72-22019

Value engineering report on design and evaluation of stowed tilt rotor concept - Vol. 9  
[AD-736022] p0370 N72-22035

Wind tunnel tests of full-scale flight path accelerometer to determine transonic aerodynamic characteristics and to eliminate interaction effects between angle of attack and sideslip vanes  
[AD-736456] p0371 N72-22328

Effects of engine pressure ratio, engine size, and engine location on aerodynamic characteristics of STOL wing propulsion system  
[NASA-TM-X-2541] p0378 N72-22795

Wind tunnel tests to determine aerodynamic characteristics of nonarticulated folding tilt rotor mounted on semispan wing - Vol. 4  
[AD-735632] p0380 N72-22999

Wind tunnel tests to determine aerodynamic characteristics of tilt rotor aircraft with simulation of free flight conditions - Vol. 6  
[AD-735633] p0380 N72-23000

Aerodynamic analysis of airfoils and wings at transonic flight conditions  
[AD-737293] p0380 N72-23002

Improvements in dynamic and aerodynamic performance of helicopter rotor blades  
p0380 N72-23005

Principles of helicopter flight with emphasis on main rotor performance and aerodynamic forces imposed on helicopter during maneuvers  
[NASA-TT-F-676] p0383 N72-23024

Aerodynamic characteristics of CV-990 aircraft under various conditions of Mach number, altitude, and flap setting  
[NASA-TN-D-6777] p0383 N72-23027

Geometric and aerodynamic characteristics of Yak-40 aircraft  
[AD-736902] p0384 N72-23031

Aerodynamic characteristics of leading edge slats plus main airfoil combinations  
[AD-737126] p0385 N72-23042

Performance tests of turbojet engine with axisymmetric mixed-compression supersonic inlet and single spool rotor  
[NASA-TM-X-2558] p0390 N72-23837

Wind tunnel tests to determine effects of variations in body shape on aerodynamic characteristics of all-body hypersonic aircraft configuration  
[NASA-TN-D-6821] p0419 N72-23996

Wind tunnel tests to determine aerodynamic characteristics of powered tilt-rotor aircraft under conditions of hover, transition, and cruise - Vol. 5  
[AD-736824] p0419 N72-24001

Wind tunnel tests to determine aerodynamic effects created by rotor spinup, stopping, and folding on semispan tilt-rotor model - Vol. 7  
[AD-736825] p0419 N72-24002

Development of computer program to determine aerodynamic characteristics of airfoils under conditions of zero trailing edge angle  
[AD-738318] p0419 N72-24003

Aerodynamic characteristics and operational capability of T0-144 aircraft  
[NASA-TT-F-14241] p0420 N72-24009

Wind tunnel tests to determine aerodynamic characteristics of V/STOL transport aircraft with tip-turbine driven lift fans  
[NASA-TM-X-62151] p0420 N72-24010

Large-scale wind tunnel investigation of noise characteristics of semispan wing equipped with externally blown jet flaps  
[NASA-TM-X-62154] p0420 N72-24011

Flight evaluation of takeoff and landing characteristics of short takeoff aircraft to determine limiting factors on short takeoff operation  
[RAE-LIB-TRANS-1604] p0422 N72-24026

Aerodynamic characteristics of elliptical airfoil with circulation control by tangential trailing edge blowing  
p0430 N72-24989

Analysis of techniques and computer programs for extracting stability derivative information from flight test records  
[NASA-CR-2016] p0430 N72-24991

Development and application of computer program for predicting unsteady loads caused by trailing edge control surface motions at subsonic speed  
[NASA-CR-2003] p0430 N72-24992

Application of state transition matrix for numerical analysis of stability and gust response of lifting rotor with rigid flapping blades and rigid hub  
p0431 N72-25001

Analysis of transition fixing and Reynolds number variation on aerodynamic forces produced by thin delta wings  
[NASA-CR-112016] p0463 N72-25996

Effect of wind tunnel disturbances on boundary layer transition process at hypersonic speed and development of low noise level wind tunnel  
[NASA-TM-X-2566] p0469 N72-26239

Aerodynamic performance test data for high-bypass-ratio, single stage turbofan designed in experimental 'quiet engine' program  
[NASA-CR-120858] p0474 N72-26695

Compilation of technical reports on theoretical aerodynamics and air flow - Vol. 1  
[SBN-11-470151-2] N72-26993

Compilation of technical reports on theoretical aerodynamics, aircraft performance, sonic booms, aircraft stability, and turbulent boundary layers - Vol. 2  
[SBN-11-470152-0] p0475 N72-26994

Performance tests to determine problems associated with hovering, vertical takeoff, and landing of VTOL aircraft with emphasis on attitude control  
[NAL-TR-276] p0479 N72-27027

Measurement of aerodynamic damping moment in pitch for hovering model helicopter rotary wing  
[NAL-TR-256] p0479 N72-27028

Determination of upwash angles for short takeoff aircraft lifting system using two dimensional potential flow analysis  
[NASA-TM-X-2593] p0487 N72-27817

Wind tunnel tests to determine aerodynamic characteristics of rectangular shaped containers carried as external stores on helicopters  
[NASA-TM-X-62169] p0513 N72-27995

Wind tunnel tests to determine low speed aerodynamic characteristics of large scale model of advanced fixed wing fighter aircraft with thin, cranked leading edge wing  
[NASA-TN-D-6919] p0513 N72-27998

Wind tunnel determination of aerodynamic characteristics for large scale 35 deg swept wing jet transport model with external blowing triple-slotted flap  
[NASA-TM-X-2600] p0514 N72-28009

Development of trajectory-parametric analogy between aircraft maneuvering in planetary atmospheres and spacecraft during atmospheric entry  
[NASA-TT-F-14344] p0515 N72-28011

Wind tunnel tests to determine aerodynamic characteristics of VTOL fighter aircraft model with external swiveling lift engines  
[NASA-TM-X-62167] p0515 N72-28012

Aerodynamic characteristics of progressing and regressing forced rotary wing flapping modes  
[NASA-CR-114481] p0516 N72-28019

Thrust performance characteristics of augmentor nozzle with rectangular ejector for vertical takeoff planes  
[AD-739863] p0524 N72-28798

Effect of subsonic speed on drag characteristics of high speed wingless and winged helicopters with two different rotor head fairings  
[AD-740771] p0529 N72-29010

Aerodynamic characteristics of two dimensional airfoils with variable camber and performance of Whitcomb supercritical airfoil  
[AD-740369] p0529 N72-29012

Development of handbook of basic principles of aircraft design based on technical specifications and calculation of aerodynamic characteristics  
[AD-741485] p0529 N72-29016

Application of computer program to determine stability and control derivatives for UH-1C helicopter model  
[AD-740774] p0530 N72-29019

Computer simulation of helicopter flight conditions to determine dynamic effects of

- external load combinations on helicopter performance  
[AD-740772] p0530 N72-29020
- Aerodynamic performance test of Fan B for Experimental Quiet Engine Program  
[NASA-CR-72993] p0538 N72-29808
- Optimized design of conically cambered triangular wings with subsonic leading edges and supersonic trailing edges for drag reduction without leading edge suction  
[ARC-TR-2] p0571 N72-29992
- Computation of aerodynamic characteristics for airfoils of varying plan configuration moving near ground effect surface  
[JPRS-56629] p0571 N72-29996
- Analysis of flow distribution near wing body configuration and determination of interference effects on another aircraft by incident shock  
[AD-741917] p0571 N72-29998
- Takeoff and landing performance of swept wing aircraft with augmented jet flap, designed for short takeoff operation and reduced aerodynamic noise  
[NASA-TN-X-62176] p0571 N72-30001
- Flight tests to determine effects of moderate deflections of wing leading and trailing edges of F-104 aircraft buffet characteristics at subsonic and transonic speeds  
[NASA-TN-D-6943] p0572 N72-30004
- Wind tunnel stability tests of XV-6A vectored thrust vertical takeoff aircraft model in and out of ground effect at low speed  
[NASA-TN-D-6826] p0572 N72-30008
- Wind tunnel tests to determine aerodynamic characteristics of folding helicopter rotor in various configurations  
[NASA-CR-114864] p0573 N72-30013
- Development of para-foil high glide steerable parachute controlled by ground and airborne electronics homing systems for delivery of military equipment  
[AD-742294] p0574 N72-30019
- Wind tunnel tests to determine aerodynamic effects of leading edge serrations on two dimensional airfoil  
[NASA-TN-X-2643] p0581 N72-30992
- Analysis of three dimensional, unsteady aerodynamic forces with elastic deformations and surface deflections for aerodynamic structures in subsonic flow  
[AD-742996] p0583 N72-31009
- Effects of blade section camber and blade planform taper on helicopter rotary wing hovering performance  
[AD-743232] p0586 N72-31033
- Numerical analysis of turbine efficiency for two stage turbine and comparison with estimations of first stage efficiency  
[NASA-TN-D-6960] p0590 N72-31783
- Development of procedures for calculating pressure distribution on airfoil in sonic stream  
[ESDU-69013] p0617 N72-31989
- Numerical representations of lift-curve slope and aerodynamic center position of wings in inviscid, subsonic flow  
[ESDU-70011] p0617 N72-31991
- Aerodynamic problems of designing optimum hypersonic vehicles  
[AGARD-LS-42-VOL-1] p0617 N72-31994
- Waverider prediction of hypersonic behavior of wing planforms  
p0617 N72-31997
- Aerodynamic characteristics of lifting surfaces  
[JPRS-57100] p0618 N72-32005
- Calculating aerodynamic characteristics of lifting systems composed of rectangular wings arranged one behind other  
p0618 N72-32007
- Analysis of spanwise distribution leading edge tangential suction forces on thin sixty degree delta wing obtained in low speed wind tunnel  
[KTH-AERO-TN-58] p0618 N72-32011
- Wind tunnel tests to determine path of vortex moving from each rotor blade tip of helicopter rotor to establish effect on aerodynamic forces and pressure distribution  
[NASA-TT-P-14462] p0618 N72-32012
- Analysis of gust loads on transport aircraft under various flight conditions  
[ESDU-69023-ANEND-B] p0619 N72-32015
- Aerodynamic characteristics of CL-84 tilt wing, V/STOL aircraft and comparison with handling qualities criteria documents  
p0620 N72-32023
- Analysis of aerodynamic characteristics of VJ-101C and DO 31E V/STOL aircraft and comparison with criteria contained in handling requirements documents  
p0620 N72-32024
- Application of simulation and analysis techniques for establishing flying qualities criteria for piloted aircraft  
p0620 N72-32026
- Development and application of pilot rating to determining performance and handling criteria of aircraft  
p0620 N72-32028
- Properties of atmospheric turbulence at low altitudes and effect on aircraft during landing approach and takeoff  
p0621 N72-32030
- Aerodynamic characteristics and performance of Russian M-4 supersonic long range aircraft  
[AD-744159] p0623 N72-32051
- Development of controller design procedure for aircraft throughout entire flight envelope based on quadratic optimal control technology  
[AD-744491] p0626 N72-32068
- Numerical analysis of flow distribution about nonaxisymmetric bodies at subsonic and supersonic speeds  
[NASA-TT-P-14547] p0628 N72-32302
- Computer programs for analyzing axial compressor aerodynamic test data  
[AD-744503] p0631 N72-32756
- Tests to determine acoustic and aerodynamic performance of two choked flow inlets under static conditions  
[NASA-TN-X-2629] p0632 N72-32765
- Numerical analysis of profile drag coefficient increment due to full span, single-slotted flaps  
[ESDU-02.01.06] p0635 N72-32987
- Wind tunnel tests to determine effects of leading edge camber on low speed aerodynamic characteristics of thin, sharp-edge delta wing  
[NASA-CR-2002] p0636 N72-32996
- Effect of wing span loading on development of fully rolled up wing trailing vortices  
[AD-744860] p0636 N72-32998
- Analysis of engine and airframe characteristics used in determining performance of turbine powered aircraft  
[ESDU-70020] p0636 N72-33003
- Derivation of equations for determining climb performance of aircraft based on energy considerations  
[ESDU-70023] p0637 N72-33007
- Design, development, and aerodynamic characteristics of compound helicopter designed for rotor systems research applications  
[NASA-CR-112156] p0639 N72-33020
- Comparison of two helicopter design concepts developed to conduct rotary wing research project  
[NASA-CR-112157] p0639 N72-33021
- Simulator analysis of aerodynamic characteristics of short takeoff and landing transport aircraft during approach and landing  
[NASA-TN-D-6898] p0640 N72-33030
- Bibliography of vertical takeoff aircraft to include aircraft design, aerodynamic configurations, aerodynamic characteristics, and flight tests  
[AD-744000] p0640 N72-33033
- Aerodynamic characteristics and operational experiences with various types of helicopter rotors  
[AD-745124] p0641 N72-33041
- Design, development, and specifications of ringsail parachute with emphasis on inflation characteristics of cluster canopies  
[AD-745335] p0642 N72-33051
- Wind tunnel tests to determine performance of fan in wing model at various angles of attack and airspeeds  
p0649 N72-33966

AERODYNAMIC CHORDS  
U AIRFOIL PROFILES

## AERODYNAMIC COEFFICIENTS

Sound radiation from axial flow fans running in turbulent flow, evaluating fluctuating lift on rotor blades due to incident gusts  
p0003 A72-10220

Aircraft stability coefficient determination by numerical integration fitting to differential equations of motion  
p0013 A72-11136

Area rule for change in lift/drag ratio of hypersonic delta wing due to conical body addition on compression side  
p0018 A72-12270

Jet aircraft brake parachute loads under engine wake, evaluating velocity and drag coefficient influences  
p0021 A72-12504

Wing-fuselage combination aerodynamic coefficients, comparing experimental data with subsonic linear and nonlinear theoretical results [DGLR PAPER 71-115]  
p0023 A72-12723

Two dimensional airfoil pressure distribution measurements at high subsonic speeds, comparing normal force coefficients corrected for wind tunnel interference effects with theoretical calculations [DFVLR-SONDDR-168]  
p0058 A72-13609

Wind tunnel investigation of Reynolds number effects on boundary layer separation incidence and maximum lift coefficient of high-lift device equipped aircraft model  
p0242 A72-24657

Lift and pressure fluctuations of cambered airfoil under periodic longitudinal and transverse gusts, applying to axial flow turbomachines [ASME PAPER 72-GT-30]  
p0295 A72-25626

Hypersonic gun tunnel balance and pressure measurements on sharp leading edge delta wings, comparing experimental coefficients and shock angles with predicted values  
p0299 A72-25735

Rotating airfoil experimental test program for verification of Rummelskamp and Dwyer-McCroskey theoretical analysis, presenting graphs of lift coefficient vs. angle of attack  
p0313 A72-28124

Supersonic aerodynamic influence coefficients matrices calculation for wings of arbitrary planform, constructing computer program  
p0314 A72-28142

Vortex-lattice method for subsonic aircraft aerodynamic coefficients calculation, verifying results with airbus lifting surface wind tunnel test data  
p0394 A72-31401

Angle of attack increase of an airfoil in decelerating flow.  
p0459 A72-36773

Prediction of the stalling of a wing section in incompressible flow [ONERA, TP NO. 1088]  
p0492 A72-37760

V/STOL aircraft configurations with lifting counter-rotating disks, presenting aerodynamic coefficients from rotating water tank experiments  
p0551 A72-41070

Lift on airfoils with separated boundary layers.  
p0557 A72-41264

Computation of the potential-theoretical flow around wing-fuselage combinations and a comparison with measurements  
p0602 A72-44298

Conference papers on jet and slipstream influence on aerodynamic coefficients using aircraft models [DLR-MITT-70-28]  
p0027 A72-10004

Vertical takeoff aircraft wind tunnel model with high pressure ejectors to determine jet interference on aerodynamic coefficients  
p0028 A72-10007

Influence of jet interference on aerodynamic coefficients of rectangular and swept wings mounted above the engine  
p0028 A72-10010

Wind tunnel measurements of Reynolds number effect on force and pressure coefficients for slender delta wing at transonic speed  
p0074 A72-11863

Maximum lift coefficient airfoils developed through optimization of pressure distribution [NASA-TM-X-67591]  
p0164 A72-14992

Determination of interference lift, aerodynamic coefficients, and pitching moment for cruciform wings by iterative solution [BMVG-PBWT-71-18]  
p0166 A72-15009

Effects of aerodynamic coefficients, launch velocity, and burning rate on trajectory of self-suspended parachute flare [AD-731683]  
p0217 A72-16955

Development of technique for curve fitting experimental aerodynamic normal-force and pitching-moment coefficient data as function of angle of attack [AD-732834]  
p0218 A72-17001

Low speed wind tunnel test on low-drag airfoil at half a million Reynolds number, noting aerodynamic coefficients  
p0270 A72-19033

Aerodynamic coefficients of body-wing configuration in subsonic flow  
p0318 A72-20001

Lifting airfoils with supercritical shock-free flow [HLR-MP-70015-U]  
p0327 A72-20972

Comparison of flight test and wind tunnel data to determine areas of agreement when nonlinearities appear in aerodynamic coefficients of slender wing aircraft  
p0330 A72-20990

Development of numerical process for extracting aerodynamic coefficients from flight test data  
p0330 A72-20991

Nonplanar method for predicting incompressible aerodynamic coefficients of rectangular wings with circular-arc camber [NASA-TM-X-67791]  
p0379 A72-22995

Aerodynamic characteristics of elliptical airfoil with circulation control by tangential trailing edge blowing  
p0430 A72-24989

Review of work on external flow jet flaps noting lift coefficient [ARC-CP-1194]  
p0431 A72-24998

Strain gage balances for measuring aerodynamic coefficients in wind tunnel model test - conference [DLR-MITT-72-06]  
p0469 A72-26341

Numerical representations of lift-curve slope and aerodynamic center position of wings in inviscid, subsonic flow [ESDU-70011]  
p0617 A72-31991

Effect of proximity of earth surface to aerodynamic coefficients  
p0618 A72-32006

Calculating aerodynamic characteristics of lifting systems composed of rectangular wings arranged one behind other  
p0618 A72-32007

Nonlinear theory of lifting surfaces applied to problem of forces acting on rectangular wing in stream of incompressible fluid  
p0618 A72-32008

Numerical analysis of profile drag coefficient increment due to full span, single-slotted flaps [ESDU-02.01.06]  
p0635 A72-32987

Analysis of low speed normal force and pitching moment of slender wings operating in ground effect [ESDU-71007]  
p0635 A72-32988

Numerical analysis of low speed longitudinal aerodynamic characteristics of slender wings [ESDU-71006]  
p0635 A72-32989

Numerical analysis of lift coefficient increment due to full-span split flap chord for various thickness/chord ratios of wings [ESDU-01.01.04]  
p0635 A72-32990

**AERODYNAMIC CONFIGURATIONS**

Equilibrium configuration of cable towed in circular path, presenting multivalued boundary value problem mathematical analysis [AD-737445]  
p0012 A72-11132

Wing-fuselage combination aerodynamic coefficients, comparing experimental data with subsonic linear and nonlinear theoretical results [DGLR PAPER 71-115]

Steady and oscillatory subsonic aerodynamic loads prediction based on Doublet-Lattice method and method of images, determining chord and spanwise loading on lifting surfaces  
[AIAA PAPER 72-26] p0020 A72-12440

Airloads and structural integrity flight testing /U.S. Air Force/, noting dynamic response, fatigue tests and temperature data acquisition  
p0131 A72-16917

Downwash behind lifting surface related to loading in ideal incompressible gas by equations of motion linearization  
p0145 A72-18490

Wing load distribution and induced drag control by warping, summarizing linear theory and wind tunnel test results  
p0182 A72-19110

Hypersonic nonlinear aerodynamic loading effect on panel flutter, examining stability for various initial conditions  
[AIAA PAPER 72-345] p0240 A72-24218

Unsteady aerodynamic loadings of flexible aircraft with nonplanar wings and wing-tail surfaces in supersonic flow  
[AIAA PAPER 72-378] p0286 A72-25374

Axial flow turbines aerodynamic loading increase via control of velocity distribution and boundary layer evolution around airfoil profiles  
[ASME PAPER 72-GT-78] p0287 A72-25402

Nonlinear integral equations solution for heavily loaded actuator disk induced flow field, taking into account blade tip vortices and thrust coefficient effects  
p0297 A72-25658

Low altitude gust load spectra above Czechoslovak territory interpreted in terms of equivalent velocity cumulative frequencies for light aircraft  
p0303 A72-26577

Aeroelasticity, discussing gust and maneuver load alleviation, flutter suppression, aircraft stability, computerized aeroelastic analysis, aeroelastic optimization, composite structures, etc  
p0358 A72-30282

Near flow field and aerodynamic loading in subsonic and supersonic flow over body-wing configuration, surveying numerical, kernel function and image methods  
p0393 A72-31202

Evaluation of Reissner's correction for finite span aerodynamic effects.  
p0457 A72-36390

Application of advanced methods to the determination of design loads of the Lockheed L-1011 TriStar.  
[AIAA PAPER 72-775] p0459 A72-36774

The application of non-planar lifting surface theory to the calculation of external-store loads.  
[AIAA PAPER 72-971] p0499 A72-38134

Agricultural aircraft flight loads - Typical spectra and some observations on airworthiness.  
p0561 A72-42340

An assessment of repeated loads on general aviation and transport aircraft.  
p0608 A72-44734

Maneuver acceleration measured for estimating loads during civil aircraft training and test flying  
[ARC-CP-1176] p0609 A72-44736

Test equipment and calibrating tests for lifting rotor load and vibration measurements  
[NASA-CR-114388] p0042 A72-11043

Free flight tests to determine deployment characteristics and aerodynamic loads for all-flexible parawings with 4000 square foot wing area  
[NASA-TN-X-2326] p0079 A72-11891

Simulation of flight maneuver-load distributions utilizing stationary, nonGaussian random load histories  
[NASA-TN-D-6570] p0087 A72-11956

Computer programs for wake geometry, and blade loads and responses  
[NASA-CR-1912] p0149 A72-13977

Flight tests of ribbon parachutes with 2000 lb store at low altitude  
[SC-DC-71-4022] p0151 A72-13994

Two-degree-of-freedom flutter model for analyzing aerodynamic structural vibrations  
p0216 A72-16877

Velocity diagram for highly loaded multistage fan drive turbine with plain blade configuration  
[NASA-CR-1964] p0224 A72-17845

Computer program for calculation of airborne store loads, shears, and moments  
[AD-733673] p0249 A72-17995

Wind tunnel tests of models of helicopter rotary wings to determine blade element airloads in unstalled and stalled flight regimes  
[NASA-CR-114424] p0251 A72-18005

Woodward panel method used to calculate loads on slender bodies with small aspect ratio wings for supersonic flow  
[PPA-AU-635-PT-1] p0317 A72-19995

Application of statistical methods for establishing positive maneuver loads design criteria for fighter aircraft  
[AD-735472] p0332 A72-21015

Effects of gusts, maneuvers, and landing impacts on four-engine cargo aircraft during commercial airlines operation  
[NASA-TN-D-6790] p0421 A72-24015

Aerodynamic characteristics and performance of OH-6 helicopter with emphasis on flight loads imposed during combat operations  
[AD-738202] p0422 A72-24032

Development and application of computer program for predicting unsteady loads caused by trailing edge control surface motions at subsonic speed  
[NASA-CR-2003] p0430 A72-24992

Numerical procedure for predicting interference of external stores on F-4 aircraft at subsonic speed - Part 1  
[NASA-CR-112065-1] p0466 A72-26021

Numerical procedure for predicting interference of external stores on F-4 aircraft at supersonic speed - Part 2  
[NASA-CR-112065-2] p0466 A72-26022

Computer programming manual for theoretical prediction of interference loads caused by external stores on F-4 aircraft - Part 3  
[NASA-CR-112065-3] p0466 A72-26023

Analysis of flight loads on CH-53A helicopter to determine exceeding of design limits during actual operating situations  
[AD-739332] p0467 A72-26030

Analysis of flight loads imposed on H-2 helicopter during fleet operations  
[AD-738452] p0480 A72-27038

Computer program for calculating unsteady loadings caused by motions of lifting surfaces with trailing edge controls in subsonic compressible flow  
[NASA-CR-112015] p0533 A72-29229

Evaluation of accelerometer and strain gage data obtained by counting methods of load-time histories for jet fighter aircraft  
p0541 A72-29912

Analysis of normal acceleration data obtained during operation of military aircraft using counting accelerometers  
[AD-743067] p0587 A72-31036

Flight load parameters of F-4J aircraft for 49.5 flight hours  
[AD-743476] p0623 A72-32050

Analysis of low speed normal force and pitching moment of slender wings operating in ground effect  
[ESDU-71007] p0635 A72-32988

Mathematical model and computer program for determining helicopter main rotor wake geometry effects on rotor blade air loads and response in steady maneuvers - Vol. 1  
[NASA-CR-2110] p0636 A72-32995

Fatigue tests on aluminum alloys specimens using simulated aircraft gust and maneuver conditions  
[ESDU-69024] p0648 A72-33899

**AERODYNAMIC MOMENTS**  
**U STABILITY DERIVATIVES**  
**AERODYNAMIC NOISE**  
Acoustic, turbulent and thermal fluctuating motions interdependence in gas flow, considering application to aerodynamic noise theory  
p0055 A72-13405

Noise generation from turbulent supersonic shear layers, including low supersonic and transonic ranges for jet noise applications

## SUBJECT INDEX

## AERODYNAMIC NOISE CONTD

- Multiple pure tone noise generation from turbofan blade to blade nonuniformities in rotor geometry, using two dimensional inviscid flow model p0072 A72-15566
- Leaning vanes for fan noise reduction, discussing rotor-stator plane fluctuating pressure amplitude decrease and radial distribution modification p0072 A72-15568
- [AIAA PAPER 72-126] p0128 A72-16823
- Cross flow effect on lifting fan noise at subsonic blade tip speeds, analyzing radiation pattern change due to inlet flow distortion p0131 A72-16921
- [AIAA PAPER 72-128] p0131 A72-16921
- Aerodynamic noise measurement, discussing physical units, spectral analysis, conversion and correction formulas p0136 A72-17195
- Hovercraft noise and vibration source and reduction for improved crew and passenger comfort p0184 A72-19648
- Pressure sensor measurements of fluctuating aerodynamic forces on rotor blades related to compressor noise generation p0192 A72-21486
- [ASA PAPER H 6] p0192 A72-21486
- Coherent and incoherent structures of aerodynamic noise, analyzing compressor near field and hot jet IR emission source p0231 A72-22816
- [ONERA, TP NO. 983] p0231 A72-22816
- Aerodynamic noise produced by gas jet flow around airfoil, discussing sound reduction p0240 A72-24107
- Aerodynamic noise generation mechanism of ideally expanded supersonic jet based on large scale flow instabilities, deriving mathematical model p0241 A72-24331
- IR measurement of hot jets turbulence intensity axial and transverse profiles, noting application to sound sources detection p0242 A72-24656
- Low pressure ratio Q-FAN propulsor noise reduction tests on wind tunnel model, discussing source components and design configurations p0295 A72-25634
- [ASME PAPER 72-GT-40] p0295 A72-25634
- Aircraft noise sources, showing noise intensity relationship to airfoil velocity and pressure ratio p0354 A72-29568
- Subsonic and supersonic heavily loaded axial flow rotors noise, discussing helicopter blade slap effect and compressor rotor-stator interaction p0355 A72-29570
- Mathematical model for gas turbine engine inlet noise caused by shock wave impingement, noting dynamic wave system with overpressure and distortion p0355 A72-29576
- Aerodynamic noise and structural fatigue failure research and test facility, concerning supersonic jet and V/STOL aircraft p0405 A72-32900
- Airfoil vortex shedding noise in low-turbulence flow at helicopter blade Reynolds numbers, obtaining correlation coefficients for far field noise and surface pressure fluctuations p0415 A72-34078
- [AIAA PAPER 72-656] p0415 A72-34078
- Acoustic attenuation and thrust loss incurred by shrouded multistage supersonic jet noise suppressor p0416 A72-34090
- [AIAA PAPER 72-642] p0416 A72-34090
- American Helicopter Society Noise Subcommittee report on physical characteristics and major controlling parameters of rotor induced aerodynamic noise p0443 A72-34476
- [AHS PREPRINT 625] p0443 A72-34476

- Characteristics of free turbulence as source of aerodynamic noise and application to analysis of noise created by jet engines p0383 N72-23021
- Spectral methods for analyzing jet noise and numerical analysis of sound pressure components and sound generation by wave-type jet turbulence p0383 N72-23022
- Comparison of aerodynamic noise measurements made on two jet flap systems to be used on STOL aircraft p0383 N72-23025
- [NASA-TN-D-67811] p0383 N72-23025
- Analysis of effect of aerodynamically-induced fluctuation forces on sound produced by axial flow compressor rotor and stator combinations

## AERODYNAMIC STABILITY

## SUBJECT INDEX

[NASA-CR-2012] p0419 N72-23991  
Acoustic properties of STOL aircraft with engine over wing configuration and effects of nozzle location, wing shielding, flap leakage, and internally generated exhaust noise  
[NASA-TN-X-68032] p0420 N72-24008  
Recommendations for advanced technology program to develop long range transport aircraft to meet noise reduction standards - Vol. 2  
[NASA-CR-112093] p0464 N72-26007  
Wind tunnel investigation of acoustic characteristics of STOL aircraft  
[NASA-TN-X-62164] p0464 N72-26008  
Aerodynamic noise sources at subsonic speeds  
[ARC-CP-1195] p0473 N72-26556  
Analysis of noise generated by target type thrust reversers used on augmentor-wing short takeoff aircraft  
[NASA-TN-X-68082] p0477 N72-27012  
Analysis of peak axial-velocity decay in moving airstream for several nozzles and effect on noise generated by short takeoff aircraft with externally blown flaps  
[NASA-TN-X-68102] p0479 N72-27029  
Acoustic measurement tests to determine reduction of aerodynamic noise by engine-over-wing concept for conventional and STOL aircraft  
[NASA-TN-X-68104] p0479 N72-27030  
Acoustic measurements to determine effectiveness of insulation in reducing noise intensity with helicopter compartments  
[DCIEM-839] p0515 N72-28014  
Static and flight acoustic and aerodynamic tests to determine flight velocity effect on jet noise of conical ejector, annular plug, and segmented suppressor nozzles  
[NASA-CR-120961] p0571 N72-30000  
Helicopter rotary wing noise in hover and forward flight produced by Karman street type vortex shedding  
[AD-741778] p0574 N72-30020  
Effects of aircraft flight altitude and Mach number, wind and temperature gradients, and wind direction on width of sonic boom corridor  
[AD-740897] p0575 N72-30027  
Lighthill-based model of sound emission from axisymmetric turbulence convected by mean flow, and implications for jet noise  
[NASA-TN-D-6939] p0579 N72-30607  
Analysis of effect of noise created by V/STOL aircraft operation on annoyance to communities near operational sites  
[UTIAS-TN-177] p0584 N72-31015  
Numerical analysis of total sound pressure field emitted by stationary rotating jet and sound field from same jet in motion observed at fixed point on ground  
[NASA-TT-P-14489] p0623 N72-32047  
Procedures for estimating near field sound pressure levels caused by jet engine noise  
[ESDU-72002] p0637 N72-33009  
Analysis of sound produced by turbulent boundary layers, flow past single discontinuities, and rigid flow discontinuities immersed in rigid ducts  
[NASA-CR-2126] p0640 N72-33029

**AERODYNAMIC STABILITY**  
Axial cords effects on parachute drag and stability characteristics and opening time, discussing wind tunnel and balloon drop tests results  
p0007 A72-10306  
Paratroop type parachutes breathing oscillations and stability characteristics, using high speed cinematography and kinetheodolites to track during steady state descent  
p0007 A72-10307  
Flutter problem wing-air flow energy exchange at instability limit, obtaining vibration mode shapes from homogeneous boundary value problem analog model  
p0054 A72-13191  
Ground effect wing vehicles stability in forward motion, deriving characteristic equations by linear analysis  
p0244 A72-24844  
Exploration of aeroelastic stability boundaries with a soft-in-plane hingeless-rotor model.  
[AHS PREPRINT 610] p0445 A72-34493

Parametric studies of instabilities associated with large, flexible rotor propellers.  
[AHS PREPRINT 615] p0446 A72-34496  
Helicopter stability derivative extraction and data processing using Kalman filtering techniques.  
[AHS PREPRINT 641] p0447 A72-34501  
Development of an inflatable fabric structure for the early stabilization of the B-1 crew escape capsule.  
[AIAA PAPER 72-801] p0510 A72-40053  
Effects of semi-rigid rotors on helicopter autostabilizer design  
p0083 N72-11928  
Aerodynamics and flight stability of oblique wing-body combinations and application to supersonic transport aircraft  
p0105 N72-13018  
Experimental determination of stability and stall flutter of scale model of tilt-propeller free-wing V/STOL aircraft  
[NASA-TN-D-6831] p0463 N72-25998  
Multiple component strain gage balance for measuring aerodynamic loads and forces in wind tunnel model stability tests  
p0470 N72-26343  
Development of control volume concept in aeronautical engineering based on laws of continuity, momentum, and energy  
[AD-741132] p0527 N72-29001  
Stability and gust response characteristics of short takeoff aircraft  
[ARC-R/M-3686] p0582 N72-30996  
Dynamic aeroelastic effects on stability control and gust response of slender delta aircraft  
[ARC-R/M-3690] p0582 N72-30998  
Aero-normalized yawing moment derivatives  
[ESDU-71017] p0617 N72-31988  
Analysis of aircraft structural flexibility and flight controls interface with application to aircraft design criteria  
p0621 N72-32031

**AERODYNAMIC STALLING**  
Aircraft spin characteristics due to superstall, comparing three stall types with respect to recovery, yaw damping and rate of rotation  
[DGLR PAPER 71-057] p0023 A72-12718  
Stalled blade rows dynamic performance in terms of blade channel fluid inertia and surface boundary layer-caused time delay  
p0121 A72-16487  
Flight initial spin testing, discussing aircraft autorotation due to stalled angle of attack and sideslip  
p0146 A72-18492  
Inlet duct and turbofan engine compatibility without stalling and surge conditions obtained by design optimization and wind tunnel testing  
p0176 A72-18761  
Incipient wing stall detection by unsteady pressure monitoring via flush-mounted microphones, discussing flow patterns on models  
p0182 A72-19093  
Dassault Falcon 10 turbofan powered executive aircraft, attributing safe stall characteristics to wing design optimization  
p0191 A72-21274  
Unsteady airfoil stall and stall flutter analysis, discussing application to space shuttle configuration  
[AIAA PAPER 72-380] p0287 A72-25404  
Stall warning system for general aviation aircraft, using signal discriminator for rough or gusting air  
[SAE PAPER 720331] p0291 A72-25592  
Finite difference method application to axial flow compressors rotating stall nonlinear analysis, taking into account blade row characteristics  
[ASME PAPER 72-GT-3] p0292 A72-25606  
Leading edge boundary layer flow separation and reattachment processes in airfoil dynamic stall, considering effect of angle of attack rate of change  
p0396 A72-32024  
Aerodynamic stall characteristic prediction from static experimental data for airfoils, noting boundary layer effects  
[AIAA PAPER 72-682] p0414 A72-34060  
Influence of airfoils on stall flutter boundaries of articulated helicopter rotors.

# SUBJECT INDEX

# AEROELASTICITY

- [AHS PREPRINT 621] p0445 A72-34489  
Determination of airfoil and rotor blade dynamic stall response.
- [AHS PREPRINT 613] p0446 A72-34495  
Wind tunnel experiments on aerodynamic superstall, describing stability tests and models
- p0451 A72-35374  
P-111 stall inhibitor system with angle of attack limitation, describing interface with stability augmentation system
- p0454 A72-35577  
Prediction of the stalling of a wing section in incompressible flow
- [ONERA, TP NO. 1088] p0492 A72-37760  
Status of U.S. Navy stall/post-stall/spin flight testing.
- [AIAA PAPER 72-787] p0495 A72-38104  
Heat transfer effects on reentry vehicle surfaces boundary layer stability and aerodynamic characteristics, noting stall angle reduction and drag increase from wind tunnel tests
- [AIAA PAPER 72-960] p0562 A72-42357  
Analytical method for combining the interaction of inlet distortion and turbulence.
- p0594 A72-43330  
Application of a time-dependent boundary-layer analysis to the problem of dynamic stall.
- p0599 A72-44058  
Flow model for shock induced leading edge transonic flow turbulence and rear separation in low speed stall of airfoil
- p0073 N72-11858  
Transonic wind tunnel tests on three dimensional flow distribution during stall development on rotary wing profiles
- [ARC-CP-1146] p0080 N72-11904  
Effect of grooved casing treatment on flow range capability of single-stage axial flow compressor
- [NASA-TM-X-2459] p0163 N72-14985  
Analysis of boundary layer flow processes during airfoil dynamic stall and design of airfoil to delay onset of dynamic stall
- [AD-734699] p0267 N72-19012  
Flight test procedures for determining stall and spin characteristics of high performance aircraft
- p0328 N72-20979  
Near wake effects on airfoil loading in dynamic stall and wake structure resulting from oscillatory motion of stalled airfoil
- p0379 N72-22991  
Numerical procedure for predicting airfoil stall occurrence in incompressible flow conditions
- [ONERA-TP-1088] p0463 N72-26003  
Wind tunnel and flight tests of dynamic stall of airfoils and helicopter blades
- [AD-738610] p0469 N72-26251  
Inlet random pressure fluctuation effects on turbojet engine stall characteristics
- p0478 N72-27022
- AERODYNAMIC VEHICLES**  
**U AIRCRAFT**  
**AERODYNAMICS**  
**NT AEROTHERMODYNAMICS**  
**NT HYPERSONICS**  
**NT ROTOR AERODYNAMICS**  
Data acquisition and reduction for model aerodynamics in superconducting magnetic suspension and balance of supersonic wind tunnel facility
- p0243 A72-24766  
German book on flow technology and fluid flow machines covering hydrodynamics, gas dynamics, aerodynamics, airfoils, wind tunnels, propellers, helicopters, turbomachines, blade cascades, etc
- p0247 A72-25122  
Turbine aerodynamics research trends, covering engine cooling, high work factor turbines, pneumatic variable geometry and computer analysis
- p0301 A72-26036  
Mechanics fundamentals in aerodynamical aircraft analysis, noting force concept and Newton theory
- p0361 A72-30817  
Russian book on flight dynamics covering horizontal flight, takeoff, climb and landing characteristics, meteorological conditions, helicopters, trajectory problems, stability and controllability analysis, etc
- p0413 A72-33874
- Aerodynamic analysis of various flight conditions of conventional aircraft. III - Mechanical fundamentals /Dynamics of a point mass/
- p0451 A72-35440  
Russian book - Experimental studies of helicopter aerodynamics.
- p0507 A72-39598  
Aerodynamic test facility data on swept wings, peaky airfoils, aircraft flutter and transonic flow, discussing shock tubes and wind tunnels development
- p0509 A72-39846  
Research planning in steady compressible flow aerodynamics, discussing projects on annular wings, shockless transonic airfoils and Smith panel method for three dimensional flow problems
- [ICAS PAPER 72-01] p0552 A72-41126  
Reports and memoranda published by Aeronautical Research Council, Great Britain, on aerodynamics, aircraft etc.
- [ARC-R/M-3650] p0099 N72-12971  
Aerodynamics of helicopter rotor blade tip vortices
- [NASA-CR-112009] p0101 N72-12992  
Design and aerodynamic performance of clamshell target thrust reverser
- p0210 N72-16695  
Aerodynamic research and development trend for transport and military aircraft
- p0369 N72-22029  
Turbine research and technology including aerodynamic effect of turbine coolant, high work-factor turbines, and computer programs for design and performance
- [NASA-TM-X-68115] p0524 N72-28795  
Activities of ONERA for 1971
- p0592 N72-31962  
Lift curve slope and aerodynamic center position of wings in inviscid supersonic and subsonic flow
- [ESDU-70012] p0617 N72-31990  
Aerodynamics and hypersonic inviscid flow
- p0617 N72-31995  
Research activities for various divisions of National Aeronautical Laboratory for 1970 - 1971
- p0634 N72-32958  
Subsonic, transonic, and supersonic aerodynamics, fatigue and structural analysis, and related aircraft studies - bibliography
- p0648 N72-33961
- AEROELASTICITY**  
Aeroelastic models construction for flutter analysis of aircraft design, noting error risk reduction
- [DGLR PAPER 71-082] p0023 A72-12722  
Galerkin method application to nonconservative nonself-adjoint aeroelasticity problems based on interpretation as mathematical formulation of virtual work principle
- p0178 A72-18788  
Dynamically similar wind tunnel models for transonic aeroelastic studies of aircraft failures or structural damage and flutter margins
- [ONERA, TP NO. 1082] p0356 A72-29672  
Aeroelasticity, discussing gust and maneuver load alleviation, flutter suppression, aircraft stability, computerized aeroelastic analysis, aeroelastic optimization, composite structures, etc
- p0393 A72-31202  
The controllable twist rotor performance and blade dynamics.
- [AHS PREPRINT 614] p0444 A72-34483  
Exploration of aeroelastic stability boundaries with a soft-in-plane hingeless-rotor model.
- [AHS PREPRINT 610] p0445 A72-34493  
Parametric studies of instabilities associated with large, flexible rotor propellers.
- [AHS PREPRINT 615] p0446 A72-34496  
Analytical investigation of the effects of blade flexibility, unsteady aerodynamics, and variable inflow on helicopter rotor stall characteristics.
- p0503 A72-38950  
Unsteady aerodynamic and aeroelastic effects in turbomachine blade cascades supersonic flow, discussing trends in fan and compressor technology
- p0551 A72-40969  
A new method of calculating the natural vibrations of a free aeroplane.
- [ICAS PAPER 72-05] p0552 A72-41130

- Steady state equations of motion, equilibrium shape and stability derivatives of elastic airplanes evaluated with finite element methods. p0566 A72-42845
- Flutter analysis and unsteady pressure fields induced by pitching motions of wall mounted sweptback wing, verifying experimentally lifting surface theory in high subsonic range p0569 A72-43094
- Aeroelastic optimization of a panel in high Mach number supersonic flow. p0593 A72-43327
- Influence of wing deformations measured during flight tests upon the flight performance of a glider made of synthetic materials. p0603 A72-44452
- Aerodynamic and aeroelastic characteristics of rigid two-bladed rotor system with full-scale rotor operating at very high advance ratios and during start/stop operation [AD-727653] p0043 N72-11050
- Aeroelasticity, unsteady aerodynamics, vibration analysis, and flutter in fixed wing aircraft [RAE-TM-813] p0079 N72-11892
- Static aeroelastic characteristics of thin cylindrical shells at subsonic speeds without use of boundary layer control or shell axial-force loading [AD-732291] p0202 N72-15954
- Estimating aeroelastic stability and forced response characteristics of thin walled, circular cylindrical shells [AD-733370] p0250 N72-17996
- Bending response of rotary wing blades when subjected to random input velocities for both hinged and unhinged cases of root end fixity [AD-732395] p0253 N72-18028
- Dynamic aeroelastic effects on stability control and gust response of slender delta aircraft [ARC-R/M-3690] p0582 N72-30998

Research projects conducted by National Research Council of Canada from 1 Apr. to 30 Jun. 1972  
[DME/NAE-1972(2)] p0649 N72-33964
- AEROSPACE SYSTEMS**  
Electronics and aerospace systems - IEEE Conference, Washington, D.C., October 1971  
p0018 A72-12376  
Papers on aerospace structure by N. J. Hoff covering aircraft framework, stress analysis, structural stability, shell theories, bending, buckling, monocoque and sandwich structures, etc  
p0070 A72-15238  
A comparison of voice communication techniques for aeronautical and marine applications.  
p0442 A72-34267  
International Aerospace Instrumentation Symposium, 18th, Miami, Fla., May 15-17, 1972, Proceedings.  
p0563 A72-42676  
Cost analysis and economic models for European aerospace development compared to US experience  
[AD-725478] p0037 N72-10992
- AEROSPACE VEHICLES**  
Thermal simulation tests for kinetic heating of aerospace structures and materials, describing facilities for supersonic flight and atmospheric reentry  
p0404 A72-32897  
Integration of aerospace vehicle performance and design optimization.  
[AIAA PAPER 72-948] p0562 A72-42355
- Management planning and operation of test facilities for effective application to development of systems and equipment for aerospace vehicles  
[AD-731548] p0276 N72-19307  
Software and hardware technology for application of computer systems to guidance and control of aerospace vehicles  
[AGARDOGRAPH-158] p0335 N72-21211  
Measurement of wind tunnel background pressure fluctuations for application to design of aerospace vehicles  
[NASA-CR-123810] p0575 N72-30245  
Development of mathematical techniques for determining stresses, deformation, and stability of aerospace vehicle structures  
[AD-744114] p0625 N72-32067
- AEROSTATS**  
**U AIRSHIPS**  
**AEROTHERMODYNAMICS**  
Hypersonic wind tunnel tests to determine surface pressures and flow distribution on orbiter space shuttle  
[NASA-CR-120037-VOL-1] p0201 N72-15942
- AFC (CONTROL)**  
**U AUTOMATIC FREQUENCY CONTROL**  
**AFCS (CONTROL SYSTEM)**  
**U AUTOMATIC FLIGHT CONTROL**
- AFRICA**  
Airfield distribution survey of selected countries in Southeast Asia, South America, Africa, and Eastern Europe to determine effectiveness of STOL and VTOL aircraft  
[AD-742093] p0627 N72-32280
- AFTERBODIES**  
Convergent-divergent nozzles thrust model measurement on supersonic aircraft afterbody  
[ONERA, TP NO. 978] p0116 A72-15856  
Transonic performance of double flux engine nacelle air intake and afterbody at high Reynolds numbers  
p0075 N72-11866  
Afterbody thrust measurement in wind tunnel  
[ONERA-TP-978] p0221 N72-17206  
Wind tunnel study of aerodynamic drag for engine pod and its elements including air intake and afterbody  
[NASA-TT-F-14154] p0265 N72-18997
- AFTERBURNERS**  
**U AFTERBURNING**  
**AFTERBURNING**  
Steady combustion limits in afterburner gas turbine engine chambers  
p0509 A72-39922  
Optimal synthesis of a two-parameter continuous controller for a jet engine with an afterburner  
p0601 A72-44284  
Recirculation mechanism in jet powered V/STOL aircraft  
[BMWG-FBWT-71-12] p0036 N72-10828  
Afterburning steady state performance and operational limits of TP-30 turbofan engine  
[NASA-TN-D-6839] p0477 N72-27014  
Analysis of carbon monoxide, unburned hydrocarbons, and nitrogen oxides in turbojet afterburner combustion products using infrared spectroscopy - Part 1  
[AD-739176] p0488 N72-27968  
Computer program for determining history of combustion products produced by turbojet engine afterburner - Part 2  
[AD-739177] p0488 N72-27969  
Altitude and Mach number effects on exhaust gas emissions of afterburning turbofan engine  
[AD-741249] p0542 N72-29967  
Flight tests to determine performance of air cooled plug nozzle with afterburning turbojet  
[NASA-TN-X-2607] p0590 N72-31785  
Concept for jet noise suppression for afterburning turbojet engine  
[NASA-TN-X-68144] p0632 N72-32763
- AGE HARDENING**  
**U PRECIPITATION HARDENING**  
**AGREEMENTS**  
Book on world airlines economic regulation, analyzing multilateral international agreements, national aviation interests and competitive situation  
p0300 A72-25923

# AGRICULTURAL AIRCRAFT

# SUBJECT INDEX

## AGRICULTURAL AIRCRAFT

### U UTILITY AIRCRAFT

#### AILERONS

##### NT SPOILER SLOT AILERONS

State sensitivity functions in aircraft parameter identification for lateral dynamics under aileron deflection from model response and in-flight test data

p0236 A72-23807

Aileron vibration pressure measurement in plane-parallel transonic flow, evaluating damping characteristics with allowance for shock motion caused nonlinear effects

p0363 A72-31026

#### AIR

##### NT COMPRESSED AIR

##### AIR BEARINGS

##### U GAS BEARINGS

##### AIR BLASTS

##### U AERIAL EXPLOSIONS

##### AIR BREATHING ENGINES

##### NT GAS TURBINE ENGINES

##### NT JET ENGINES

##### NT PULSEJET ENGINES

##### NT RAMJET ENGINES

##### NT SUPERSONIC COMBUSTION RAMJET ENGINES

##### NT TURBOFAN ENGINES

##### NT TURBOJET ENGINES

##### NT TURBOPROP ENGINES

Air breathing propulsion systems for reducing engine noise level, discussing stoichiometric gas turbine engines, V/STOL propfans and variable-geometry supersonic inlet and exhaust nozzles

p0057 A72-13486

Aircraft air breathing propulsion technology, discussing two-place aircraft, turbofan power plants, helicopter engines and V/STOL, CTOL, subsonic transports and supersonic aircraft

p0067 A72-14825

Two-dimensional model for thermal compression.

p0567 A72-42868

Application of linear stochastic optimal control theory to design of control system for air inlet of supersonic propulsion system

[NASA-TM-X-67905] p0079 N72-11897

Development of scramjet with airbreathing engine for cruise application

p0103 N72-13003

Inventory of aeronautical test facilities for air breathing engines

[NASA-CR-1875] p0108 N72-13233

Design and experimental performance of 20-inch diameter, tandem bladed, axial flow, transonic compressor rotor for advanced air breathing engines

[NASA-TM-X-2484] p0263 N72-18773

Development of techniques for evaluating performance of air breathing engines and measurement of significant operating parameters

[NASA-TM-X-68305] p0329 N72-20983

Mission requirements and design modifications for air breathing engines used in space shuttles

[NASA-TM-X-68098] p0524 N72-28794

Curves for use with total heat and static pressure sampling methods for gross thrust, mass flow, and choking pressure ratio of air breathing engines in flight

[ESDU-69008] p0631 N72-32746

Gross thrust and nozzle mass flow measurements for air breathing, ducted flow engines

[ESDU-69007] p0631 N72-32747

Intrinsic thrust and drag for air breathing ducted flow engines in flight

[ESDU-69006] p0631 N72-32748

Analysis of major pollutants produced by aircraft engine exhaust and development of techniques to reduce level of pollutant emission

[NASA-TM-X-68129] p0631 N72-32754

#### AIR CARGO

##### NT AIR MAIL

U.S.S.R. high-subsonic freight transport jet aircraft IL-76 for arctic areas, Siberia and Far East, noting independence of large airports availability

p0056 A72-13471

American civil aviation future development, discussing passenger and freight markets growth, aircraft types and FAA role

p0066 A72-14811

Future civil air transport trends, considering passenger and cargo growth, travel frequency per capita income and STOL market

p0199 A72-22150

Air cargo growth potential, marketing and profitability, considering need for improvements in ground handling, rate structure, container standardization, documentation, etc

p0344 A72-28452

Air cargo intermodal and interline containers handling in warehouse storage, transportation and distribution, considering total pack and interlock requirements

p0405 A72-33174

Terminal handling environment and air cargo requirements for noncontainerized freight

p0406 A72-33175

Major civil airport passenger and cargo terminal complex design and layout planning, discussing various facilities and equipment requirements

p0409 A72-33329

Simulation of an air cargo handling system

p0443 A72-34472

Airborne towed cargo carrying bodies dynamic stability for single-point suspension system, using linearized small perturbation analysis

[AIAA PAPER 72-986] p0561 A72-42328

Boeing 747-F cargo aircraft, describing onboard and ground facilities for freight handling and loading

p0593 A72-43245

Air freight ground handling and distribution terminal facilities and methods, discussing future technical and organizational developments for efficient handling of increased traffic volume

p0593 A72-43246

Design of a military air cargo transportation system by use of a large scale mathematical programming model.

p0604 A72-44577

Statistical forecasting models for USAF CONUS outbound cargo airlift requirements by averaging and exponential smoothing models

p0604 A72-44578

Aircraft and route assignment to satisfy passenger and cargo demand

[PB-200474] p0106 N72-13028

Passenger, cargo, and mail statistics for commuter air carriers FY 1971

p0429 N72-24981

Design of security system for civil aviation cargo transportation

p0526 N72-28985

Senate hearings on regulation of rates and practices of domestic and foreign air carriers

p0542 N72-29981

#### AIR CONDITIONING EQUIPMENT

Soviet book on civil aircraft high altitude equipment covering air conditioning systems, oxygen equipment and cabin pressurization

p0018 A72-12295

Design and development program for air conditioning system of twin engine unpressurized Piper Navajo, noting flight test results

[SAE PAPER 720328] p0291 A72-25590

#### AIR COOLING

Two dimensional cascade test of air-cooled turbine nozzle, describing aerodynamic characteristics and heat transfer properties

p0122 A72-16489

Aircraft engines high pressure turbine guide vanes air cooling by internal insert, analyzing thermal stresses

[AIAA PAPER 72-7] p0129 A72-16864

Heat transfer rates of impingement cooling in gas turbine airfoils, noting leading edge sharpness effects for slot and circular jet configurations

[ASME PAPER 72-GT-7] p0293 A72-25610

Cooling efficiency and load endurance of aircraft turbine engine blades as function of ambient temperature and air flow rates

p0304 A72-26892

Air bleeding location to cool turbojet engine turbine of supersonic aircraft, presenting graphs

p0314 A72-28147

Flow characteristics of turbine airfoil cooling system components

[NASA-CR-120883] p0483 N72-27290

## SUBJECT INDEX

## AIR INTAKES

- Heat transfer characteristics of chordwise-finned, impingement-cooled vane in modified J-75 research engine and four-vane cascade [NASA-TM-X-2595] p0525 N72-28919
- Analysis of heat transfer characteristics of three air cooled vanes in turbojet engine using impingement cooling, film cooling, and convection cooling [NASA-TM-X-2580] p0634 N72-32949
- AIR CURRENTS**
- NT JET STREAMS (METEOROLOGY)
- NT MERIDIONAL FLOW
- NT VERTICAL AIR CURRENTS
- Techniques for forecasting turbulent weather conditions below 10,000 feet for light aircraft operating in Hawaiian Islands [AD-726107] p0046 N72-11525
- AIR CUSHION VEHICLES**
- U GROUND EFFECT MACHINES
- AIR DEFENSE**
- Congressional hearing concerning penetration of US defense system by Cuban aircraft on flight from Havana, Cuba to New Orleans, Louisiana, 26 October, 1971 p0475 N72-26986
- AIR FILTERS**
- Dusty inlet air filtering in aircraft turbine engines, discussing engine operation, dust and filter characteristics p0119 A72-16179
- Gas turbine engine inlet solid particle separator designed as integral engine part, discussing semireverse flow superiority p0175 A72-18755
- Aircraft gas turbine engines smoke emission sampling by stained filter technique, comparing Navy specifications AS 1833 with SAE method ARP 1179 p0177 A72-18770
- Air dust erosive damage to helicopter gas turbine engine parts, discussing inertial rotorless filtering systems p0346 A72-28786
- Sand and dust particle filter tests for evaluation of separation efficiency and aerodynamic performance [AD-725593] p0051 N72-11713
- AIR FLOW**
- NT AIR CURRENTS
- NT JET STREAMS (METEOROLOGY)
- NT MERIDIONAL FLOW
- NT VERTICAL AIR CURRENTS
- Gas turbine nozzles aerodynamic throat area air flow measurement, describing accuracy, standards, reference nozzles and mounting flanges [SAE ARP 1195] p0008 A72-10390
- Real gas effects in atmosphere to make sonic bang shock wave full dispersion and thickness wide variations p0016 A72-11972
- Flutter problem wing-air flow energy exchange at instability limit, obtaining vibration mode shapes from homogeneous boundary value problem analog model p0054 A72-13191
- Supersonic diffusion flame in duct configuration to study mixing with combustion of two parallel methane and air flows p0057 A72-13545
- Air stream from air entry holes of aeronautical gas turbine combustor, investigating jets maximum penetration, flow path, and mixing p0122 A72-16493
- Pressure recovery calculation for subsonic adiabatic air flow through diffusers with tail pipes, assuming turbulent inlet boundary layer p0237 A72-23855
- Turbulent shear stress and kinetic energy characteristics of subsonic air flow in straight conical diffuser, using hot-wire anemometry measurements p0238 A72-23862
- Subsonic unsteady aerodynamic pressures on blades of compressor wheel rotating freely in air stream [ONERA, TP NO. 1077] p0244 A72-24854
- Gas turbine engine combustion chamber, investigating swirl vane air flow rate effects on circumferential nonuniformity of gas temperature field at outlet p0314 A72-28132
- Film cooling effectiveness for air-gas flow section of gas turbine engine under actual operating conditions p0314 A72-28170
- Flow and heat transfer for air cooled turbine vane [NASA-TM-X-2376] p0098 N72-12947
- Performance criteria, including engine air flow matching requirements, of axisymmetric mixed compression intake for supersonic transport p0211 N72-16703
- Characteristics of jets flowing from air entry holes of combustion chamber of gas turbine for jet flow parallel to and normal to primary flow through turbine [NAL-TR-227] p0258 N72-18279
- Development and characteristics of dual scatter laser Doppler velocimeter for flow distribution measurement in wind tunnels, helicopter downwash, and across high lift wing sections p0435 N72-25506
- Compilation of technical reports on theoretical aerodynamics and air flow - Vol. 1 [SBN-11-470151-2] N72-26993
- Compilation of technical reports on theoretical aerodynamics, aircraft performance, sonic booms, aircraft stability, and turbulent boundary layers - Vol. 2 [SBN-11-470152-0] p0475 N72-26994
- Application of streamline curvature method for determining performance of turbobfans and comparison with empirical results [NAL-TR-268T] p0476 N72-26999
- Analysis of peak axial-velocity decay in moving airstream for several nozzles and effect on noise generated by short takeoff aircraft with externally blown flaps [NASA-TM-X-68102] p0479 N72-27029
- Determination of upwash angles for short takeoff aircraft lifting system using two dimensional potential flow analysis [NASA-TM-X-2593] p0487 N72-27817
- Development of local linearization and transonic equivalence rule for predicting properties of transonic flows about wing-body combinations [NASA-CR-2103] p0526 N72-28994
- Numerical analysis of flow distribution about nonaxisymmetric bodies at subsonic and supersonic speeds [NASA-TT-P-14547] p0628 N72-32302
- Analysis of sound produced by turbulent boundary layers, flow past single discontinuities, and rigid flow discontinuities immersed in rigid ducts [NASA-CR-2126] p0640 N72-33029
- Development of model to represent induced flow through rotary wing of helicopter in descending flight [AD-745103] p0642 N72-33047
- AIR FREIGHT**
- U AIR CARGO
- AIR INLETS**
- U AIR INTAKES
- AIR INTAKES**
- NT ENGINE INLETS
- NT SUPERSONIC INLETS
- Pressure and convective heat transfer distribution at air inlet central body surface, reducing Navier-Stokes equations to partial differential equations with similar solutions p0069 A72-14971
- Convective heat flow pressure and density measurements at surface of central body of air inlet with live point and axial symmetry p0138 A72-17560
- Gas turbine engine inlet solid particle separator designed as integral engine part, discussing semireverse flow superiority p0175 A72-18755
- Inlet duct and turbobfan engine compatibility without stalling and surge conditions obtained by design optimization and wind tunnel testing p0176 A72-18761
- Transonic performance of double flux engine nacelle air intake and afterbody at high Reynolds numbers p0075 N72-11866
- Transonic and supersonic wind tunnel test data on intake performance of supersonic mixed compression inlet flow

[NASA-CR-1977] p0264 N72-18786  
Wind tunnel study of aerodynamic drag for engine  
pod and its elements including air intake and  
afterbody  
[NASA-TT-P-14154] p0265 N72-18997

## AIR JETS

Air jet propelled flight vehicles optimal design  
parameters for constant altitude flight at given  
speed

Aerodynamic throttling effect due to air jet flow  
interaction in throat region of mainstream two  
dimensional nozzle flow

Turbulent intensity induced by wakes near  
secondary air jet inlet to gas turbine engine  
flame tube

Effect of air injection on the torque produced by  
a trailing vortex.

Basic directivity and spectra of jet noise with  
improved correction for refraction.

## AIR MAIL

Passenger, cargo, and mail statistics for commuter  
air carriers FY 1971

## AIR NAVIGATION

## NT ALL-WEATHER AIR NAVIGATION

ATC separation minima and navigational errors on  
airways in general and long range oceanic  
environments

Avionics contribution to airspace decision making  
problems, considering navigation, surveillance  
radar, collision avoidance and ATC techniques

Stellar attitude reference and navigation  
associative processor with high computational  
speed for radar approach control in ATC

Optimal stochastic /Kalman/ filters application to  
integrated air and submarine navigation systems,  
discussing measurement errors modeling as bias  
and colored noise

L band in satellite system for aerial navigation  
aid, discussing position accuracy, data  
transmission and voice communication and  
modulation methods

Radio aids for air navigation and traffic control  
in Italy, discussing facilities development

Doppler system with navigation radar device,  
computer unit and data transmitter for  
continuous recording of aircraft position and  
speed

Communications and navigation trends in ATC,  
emphasizing use of improved existing systems

A-7 D/E navigation/weapon delivery system flight  
testing, using photogrammetric technique

Navy hovering vehicle versatile automatic control  
system for V/STOL flight test program, using  
airborne digital computer for  
navigation/guidance computations

Flight safety and ATC planning in German Federal  
Republic and on international level, discussing  
regional control stations, radio frequencies,  
navigation systems, automation, etc

Omega system in short range navigation  
supplementing VORTAC for coverage at low  
altitudes in mountain areas

Single satellite angle system and multiple  
satellite ranging and range difference systems  
in short haul air navigation, comparing with  
VORTAC

Head-up display flying under IMC and VMC flight  
conditions, considering takeoff, landing and  
navigation modes

Area navigation systems, discussing VOR/DME,  
Doppler and inertial systems, CRT displays, data  
links, etc

Cockpit instrumentation for jet transport aircraft  
flight path management, emphasizing  
dependability, safety and economy

Automation in planning and execution of flights,  
considering navigation, communication, flight  
instruments monitoring, control/stabilization  
and warning systems

Area navigation for Chicago-New York region,  
evaluating Decca Omnitrac 1A RNAV system  
installation in Boeing 727 aircraft

Flight testing of automated modular area  
navigation system for L-1011, describing  
computer, data storage and control-display units  
and electronic automatic chart system

Skyguide airborne computer navigation system for  
airline applications, discussing system  
components, flight crew monitoring and  
optimization

Shoran systems with onboard computers for aircraft  
position and trajectory parameters, noting  
coordinate plotting for flight path recovery  
maneuvers

Information theory approaches to air navigation,  
discussing ATC, collision avoidance and computer  
applications

Navigation accuracy of corrected OMEGA close to  
transmitter, using aircraft flight test at 500  
nm range

Aircraft applications of composite signal OMEGA  
configuration with phase data combined at  
separate carrier with weighting coefficients,  
discussing advantages over uncompensated  
navigation systems

Aeronautical navigation/guidance standardization  
in conjunction with OMEGA, covering sensor and  
computer equipment life cycles

Small aircraft navigation over 10-400 mile course  
segments by raw OMEGA phase information dc  
presentation on conventional ID-249 course  
deviation indicator

OMEGA receiver integration into Navy P-3C airborne  
computerized navigation system, describing  
flight test, maintainability and laboratory  
simulation programs

Subtraction circuit design for impulse noise  
elimination at front end of aircraft oriented  
OMEGA navigation system receiver

Aircraft inertial navigation system, discussing  
mode selection unit, digital computer and  
control display for operator communication with  
system

Head-up display for aircraft three dimensional sky  
path observation during navigation and landing,  
discussing computer units, CRT and image  
generating subsystems

Navigation for general aviation and navigation  
training - Conference, Atlanta, February-March  
1972

Area navigation requirements by general aviation,  
discussing random routing, ATC system and  
aircraft approach spacing

Great circle intermediate waypoint computation  
method for inertial navigation equipped aircraft

Computerized navigator training simulator for  
complete array of air navigation instruments,  
discussing design and human factors

## SUBJECT INDEX

## AIR NAVIGATION CONTD

- Canadian Armed Forces air navigation training program, noting emphasis on training flights  
p0398 A72-32209
- USAF Academy air navigation training program, discussing systems development course and descriptive and applied astronomy  
p0399 A72-32210
- Fighter bomber Loran-inertial data processing with digital computer to combine navigation, guidance and weapon delivery into fully integrated system  
p0407 A72-33246
- Solid state modular ground based distance measuring equipment /DME/ receiver for en route aircraft navigation and landing  
p0411 A72-33521
- Technical and operational aspects of L-band satellite system for air navigation, discussing verbal communication, direction finding and noise interference problems  
p0417 A72-34138
- Configuration and flight test of the only operational Air Force area navigation system.  
p0453 A72-35557
- USAF development of electrostatic gyros for inertial air navigation, noting flight tests and associated airborne digital computer  
p0453 A72-35558
- Book - Minimum operational characteristics for vertical guidance equipment used in airborne volumetric navigation systems  
[DO-152] p0455 A72-35800
- OMEGA air and maritime navigation system development, test phase and application potential, discussing operational modes, propagation parameters, solar activity effects and signal loss  
p0493 A72-37796
- Inertial platform pursuant to ARINC-571 specifications, noting capability for integration into surface navigation system or autonomous operation  
p0493 A72-37799
- Development of STOLAND, a versatile navigation, guidance and control system.  
[AIAA PAPER 72-789] p0496 A72-38106
- Flight evaluation of three-dimensional area navigation for jet transport noise abatement.  
[AIAA PAPER 72-814] p0497 A72-38116
- Area navigation and its affect on aircraft operation and systems design.  
[AIAA PAPER 72-754] p0498 A72-38125
- Error analysis of hybrid aircraft inertial navigation systems.  
[AIAA PAPER 72-848] p0504 A72-39081
- Optimum aiding of inertial navigation systems using air data.  
[AIAA PAPER 72-847] p0504 A72-39082
- Updating inertial navigation systems with VOR/DME information.  
[AIAA PAPER 72-846] p0504 A72-39083
- Tactical aircraft weapon system development, describing navigation, target acquisition, release point guidance and delivery modes  
[AIAA PAPER 72-896] p0505 A72-39107
- Reduction of air traffic congestion due to corridor effect of present airway route pattern through area navigation /R-NAV/ based on VOR/DME inputs  
p0508 A72-39750
- NEWNAV Symposium, Frankfurt am Main, West Germany, October 5-7, 1971, Report. Volumes 1 & 2.  
p0545 A72-40276
- Modular navigation /MONA/ dual channel automatic area navigation system, describing computer, flight data storage and control/display units  
p0545 A72-40277
- TCE-71A area navigation system based on modular design with provision for 20 waypoints parameter storage, describing computer, control display and automatic data entry units  
p0546 A72-40278
- Operational implementation of area navigation.  
p0546 A72-40279
- Area navigation systems integration into existing ATC and man/machine relationship problems, considering cockpit workload coordination  
p0546 A72-40280
- An area navigation system for a long range airplane.  
p0546 A72-40281
- Present status of self-contained navigation systems combining Doppler velocity sensors and attitude/heading references.  
p0546 A72-40282
- Autonomous navigation systems, discussing Doppler navigation, inertial platforms and onboard computers  
p0546 A72-40283
- Geostationary satellite system for air navigation via voice and data communication, discussing ground facilities and avionics  
p0546 A72-40284
- An air traffic controller's view on area navigation and ATS requirements related thereto.  
p0548 A72-40299
- Terminal airspace navigation and aircraft ground handling control, discussing air traffic controllers and pilots functions in context of workload and automation  
p0549 A72-40546
- Automated area navigation with real time track computation, discussing information processing by on-board computer for immediate pilot instruction  
p0550 A72-40683
- Collision avoidance system electromagnetic compatibility with radar altimeters designed for 1600 MHz aeronavigation band  
p0550 A72-40881
- Great circle navigation for inertial equipped aircraft, describing procedure for determining waypoint coordinates with reference to VORTAC stations  
p0567 A72-42949
- Possible impact of area navigation upon MLS requirements for azimuth angular coverage and range.  
p0606 A72-44643
- Analysis of target signal requirements for aircraft navigation systems using millimeter wave radiometry from terrain radiation or ground-based beacons  
[NASA-TN-X-62082] p0035 N72-10539
- Design, development, and evaluation of locator equipment to provide aircraft position information for flight inspection of navigation facilities  
[FAA-RD-72-3] p0170 N72-15434
- Radio frequency allocations for integrated navigation air traffic control system  
[AD-731751] p0207 N72-16138
- VHF ranging and position fixing techniques using ATS 1 and ATS 3 for ship and aircraft navigation  
[NASA-CR-125538] p0209 N72-16510
- VHF ranging and position fixing techniques using ATS 1 and ATS 3 for ship and aircraft navigation - executive summary  
[NASA-CR-125537] p0209 N72-16511
- Proceedings of conference on Omega navigation system and recommendations for modified hyperbolic navigation system  
[NASA-CR-125807] p0280 N72-19718
- Analysis of air traffic control systems based on equipment specifications, data processing equipment, display simulation, and cost benefits  
[AD-735322] p0377 N72-22657
- Application of antenna dumping techniques to reduce precipitation interference in airborne Omega navigation system  
[AD-736516] p0377 N72-22659
- Analysis of incompatibility between ground and airborne measurements of VOR system space modulation  
[AD-737039] p0377 N72-22662
- Optimum adaptive phase estimation receiver for one-way ranging air navigation  
p0389 N72-23660
- Development of air navigation system using liquid crystals and electronic equipment to determine direction to selected VOR station  
[NASA-CR-112062] p0389 N72-23664
- Development of air traffic control procedure using inertial navigation position reports as input data for computer graphics presentation  
[FAA-RD-71-92] p0427 N72-24673
- Concepts, philosophy, and development of minimum operational characteristics for airborne navigation systems  
[DO-149] p0436 N72-25603

- Equipment specifications and environmental standards for air navigation systems based on development of minimum operational characteristics [DO-152] p0522 N72-28667
- Formulas accounting for earth ellipsoid flattening and flight altitude corrections of air navigation measurements [SER-C/DISS-166] p0523 N72-28677
- Development of plan for navigation systems improvements for civil aviation and maritime requirements [AD-741944] p0579 N72-30592
- Flight tests of air navigation equipment to determine accuracy of position location for small area mapping and aerial reconnaissance in Arctic regions [AD-740607] p0579 N72-30596
- Development of precision air navigation system based on loran C system and digital barometric altimeter [AD-740894] p0579 N72-30597
- Analysis of factors affecting accuracy of inertial air navigation systems [JPRS-51241] p0589 N72-31639
- Low altitude flight test to determine accuracy of VOR Tacan air navigation aid p0630 N72-32642
- Development and evaluation of equipment and automation proposed for air traffic control systems for late 1970 and 1980 time period. [AD-743635] p0630 N72-32645
- Development and characteristics of navigation system for vertical and short takeoff aircraft with application to flight management experiments [NASA-TM-X-62183] p0646 N72-33642
- Concept for automating air traffic control in terminal area with navigation and guidance system primarily dependent on airborne equipment [NASA-TN-D-6992] p0646 N72-33644
- AIR PIRACY**
- Legal aspects in prevention of aircraft unlawful seizure in view of international cooperation, noting German Democratic Republic agreements p0308 A72-27272
- The onboard authority of the aircraft commanding officer as provided by the 1963 Tokyo Convention p0454 A72-35763
- AIR POLLUTION**
- Air transportation evolution and relation to atmospheric and noise pollution p0061 A72-14151
- Diffusion and fallout of polluting particulates emitted by aircraft engines, discussing effect of wing-tip vortices, plume visibility and monitoring, simulation and modeling [ASME PAPER 71-WA/AV-2] p0117 A72-15950
- Army aircraft gas turbine engines pollution potential evaluation program, considering smoke emission, noise and invisible pollutants p0177 A72-18772
- Combustion research for reducing jet aircraft pollutant emissions, discussing fuel atomization improvement, smoke reduction and combustor design techniques p0301 A72-26037
- New York-New Jersey megalopolis offshore jetport feasibility, considering noise, air-water pollution, land conservation, cost, etc p0346 A72-28792
- Estimated peak regional concentration of SST exhaust in stratosphere from expected flight operation levels p0346 A72-28837
- Stratospheric subsonic and supersonic aircraft emission estimation for water vapor and nitrogen oxides p0346 A72-28838
- Future projections of commercial jet aircraft fuel demands, estimating engine exhaust effects on air quality p0350 A72-28879
- Climatic changes due to stratospheric perturbation by propulsion effluents of high altitude aircraft flights [AIAA PAPER 72-658] p0414 A72-34076
- Stratospheric pollution by SST exhaust gases, discussing water vapor and nitrogen oxides effects on ozone concentration p0451 A72-35327
- Air transport developments effects on economy and environment, discussing government power to control airport use and location and air pollution p0455 A72-35952
- Numerical prediction of the diffusion of exhaust products of supersonic aircraft in the stratosphere p0493 A72-37824
- Hypersonic transports commercial applications, examining economic and noise and air pollution aspects [ICAS PAPER 72-32] p0554 A72-41157
- Aircraft activity effects on air pollution in San Francisco Bay area with engine emission and climatological data p0034 N72-10361
- Environmental impact and adverse environmental effects of Navy F-14 aircraft operation [PB-199851-F] p0206 N72-15983
- Proceedings of conference on environmental effects of aircraft operation with emphasis on air and noise pollution [PB-202038] p0217 N72-16992
- Statistical analysis of turboprop engine exhaust emissions in atmosphere p0222 N72-17319
- Analysis of pollutant emissions from jet aircraft and combustion research for reducing emissions through combustor design and fuel atomization [NASA-TM-X-68000] p0251 N72-18009
- Air and noise environmental pollution from B-1 aircraft [PB-201711-F] p0254 N72-18033
- Design and development of F-15 fighter aircraft and analysis of effects of aircraft operation on air pollution and noise [PB-201710-F] p0254 N72-18034
- Fraunhofer line discriminator as remote sensor of fluorescent dyes used in pollution detection [NASA-CR-125643] p0258 N72-18448
- Environment pollution of turbine engine aircraft p0270 N72-19030
- Air pollution source inventory for ground operations at airports [AD-733111] p0276 N72-19298
- Hydrocarbons, carbon monoxide, carbon dioxide, and nitrogen oxides in gaseous emissions from limited sample of military and commercial aircraft turbine engines [PB-204177] p0283 N72-19968
- Statistical analysis of aircraft exhaust emission measurements, using random sampling [PB-204869] p0321 N72-20029
- Carbon monoxide, hydrocarbons, and nitrogen oxide exhaust emissions from aircraft [PB-204879] p0321 N72-20030
- Assessment of aircraft emission control technology and feasibility analysis of various control methods [PB-204878] p0333 N72-21017
- Exhaust emissions tests of aircraft propulsion and auxiliary power gas turbine engines [PB-204920] p0333 N72-21018
- International survey of air pollution by aircraft engines and fuels [AGARD-AR-40] p0338 N72-21590
- Instruments for measuring air pollution emitted by aircraft engines [PB-204794] p0338 N72-21592
- Annotated bibliography on environmental pollution caused by aircraft emissions [AD-735943] p0388 N72-23655
- Air pollution for peak traffic periods at Heathrow Airport, London, for April through September for 1970 p0426 N72-24649
- Analysis of emissions from aircraft piston and gas turbine engines - tables [PB-207107] p0435 N72-25589
- Environmental impact statement for Earth Resources Aircraft program [NASA-TM-X-68550] p0476 N72-27008
- Analysis of carbon monoxide, unburned hydrocarbons, and nitrogen oxides in turbojet afterburner combustion products using infrared spectroscopy - Part 1 [AD-739176] p0488 N72-27968
- Air pollution study of jet aircraft operations at Los Angeles International Airport, California

# SUBJECT INDEX

# AIR TRAFFIC

- [PAPER-71-117] p0623 N72-32048
- Analysis of major pollutants produced by aircraft engine exhaust and development of techniques to reduce level of pollutant emission
- [NASA-TM-X-68129] p0631 N72-32754
- Analysis of particulate emissions contained in afterburning turbojet engine exhaust operating at ground level - Part 1
- [AD-744048] p0632 N72-32768
- Aircraft emission rates and their impact at selected airports
- [PB-208950] p0646 N72-33624
- AIR SAMPLING**
- Air pollution study of jet aircraft operations at Los Angeles International Airport, California
- [PAPER-71-117] p0623 N72-32048
- AIR SICKNESS**
- U MOTION SICKNESS**
- AIR TO AIR MISSILES**
- Design for air combat.
- [AIAA PAPER 72-749] p0498 A72-38124
- AIR TO AIR REFUELING**
- F-14 Tomcat test program for hydraulic systems, spinning, low speed performance, stalling, afterburning turbofan engines, in-flight refueling and automatic telemetry equipment
- p0138 A72-17582
- Development of training program for RF-4C aircraft aerial refueling training based on computer systems data
- [AD-736409] p0370 N72-22037
- AIR TO AIR ROCKETS**
- U AIR TO AIR MISSILES**
- AIR TO SURFACE MISSILES**
- Pilot-fighter aircraft system mathematical model relating pilot performance to air to ground weapon delivery accuracy
- p0453 A72-35564
- Procedures for conducting engineering tests of aircraft guided missile subsystems
- [AD-731189] p0169 N72-15254
- Evaluation of helicopter launching system for air to ground rockets
- [AD-737177] p0384 N72-23034
- AIR TRAFFIC**
- Future aircraft design trends for transcontinental and short haul operation, considering traffic forecasts, current transport aircraft and potential derivatives and technology
- [SAE PAPER 710749] p0003 A72-10248
- Pilot collision warning indicator performance in terminal area traffic, using computer fast-time simulation for traffic model
- p0012 A72-11134
- German Federal Republic territorial air traffic regulations covering general, VFR and IFR rules, equipment and personnel examination and certification, safety, takeoff and landing, accidents, etc
- p0021 A72-12621
- German book on air traffic law covering norms relative to vehicles and air space, international air law, organizations, etc
- p0021 A72-12622
- German commercial airports adaptation to traffic development, considering economic factors
- p0119 A72-16187
- Soviet air traffic service productivity increase and manpower saving by introduction of new airliner types
- p0127 A72-16779
- STOL transport passenger market demand model selection based on estimation of traffic patterns between two population centers and service frequency and fare considerations
- p0139 A72-17586
- Aircraft midair collision prevention in dense air traffic environments, suggesting problem solution based on proximity warning system
- p0191 A72-21090
- Optimal high capacity runway systems for major airports, discussing multiple systems in anticipation of future mass air traffic requirements
- p0240 A72-24169
- General aviation equipment standards in light of air traffic system safety needs, emphasizing Technical Standard Order system
- [SAE PAPER 720307] p0288 A72-25571
- Charter air traffic regulations under German air law, discussing legal safeguards relative to economic, personnel, technical and organizational aspects
- p0303 A72-26559
- Airport capacity and air traffic congestion effects on airport operations in terms of time and costs
- p0401 A72-32454
- Individual regions and nationwide air traffic demands forecasting for airport planning
- p0408 A72-33311
- Major civil airport planning, discussing information gathering and processing for aviation demand, aircraft movements revenue and cost forecasts and pricing policy evaluation
- p0409 A72-33327
- Major civil airport development plan, discussing traffic forecasts, runways, noise, airspace capacity, access systems, freight installations, maintenance facilities, navigation aids, buildings, etc
- p0409 A72-33328
- Airport planning requirements - An airline view.
- p0441 A72-34224
- Simulation models for airports performance evaluation through replication of traffic units actual movement
- p0443 A72-34414
- Functional equipment active and standby redundancy for flight safety and air traffic punctuality improvement, noting Boeing 747 aircraft redundant systems
- p0452 A72-35476
- Air transport developments effects on economy and environment, discussing government power to control airport use and location and air pollution
- p0455 A72-35952
- Air transport development between the UK and Europe - The next twenty years.
- p0462 A72-37092
- Reduction of air traffic congestion due to corridor effect of present airway route pattern through area navigation /R-NAV/ based on VOR/DME inputs
- p0508 A72-39750
- German monograph - Model-analytical investigation of short-haul air traffic with VTOL aircraft in the Federal Republic of Germany.
- p0569 A72-43068
- Independent parallel runway landing system to relieve air traffic congestion, investigating minimum spacing required to minimize collision risk
- p0569 A72-43130
- Critical assessment of air transport planning for German Federal Republic, advocating decentralized concept of major air terminals for intercontinental jumbo jet traffic
- p0593 A72-43244
- Airports planning for West Germany, discussing geographical air traffic patterns, economic and noise aspects
- [DGLR PAPER 72-034] p0605 A72-44614
- Airline operational problems from traffic volume increase, discussing flight safety, passenger comfort, schedule adherence and economy aspects
- [DGLR PAPER 72-037] p0606 A72-44618
- Aircraft and route assignment to satisfy passenger and cargo demand
- [PB-200474] p0106 N72-13028
- Air traffic and route analysis using computer program
- [PB-200481] p0107 N72-13035
- Research and development of advanced technologies for future air transportation needs
- [EVENT-118] p0111 N72-13584
- Analysis of commercial aircraft traffic during prime travel hours and effect of unrealistic scheduling on extent of congestion
- [AD-725326] p0154 N72-14009
- Dynamic simulation of air traffic operations in San Francisco area to determine traffic capacity
- [AD-727756] p0281 N72-19724
- Airport traffic forecasts for Washington, D.C. for 1972 to 1983
- p0283 N72-19975
- FAA review of aviation activity in 1971 and projected outlook for 1972

# AIR TRAFFIC CONTROL

# SUBJECT INDEX

[REPT-72-00207] p0320 N72-20020  
Linear programming applied to air traffic prediction noting airline operations for optimal flight  
[DLR-PB-71-60] p0326 N72-20595  
San Francisco Bay area airport and airspace capacity analysis to meet 1985 demand forecast p0526 N72-28978  
Proposal for increasing overall air traffic capability by expansion of charter service between bilateral parties p0634 N72-32983  
Forecast of airport activity for major communities in U.S. p0635 N72-32986

**AIR TRAFFIC CONTROL**  
**NT RADAR APPROACH CONTROL**  
ATC separation minima and navigational errors on airways in general and long range oceanic environments p0001 A72-10177  
Avionics contribution to airspace decision making problems, considering navigation, surveillance radar, collision avoidance and ATC techniques p0002 A72-10180  
Terrain clearance during descent and approach of aircraft under radar control, discussing optimum profile, ATC, nav aids and rules p0002 A72-10183  
Automated radar terminal system /ARTS/ for monitoring and tracking all aircraft within radar range, displaying identification, altitude and ground speed information to air traffic controller p0010 A72-10960  
Phased scanning array for ATC radar beacon systems, airport or air route surveillance radars and ground landing systems p0010 A72-10962  
Inertial navigation role in automatic ATC systems, discussing path control accuracies, environmental conditions, noise and air pollution, etc p0012 A72-11118  
ATC system decision making problem and future technological and administrative improvements p0015 A72-11718  
Stellar attitude reference and navigation associative processor with high computational speed for radar approach control in ATC p0017 A72-12033  
Discrete address ATC radar beacon system operation and design p0019 A72-12378  
FAA air traffic control automation program, discussing en route stage, computer program, data processing and storage and terminal area navigation and display techniques p0019 A72-12380  
UHF aeronautical satellite system, presenting ATC trends, international aspects, available flight levels, weather conditions and long haul conflicts p0019 A72-12383  
Computer-aided interactive graphic displays for ATC, discussing subsystems, data processing flow and operational capabilities p0020 A72-12420  
Tactical ATC display system for airport surveillance, precision approach and landing and operator/aircraft/machine operations by using terminal Area Surveillance Radar p0020 A72-12421  
Digital computer memory system for real time processing of air and naval traffic data, discussing logic design, time comparisons and optimum use p0022 A72-12647  
ATCAS air traffic control automation system emphasizing Italian situation p0022 A72-12649  
Radio aids for air navigation and traffic control in Italy, discussing facilities development p0024 A72-12748  
Flight planning by ATC, discussing problems due to runway feeding from several converging airways p0055 A72-13415  
Pulse coded processing system EMC performance measurement, considering CW and pulsed interference effects and application to ATC

radar beacon system transponders p0061 A72-14033  
ATC for North Atlantic air transportation, emphasizing collision risk model for safety standards assessment p0062 A72-14484  
ATC technology impact on flight operations and public value of aviation, discussing microwave landing system economic aspects p0065 A72-14810  
Terminal area air traffic guidance and control, discussing automation, all-weather precision approach and landing and failure detection p0066 A72-14817  
Air traffic control long range planning for airlines and general aviation, discussing use of IPR, RNAV and IPC equipment p0066 A72-14818  
Aircraft operations effects on community noise pollution, discussing ATC airline operational procedures modifications in terms of noise reduction p0067 A72-14819  
Air surveillance using satellite range-difference measurement from noninterrogated aircraft beacons for ATC p0068 A72-14826  
Airborne collision avoidance system equipment for general aviation aircraft, discussing logic functions, transmission modes, data handling tradeoffs and ATC procedure interactions p0068 A72-14830  
ATC radar beacon system developments, considering diversity transponders, interrogator environment control, electronic scan cylindrical array antenna design and discrete address mode p0068 A72-14832  
Computer technology projection in terms of cost and performance for future ATC system, determining data processing systems availability p0068 A72-14834  
Toulouse-Bretigny link involving ATC and flight simulators with Concorde cockpit replica p0069 A72-15072  
Mountain stations wind measurement usefulness for small aircraft traffic guidance p0072 A72-15625  
Communications and navigation trends in ATC, emphasizing use of improved existing systems p0115 A72-15781  
Flight safety and ATC planning in German Federal Republic and on international level, discussing regional control stations, radio frequencies, navigation systems, automation, etc p0127 A72-16738  
Automated scheduling algorithms for aircraft from terminal area to touchdown, discussing system features and STOL air traffic computerized simulation p0131 A72-16905  
[AIAA PAPER 72-120] p0131 A72-16905  
Fast time simulation application to ATC systems, discussing control action exercise within strategic/tactical spectrum p0135 A72-16994  
Radio technical capabilities and limitations of ATC systems - Conference, Washington, D.C., November 1971 p0137 A72-17326  
FAA air traffic control automation program, describing enroute and terminal ATC systems implementation p0137 A72-17327  
Development programs for ATC system improvement by digital computers and data displays applications p0137 A72-17328  
Airborne traffic display system using beacon and radar surveillance network and ground computer processing p0137 A72-17329  
Aircraft proximity control for ATC system using national secondary surveillance radar /SSR/ for CAS-PWI functions p0137 A72-17330  
Airline pilot performance in automated ATC system involving use of surveillance data and instantaneous discrete communications p0137 A72-17331  
Pilot role in automated ATC system using onboard situation display with navigation and collision

- ICAO standardized taxiing guidance and airports surface traffic control procedures p0240 A72-24171
- Electronics and data processing technology effects on radar state of art, discussing automated air traffic control surveillance systems p0241 A72-24490
- Airborne VHF omnirange /VOR/ systems minimum operational standards for navigation and communication in air traffic control p0242 A72-24725
- Operational aviation meteorological requirements, reviewing aircraft categories, ATC systems and avionics and navigational aids p0246 A72-25078
- STOL aircraft systems development coordination, considering vehicle design, airport facilities and related ground environment, transportation modes interface and airspace management p0285 A72-25255
- SECANT system of aircraft separation and control by nonsynchronous technique for midair collision avoidance [SAE PAPER 720313] p0289 A72-25577
- Digital solid state altitude encoder for ATC transponder reporting, covering Gray and Gillham codes [SAE PAPER 720314] p0289 A72-25578
- ATC system, discussing flight data and radar processing functions and terminal automation program p0300 A72-25875
- FAA automated ATC system, discussing subsystems related to operational and nonoperational computer program components, data entry and display, communication, personnel and environments p0304 A72-27000
- Trends in civil ATC discussing plans to increase terminal capacity, surveillance system and use of multiple synchronous satellites for ocean travel efficiency improvement p0307 A72-27103
- Continuous wave Doppler radar with microwave oscillator for ATC measurements and surveillance p0309 A72-27403
- STOL aircraft role in civil aviation, discussing short range operation, ATC, reduced noise and weather capability p0310 A72-27518
- Communication aspects of aeronautical satellite system, considering aircraft equipment, ground stations, ATC, type of access and frequency assignment p0310 A72-27658
- Secondary surveillance radar systems design and planning for ATC application p0344 A72-28698
- Meteorological information requirements for V/STOL aircraft design, airport location, runway orientation, aircraft operations and ATC simulation p0349 A72-28869
- Information theory approaches to air navigation, discussing ATC, collision avoidance and computer applications p0350 A72-29013
- Statistical analysis for single airport ATC digital simulation using Poisson distribution law, calculating optimal number of channels p0352 A72-29179
- Aircraft antennas design for radio links to satellites for aeronautical communication and ATC, proposing use of beam steering system p0354 A72-29347
- Hypersonic commercial aircraft operational problems, considering passenger physiology limits flight profile, sonic pollution, traffic demands, route structure, etc p0362 A72-30830
- ATC operational systems, discussing global surveillance and voice and data communication between aircraft and earth station p0363 A72-31141
- ATC systems fast-time simulation, emphasizing importance of human operator performance realistic modeling p0396 A72-32097
- ATC procedures training by digital radar simulators, taking into account geographic terrain, radar, wind and aircraft characteristics and flight plans p0397 A72-32098
- Area navigation requirements by general aviation, discussing random routing, ATC system and

aircraft approach spacing p0398 A72-32202

ATC system organization in terms of optimal operating conditions for civil and military airspace users, discussing navigation systems, human factors, equipment reliability, etc p0401 A72-32455

Aircraft on-time operation and air traffic problems, considering solution requirement formulation and funding suggestions p0402 A72-32462

Integrated civil/military ATC system for upper airspace control /UAC/ center at Karlsruhe p0416 A72-34108

Mediator plan for joint civil/military ATC organization at London center, discussing sectorization, control and radar facilities, flight plan processing and communications p0416 A72-34109

Ranging signals for aeronautical satellite systems p0450 A72-35220

Book - Minimum operational characteristics for vertical guidance equipment used in airborne volumetric navigation systems [DO-152] p0455 A72-35800

ATC IC transponder used with secondary surveillance radar, discussing design features p0461 A72-37048

Atmospheric turbulence and the ATC system. p0462 A72-37049

Potential value of turn-rate telemetry in tracking of aircraft equipped with discrete address beacon system /DABS/ for ATC, discussing tracking algorithms design p0489 A72-37282

The Gander automated air traffic system. p0492 A72-37748

Study of the flow of air traffic and capacity of a control system p0493 A72-37797

STOL-based short haul transportation feasibility for airport congestion alleviation from airline viewpoint, discussing system requirements, economic factors and safety [AIAA PAPER 72-807] p0497 A72-38120

4-D guidance system design with application to STOL air traffic control. p0501 A72-38252

Air traffic flow control - Problems and approaches. p0501 A72-38254

Application of optimization techniques to near terminal area sequencing and flow control. p0502 A72-38255

An investigation of vehicle dependent aspects of terminal area ATC operation. p0502 A72-38256

Operational implementation of area navigation. p0546 A72-40279

Area navigation systems integration into existing ATC and man/machine relationship problems, considering cockpit workload coordination p0546 A72-40280

Automatic position reporting, ATC communication, weather information and message identification via digital ground-air-ground data link, discussing operational and maintenance requirements p0546 A72-40286

ATC services configuration with secondary surveillance radar and primary radar data acquisition system, discussing signal processing by automated decoder p0547 A72-40288

Air traffic density effect on secondary surveillance radar operation in ATC for aircraft identification and position determination, proposing selective address system p0547 A72-40289

Design, operation and performance of time-frequency midair collision avoidance system, noting air traffic controller backup for departure, enroute and arrival control p0548 A72-40295

Midair collision prevention independent of ATC, discussing aircraft lighting, collision avoidance systems and proximity warning indicator p0548 A72-40297

An air traffic controller's view on area navigation and ATS requirements related thereto.

p0548 A72-40299

Active transistorized directional dipole VHF receiving antennas for ATC and mobile applications and field intensity measurement p0549 A72-40527

Radar double beam dielectric radiator antenna design for ATC in 1250-1350 MHz range p0549 A72-40530

Terminal airspace navigation and aircraft ground handling control, discussing air traffic controllers and pilots functions in context of workload and automation p0549 A72-40546

Shaped coverage patterns with satellite array antennas. p0550 A72-40884

Future trends in air traffic control and landing. [ICAS PAPER 72-04] p0552 A72-41129

Investigations on the use of a Kalman filtering method in tracking systems for air traffic control. [ICAS PAPER 72-43] p0555 A72-41168

Discrete address beacon system /DABS/ development for surveillance and ground-air communications in support of ATC automation p0569 A72-43151

Trends in the control of air-traffic flows in the air space p0597 A72-43640

The optimal control of merging aircraft - Implementation of the hybrid air traffic controller. p0599 A72-43868

Flight safety from general aviation viewpoint in West Germany, discussing ATC and flight rules relative to airspace use [DGLR PAPER 72-036] p0605 A72-44615

Air traffic, collision risks, defense zones, airspace structure and central planning agency for flight safety problems reform [DGLR PAPER 72-038] p0605 A72-44617

Air traffic control radar beacon systems and laser warning systems [AD-725743] p0035 N72-10543

System and method for position locating for air traffic control involving supersonic transports [NASA-CASE-GSC-10087-3] p0091 N72-12080

Simulation and analysis of characteristics of air traffic control voice communication channels [FAA-RD-71-78] p0095 N72-12578

Proposal for air traffic control of landing aircraft near airports [NASA-CR-124640] p0095 N72-12580

Estimates of maximum number of aircraft likely to be airborne simultaneously over Pacific for planning operational satellite service p0096 N72-12588

Analysis of causes for air carrier delays in operations at major airports and recommendations to alleviate sources of delay [AD-726061] p0096 N72-12593

Air traffic control systems emphasizing pilot participation [NASA-CR-124696] p0111 N72-13580

Analysis of adequacy of omnirange and distance measuring equipment for navigation of V/STOL aircraft in Los Angeles, California area [FAA-RD-71-96] p0111 N72-13586

Minutes of hearing on career program for air traffic controllers p0113 N72-13933

Evaluation of proposed airport traffic control tower for intermediate activity [FAA-WA-72-2] p0157 N72-14273

Development and evaluation of off-airport satellite terminal concepts with emphasis on time and cost impedances [AD-724958] p0157 N72-14289

Development of criteria for evaluating airport traffic levels to determine eligibility for installation of visual flight rules towers [AD-729443] p0161 N72-14679

Update of STOL bibliography, including design, operation, guidance, air traffic control, and STOLports [UTIAS-176] p0165 N72-15002

Design, development, and evaluation of locator equipment to provide aircraft position information for flight inspection of navigation

- Development of computer-oriented algorithms for application to solution of air traffic control and terminal area guidance problems  
[NASA-TN-D-6773] p0382 N72-23017
- Analysis of discrete address beacon system operation for air traffic control to identify problems created by interrogation scheduling  
[AD-737294] p0389 N72-23671
- Development of air traffic control procedure using inertial navigation position reports as input data for computer graphics presentation  
[FAA-RD-71-92] p0427 N72-24673
- Analysis of collision hazards involved in VFR flight near clouds and effect of safe vertical clearance from clouds to reduce aircraft accidents  
[AD-737804] p0427 N72-24682
- Catalog on capacity and efficiency of air traffic control systems

[AD-737513] p0427 N72-24683  
FAA Airport and Airway System unit cost estimates and allocation study

Performance tests of L band communication concepts for air traffic control equipment installed in Applications Technology Satellite-F [NASA-TN-X-65906] p0429 N72-24982

Design and development of collision avoidance system for use with air traffic control system [ONERA-TP-1091] p0436 N72-25601

Analysis of air traffic control capabilities with emphasis on flight safety and systems functions [FAA-RD-72-2] p0472 N72-26523

Simulation study of airspace control corridor for Boston terminal area [AD-739130] p0472 N72-26526

Congressional hearing concerning penetration of US defense system by Cuban aircraft on flight from Havana, Cuba to New Orleans, Louisiana, 26 October 1971 p0472 N72-26526

Congressional hearings concerning undetected flight of civilian aircraft from Havana, Cuba to New Orleans, Louisiana on October 26, 1971 p0475 N72-26986

Change in aircraft congestion due to introduction of STOL aircraft into airport operation p0475 N72-26987

Analysis of terminal area flight procedures and air routes for supersonic transport aircraft on transatlantic flights from Kennedy International Airport, New York [NASA-TN-D-6801] p0476 N72-27007

Performance tests of instrument landing system localizer to include system and monitor stability and monitor operation under degraded system performance [FAA-RD-72-50] p0477 N72-27010

Systems analysis of analog and digital voice coding techniques for use with satellite based air traffic control system [NASA-CR-122432] p0485 N72-27694

Characteristics and operation of air traffic control radar system installed at USSR airports [JPRS-56463] p0485 N72-27701

Methods for performing evaluation and processing data following flight tests of air traffic control beacon [AD-738680] p0486 N72-27709

Procedures for determining capacity of air traffic control systems and application to long range planning, management decisions, and system performance evaluation [AD-738892] p0486 N72-27710

Air traffic control procedures for aircraft carrier operations based on trajectory optimization and computer-aided reassignment [AD-739713] p0486 N72-27713

Mathematical models for determining effects of voice communication constraints on air traffic control in terminal control sector p0517 N72-28171

Minimum performance standards for airborne ATC transponder equipment for use with ATC radar beacon system [DO-150] p0518 N72-28229

Development of broadcast system of flight traffic control for increased flight safety based on increased pilot participation of control procedures [NASA-CR-127452] p0522 N72-28662

Design and development of airborne traffic control system for aircraft collision warning and avoidance p0522 N72-28671

Annotated bibliography of air traffic control activities and collision avoidance systems for improved aviation safety - September 1968 to April 1972 [FAA-WA-72-41] p0537 N72-29672

Simulation program for ESRO air traffic control network based on two navigation satellites [SESA-EX-5072-15.786/72] p0537 N72-29674

Developments in air traffic control equipment to include radar technology, airborne graphical displays, influence of propagation effects on navigation, and microwave landing guidance systems [AD-740877] p0537 N72-29676

Bibliography of air traffic control systems to include control centers, operators, communication equipment, computer applications, display devices, and navigational aids [AD-741200] p0537 N72-29680

Career program management for air traffic controllers p0589 N72-31652

Cathode ray tube terminals for air traffic control teletypewriter systems [AT-7330-OT] p0626 N72-32183

Nonlinear programming for air traffic control systems [AD-743569] p0630 N72-32596

Design of automatic ground control system for controlling aircraft arriving in random fashion at terminal areas [NASA-CR-128298] p0630 N72-32639

System concept development and testing of aircraft cockpit traffic situation display for improved air traffic control [PTL-R-71-2] p0630 N72-32644

Development and evaluation of equipment and automation proposed for air traffic control systems for late 1970 and 1980 time period [AD-743635] p0630 N72-32645

Maximum throughput rate for runway serving single stream of landing aircraft [AD-744481] p0630 N72-32648

Effects of differential target velocity, horizontal or vertical plane conditions, and air traffic controller experience on intersection time estimation accuracy of converging targets [AD-745119] p0630 N72-32649

National plan for development of civil/military microwave landing system [NASA-TN-X-68637] p0646 N72-33633

Concept for automating air traffic control in terminal area with navigation and guidance system primarily dependent on airborne equipment [NASA-TN-D-6992] p0646 N72-33644

Air traffic control tasks, displays, surveillance technology, microwave landing guidance system, and communication, navigation, identification system [AD-744826] p0647 N72-33645

## AIR TRANSPORTATION

Air transportation system design for safety and efficiency, discussing navigation facilities and surveillance systems employment for blunder prevention p0012 A72-11117

STOL aircraft for solving noise reduction and land use problems in future transportation systems, discussing airport location and layout for growing air traffic p0013 A72-11153

General and commercial aircraft service needs in air transportation, considering FAA and CAB roles and policies p0015 A72-11716

Short haul air transport system need for future short takeoff and landing aircraft, considering airports, airways, economics and navigation and landing aids p0015 A72-11719

Civil aviation air transportation contributing factors to American economy, considering disposable income, airline fares and time-trend variable p0016 A72-11721

Short haul operating systems in air transportation environments, discussing terminal vs cruise configurations, costs and noise abatement p0056 A72-13422

Air transport vs other travel, discussing time, costs, popularity and technology p0057 A72-13485

Short-short haul STOL network economics for commuter ports in Detroit region, estimating service demand, aircraft number and maintenance costs p0059 A72-13696

Soviet look on air transport economics covering efficiency and control improvement, maintenance, work and wages, tariffs, cost and revenues, etc p0061 A72-14098

Air transportation evolution and relation to atmospheric and noise pollution

# SUBJECT INDEX

# AIRCRAFT ACCIDENTS

- Review of US civil aircraft accident data with related statistics on air carrier operations and safety records for year 1969 [PB-203183] p0220 N72-17016
- Psychological autopsy for analyzing immediate psychodynamic processes leading to suicidal aircraft accidents [FAA-AM-72-2] p0268 N72-19020
- Report of aircraft accident involving Beechcraft 99 air taxi at Allentown, Pennsylvania on 24 October, 1971 [NTSB-AAR-72-3] p0331 N72-21002
- Investigation of fire aboard Vickers Viscount aircraft following landing at Honolulu, Hawaii on 8 August, 1971 [NTSB-AAR-72-2] p0331 N72-21003
- Relative incidence and cost data for orientation-error accidents in regular Army UH-1 aircraft during fiscal year 1968 [AD-735457] p0332 N72-21016
- Briefs of US general aviation aircraft accidents involving missing aircraft and missing aircraft later recovered during 1969 [PB-205097] p0333 N72-21021
- Briefs of US general aviation aircraft accidents involving air taxi operations during 1969 [PB-205096] p0333 N72-21022
- Briefs of US general aviation accidents involving aerial application operations during 1969 [PB-204811] p0333 N72-21025
- Report of aircraft accident involving Aero Commander aircraft at Aspen, Colorado on 22 January, 1970 [PB-206562] p0386 N72-23044
- Practical application of mishap data in Army aircraft system safety programs p0439 N72-25967
- Analysis of survival following crashes of military aircraft and identification of areas for improvement in structural design [AD-739370] p0481 N72-27044
- Analysis of helicopter accidents to determine effectiveness of crash resistant fuel system installed in UH-1 helicopter [AD-739567] p0517 N72-28023
- AIRCRAFT ACCIDENTS**
- Cockpit information for pilot and flight crew as key to transport aircraft accident prevention, discussing cockpit layout and displays in terms of flight safety requirements p0066 A72-14813
- Airborne collision avoidance system equipment for general aviation aircraft, discussing logic functions, transmission modes, data handling tradeoffs and ATC procedure interactions p0068 A72-14830
- Atmospheric turbulence effects on aircraft flight and design, covering accidents and costs, turbulence generation, prediction, measurements and load alleviation devices [AIAA PAPER 72-219] p0129 A72-16885
- High performance aircraft takeoff and landing accidents, investigating survival rates p0193 A72-21563
- Survival rates in USAF accidents during 1965-69, noting visual sighting as primary rescue factor p0194 A72-21564
- Behavioral inaction under stress conditions similar to survivable aircraft accident, tabulating hesitation statistics p0194 A72-21570
- Book on general aviation safety covering statistical accident records, accident analysis, crashworthiness, preventive measures, etc p0236 A72-23750
- Test facility design for aircraft crashworthiness evaluation and improvement, considering survivable accident surrounding conditions, equipment and testing methods [SAE PAPER 720323] p0290 A72-25586
- Safe aircraft fuels crashworthiness evaluation in terms of ignition susceptibility parameter, noting full scale crash environment simulation [ASME PAPER 72-GT-27] p0294 A72-25623
- General aviation crashworthy personnel restraint systems, discussing strap take-up devices, comfort, fit and ease of use p0345 A72-28726
- Atmospheric turbulence and the ATC system. p0462 A72-37049
- Corporate business aviation performance record in light of aircraft accident statistics, noting high percentage of approach-landing accidents and means for improvement p0507 A72-39743
- Aircraft accidents during nonprecision approaches under adverse weather conditions, discussing landing aids use for corporate jet aircraft p0508 A72-39745
- Electrostatic charge on an aircraft and lightning striking the aircraft p0545 A72-40171
- A survey of rotary-wing aircraft crashworthiness. p0565 A72-42763
- An assessment of energy absorbing devices for prospective use in aircraft impact situations. p0565 A72-42764
- Statistical analysis of home built aircraft accidents [PB-201438] p0031 N72-10038
- Statistical analysis of weather effects in aircraft accidents [PB-201437] p0031 N72-10039

## AIRCRAFT COMMUNICATION

## SUBJECT INDEX

Simulator for physical forces experienced by carrier aircraft during catapult launches and arrested landings, considering external stores safe suspension  
p0403 A72-32620

Direct lift control feasibility for integration into F-14A automatic carrier landing system /ACLS/, using moving-base six-degree-of-freedom simulation  
[AIAA PAPER 72-873]  
p0505 A72-39127

Measurement of noise levels on aircraft carrier deck during aircraft operations and effects on deafness risk and verbal communication interference  
[AD-729067]  
p0107 N72-13038

Development and characteristics of turbine type energy absorber arresting gear for use on aircraft carriers  
[AD-728682]  
p0108 N72-13249

Spring constants for shock analysis of aircraft carrier catapult installations  
[AD-729249]  
p0157 N72-14288

Performance of vertical contact analog display system used in carrier landing  
[AD-730464]  
p0167 N72-15013

Operational evaluation of aircraft landing aid stabilization system installed on aircraft carrier  
[AD-732446]  
p0221 N72-17199

Computerized system for numerical analysis of carrier aircraft  
[AD-732755]  
p0254 N72-18030

Development of method for determining ramp altitude clearance of aircraft approaching aircraft carrier for landing and identification of unsafe situation  
[AD-732760]  
p0254 N72-18032

Factor analysis and statistical data for human carrier landing performance criteria  
[AD-733703]  
p0256 N72-18120

Flight tests to determine suitability of aircraft for operation on aircraft carriers  
p0329 N72-20988

Jet blast deflector for controlling shipboard flight deck environment  
[AD-735877]  
p0341 N72-21963

Accuracy of vertical contact analog display in simulating carrier landings, and error contributed by display resolution, temporal loading, and control complexity  
p0375 N72-22642

Flight evaluation of simulated carrier approach task considering engine response, flight path stability, tail lift, and direct lift control  
[AD-736968]  
p0385 N72-23039

Accelerated life tests to determine effects of arrested landing stresses on C-2 aircraft structure  
[AD-739331]  
p0480 N72-27036

Air traffic control procedures for aircraft carrier operations based on trajectory optimization and computer-aided reassignment  
[AD-739713]  
p0486 N72-27713

Optimization and performance prediction of computer simulated cable type aircraft recovery system  
[AD-740098]  
p0519 N72-28272

Safety precautions, visual checks, static proof loads, and hydrostatic tests of type C13 Mod 1 catapults and associated launcher equipment  
[AD-738445]  
p0519 N72-28273

Evaluation of method for predicting performance of steam catapults used for shipboard aircraft launching  
[AD-742804]  
p0585 N72-31027

Inflight variable stability airplane investigations during carrier approaches to determine effect of flying qualities parameters on approach performance  
p0622 N72-32037

## AIRCRAFT COMMUNICATION

Civil aviation communication systems, discussing short and long range communications, satellite channel capacities, digital data link systems, ATC, weather broadcasts, etc  
p0055 A72-13416

Communications and navigation trends in ATC, emphasizing use of improved existing systems  
p0115 A72-15781

Soviet book on aircraft radio equipment covering transmission and reception, velocity and coordinates measurements, siting and navigation, flying target interception, reconnaissance, landing systems, etc  
p0122 A72-16530

Airline pilot performance in automated ATC system involving use of surveillance data and instantaneous discrete communications  
p0137 A72-17331

Airline air/ground radio communications and data link service implementation for San Francisco-Hawaii center  
p0138 A72-17337

Automation in planning and execution of flights, considering navigation, communication, flight instruments monitoring, control/stabilization and warning systems  
p0230 A72-22780

Airborne VHF omnirange /VOR/ systems minimum operational standards for navigation and communication in air traffic control  
p0242 A72-24725

Aircraft and water vehicles mobile communications via stationary satellite, discussing optimum multiple access and repeater configuration  
[AIAA PAPER 72-565]  
p0308 A72-27376

Pacific Ocean meteorological data collection from military and civil aircraft in-flight reports, discussing computer processing for daily analysis and monthly and seasonal means  
p0349 A72-28874

ATC operational systems, discussing global surveillance and voice and data communication between aircraft and earth station  
p0363 A72-31141

Aeronautical communication satellite technical and economic survey, considering wave propagation, noise, aircraft antennas and VHF and UHF links  
p0393 A72-31180

Economic analysis of aeronautical communication system via satellite, noting cost estimates and annual charge per user  
p0548 A72-40298

Ground-based Doppler navigation waveguide slot antenna design for optimal directional multilobe reception from aircraft  
p0549 A72-40509

VHF/UHF ground-air-ground communications siting criteria and field manual  
[FAA-RD-71-76]  
p0092 N72-12087

Technologies of computerized flight management and control systems, automated communications systems, and navigation and surveillance systems in future avionics  
p0104 N72-13011

Adaptive antenna arrays for aircraft communication systems  
[AD-729106]  
p0156 N72-14243

FAA engineering and development programs for aircraft safety, landing, navigation, communication and support services  
p0391 N72-23980

## AIRCRAFT COMPARTMENTS

Aircraft crash fire protection, using passenger compartment heat shield of fire-retardant polyisocyanurate foam and intumescent paint  
p0057 A72-13484

Aircraft transparencies from civil operator viewpoint, considering replacement cost of flight deck and cabin windows  
p0305 A72-27005

Concorde aircraft optical transparency components design characteristics and reliability tests, noting visor, pilot forward windshield, flight deck side windows and cabin windows  
p0306 A72-27012

Measurement of B-58 crew compartment vibration environment during high speed, low altitude flight  
[AD-730288]  
p0154 N72-14013

Development of standardized method for evaluating physical geometry of aircrew stations - Vol. 1  
[AD-738006]  
p0433 N72-25015

Computer programs for improved methods for evaluating physical compatibility of crew members with crew stations - Vol. 3  
[AD-738007]  
p0433 N72-25016

Development of mathematical model for evaluating compatibility of flight crew personnel and

## SUBJECT INDEX

## AIRCRAFT CONTROL

- aircraft crew stations - Vol. 4  
[AD-738008] p0433 N72-25017
- Validation of man-model joint movement parameters to determine compatibility of flight crews and aircraft compartments - Vol. 5  
[AD-738009] p0433 N72-25018
- Standard formula for allowable cabin leakage in military aircraft  
[AD-739687] p0482 N72-27048
- AIRCRAFT CONFIGURATIONS**
- Industry assisted state of art assessment of high lift turbofan configurations for USAF STOL tactical transport technology program  
[SAE PAPER 710758] p0004 A72-10255
- Sonic boom generation, propagation and minimization, discussing atmospheric turbulence and temperature gradients and aircraft configuration effects  
[AIAA PAPER 72-194] p0128 A72-16849
- VJ-101A and B V/STOL weapon system design, describing various propulsion system configurations  
p0183 A72-19250
- V/STOL weapon system VJ-101, describing He-231 design development from tailsitter concept to canard configuration with tilting wing-tip engines  
p0183 A72-19251
- Engine fan-compressor maximum noise reduction for given aircraft configuration by acoustic linings on nacelle inlet and exhaust walls  
p0183 A72-19268
- Iron rotational hysteresis effect in cold magnetic balance wind tunnel system for spinning aircraft configurations and subsonic flow regimes  
p0244 A72-24776
- Flutter analysis of propeller whirl flutter, twin boom aircraft, T tail configuration, servo tabs and all-moving tail, discussing structural variations effects on service life  
[SAE PAPER 720309] p0289 A72-25573
- European passenger aircraft Airbus program, discussing various configurations performance, economic factors and technical support  
p0307 A72-27108
- Future short haul aircraft transportation systems, discussing aircraft forms, noise reduction technology and runway requirements  
p0311 A72-27660
- Relationship between static pressure error /position error/ and measurable flight parameters for different aircraft weights and configurations  
p0412 A72-33637
- B-1 aircraft design features, discussing aerodynamic configurational aspects, structural components and materials, engine inlets, fuel, hydraulic control and avionics systems  
p0441 A72-34223
- New VTOL transport aircraft designs by VFW Pokker. II  
p0452 A72-35477
- V/STOL developments in Hawker Siddeley Aviation Limited.  
p0462 A72-37096
- B-52 test vehicle flight demonstration program for control configured vehicles /CCV/ technology concepts validation, noting gross weight reduction  
[AIAA PAPER 72-747] p0498 A72-38123
- Advanced technology transport /ATT/ aircraft configurations design parameters analysis, considering cruise speed, passenger capacities, ranges, noise level and economics  
[AIAA PAPER 72-757] p0498 A72-38127
- V/STOL aircraft configurations with lifting counter-rotating disks, presenting aerodynamic coefficients from rotating water tank experiments  
p0551 A72-41070
- F-111A inlet nozzle dynamic distortion diagnostics for airframe-propulsion integration based on flight and transonic wind tunnel tests  
[ICAS PAPER 72-18] p0553 A72-41143
- Analytic prediction of aircraft spin characteristics and analysis of spin recovery.  
[AIAA PAPER 72-985] p0561 A72-42329
- An aerodynamics model applicable to the synthesis of conventional fixed-wing aircraft.  
[SAE PAPER 908] p0595 A72-43455
- Mission analysis and performance program as part of computerized aircraft configuration synthesis process, describing interfaces with other system modules  
[SAE PAPER 909] p0595 A72-43456
- Control requirements for control configured vehicles.  
p0614 A72-45349
- Wind tunnel model boundary layer reduction through suction for accurate simulation of high Reynolds number full scale aircraft characteristics  
p0076 N72-11875
- Aeroelasticity, unsteady aerodynamics, vibration analysis, and flutter in fixed wing aircraft  
[BAE-TM-813] p0079 N72-11892
- Analytical method for determining three dimensional vortex interaction effects on aerodynamic properties of wing and aircraft configurations  
[NASA-TT-F-14074] p0100 N72-12982
- Technological forecasting for advanced airport-airplane interface transportation systems  
p0104 N72-13009
- Technological forecasting of future pilot-aircraft interface requirements  
p0104 N72-13010
- Laplace transform applied to aerodynamic characteristics prediction of aircraft configurations in subsonic flow  
[NLR-HP-71018-U] p0321 N72-20025
- Techniques and procedures for conducting flight tests of lifting body type aircraft during transonic and supersonic flight conditions  
[NASA-TN-X-68306] p0329 N72-20986
- Dual fuselage aircraft design with yavable wing and horizontal stabilizer  
[NASA-CASE-ARC-10470-1] p0332 N72-21010
- Validation of man-model joint movement parameters to determine compatibility of flight crews and aircraft compartments - Vol. 5  
[AD-738009] p0433 N72-25018
- Design procedures and supporting data for configuring light aircraft to produce optimum riding and handling qualities  
[NASA-CR-1975] p0464 N72-26005
- Analytical procedures and design data for predicting stability and control characteristics of light, propeller-driven aircraft  
[NASA-TN-D-6800] p0464 N72-26006
- Techniques for reducing injuries during emergency landing of light, fixed-wing aircraft  
[NTSB-AAS-72-3] p0465 N72-26011
- Method for estimating equilibrium temperature distribution on flat plates, wedges, cylinders, and cones in constant velocity flight in air  
[ESDU-69012] p0648 N72-33938
- AIRCRAFT CONSTRUCTION**
- U AIRCRAFT STRUCTURES**
- AIRCRAFT CONTROL**
- NT HELICOPTER CONTROL**
- Aircraft pitching and yawing cross couplings compensation at high speed  
p0008 A72-10506
- European A300B airbus flap and slat systems and tailplane actuator for longitudinal pitch trim control  
p0009 A72-10725
- Handling qualities simulation program for augmentor wing jet STOL research aircraft considering control devices design  
p0015 A72-11654
- STOL aircraft roll moment control possibility for externally-blown jet flap due to engine failure  
p0015 A72-11700
- B-1 strategic supersonic bomber design, emphasizing variable sweep wing, landing gear, control and instrumentation  
p0018 A72-12226
- Soviet book on in-flight studies of aircraft stability and controllability covering dynamic characteristics, measurements, balancing curves, aerodynamic forces and limiting and special flight regimes  
p0021 A72-12542
- Self organizing adaptive aircraft control system with C criterion pitch axis performance and failure compensation  
p0053 A72-12920
- Aircraft power plant management, discussing integration of intake, engine and exhaust system from control standpoint

- Pilots in aircraft systems management involving machine and air traffic environment p0055 A72-13418
- Control technique and flight quality for crew workload reduction to improve military and civil aircraft flight safety p0055 A72-13419
- Aircraft integrated data systems application to flight safety analysis, engine performance monitoring, crew proficiency, autoland evaluation, operations and logistics p0059 A72-13640
- Aircraft landing microwave guidance and control systems, considering general dynamic model for aircraft translational motion determination in earth fixed coordinate system p0065 A72-14726
- Airplane hydraulic control systems digital simulation, using method of characteristics for distributed parameter analysis of transmission line dynamics p0067 A72-14821
- [ASME PAPER 71-WA/FE-21] p0117 A72-15928
- Feedback gains for STOL aircraft display pilot interactive flight director design, using computerized approach-touchdown simulation and optimal control theory p0117 A72-15956
- [ASME PAPER 71-WA/AUT-9] p0117 A72-15956
- Aircraft steering dynamics model with translational and rotational equations, considering zero sideslip and acceleration and lift bank angle transfer functions p0118 A72-16112
- Dynamic stability, control and structural response of transonic jet transport to atmospheric turbulence p0119 A72-16348
- Optimization algorithms for jet transport aircraft inertially based flight trajectory control in turbulent atmosphere, comparing with ILS p0120 A72-16472
- Aircraft flight control system MTBF field operational and MIL-STD-781 testing, establishing data baseline for reliability predictions p0125 A72-16662
- Direct side force control by rudder deflection and asymmetrical drag utilization to cancel yawing moment, discussing variable stability T-33 flight tests p0133 A72-16946
- [AIAA PAPER 72-94] p0133 A72-16946
- Aircraft proximity control for ATC system using national secondary surveillance radar /SSR/ for CAS-PWI functions p0137 A72-17330
- Extremal field properties in optimal control problem applied to aircraft flight over assigned distance with minimum fuel consumption p0139 A72-17727
- Flight simulator for aircraft design, emphasizing compromise between performance and control requirements to avoid excess weight and drag p0142 A72-18245
- Multiplier method for discrete optimization problems with equality constraints, applying to time optimal control for V/STOL aircraft p0144 A72-18387
- Sensitivity functions for differential equations describing aircraft perturbed motion, noting dependence on time derivatives, system parameters and coordinates p0180 A72-18977
- Aircraft optimal control for case of continuous data flow on time variable flight conditions p0181 A72-18979
- Singular surfaces for time optimal control in zero sum differential games between two aircraft in three dimensional space, assuming spherical acceleration vectorgram p0183 A72-19279
- Optimal thrust reversing in pursuit evasion games between two aircraft in horizontal plane, considering cost functions and termination criteria p0183 A72-19282
- Model-following control for nonlinear multivariable plants, considering implicit algorithm solution and application to variable stability aircraft control synthesis p0185 A72-19708
- Aircraft altitude two-loop feedback control system designed by compensation parameter variation technique, determining correlation between system sensitivity computations and observations p0189 A72-20592
- Book on dynamics of atmospheric flight covering unsteady motion, small disturbance theory, aerodynamic characteristics, aircraft stability and control, handling qualities, etc p0192 A72-21491
- Mystere business jet aircraft flight instruments, acceleration, control and stall characteristics p0197 A72-21900
- Soviet book on control system technology for flight vehicles covering production of mechanical, hydraulic, pneumatic, electric and electronic elements p0199 A72-22024
- Anthropotechnical aspects of V/STOL aircraft control, discussing instrument and control systems concepts based on development and flight tests of experimental Do-31 VTOL aircraft p0230 A72-22784
- DC 10 aircraft automatic flight guidance system, noting dual-dual fail-passive autoland p0234 A72-23448
- Near optimal closed loop control laws for fixed time pursuit-evasion differential game between two aircraft in vertical plane, using dynamic modeling p0236 A72-23805
- State sensitivity functions in aircraft parameter identification for lateral dynamics under aileron deflection from model response and in-flight test data p0236 A72-23807
- Stochastic control theory application to flight problem, discussing aircraft identification and adaptive control over wide environmental range p0247 A72-25146
- Extremal field properties in optimal control problem applied to aircraft flight over assigned distance with minimum fuel consumption p0285 A72-25329
- Flight airworthiness requirements development for supersonic transports, V/STOL and transport and general aviation aircraft, exploring critical control and stability parameters p0288 A72-25570
- [SAE PAPER 720306] p0288 A72-25570
- SECANT system of aircraft separation and control by nonsynchronous technique for midair collision avoidance p0289 A72-25577
- [SAE PAPER 720313] p0289 A72-25577
- Aft center of gravity travel effects on aircraft longitudinal control response characteristics p0290 A72-25581
- [SAE PAPER 720318] p0290 A72-25581
- Propulsion control systems design for military and commercial V/STOL aircraft, considering power management performance with minimum weight and maximum reliability and maintainability p0297 A72-25659
- [ASME PAPER 72-GT-79] p0297 A72-25659
- Flight tests of stability augmentation system for light airplane improving pilot control during IFR encounter p0309 A72-27513
- Flight test of direct side force control by rudder deflection and asymmetrical drag on T-33 airplane, noting use in dive bombing p0310 A72-27520
- Low level vertical wind shear effect on aircraft control, considering runway selection with respect to surface wind conditions p0348 A72-28862
- Airplane attitude display motion relationship to external world as factor in pilot error due to visual frame of reference shift p0363 A72-31151
- Aircraft inertial navigation system, discussing mode selection unit, digital computer and control display for operator communication with system p0394 A72-31596
- L-1011 propulsion, fuel, flight control, navigation, avionics, communication, electrical, environmental control and auxiliary power systems, discussing structure and high lift devices p0400 A72-32427

# SUBJECT INDEX

# AIRCRAFT CONTROL CONTD

- Aircraft electronic display for pilot precise control in complex tasks, discussing clarity, stability and readability of CRT images  
p0403 A72-32632
- Aircraft CRT electronic displays discussing operational flexibility versus control and monitor complexities, economics, reliability and human factors  
p0404 A72-32636
- Digital attitude and heading reference system computer for aircraft heading control, discussing design and performance features  
p0407 A72-33244
- Flight test instrumentation system for measurement of aircraft performance, stability and control characteristics during nonsteady flight  
p0412 A72-33639
- Russian book on flight dynamics covering horizontal flight, takeoff, climb and landing characteristics, meteorological conditions, helicopters, trajectory problems, stability and controllability analysis, etc  
p0413 A72-33874
- A pilot's opinion - VTOL control design requirements for the instrument approach task.  
[AHS PREPRINT 644] p0447 A72-34504
- Russian book on aircraft design covering flight conditions, structure and control characteristics, production and stress analysis  
p0451 A72-35448
- Hybrid mechanical-electrical mechanizing techniques for aircraft flight control systems  
p0454 A72-35576
- Development of STOLAND, a versatile navigation, guidance and control system.  
[AIAA PAPER 72-789] p0496 A72-38106
- STOL transport stability and control derivative prediction methods and accuracy requirements.  
[AIAA PAPER 72-780] p0500 A72-38139
- Lift and control augmentation by spanwise blowing over trailing edge flaps and control surfaces.  
[AIAA PAPER 72-781] p0500 A72-38140
- Optimal selection of stability augmentation parameters for excellent pilot acceptance.  
p0501 A72-38227
- An optimal model-following flight control system for manual control.  
p0501 A72-38228
- A generalized method for the identification of aircraft stability and control derivatives from flight test data.  
p0502 A72-38260
- A versatile Kalman technique for aircraft or missile state estimation and error analysis using radar tracking data.  
[AIAA PAPER 72-838] p0505 A72-39089
- Advanced fighter controls flight simulator for all-systems compatibility testing.  
[AIAA PAPER 72-837] p0505 A72-39090
- Synthesis and analysis of a fly-by-wire flight control system for an F-4 aircraft.  
[AIAA PAPER 72-880] p0505 A72-39119
- Maneuver load control and relaxed static stability applied to a contemporary fighter aircraft.  
[AIAA PAPER 72-870] p0506 A72-39129
- System analysis and synthesis for B-52 Control Configured Vehicle program, discussing flutter mode and maneuver load control and augmented stability configurations  
[AIAA PAPER 72-869] p0506 A72-39130
- Failsafe hydraulic actuator flight control for jet aircraft.  
p0506 A72-39351
- Test of direct lift control in the case of the experimental aircraft DFVLR-FPB 320  
p0509 A72-39934
- Flight-test experience in digital control of a remotely piloted vehicle.  
[AIAA PAPER 72-883] p0510 A72-40059
- Instruments installation effect on Soviet passenger aircraft pilot performance, discussing Tupolev aircraft control systems  
p0545 A72-40173
- Operation principles, capabilities and tests of midair collision avoidance system with aircraft separation control by nonsynchronous techniques  
p0548 A72-40296
- Concorde electrically signalled fly by wire control system with mechanical linkages for standby fail-safe redundancy  
p0551 A72-41068
- Improved qualitative flight data rating scales.  
p0556 A72-41257
- Evaluation of flight instrumentation for the identification of stability and control derivatives.  
[AIAA PAPER 72-963] p0561 A72-42346
- An analysis of aircraft lateral-directional handling qualities using pilot models.  
[AIAA PAPER 72-962] p0561 A72-42347
- The optimal control of merging aircraft - Implementation of the hybrid air traffic controller.  
p0599 A72-43868
- Liquid and solid precipitation on aircraft structure surfaces, discussing potential hazards to engine components and aircraft controls due to ice formation  
p0603 A72-44339
- Effects of variations in lift and drag response to longitudinal control on the ease and quality of landing.  
p0613 A72-45333
- Application of linear mathematical model to represent human operator performance in controlling attacking fighter aircraft  
[AD-725069] p0031 N72-10042
- Analysis and calculation of basic parameters of aircraft automatic control system components  
[JPRS-54332] p0042 N72-11039
- Acquisition and analysis of aerodynamic stability and control data for vertical takeoff aircraft configurations  
[AD-726103] p0089 N72-11969
- Hydraulic actuator design for aircraft vehicle control  
[AD-875752] p0093 N72-12425
- Advanced control technology for future civil aircraft configurations  
p0104 N72-13008
- Technologies of computerized flight management and control systems, automated communications systems, and navigation and surveillance systems in future avionics  
p0104 N72-13011
- Wind tunnel tests for slot spoiler direct lift control system  
[NASA-TN-D-6627] p0149 N72-13978
- Annotated bibliography on human engineering configurations in arrangement of controls and displays in aircraft  
[AD-729840] p0149 N72-13983
- Longitudinal stability and control derivatives of jet fighter aircraft extracted from flight test data by utilizing maximum likelihood estimation  
[NASA-TN-D-6532] p0252 N72-18013
- Fly by wire and integrated actuator package techniques for developing survivable flight control system in jet aircraft  
[AD-733582] p0255 N72-18040
- Determining stability and control derivatives of airplanes from flight data using modified Newton-Raphson minimization technique  
[NASA-TN-D-6579] p0279 N72-19659
- Aerodynamic control system for controlling flutter  
[NASA-CASE-LAR-10682-1] p0332 N72-21009
- Development of direct side force control on aircraft during flight and application to improved bombing accuracy  
[AD-735294] p0334 N72-21030
- Terminal guidance system for guiding aircraft into preselected altitude and/or heading at terminal point  
[NASA-CASE-PRC-10049-1] p0339 N72-21632
- Maximum likelihood parameter estimation for extracting stability and control derivatives of aircraft from flight test data using real time digital computer  
[NASA-TN-D-6735] p0426 N72-24625
- Development of thrust control system for application to control of aircraft and spacecraft  
[NASA-CASE-MSC-13397-1] p0436 N72-25595
- Design procedures and supporting data for configuring light aircraft to produce optimum riding and handling qualities  
[NASA-CR-1975] p0464 N72-26005
- Analytical procedures and design data for predicting stability and control characteristics

- of light, propeller-driven aircraft  
[NASA-TN-D-6800] p0464 N72-26006
- Aircraft accident investigation of DC-8 crash at Kennedy International Airport, New York on 8 September, 1970  
[NTSB-AAR-71-12] p0465 N72-26013

- VJ-101A and B V/STOL weapon system design, describing various propulsion system configurations p0183 A72-19250
- V/STOL weapon system VJ-101, describing He-231 design development from tailsitter concept to canard configuration with tilting wing-tip engines p0183 A72-19251
- Aircraft design for acceptable vibration level, discussing flight vibration and runway response p0183 A72-19269
- Mitsubishi T-2 two-place supersonic trainer, describing prototype, airframe and propulsion system design and operational features p0187 A72-20306
- French, British, Italian, U.S., German and Israeli military aircraft, presenting design and performance data p0187 A72-20308
- Mercury short haul transport aircraft, emphasizing lightweight structural design with extensive use of integral machined components for fatigue safety p0187 A72-20310
- Aircraft preliminary design procedure with integrated performance simulation, using time sharing computer facility p0188 A72-20353
- Eight-place turbofan powered business jet aircraft design, discussing structure, fuel system, engines crew station and safety features p0194 A72-21572
- Emergency Life Saving Instant Exit system in aircraft fuselage for use after crash landing, discussing design and ground testing p0195 A72-21583
- Wing structural weight estimation for civil aircraft preliminary deriving generalized formula based on wing root bending moment for specified flight condition p0232 A72-22909
- Fixed wing agricultural aircraft, comparing different designs in terms of performance, safety, handling and economic efficiency p0232 A72-22940
- Airfoil ram-wing air-water hybrid vehicle X-113 Aa design and operational principles based on aerodynamic ground effect, discussing flight tested performance characteristics p0232 A72-22971
- DC-10 aircraft structural design, flight handling characteristics and fatigue tests p0234 A72-23446
- Deterministic optimization of aircraft undercarriage suspension characteristics for taxiing induced vibration minimization, discussing damping and stiffness functions and hybrid computer solution p0235 A72-23458
- Simply supported skew plates stability under combined loading, noting wing and tail design applications for high speed aircraft and missiles p0240 A72-24196
- STOL and V/STOL transport aircraft design requirements consideration based on common propulsion and lift engine types use, noting fan lift solution superiority p0244 A72-24865
- RCA SECANT aircraft collision avoidance system avionics design using nonsynchronous techniques p0245 A72-24866
- Legal aspects of international cooperation on aircraft design and production, discussing work distribution, project management and liabilities sharing p0245 A72-24881
- Mitsubishi XT-2 jet trainer aircraft, presenting design, structural and performance data p0246 A72-25107
- STOL aircraft systems development coordination, considering vehicle design, airport facilities and related ground environment, transportation modes interface and airspace management p0285 A72-25255
- Transport aircraft fuselage computerized design, determining optimal structural distribution for strength and displacement constraints [AIAA PAPER 72-330] p0285 A72-25366
- Automated optimization for preliminary design of supersonic aircraft wings, noting flutter, stresses and resonant frequency as dynamic constraints [AIAA PAPER 72-333] p0286 A72-25368
- Convective cooling system design for Mach 6 hypersonic transport Al alloy airframe, using water glycol loop network [AIAA PAPER 72-334] p0286 A72-25369
- Energy absorbing seat design for light aircraft, describing development and static and dynamic testing [SAE PAPER 720322] p0290 A72-25585
- Test facility design for aircraft crashworthiness evaluation and improvement, considering survivable accident surrounding conditions, equipment and testing methods [SAE PAPER 720323] p0290 A72-25586
- Transport aircraft aerodynamic design technology application to general aviation propeller driven twin engine aircraft, discussing wing loading and aspect ratio optimization [SAE PAPER 720337] p0291 A72-25595
- Propulsion system/airframe matching in hybrid V/STOL airplanes, stressing thrust vector management, lift engine bypass ratio and power plant packaging design [ASME PAPER 72-GT-106] p0299 A72-25671
- Super Guppy four engine aircraft characteristics, performance and loading device for bulky cargo air transportation p0300 A72-25812
- LOX supply systems installation for civil transport aircraft crew and/or passenger breathing oxygen [SAE AIR 1223] p0301 A72-26030
- Structural design and optical problems of external vision and cockpit transparencies in military aircraft

- p0305 A72-27002  
German VAK 191B V/STOL fighter aircraft design, development and flight tests, noting redundant control systems
- p0307 A72-27166  
NDT application to aircraft design and reliability, discussing fatigue life analysis and in-service monitoring for structural elements, components and airframes
- p0307 A72-27198  
Tu-154 aerodynamic design, discussing arrow wing and propulsion unit characteristics
- p0307 A72-27268  
L-1011 flight test program, discussing aircraft design, flight station, controls, flying qualities, etc
- p0310 A72-27519  
General Dynamics model 401 air superiority single engine fighter design stressing light weight structure and maneuverability at high speeds and angles of attack
- p0344 A72-28575  
Computer calculation of second order curve segment discriminant in geometrical problem associated with aircraft lofting, assessing method accuracy
- p0345 A72-28739  
Large amplitude flight simulator for fighter design refinement, noting extensive computer commitment
- p0345 A72-28757  
Meteorological information requirements for V/STOL aircraft design, airport location, runway orientation, aircraft operations and ATC simulation
- p0349 A72-28869  
Aircraft landing gear stress spectrum and design data during ground loading on airport runways, using linearized theory for model investigation
- p0359 A72-30283  
Measuring technique importance for aircraft B and D, emphasizing quartz transducer, digital control and signal processing
- p0359 A72-30286  
Book of aircraft design illustrations covering three view and perspective form low drag airfoil, aspect ratio, plain split, slotted and multiple flaps
- p0361 A72-30776  
Airbus design features, noting passenger number, operational range and propulsion engine number and location
- p0361 A72-30813  
Suboptimal feedback control for aircraft gust alleviation design, using indirect perturbation information through normal acceleration factor measurement
- p0396 A72-32025  
Book on airfoil section designs for light aircraft covering wind tunnel studies of lift drag ratio as function of angle of attack
- p0399 A72-32250  
Aircraft design for operational reliability and maintainability, emphasizing working relations coordination between manufacturer and operator
- p0402 A72-32459  
Concorde on-time operation as total management problem from design to airline operations, discussing techniques for in-flight failure diagnosis and onward reporting
- p0402 A72-32460  
Fokker VTOL transport aircraft designs, considering payload, range, runway conditions, noise, military capabilities and operational costs
- p0405 A72-33048  
V/STOL weapon system VJ-101 design, discussing one axis rocking device, suspension structure and hovering flight thrust control
- p0405 A72-33049  
STOL aircraft for civil transport applications, considering optimum design concepts, noise reduction and terminal facility requirements
- p0409 A72-33331  
B-1 aircraft design features, discussing aerodynamic configurational aspects, structural components and materials, engine inlets, fuel, hydraulic control and avionics systems
- p0441 A72-34223  
V/STOL flight control - Trend and requirements.
- p0442 A72-34240  
The flight mechanics of STOL aircraft.
- p0442 A72-34241  
Northrop A-9A attack aircraft production planning, discussing design features and management/engineering organizational changes in anticipation of USAF production contract
- p0442 A72-34391  
A-10 prototype designed for production.
- p0443 A72-34392  
The integration of composite structures into aircraft design.
- p0450 A72-35281  
Aerodynamic analysis of various flight conditions of conventional aircraft. III - Mechanical fundamentals /Dynamics of a point mass/
- p0451 A72-35440  
Russian book on aircraft design covering flight conditions, structure and control characteristics, production and stress analysis
- p0451 A72-35448  
Remote power control for aircraft generating and distribution systems.
- p0461 A72-37034  
V/STOL developments in Hawker Siddeley Aviation Limited.
- p0462 A72-37096  
V/STOL - Selection and problems of the new medium
- p0462 A72-37215  
Flow and circulation diagrams formed by events involved in optimum aircraft design configuration and structural weight selection, outlining calculation methods
- p0490 A72-37452  
Fast method for aircraft rebalance.
- p0490 A72-37453  
Active controls - Changing the rules of structural design.
- p0492 A72-37681  
Development of the Saab-Scania Viggen.
- p0492 A72-37749  
VJ-101 V/STOL aircraft design, development and flight testing, discussing takeoff and landing, hovering and transition flight and associated control problems
- p0494 A72-38032  
A computerized system for the preliminary design of commercial airplanes.
- p0496 A72-38110  
[AIAA PAPER 72-793] A flutter optimization program for aircraft structural design.
- p0496 A72-38111  
[AIAA PAPER 72-795] An integrated computer system for preliminary design of advanced aircraft.
- p0496 A72-38112  
[AIAA PAPER 72-796] Design studies and model tests of the stowed tilt-rotor concept.
- p0497 A72-38113  
[AIAA PAPER 72-804] Investigation of the commonality in development of military and commercial STOL transports.
- p0497 A72-38114  
[AIAA PAPER 72-808] The DHC-7, first generation transport category STOL - Particular design challenges.
- p0497 A72-38115  
[AIAA PAPER 72-809] Computer program for automated design of long haul transport aircraft, discussing cost effectiveness of composite materials for aircraft structure
- p0498 A72-38121  
[AIAA PAPER 72-794] Aerodynamic design and development of the Lockheed S-3A Viking.
- p0498 A72-38122  
[AIAA PAPER 72-746] B-52 test vehicle flight demonstration program for control configured vehicles /CCV/ technology concepts validation, noting gross weight reduction
- p0498 A72-38123  
[AIAA PAPER 72-747] Design for air combat.
- p0498 A72-38124  
[AIAA PAPER 72-749] Advanced technology transport /ATT/ aircraft configurations design parameters analysis, considering cruise speed, passenger capacities, ranges, noise level and economics
- p0498 A72-38127  
[AIAA PAPER 72-757] Economic impact of applying advanced technologies to transport airplanes.
- p0499 A72-38128  
[AIAA PAPER 72-758] Use of the flight simulator in the design of a STOL research aircraft.
- p0499 A72-38129  
[AIAA PAPER 72-762]

- Designing aircraft structure for resistance and tolerance to battle damage.  
[AIAA PAPER 72-773] p0499 A72-38133
- Application of advanced methods to the determination of design loads of the Lockheed L-1011 TriStar.  
[AIAA PAPER 72-775] p0499 A72-38134
- Structural development of the L-1011 Tri-Star.  
[AIAA PAPER 72-776] p0499 A72-38135
- System analysis and synthesis for B-52 Control. Configured Vehicle program, discussing flutter mode and maneuver load control and augmented stability configurations  
[AIAA PAPER 72-869] p0506 A72-39130
- Use of fixed and moving base flight simulators for the aerodynamic design and development of the S-3A airplane.  
[AIAA PAPER 72-764] p0510 A72-40052
- Tilt-propotor VTOL aircraft design evaluation based on aerodynamic and aeroelastic model and full scale performance tests  
[AIAA PAPER 72-803] p0510 A72-40054
- STOL performance criteria for military transport aircraft.  
[AIAA PAPER 72-806] p0510 A72-40055
- High subsonic transport aircraft design development based on supercritical aerodynamic configuration and advanced structural, flight control and propulsion system technologies  
[AIAA PAPER 72-756] p0510 A72-40056
- Airlines requirements for European airbus, discussing design of aircraft structure, control, pressurized cabin and propulsion system  
p0545 A72-40174
- Landing 'in the backyard' with quiet aircraft  
p0548 A72-40376
- Dutch monograph - Analysis of dynamic aircraft landing loads, and a proposal for rational design landing load requirements.  
p0550 A72-40925
- Noise radiation from V/STOL aircraft.  
[ICAS PAPER 72-22] p0553 A72-41147
- Modern landing impact load calculations and old-fashioned requirements.  
[ICAS PAPER 72-31] p0554 A72-41156
- VTOL aircraft noise reduction through design methods and flight path management in terminal area, evaluating acoustical annoyance to surrounding community  
[ICAS PAPER 72-34] p0554 A72-41159
- Rigid form airship for transportation, discussing applications for special loads and scientific and service purposes, and design and construction problems  
p0556 A72-41200
- Development of design criteria for predicting departure characteristics and spin susceptibility of fighter-type aircraft.  
[AIAA PAPER 72-984] p0561 A72-42330
- The application of non-planar lifting surface theory to the calculation of external-store loads.  
[AIAA PAPER 72-971] p0561 A72-42340
- Aircraft emergency evacuation systems, discussing door designs, inflatable escape slide, and slide/lifeboat combination  
p0563 A72-42520
- Boeing aircraft altitude alerting systems: development and design to meet FAR 91-51 requirements, discussing retrofit programs and altimeter encoding  
p0564 A72-42689
- Wing flutter prevention in SST structural design, using finite element model and lifting surface aerodynamic theory  
p0565 A72-42760
- A survey of rotary-wing aircraft crashworthiness.  
p0565 A72-42763
- An assessment of energy absorbing devices for prospective use in aircraft impact situations.  
p0565 A72-42764
- Dynamic aspects of Fokker F-28 aircraft design.  
p0566 A72-42831
- Aircraft synthesis analysis program /ASAP/ for computerized aircraft design, enabling large number of trade-off studies for design optimization  
[SAWE PAPER 907] p0595 A72-43454
- An aerodynamics model applicable to the synthesis of conventional fixed-wing aircraft.  
p0595 A72-43455
- Mission analysis and performance program as part of computerized aircraft configuration synthesis process, describing interfaces with other system modules  
[SAWE PAPER 909] p0595 A72-43456
- Engine selection for specific aircraft design and mission, considering bypass and pressure ratios and turbine temperature effects on performance and weight.  
[SAWE PAPER 910] p0595 A72-43457
- The weight module - A keystone in the aircraft synthesis program.  
[SAWE PAPER 912] p0595 A72-43459
- L-1011 computerized weight reporting system present and future capabilities.  
[SAWE PAPER 932] p0596 A72-43472
- Aircraft design structural weight estimation based on post-design analysis of production aircraft, discussing weight factors application to new designs  
[SAWE PAPER 936] p0597 A72-43476
- Analysis of the fundamental parameters and flight properties of aerobatic aircraft in a statistical framework  
p0602 A72-44336
- Harrier two seat aircraft design, performance, weapon systems, thrust vectoring and combat characteristics comparison with GR.1  
p0603 A72-44391
- Design and certification for executive type aircraft.  
p0608 A72-44730
- Fatigue design and test program for the American SST.  
p0609 A72-44741
- Observations on designing to combat fatigue and its effects on the economics of civil transport aircraft.  
p0610 A72-44745
- Aircraft/spacecraft design approach and performance data, considering space shuttle program  
p0612 A72-45159
- Lateral flight path control during aircraft landing in gusty cross-winds by lateral thrust deflection, discussing design optimization  
p0613 A72-45330
- Iterative methods for the aerodynamic calculation of thin wings in a subsonic flow  
p0614 A72-45378
- Control configured fighter and bomber aircraft based on flight control technology, discussing development programs  
p0614 A72-45386
- Military aircraft construction, design and economic requirements, discussing fighter payloads, armament efficiency and fire control systems  
p0615 A72-45450
- Aircraft design concepts for intraurban transportation system  
[NASA-CR-114342] p0036 N72-10986
- Effect of optimum accessibility on improved maintenance and reliability of commercial aircraft  
p0041 N72-11031
- Specifications for high Reynolds number wind tunnel design for flow simulation in swept wing aircraft development tests  
p0077 N72-11883
- Subsonic and transonic aerodynamic design characteristics of advanced civil aircraft technology  
p0102 N72-12998
- Supersonic aerodynamic design technology for civil aircraft  
p0102 N72-12999
- Forecasting trends in subsonic and supersonic propulsion aircraft technology  
p0103 N72-13002
- Forecasting of structural materials usage in future aircraft designs  
p0103 N72-13005
- Choice of materials, configurations, and load factor in aircraft design against fatigue and fracture  
p0103 N72-13006
- Computerized structural analysis and integrated design of future aircraft

Aircraft high pressure oxygen cylinder system  
filler valve optimum standards, discussing  
automatic fill rate and pressure sensitive  
closing control, design, construction and  
performance  
[SAE AS 1225] p0008 A72-10385

Soviet book on civil aircraft high altitude  
equipment covering air conditioning systems,  
oxygen equipment and cabin pressurization  
p0018 A72-12295

Soviet book on electrical equipment and  
instrumentation of An-24 aircraft covering power  
sources, control, safety systems, engine, flight  
and navigation instruments and autopilot  
p0120 A72-16400

Soviet book on aircraft radio equipment covering  
transmission and reception, velocity and  
coordinates measurements, siting and navigation,  
flying target interception, reconnaissance,  
landing systems, etc  
p0122 A72-16530

Zener diode transient suppressors with electronic  
thermal switch for ground vehicle and aircraft  
applications  
[AD-741529] p0123 A72-16553

DC 9 aircraft integrated data system simulator to  
facilitate interacting systems checking, input  
circuit integrity, performance degradation and  
calibration  
p0143 A72-18284

Concorde aircraft systems reliability and safety  
flight and simulator testing, discussing  
operational and environmental conditions and  
maintenance procedures  
p0187 A72-20309

Survival and flight equipment - Conference, Las  
Vegas, September 1971  
p0193 A72-21560

Altitude information warning devices and systems,  
discussing requirements and performance and  
qualification tests  
[SAE ARP 1061] p0301 A72-26032

Onboard localization of aircraft electrical  
equipment failures, using list checkout,  
automatic indication and dynamic programming  
method  
p0304 A72-26895

Communication aspects of aeronautical satellite  
system, considering aircraft equipment, ground  
stations, ATC, type of access and frequency  
assignment  
p0310 A72-27658

Reliability requirements and optimization for  
complex systems, discussing method to improve  
component reliability of aircraft weapon system  
p0343 A72-28353

Aircraft electrical power systems design  
dependence on latitude, minimum weight  
requirement, reliability degree, environmental  
conditions and acceleration  
p0344 A72-28693

Cavitation failure of aircraft hydraulic plunger  
pump elements from microscopic and  
metallographic analysis  
p0345 A72-28732

Airborne OMEGA navigation system performance,  
discussing transmission facilities, three  
frequency receiver, flight tests and  
optimization of receiving antenna  
p0352 A72-29191

High light transmission electrically conducting  
Hyviz and gold film laminates for aircraft  
windshields and window heating applications  
p0357 A72-30038

Reduced voltage relay operation in aircraft high  
voltage ac power systems, describing RLC circuit  
theory, laboratory test arrangement and  
performance measurements  
p0394 A72-31215

Collision avoidance techniques for midair  
collisions reduction, discussing airborne and  
ground based systems  
p0399 A72-32213

Electromagnetic waves penetration through  
conducting gasket used to protect sensitive  
devices in aircraft, investigating field  
strength variation with distance from gasket  
p0402 A72-32571

Sizing new generation aircraft wire and circuit  
breakers utilizing computer techniques.  
p0453 A72-35568

USSR electric impulse de-icing system design.  
p0461 A72-37033

Electronic primary flight control system  
requirements and equipment characteristics,  
discussing USAF and NASA fly by wire R and D  
programs  
[AIAA PAPER 72-882] p0505 A72-39118

Application of computers for improved maintenance  
of avionics equipment, fault isolation, and  
verification of fault correction  
p0040 N72-11022

Analysis of fire and explosion hazards in aircraft  
fuel tanks and methods for predicting fuel/air

Design, fabrication, and evaluation of aircraft wheel-constructed of fibrous graphite and epoxy resin

[AD-745130] p0642 N72-33046  
Concept for automating air traffic control in terminal area with navigation and guidance system primarily dependent on airborne equipment [NASA-TN-D-6992] p0646 N72-33644

**AIRCRAFT EXHAUST**  
**EXHAUST GASES**  
**AIRCRAFT FUEL SYSTEMS**  
Lightweight low pressure plastic hose assemblies in aircraft and missile petroleum base fuel and synthetic lubricating oil systems at 395-710 R and up to 200 psi [SAE ARP 1180] p0008 A72-10388  
Aircraft fuel system gunfire vulnerability and fire and explosion protection techniques p0195 A72-21579  
Hydraulic starter systems for aircraft turbine engines, examining operation loads and fluid supply and pressure requirements p0285 A72-25284  
Utilization of wing and empennage volume for aircraft fuel tankage, presenting equations and charts for quick determination of available volume p0299 A72-25811  
Deterioration of shaft bearings of electromotor driving aircraft centrifugal fuel pump, determining lateral force acting on impeller p0598 A72-43663  
Reliability analysis of a jet engine fuel system with the aid of an analog computer using operational data p0600 A72-44282  
Evaluation of elastomer coatings and curtains as containment methods to prevent fuel spill from integral aircraft wing tanks following crash [FAA-RD-71-75] p0086 N72-11947  
Liquid propellant rocket engines for racing cars and aircraft p0525 N72-28966  
Flight tests to determine effectiveness of liquid nitrogen fuel tank inerting system for fire prevention on DC-9 aircraft [FAA-RD-72-53] p0579 N72-30769

**AIRCRAFT FUELS**  
Proposed gas turbine procurement standards for gaseous and liquid fuel specifications emphasizing fuel contaminants [ASME PAPER 71-WA/GT-3] p0116 A72-15896  
Fuels and lubricants development trends for subsonic and supersonic aircraft, discussing thermostable hydrocarbons, ramjet fuels, esters, oxidation inhibitors, metal deactivators, high pressure lubricant additives, etc p0127 A72-16739  
Purity requirements of aircraft gas turbine fuels, considering mechanical impurities, water, microorganisms, and surface active, corrosive, resinlike and paraffin substances p0188 A72-20373  
Fuel lubricity effects on aircraft engine fuel pump wear, discussing remedial use of corrosion inhibitors and change to noncorroding pump construction materials p0191 A72-21450  
Safe aircraft fuels crashworthiness evaluation in terms of ignition susceptibility parameter, noting full scale crash environment simulation [ASME PAPER 72-GT-27] p0294 A72-25623  
Crash safe turbine fuel to reduce fire probability and severity during aircraft ground crash, investigating physical and chemical properties [ASME PAPER 72-GT-28] p0294 A72-25624  
Physicochemical processes in metal surface layers subjected to contact friction with aircraft fuels presence, noting secondary compounds and thermal oxidation acceleration p0315 A72-28183  
Future projections of commercial jet aircraft fuel demands, estimating engine exhaust effects on air quality p0350 A72-28879  
Aviation fuels and additives effect on steel endurance limit at room temperature p0354 A72-29487

Evaluation of film forming foams for the suppression of fuel fires in aircraft hangars. [WSCI PAPER 72-16] p0504 A72-38974  
Fuels, lubricating oils and hydraulic fluids for supersonic aircraft, discussing chemical properties, propellant combustion efficiency and production p0509 A72-39930  
Aircraft fuels, lubricants, and fire safety - conferences [AGARD-CP-84-71] p0046 N72-11668  
Small scale combustion chamber rigs for combustion characteristics determination of aviation fuel p0047 N72-11674  
Dual purpose filter-separators for dirt and water removal from fuel p0047 N72-11676  
Fuel related problems in aircraft fuel systems, emphasizing hydrogen treated fuel p0047 N72-11677  
Theoretical analysis of fuel ignition by hot projectile and ignition delay time as function of temperature and width of hot gas region p0048 N72-11683  
Fire extinguishing system in aircraft, using exhaust gases of solid propellant gas generator to pressurize extinguisher bottle p0048 N72-11685  
Electrostatic charging in handling of aviation fuels, resulting in incendiary sparking in fuel tank p0048 N72-11686  
Crash safe turbine fuel program, using gelled fuels p0049 N72-11687  
Post-crash fire safety of helicopter turbine engine fuels p0049 N72-11688  
Simulated crash tests to assess fire resistance of aircraft fuels containing polymeric additives p0049 N72-11692  
Use of fluorocarbon surfactants to extinguish aircraft fuel fires p0049 N72-11693  
Evaluation of safety performance of emulsified and gelled aviation fuels in simulated full scale aircraft crash environment [AD-729330] p0161 N72-14784  
Ignition characteristics of aircraft fluids impinging on hot surfaces under air flow conditions found during flight [AD-734238] p0283 N72-19964  
International survey of air pollution by aircraft engines and fuels p0338 N72-21590  
Discussion of aircraft fuels and lubricants to include production, analysis, testing and fire safety [AGARD-AR-44] p0487 N72-27811  
Future aircraft fuel resource availability and pricing, processing methods, and economic projections for period 1970 to 2000 [NASA-TN-X-62180] p0631 N72-32742

**AIRCRAFT GUIDANCE**  
Carrier system for controlled approach of Naval aircraft to provide pilot window to deck for tactical jet guidance for poor visibility landing p0018 A72-12323  
Terminal area air traffic guidance and control, discussing automation, all-weather precision approach and landing and failure detection p0066 A72-14817  
Aircraft landing microwave guidance and control systems, considering general dynamic model for aircraft translational motion determination in earth fixed coordinate system p0067 A72-14821  
Navy hovering vehicle versatile automatic control system for V/STOL flight test program, using airborne digital computer for navigation/guidance computations p0125 A72-16661  
Automated ATC guidance technique for aircraft curved flight trajectories, describing flight profiles synthesizing algorithms and computerized simulation technique [AIAA PAPER 72-121] p0140 A72-17922  
Ground based Doppler navigation system for wide range elevation and azimuth aircraft approach guidance, using linear directive antenna array

## SUBJECT INDEX

## AIRCRAFT HAZARDS

- for conical surface definition p0142 A72-18183
- Aircraft optimal terminal guidance nonlinear feedback control law, deriving maximum principle by digital computer program p0183 A72-19287
- Control synthesis equations for aircraft motion on phase space surface p0227 A72-22208
- Civil aviation approach and landing guidance systems evolution, discussing ILS development, state of art and future requirements p0350 A72-29014
- Aeronautical navigation/guidance standardization in conjunction with OMEGA, covering sensor and computer equipment life cycles p0353 A72-29199
- Airport lighting for pilot guidance during approach and landing under category I-III visibility conditions, discussing runway layouts and power requirements p0360 A72-30621
- Fighter bomber Loran-inertial data processing with digital computer to combine navigation, guidance and weapon delivery into fully integrated system p0407 A72-33246
- Investigation of data rate requirements for low visibility approach with a scanning beam landing guidance system. p0453 A72-35562
- Book - Minimum operational characteristics for vertical guidance equipment used in airborne volumetric navigation systems [DO-152] p0455 A72-35800
- Airline crew familiarization with DC-10 Computerized Flight Guidance System to calculate steering signal from raw data to follow flight path p0494 A72-37899
- Development of STOLAND, a versatile navigation, guidance and control system. [AIAA PAPER 72-789] p0496 A72-38106
- 4-D guidance system design with application to STOL air traffic control. p0501 A72-38252
- Investigation of data rate requirements for low visibility approach with a scanning beam landing guidance system. p0502 A72-38259
- A landing approach guidance scheme for aircraft which are capable of executing steep approaches. p0502 A72-38278
- Tactical aircraft weapon system development, describing navigation, target acquisition, release point guidance and delivery modes [AIAA PAPER 72-896] p0505 A72-39107
- Microwave landing system effect on the flight guidance and control system. [AIAA PAPER 72-755] p0510 A72-40057
- Design and flight experience with a digital fly-by-wire control system using Apollo guidance system hardware on an F-8 aircraft. [AIAA PAPER 72-881] p0511 A72-40060
- Characteristics and prospects for a new landing guidance system. p0547 A72-40293
- Development and evaluation of an energy-oriented guidance logic for air combat models. [AIAA PAPER 72-949] p0562 A72-42354
- CW radar system for tactical aircraft real time command, control and positioning, using combination of frequency and time multiplexing for range measurement p0567 A72-42946
- Feasibility evaluation of microwave aircraft digital guidance equipment for helicopter approach and landing guidance system p0085 N72-11936
- Airborne recording of ILS guidance signals and determination of beam bending effects [RAE-TR-70222] p0096 N72-12590
- Comparison of scanning beam and Doppler type array aircraft landing systems, noting antenna radiation pattern and signal spectra [AT/DTRN/2-155] p0111 N72-13590
- Update of STOL bibliography, including design, operation, guidance, air traffic control, and STOLports [UTIAS-176] p0165 N72-15002
- Path changing methods for large-scale commercial STOL aircraft to fly complex flight paths to maintain a time of arrival envelope [DOT-TSC-PAA-72-5] p0325 N72-20579
- Software and hardware technology for application of computer systems to guidance and control of aerospace vehicles [AGARDOGRAPH-158] p0335 N72-21211
- Programming characteristics of future guidance and control computers p0335 N72-21216
- Fault isolation capabilities for general purpose digital computer used in guidance and control applications p0336 N72-21220
- Guidance and control computer actuated display system techniques p0336 N72-21221
- Central digital computers for helicopter guidance and control systems p0336 N72-21223
- Application of airborne digital computers to Loran C/D and Omega navigation and guidance systems p0336 N72-21225
- Selection of computers for satellite based navigation and guidance system designed for aircraft users p0336 N72-21226
- Digital computers for navigation and guidance systems and fire control systems in tactical aircraft p0336 N72-21227
- Design guidelines for pictorial integrated flight control and guidance displays for V/STOL aircraft [NASA-CR-126153] p0374 N72-22630
- Analysis of incompatibility between ground and airborne measurements of VOR system space modulation [AD-737039] p0377 N72-22662
- Comparison of scanning beam and Doppler type array aircraft landing systems emphasizing granularity [AT/DTRN/2-174] p0389 N72-23663
- Concepts, philosophy, and development of minimum operational characteristics for airborne navigation systems [DO-149] p0436 N72-25603
- Performance and problems of microwave guidance systems for aircraft approach and landing [RAE-TR-71186] p0436 N72-25606
- Aircraft position and motion controlled by photogrammetric three reference point method noting coordinate transformations [SAAB-TN-68] p0484 N72-27472
- Attitude control and guidance mechanism for spacecraft and aircraft [NASA-CR-127268] p0485 N72-27679
- AIRCRAFT HAZARDS**
- Statistical characteristics of range-guard intrusions and airspace collision conflicts in terminal area p0118 A72-16110
- Aircraft hydrocarbon fuel tank lightning protection in airframes, using adhesive bonding, high strength materials and high modulus fiber structures p0177 A72-18767
- Multiple swept stroke flash technique to test lightning effects on aircraft p0177 A72-18768
- Lightning simulation laboratory for aircraft strike testing, using high energy generators p0178 A72-18774
- Probability estimates for aircraft encounters with heavy rain p0188 A72-20365
- Aircraft hazard detection and warning system selection criteria p0193 A72-21561
- Probability estimates of aircraft encounters with hail, discussing variations with locality, hailstone size and height and supersonic transport experience p0234 A72-23423
- Turbulent jets effectiveness in protection of aircraft surfaces from rain, describing wind tunnel simulation of takeoff and landing p0247 A72-25137
- Hail damage to aircraft, predicting metal surfaces dent depth and deformation shape with computer

- program  
[AIAA PAPER 72-335] p0286 A72-25370
- Jet engine fuel fire hazard evaluation by  
controlled laboratory tests, analyzing ignition  
characteristics under simulated survivable  
aircraft crash accidents  
[SAE PAPER 720324] p0290 A72-25587
- Jet engine fuel modification to decrease fire  
hazard in survivable aircraft crashes  
[ASME PAPER 72-GT-25] p0294 A72-25621
- Aircraft windshield bird impact resistance, noting  
weight, speed, angle and window geometry effects  
p0306 A72-27014
- Legal aspects in prevention of aircraft unlawful  
seizure in view of international cooperation,  
noting German Democratic Republic agreements  
p0308 A72-27272
- Thunderstorm-associated aircraft mishaps relation  
to surrounding synoptic scale meteorological  
conditions, discussing storm interior condition  
contribution to flight stability upset  
p0347 A72-28851
- Thunderstorm penetration by F-100 aircraft to  
study turbulence hazard relation to updraft size  
and short period fluctuation-induced  
acceleration changes  
p0347 A72-28852
- Hailstone impact simulator for aircraft damage  
prediction in testing prospective structural  
designs  
p0348 A72-28855
- Mathematical criteria for probable and potential  
aircraft icing occurrence, using radiosonde and  
empirical climatological data  
p0348 A72-28856
- Lightning current tests of aircraft glass/carbon  
fiber reinforced plastics materials  
p0357 A72-30040
- Probabilistic analysis of aircraft crash-caused  
structural damage to nuclear power plant, using  
Monte Carlo method and yield line theory for  
perforation and collapse modes  
p0411 A72-33600
- Flight safety research, discussing NASA aviation  
hazards R and D programs involving fire,  
lightning and static, steep approaches, aircraft  
wakes, fog and visibility  
p0507 A72-39742
- Liquid and solid precipitation on aircraft  
structure surfaces, discussing potential hazards  
to engine components and aircraft controls due  
to ice formation  
p0603 A72-44339
- Report of aircraft accident involving DC-9  
aircraft at Gulfport, Mississippi on February  
17, 1971  
[NTSB-AAR-71-14] p0032 A72-10049
- Extinguishing flames and fires on aircraft  
p0048 A72-11680
- Flammability properties of jet fuels and  
techniques for fire and explosion suppression  
under simulated hostile operating environment  
conditions  
p0048 A72-11681
- Various gelled or emulsified fuels for reducing  
aircraft crash-fire hazard  
p0049 A72-11689
- Analysis of hazards created by aircraft wakes and  
methods for avoiding adverse effects during  
congested aircraft operation  
[NASA-TM-X-67448] p0087 A72-11951
- Development of criterion for aircraft flight in  
turbulent conditions and numerical analysis of  
probability of survival  
[NASA-CR-124834] p0164 A72-14997
- Report of aircraft incident on Boeing 747  
commercial aircraft resulting from engine  
failure during climbout after takeoff from  
Honolulu, Hawaii  
[NTSB-AAR-71-16] p0166 A72-15005
- Analysis of factors contributing to general  
aviation safety for reducing current accident  
rates  
[PB-202928] p0220 A72-17015

# SUBJECT INDEX

# AIRCRAFT INSTRUMENTS

Aircraft hydraulic control systems modular design for maintainability, emphasizing component removal with minimum hydraulic fluid loss and air entrainment

p0560 A72-42294

Aircraft clamp-on flowmeter using IR heat source in thermistor bridge to monitor flow rate in hydraulic lines

p0565 A72-42715

Aircraft hydraulic secondary power system weight estimation, presenting components loads and weights breakdown in tables and charts [SAE PAPER 935]

p0597 A72-43475

Preparation of specification for hydraulic fluid filters for aircraft ground support equipment [AD-730027]

p0160 N72-14506

## AIRCRAFT INDUSTRY

Commercial transport market and technology forecasting, considering all-cargo, STOL, SST and CTOL aircraft

p0003 A72-10249

Le Bourget Exposition data for displayed civil transport aircraft

p0059 A72-13638

Common law liability of aviation manufacturers, discussing safety, airworthiness, maintenance, reporting, modifications and inspection requirements and evidence of negligence

p0189 A72-20671

Chemical compositions, properties and heat treatment of Ti, Al alloys and steels used in aircraft industry

p0285 A72-25286

Aircraft industry product support role in time delays minimization for aircraft operators, discussing malfunction report, minimum equipment decision and fault diagnosis

p0401 A72-32456

Financial methods employed in creating Brazilian aircraft industry via mixed public-private ownership

p0410 A72-33375

Polish aircraft industry production and fabrication techniques, discussing metal working, digital controlled machining and cost reduction

p0461 A72-37010

Effects of aerospace and air transport industries on United States economy

p0150 N72-13988

Markets for civil and military aircraft and missiles, airline operations, and exports and imports for European Economic Community, United Kingdom, and United States

[REPT-7042-VOL-4] p0163 N72-14976

Survey and analysis of application of nondestructive inspection methods to aircraft structures

[AGARD-R-587-71] p0278 N72-19541

Aircraft industry survey for analysis of nondestructive inspection methods application to commercial aircraft for 1968 to 1970

p0278 N72-19543

Bibliography on aviation industry's response to solving its environmental pollution problems [GA-300-89]

p0526 N72-28986

Financial and aircraft production problems of airline industry

p0543 N72-29983

NT RATE OF CLIMB INDICATORS

NT SPEED INDICATORS

Passenger aircraft onboard automated inertial navigation devices, emphasizing accelerometer and gyroscope design and construction

p0001 A72-10070

Polar navigation with transverse mercator technique for aircraft using secant geared ground position indicators

p0002 A72-10181

Pressure altimeter system minimum safe performance standards for subsonic aircraft operation, describing test procedures

[SAE AS 942] p0008 A72-10386

Airfield Vehicle Obstacle Indication Device short range high-definition radar system for aircraft navigation aid

p0017 A72-12042

Airborne pictorial navigation systems for visual indication of aircraft position in addition to digital readout

p0018 A72-12106

Soviet book on course-indicating systems and automatic navigation aids for civil aviation aircraft covering design, operation principles, error analysis and reliability

p0018 A72-12298

Aircraft in-flight monitoring instruments for meteorological service in U.S.

p0064 A72-14687

Cockpit information for pilot and flight crew as key to transport aircraft accident prevention, discussing cockpit layout and displays in terms of-flight safety requirements

p0066 A72-14813

Time/frequency collision avoidance systems, discussing operating principle and economic aspects for airlines and general aviation

p0066 A72-14816

Soviet book on electrical equipment and instrumentation of An-24 aircraft covering power sources, control, safety systems, engine, flight and navigation instruments and autopilot

p0120 A72-16400

Aircraft and airports weather instrumentation for all-weather landing and takeoff, discussing application of laser technology and digital presentation

p0193 A72-21522

Cockpit instrumentation for jet transport aircraft flight path management, emphasizing dependability, safety and economy

p0193 A72-21524

U.S. Navy cartography, describing RA-3B Skywarrior capabilities and photographic instrumentation

p0196 A72-21699

Mystere business jet aircraft flight instruments, acceleration, control and stall characteristics

p0197 A72-21900

Anthropotechnical aspects of V/STOL aircraft control, discussing instrument and control systems concepts based on development and flight tests of experimental Do-31 VTOL aircraft

p0230 A72-22784

Automated navigation management in cockpit, considering modular navigation /MONA/ dual channel system of L-1011 TriStar

p0234 A72-23450

SECANT system of aircraft separation and control by nonsynchronous technique for midair collision avoidance

[SAE PAPER 720313] p0289 A72-25577

Pulse operated multichannel annunciator system for pilot warning of aircraft systems malfunctions, describing circuit design

[SAE PAPER 720333] p0291 A72-25593

Aircraft distance measuring equipment with VOR radio receivers and ground station transponder for pulse interrogation

p0307 A72-27105

Aircraft microminiature ILS with transmitter and localizer antenna to provide pilot with bearing and glide slope information for alignment with runway

p0307 A72-27106

Airborne gravimetry experiment yielding high resolution pressure and altitude measurements, describing equipment

p0350 A72-28877

DAIEN III digital magnetic tape recording system for aircraft flight test data acquisition, discussing components

p0412 A72-33629

Aircraft instrumentation system accuracy relation to aerodynamic derivatives evaluated from flight

- data, proposing input and transient response measurement system p0412 A72-33640
- Error analysis of hybrid aircraft inertial navigation systems. [AIAA-PAPER 72-848] p0504 A72-39081
- Altimeters development history from Wright brothers to Boeing 747, discussing altitude alert systems providing aural and visual warnings to pilot p0508 A72-39747
- Instruments installation effect on Soviet passenger aircraft pilot performance, discussing Tupolev aircraft control systems p0545 A72-40173
- Aircraft instrument panel redesign to alleviate crew task, proposing integral displays and controls for flight information p0547 A72-40291
- Collision avoidance system electromagnetic compatibility with radar altimeters designed for 1600 MHz aeronavigation band p0550 A72-40881
- Application of the head-up display /HUD/ to a commercial jet transport. p0556 A72-41256
- The INAS device of Perranti as integrated weapon system for the HS Harrier p0559 A72-41846
- An advanced strain level counter for monitoring aircraft fatigue. p0564 A72-42688
- Aircraft clamp-on flowmeter using IR heat source in thermistor bridge to monitor flow rate in hydraulic lines p0565 A72-42715
- Laboratory evaluation of electro-optical IR pilot warning indicator systems [NASA-CR-124721] p0109 N72-13351
- Micrometeorologic measurements of earth surface temperature by airborne radiometers [NASA-TT-F-14139] p0260 N72-18621
- Guidance and control display design for aircraft and spacecraft - conference [AGARD-CP-96] p0373 N72-22621
- Tradeoffs between luminance and color coding in electronic aircraft displays, and experiments involving immediate response, tracking, tachistoscope, and human judgement p0373 N72-22623
- Colors for elements of multicolored aircraft display to insure minimum number of instrument reading errors p0373 N72-22624
- Integrated cockpit research procedure used to identify control and display requirements for advanced aircraft p0373 N72-22625
- Prediction and measurement of multichannel pilot performance, and system design implications for pilot capability and limitations p0374 N72-22626
- Airborne map display systems using direct view, projected, combined map/CRT, and electronically generated map displays p0374 N72-22634
- Electronic head-up display systems for military aircraft p0374 N72-22635
- Engineering and operational factors of electronic multisensor aircraft displays p0375 N72-22636
- Spacecraft display technology applied to aircraft guidance and control displays p0375 N72-22641
- Flight test data on all-electroluminescent lighted display panel in aircraft cockpit p0376 N72-22644
- Evaluation of modified instrument lighting system installed in T-38 aircraft [AD-737121] p0385 N72-23043
- Summary of literature on altimeter display relating to aircraft height [FAA-RD-72-46] p0434 N72-25426
- Approximate compensation in airborne magnetometry for changing inductive field of aircraft moving through varying geomagnetic field p0434 N72-25435
- Airborne radar systems for Army helicopters [AD-738596] p0468 N72-26137
- In flight monitoring system to measure and record helicopter performance in real time for all six degrees of freedom [AD-745118] p0629 N72-32476
- Principles of construction and operation of heading indicators used in civil aviation [JPRS-57031] p0630 N72-32640
- AIRCRAFT LANDING**
- NT CRASH LANDING**
- NT DITCHING (LANDING)**
- Short haul air transport system need for future short takeoff and landing aircraft, considering airports, airways, economics and navigation and landing aids p0015 A72-11719
- Microwave aircraft landing system development, discussing contract definition, feasibility, prototype development, management planning and program costs p0019 A72-12377
- Aircraft ILS, covering history, adverse weather operations and replacement systems p0022 A72-12645
- STOL aircraft integrated landing approach flight control system with elevator and thrust control coupling to angle of attack, altitude and other state variables. [DGLR PAPER 71-063] p0022 A72-12705
- TU-154 lift and drag augmenting devices for takeoff and landing characteristics improvement p0056 A72-13472
- ATC technology impact on flight operations and, public value of aviation, discussing microwave landing system economic aspects p0065 A72-14810
- Terminal area air traffic guidance and control, discussing automation, all-weather precision approach and landing and failure detection p0066 A72-14817
- Aircraft landing microwave guidance and control systems, considering general dynamic model for aircraft translational motion determination in earth fixed coordinate system p0067 A72-14821
- Automated scheduling algorithm for aircraft from terminal area to touchdown, discussing system features and STOL air traffic computerized simulation [AIAA PAPER 72-120] p0131 A72-16905
- Step-scan landing system technique, using microwave fixed linear array for area coverage with pattern of narrow overlapping individually coded sequentially switched beams p0144 A72-18397
- Carrier suitability testing for aircraft landing, considering landing gear and supporting structure under simulated shipboard conditions p0146 A72-18497
- Crosswind landing under adverse runway conditions, illustrating technique with sketches p0179 A72-18833
- Night Carrier Landing Trainer flight and carrier environment simulator for A-7 aircraft pilot training, discussing performance predictions from computer data analysis p0182 A72-19137
- High performance aircraft takeoff and landing accidents, investigating survival rates p0193 A72-21563
- Buccaneer Mk 2 and F-4K Phantom takeoff and landing performance improvement due to boundary layer control by leading and trailing edge blowing p0233 A72-22973
- Turbulent jets effectiveness in protection of aircraft surfaces from rain, describing wind tunnel simulation of takeoff and landing p0247 A72-25137
- Helicopter landing on ships, discussing wind, visibility limitations and flight deck motions vs aircraft stability and handling characteristics p0309 A72-27413
- Pilot evaluation of C-5 automatic landing system in Category III weather environment p0310 A72-27521
- Slant range visibility measurements by lidar for aircraft landing operations under low clouds and fog at coastal region

- p0347 A72-28847  
Optimal angle selection of commercial aircraft glide path, taking into account vertical velocity, propulsion units operation and landing procedure
- p0361 A72-30814  
Aircraft copilot assistance to pilot in flight phases, emphasizing takeoff and landing and man machine system reliability
- p0361 A72-30815  
U.S.S.R. civil aviation regulations on takeoff and landing minimum conditions for cloud ceilings and visibility range for various aircraft characteristics and equipment
- p0361 A72-30820  
Tactical approach landing radar tests for low lift drag ratio aircraft in unpowered flight, using F-104D as test aircraft
- p0395 A72-31694  
Flight experiments to determine horizontal visual restriction effects on T-33 aircraft front cockpit during approaches and landings
- p0395 A72-31697  
Jet lift VTOL flight path optimization for minimum landing transition distance, evaluating deceleration as function of incidence and thrust vector angles
- p0400 A72-32323  
STRADA landing trajectory recording system for real time flight path restitution during approach and landing, using computer and lidar techniques
- p0404 A72-32895  
Aircraft flight characteristics for landing approach by spoiler-elevator deflection coupling, considering pitch, flight path angle and speed
- p0410 A72-33423  
Solid state modular ground based distance measuring equipment /DME/ receiver for en route aircraft navigation and landing
- p0411 A72-33521  
Computerized aircraft landing measurement system for civil airport, using optical, seismic and IR sensors
- p0411 A72-33627  
Helicopter/ship dynamic interface testing for launch and recovery capabilities under sea environment conditions, discussing visual landing aids, wind, visibility and ship motions [AHS PREPRINT 650]
- p0447 A72-34505  
Investigation of data rate requirements for low visibility approach with a scanning beam landing guidance system.
- p0453 A72-35562  
Computer control of aircraft landing.
- p0455 A72-35950  
Acoustic ray deflection by aircraft wake vortices with viscous core, observing maximum deflection angles during large aircraft landing
- p0457 A72-36417  
Application of electronic data processing airport analysis in airlines operations and for manufacturers.
- p0489 A72-37277  
Investigation of data rate requirements for low visibility approach with a scanning beam landing guidance system.
- p0502 A72-38259  
A landing approach guidance scheme for aircraft which are capable of executing steep approaches.
- p0502 A72-38278

## SUBJECT INDEX

## AIRCRAFT NOISE

- military helicopters - Vol. 2  
[AD-741377] p0623 N72-32053
- Sensitivity analysis applied to helicopter development reliability test requirements - Vol. 3  
[AD-742247] p0624 N72-32054
- AIRCRAFT MODELS**
- Low subsonic region unsteady interference effects on harmonically oscillating wing-tailplane model with variable sweep wing  
[DGLR PAPER 71-081] p0022 A72-12709
- Aeroelastic models construction for flutter analysis of aircraft design, noting error risk reduction  
[DGLR PAPER 71-082] p0023 A72-12722
- Wind tunnel stability tests of aerodynamic pitch damping of aircraft model oscillating in two degrees of freedom  
p0057 A72-13539
- State sensitivity functions in aircraft parameter identification for lateral dynamics under aileron deflection from model response and in-flight test data  
p0236 A72-23807
- Wind tunnel investigation of Reynolds number effects on boundary layer separation incidence and maximum lift coefficient of high-lift device equipped aircraft model  
p0242 A72-24657
- Magnetic simulation of gravity for wind tunnel investigations of aircraft jettison processes, considering Froude number and relationships between model and full scale aircraft  
p0243 A72-24775
- Pan-in-wing model noise due to cross flow generated in- and outflow distortions and unsteady rotor blade forces  
[ASME PAPER 72-GT-92] p0298 A72-25666
- Characteristics of an ejector-type engine simulator for STOL model testing  
[AIAA PAPER 72-1028] p0558 A72-41607
- Conference on theoretical methods and wind tunnel facilities for transonic aerodynamic testing of aircraft at high Reynolds numbers  
[AGARD-CP-83-71] p0073 N72-11854
- Free flight models for transonic testing at high Reynolds numbers  
[NASA-TN-X-67416] p0077 N72-11878
- Aerodynamic suitability of Freon 12 for wind tunnel testing of transport aircraft models at increasing Reynolds numbers and subcritical and supercritical Mach numbers  
[NASA-TN-X-67417] p0077 N72-11879
- Wind tunnel longitudinal stability tests of AVRO 720 scale model with determination of up-elevon and leading edge notch effects  
[ARC-CP-1140] p0088 N72-11962
- Free flight supersonic model for determining static and dynamic aerodynamic characteristics  
[NAL-TR-237] p0100 N72-12981
- Design studies and model tests of stowed tilt rotor aircraft - Vol. 3  
[AD-729429] p0152 N72-13997
- Free flight stability testing at transonic speeds of Orion slender wing models with zero lift using terminal velocity technique  
[ARC-CP-1174] p0202 N72-15951
- Low speed wind tunnel measurement of oscillatory lateral stability derivatives of slender variable sweep wing aircraft model and comparison with Concorde and HP-115  
[RAE-TR-70095] p0204 N72-15972
- Flow distortion and performance measurements on 12 in. fan-in-wing model for range of forward speeds and angle of attack settings in closed wind tunnel  
p0211 N72-16702
- Flight simulation of remotely controlled lifting body model  
[DLR-FB-71-82] p0319 N72-20010
- Variable geometry wind tunnel for testing aircraft models at subsonic speeds  
[NASA-CASE-XLA-07430] p0371 N72-22246
- Experimental method for measuring heat transfer in hypersonic aerodynamic models  
[REPT-32] p0438 N72-25918
- Jets introduced obliquely into free stream flow and jet impingement on curved surfaces  
[NASA-CR-127121] p0469 N72-26227
- Low Mach number wind tunnel study of advanced manned interceptor in blended body shape  
[AD-741745] p0574 N72-30021
- AIRCRAFT NOISE**
- NT JET AIRCRAFT NOISE**
- NT SONIC BOOMS**
- STOL aircraft for solving noise reduction and land use problems in future transportation systems, discussing airport location and layout for growing air traffic  
p0013 A72-11153
- Aircraft engine noise effects in airport vicinities, discussing measurement scales, turbofan sources, noise reduction and future air traffic  
p0016 A72-12022
- Rating scale judgments of aircraft noise based on surveys around airport  
p0053 A72-12956
- Prop-fan engine for quiet STOL propulsion, discussing noise characteristics, weight advantage, response and reduced fuel consumption  
p0059 A72-13697
- Air transportation evolution and relation to atmospheric and noise pollution  
p0061 A72-14151
- Aircraft operations effects on community noise pollution, discussing ATC airline operational procedures modifications in terms of noise reduction  
p0067 A72-14819
- Aircraft industry noise reduction efforts to meet FAA requirements for CTOL and STOL aircraft, emphasizing turbofan and compressor noise suppression and/or attenuation  
p0067 A72-14820
- Aircraft and other transient noise levels temporal characteristics effect on noise assessment  
p0069 A72-14843
- Sound attenuation in lined rectangular ducts with uniform steady flow, considering aircraft engine noise reduction  
p0070 A72-15267
- Civil aircraft technological constraints and requirements, discussing noise, congestion and performance characteristics of rotorcraft, STOL, VTOL, hypersonic and supersonic transports  
p0115 A72-15774
- Civil aviation R and D policy study, showing priorities for aircraft noise and congestion abatement and short haul systems  
p0115 A72-15780
- Aircraft noise measurement units and methods, discussing engine design for noise reduction  
p0118 A72-16026
- Aerospace vehicle noise induced structural vibration, presenting propellers, turbojet engine exhausts and sonic boom waves  
p0123 A72-16597
- VTOL transport aircraft use in densely populated urban areas, discussing travel time, airport requirements, noise and design problems  
p0126 A72-16733
- Airfield law in Schleswig-Holstein Appeals Court decision concerning property owner suit against operator for unnecessary noise  
p0142 A72-18170
- Rotorcraft based on VTOL concept for aircraft noise reduction in urban transportation  
p0143 A72-18248
- Army aircraft gas turbine engines pollution potential evaluation program, considering smoke emission, noise and invisible pollutants  
p0177 A72-18772
- Externally blown flap noise tests at various nozzle exhaust velocities for STOL aircraft noise reduction  
[AIAA PAPER 72-129] p0180 A72-18962
- California airport noise standards instrumentation, discussing battery operated measurement of hourly and community noise equivalent levels  
p0184 A72-19490
- Helicopter noise and vibration testing and cabin soundproofing for improved comfort  
p0199 A72-22141
- Commercial applications of quiet light aircraft technology, discussing cost and noise reduction  
[SAE PAPER 720339] p0292 A72-25596

- Turbofan engine trends for short haul conventional and STOL aircraft, considering variable pitch fans, reduction gears, thrust reversal and noise and environmental pollution  
[ASME PAPER 72-GT-86] p0298 A72-25661
- Pan-in-wing model noise due to cross flow generated in- and outflow distortions and unsteady rotor blade forces  
[ASME PAPER 72-GT-92] p0298 A72-25666
- Aircraft flyover house noise reduction data, noting application to indoors noise level estimation  
[SAE AIR 1081] p0301 A72-26029
- Infrasound observations of natural background and signals from Apollo 14 and aircraft, using thermistor flowmeter microphone array  
p0302 A72-26515
- Acoustic ray path method for computing atmospheric conditions effect on aircraft noise propagation, using digital computer  
p0347 A72-28840
- Low flight altitude atmospheric parameters spatial and temporal variability effects on aircraft flyover noise measurement  
p0347 A72-28841
- Aircraft noise sources, showing noise intensity relationship to airfoil velocity and pressure ratio  
p0354 A72-29568
- Aircraft fan and compressor noise generation mechanism, considering mass flow and lift forces fluctuations from rotor and stator airfoils  
p0354 A72-29569
- Acoustic measurements for STOL turboprop transport aircraft propeller configurations under static, taxi and flyover conditions, discussing quiet propeller noise signature  
p0355 A72-29571
- Bibliography on noise control covering surface transportation, machinery and aircraft noise, industrial criteria, biodynamics, legislation and measurement  
p0356 A72-29588
- Digital data processing techniques for aircraft engine noise data reduction, analyzing fan noise spectrum  
p0356 A72-29840
- Quiet RTOL /reduced takeoff and landing/ short haul aircraft cost comparison with Trident 3 aircraft up to design range stage length  
p0394 A72-31320
- Optimum low noise engine selection for transport and combat aircraft relative to range or payload performance, considering CTOL, VTOL, SST and fighter aircraft  
p0397 A72-32127
- Low noise aircraft-engine configuration feasibility, discussing turbofan engine noise reduction  
p0400 A72-32322
- High intensity sound effects on electronic equipment and components in aircraft noise environment, noting whisker diode and printed circuit board damage  
p0403 A72-32621
- Reduction of noise and acoustic-frequency vibrations in aircraft transmissions.  
[AHS PREPRINT 661] p0448 A72-34508
- Internal noise reduction in hovercraft.  
p0458 A72-36574
- Flyover noise testing of commercial jet airplanes.  
[AIAA PAPER 72-786] p0495 A72-38103
- Aircraft noise problem in piston engine to turbofan jumbo jet transports, discussing need for noise reduction research  
[AIAA PAPER 72-815] p0497 A72-38117
- A time-frequency localization system applied to acoustic certification of aircraft.  
[AIAA PAPER 72-836] p0505 A72-39091
- Acoustic pressure and sound intensity levels and noise annoyance international standards for civil aircraft noise reduction  
p0508 A72-39803
- Landing 'in the backyard' with quiet aircraft.  
p0548 A72-40376
- Noise radiation from V/STOL aircraft.  
[ICAS PAPER 72-22] p0553 A72-41147
- VTOL aircraft noise reduction through design methods and flight path management in terminal area, evaluating acoustical annoyance to surrounding community  
[ICAS PAPER 72-34] p0554 A72-41159
- Description and use of a method for characterizing noise sources in jets  
[ICAS PAPER 72-35] p0555 A72-41160
- Aircraft noise duration correction for effective perceived noise level /EPNL/ computation, eliminating mathematical anomaly incurred by present FAA and ICAO prescribed method  
p0567 A72-42909
- Statistical analysis of the sound level distribution of aircraft noise as a function of time  
p0603 A72-44337
- Airports planning for West Germany, discussing geographical air traffic patterns, economic and noise aspects  
[DGLR PAPER 72-034] p0605 A72-44614
- Multipoint real time all-day computerized noise monitoring system for diagnostic evaluation of airport, discussing design and applications  
p0607 A72-44684
- Tone noise from rotor/stator interactions in high speed fans.  
p0610 A72-44917
- Incremental value of noise pollution level as basis for aircraft noise rating  
[NPL-AERO-AC-49] p0030 N72-10035
- Aircraft noise effects on land use around airports  
[PB-201195] p0032 N72-10050

- Analysis of noise levels created by military aircraft, ground support equipment, and terminal facilities  
[AD-728454] p0090 N72-11972
- Accuracy of aircraft noise rating procedure relative to perceived sound levels  
[NASA-CR-1883] p0101 N72-12988
- Technological and operational methods in aircraft noise abatement  
p0104 N72-13012
- Measurement of noise levels on aircraft carrier deck during aircraft operations and effects on deafness risk and verbal communication interference  
[AD-729067] p0107 N72-13038
- Analysis of noise abatement in military and commercial STOL transport aircraft  
[AD-729184] p0108 N72-13040
- Annual report of Institute of Sound and Vibration Research including aircraft, engine, and turbomachinery noise, silencers, and human responses to noise  
p0112 N72-13614
- Annual report 1969 of Institute of Sound and Vibration Research including aircraft, engine and turbomachinery noise, audiology, and structural vibration  
p0112 N72-13615
- Equipment for measuring aircraft noise in flight and computer analysis of data  
[NASA-TT-P-14058] p0150 N72-13987
- Development of methodology for determining auditory levels at which helicopters can be detected by human subjects  
[AD-730788] p0155 N72-14017

## SUBJECT INDEX

## AIRCRAFT PERFORMANCE

- Meteorological data acquisition procedures for monitoring changes in atmospheric parameters at low altitudes to support aircraft flyover noise measurements  
[NASA-CR-1945] p0166 N72-15004
- Acoustic measurements of T-41 trainer aircraft during ground and airborne operation  
[AD-731128] p0167 N72-15014
- Measurement of aircraft noise generated by F-4E aircraft during ground and airborne operation  
[AD-731092] p0167 N72-15016
- Flight dynamics of V/STOL aircraft including stability, noise and ground effect  
p0203 N72-15964
- Research on noise reduction, flying simulators, and gust alleviators  
p0204 N72-15969
- Proceedings of conference on environmental effects of aircraft operation with emphasis on air and noise pollution  
[PB-202038] p0217 N72-16992
- Flight tests to determine methods for reducing airport community noise based on operationally optimum approach profiles  
[NASA-CR-114417] p0250 N72-18001
- Design and development of F-15 fighter aircraft and analysis of effects of aircraft operation on air pollution and noise  
[PB-201710-F] p0254 N72-18034
- Aviation noise evaluations and projections for San Francisco Bay region  
[PB-204035] p0254 N72-18035
- Improving intelligibility of voice communication in high acoustic noise environments as exists inside helicopters  
[AD-733431] p0256 N72-18171
- Vortex shedding noise characteristics of isolated airfoils in Reynolds number range applicable to full scale helicopter rotors  
[AD-734433] p0272 N72-19048
- Preliminary study of dynamic preferential runway system and exposure of communities to aircraft noise  
[NASA-CR-125821] p0323 N72-20250
- Numerical analysis of aircraft noise created by externally blown flaps on STOL aircraft and methods for noise reduction  
[NASA-TM-X-68047] p0331 N72-21001
- Large-scale wind tunnel investigation of noise characteristics of semispan wing equipped with externally blown jet flaps  
[NASA-TM-X-62154] p0420 N72-24011
- Acceptability of VTOL aircraft noise determined by test subjects evaluating simulated sounds of helicopter, tilt wing aircraft, and turbojet aircraft  
[NASA-CR-2043] p0422 N72-24025
- Correlation of total sound power and peak sideline overall sound pressure level for subsonic and supersonic jets of aircraft engine exhaust  
[NASA-TM-X-68059] p0427 N72-24711
- Designing TP-34 mixer exhaust nozzle to reduce noise generated by impingement of exhaust on STOL wing flap  
[NASA-CR-120916] p0465 N72-26014
- Procedures for reduction of noise generated by tilt-rotor aircraft during takeoff and landing phases of flight by flight path control  
[NASA-CR-2034] p0467 N72-26025
- Measurement of aircraft noise generated by YOV-10A short takeoff aircraft and comparison with wind tunnel data  
[NASA-TM-X-62166] p0480 N72-27031
- Environmental impact surveys of quiet engine program  
[NASA-TM-X-68545] p0487 N72-27814
- Regulations and operational procedures for control of aircraft noise levels  
[PAA-RD-71-24] p0514 N72-28005
- Design integration and noise reduction for jet STOL transport aircraft - Vol. 1  
[NASA-CR-114471] p0514 N72-28007
- Noise measurements obtained during visual approach monitor evaluation in 747 aircraft  
[NASA-CR-114478] p0515 N72-28010
- Analysis of noise pollution created by aircraft operations in San Francisco, California area  
p0515 N72-28013
- Combat readiness, military training, and noise control
- [AD-739972] p0526 N72-28989
- Analysis of data on land uses around airports and application of computer program for data processing  
p0532 N72-29210
- Community reaction to aircraft noise in vicinity of airports in Chattanooga, Tennessee, and Reno, Nevada  
[NASA-CR-2104] p0573 N72-30011

[AD-744183] p0632 N72-32773
- Effect of noise on structural design of aircraft parts  
[ESDU-72001] p0648 N72-33902
- ### AIRCRAFT PERFORMANCE
- #### NT HELICOPTER PERFORMANCE
- TriStar commercial jet transport aircraft development, discussing design and flight tests for operating efficiency, reliability and safety  
[SAE PAPER 710755] p0004 A72-10252
- STOL and VTOL aircraft performance and efficiency, discussing landing and takeoff distances reduction  
p0014 A72-11258

- VFW-614 short range twin jet passenger transport aircraft, analyzing service performance and economic efficiency requirements influence on design characteristics p0059 A72-13643
- Air to air maneuverability of aircraft capable of in-flight thrust vectoring, indicating improved deceleration, normal acceleration g-force and turn rate p0060 A72-13877
- Civil aircraft technological constraints and requirements, discussing noise, congestion and performance characteristics of rotorcraft, STOL, VTOL, hypersonic and supersonic transports p0115 A72-15774
- Pilot evaluation of Boeing 747 handling, directional stability, stall, rudder feel forces, landing, inertial navigation and reliability p0135 A72-16992
- French civil aircraft displayed at 1971 Le Bourget Air Show, discussing design and performance characteristics of Airbus, Concorde, Caravelle, Corvette, Falcon, Fregate, STOL-A-904 and Mercure p0136 A72-17193
- Flight simulator for aircraft design, emphasizing compromise between performance and control requirements to avoid excess weight and drag p0142 A72-18245
- Federal Air Regulations procedures for civil transport aircraft flight testing under natural and/or simulated icing conditions p0147 A72-18501
- Aircraft performance and flight path optimization algorithms for minimum fuel-fixed range, using calculus of variations p0182 A72-19091
- Aircraft performance parameters in terms of effect on lifting system service and fatigue life, and on design p0182 A72-19111
- Aircraft electric power generation history, noting aircraft performance effect on electrical system design p0186 A72-20201
- French, British, Italian, U.S., German and Israeli military aircraft, presenting design and performance data p0187 A72-20308
- Aeromechanical analysis of flight conditions for conventional aircraft, including kinematics of curvilinear motions with constant speed p0188 A72-20372
- DC-10 aircraft automatic landing performance and failure assessment monitor system p0190 A72-21003
- F-14 naval fighter aircraft flight test programs, discussing instrumentation and low-speed test results p0190 A72-21005
- Maneuvering aircraft sonic boom propagation and signatures prediction in stratified atmosphere by geometric acoustic method p0197 A72-21904
- Fixed wing agricultural aircraft, comparing different designs in terms of performance, safety, handling and economic efficiency p0232 A72-22940
- Airfoil ram-wing air-water hybrid vehicle X-113. An design and operational principles based on aerodynamic ground effect, discussing flight tested performance characteristics p0232 A72-22971
- Flight tests of combination flight director displays and attitude command control system effect on general aviation aircraft handling qualities during ILS approach [SAE PAPER 720316] p0289 A72-25580
- Super Guppy four engine aircraft characteristics, performance and loading device for bulky cargo air transportation p0300 A72-25812
- European passenger aircraft Airbus program, discussing various configurations performance, economic factors and technical support p0307 A72-27108
- STOL aircraft role in civil aviation, discussing short range operation, ATC, reduced noise and weather capability p0310 A72-27518
- L-1011 flight test program, discussing aircraft design, flight station, controls, flying qualities, etc p0310 A72-27519
- Airplane sideslip and yaw rate perturbations by continuous random vertical and side gusts, using low pass filtered white noise representation for mathematical modeling p0313 A72-28125
- Air cushion aircraft landing systems advantages and suitability for arctic transportation applications p0346 A72-28793
- European Airbus program, noting international cooperation juridical sources, content and organization, aircraft performance, financing, project chronology and Franco-German agreement p0346 A72-28795
- Aircraft flight conditions effect on low altitude critical air turbulence in terms of gust velocity components for CAT prediction p0348 A72-28861
- Stratospheric meteorological characteristics effects on Concorde supersonic flight performance, fuel consumption, dynamic behavior and passenger comfort p0349 A72-28876
- HR 200 training and acrobatic two seater low wing metal aircraft series production, dimensions and maximum takeoff weight performances p0357 A72-30039
- Hovercraft state of development and utilization potential, comparing performance to other transportation modes p0361 A72-30818
- Flight test instrumentation system for measurement of aircraft performance, stability and control characteristics during nonsteady flight p0412 A72-33639
- The use of airborne magnetic tape recorders for fatigue life monitoring. p0449 A72-34812
- The fly-by-wire systems approach to aircraft flying qualities. p0454 A72-35575
- Meteorological effects on SST performance, considering temperature, wind, turbulence, hydrometeors, ozone and radiation effects p0454 A72-35790
- Aircraft flight test facilities deficiencies and modernization impediments, recommending integrated facility research program establishment p0491 A72-37676
- Propulsion technology advance factors, stressing noise and exhaust emissions reduction, economic considerations and aircraft performance p0491 A72-37679
- The Dassault Mystere 20. p0494 A72-37900
- Flight test report on L-1011 aerodynamic characteristics, discussing high and low speed performance, stability and control, stall behavior, etc p0494 A72-38030
- The development of dynamic flight test techniques for the extraction of aircraft performance. [AIAA PAPER 72-785] p0495 A72-38102
- Automated airborne recording system to obtain data on aircraft engines, subsystems and operational performance, considering cost and economic benefits [AIAA PAPER 72-752] p0498 A72-38126
- Advanced technology transport /ATT/ aircraft configurations design parameters analysis, considering cruise speed, passenger capacities, ranges, noise level and economics [AIAA PAPER 72-757] p0498 A72-38127
- A-X Air Force flight evaluation. [AIAA PAPER 72-770] p0499 A72-38131
- Maneuver load control and relaxed static stability applied to a contemporary fighter aircraft. [AIAA PAPER 72-870] p0506 A72-39129
- Aerodynamic test facility data on swept wings, peaky airfoils, aircraft flutter and transonic flow, discussing shock tubes and wind tunnels development p0509 A72-39846

- STOL performance criteria for military transport aircraft.  
[AIAA PAPER 72-806] p0510 A72-40055
- Defense systems development based on balance between theoretical studies and hardware prototyping for uncertainty reduction in performance and cost  
p0551 A72-40971
- High Reynolds number transonic wind tunnel facility /HIRT/ for improved aerodynamic testing of modern combat and commercial aircraft performance, maneuverability and handling qualities  
[AIAA PAPER 72-1035] p0559 A72-41609

**AIRCRAFT RELIABILITY**

Boeing 747B growth model FAA certification, discussing engine thrust, fuel capacity, taxi and flight weights and aircraft noise reduction [SAE PAPER 710753] p0004 A72-10251

Concorde airworthiness certification, discussing ground and flight test programs for performance, flying qualities and structures fatigue properties evaluation [SAE PAPER 710756] p0004 A72-10253

Aircraft power plant design and installation influence on operational effectiveness, discussing manufacturers and operators cooperation for reliability and maintainability enhancement [SAE PAPER 710777] p0006 A72-10269

Air transport maintenance regulation as part of National Aviation System program, discussing airworthiness, safety and reliability in relation to design requirements p0066 A72-14814

Concorde aircraft systems reliability and safety flight and simulator testing, discussing operational and environmental conditions and maintenance procedures p0187 A72-20309

Common law liability of aviation manufacturers, discussing safety, airworthiness, maintenance, reporting, modifications and inspection requirements and evidence of negligence p0189 A72-20671

Aircraft maintenance and reliability monitoring and control on scheduled airlines, considering component failure rate and mode analysis, sampling inspection and remedial action p0231 A72-22901

Commercial aircraft reliability program development from informal continuous product improvement to formalized methods based on reliability logic diagrams and probability calculations p0239 A72-24019

Aircraft scheduled maintenance, discussing turbine engine and component reliability protection, controlled overhaul, test and repair p0245 A72-24867

Aircraft maintenance optimization, considering safety, reliability, punctuality and cost factors p0246 A72-25108

Flight airworthiness requirements development for supersonic transports, V/STOL and transport and general aviation aircraft, exploring critical control and stability parameters [SAE PAPER 720306] p0288 A72-25570

Inspectability criteria for airframes with fatigue fail safe design requirements for small airplane certification [SAE PAPER 720310] p0289 A72-25574

Fatigue certification of general aviation aircraft in Australia, describing ground taxi load spectra and endurance and radiographic inspection of laminated spar caps [SAE PAPER 720311] p0289 A72-25575

Russian book on aircraft engine reliability covering defects, fractures and failure analysis, service life prediction, production deficiencies and operational conditions

p0301 A72-26068  
 WDT application to aircraft design and reliability, discussing fatigue life analysis and in-service monitoring for structural elements, components and airframes  
 p0307 A72-27198  
 Complete aircraft systems reliability and maintainability, discussing extraordinary variances causes, faulty data inferences and operational testing for equipment specifications validation  
 p0343 A72-28358  
 Strike aircraft reliability prediction in cost effectiveness analyses, showing failure probability distribution with time  
 p0343 A72-28360  
 Parametric approaches to statistical burn-in or debugging problems in aircraft reliability analysis  
 p0343 A72-28363  
 Environmental effects on aircraft structure operational reliability, discussing failure removal and protective coating lifetime  
 p0359 A72-30285  
 Computer algorithms and programs contribution to aircraft structure operational reliability and fatigue life calculation  
 p0359 A72-30288  
 Military systems cost reduction via civil avionics procurement techniques, discussing cost-reliability design criteria  
 p0399 A72-32215  
 Time parameter in military air operations, discussing weapon systems B and D, all-weather capability, communications, reliability and maintainability, manpower training, etc  
 p0401 A72-32453  
 Results of the reliability and maintainability demonstration of the OH-58A light observation helicopter.  
 [AHS PREPRINT 652] p0447 A72-34507  
 Integrity of flight control system design.  
 p0461 A72-37032  
 Future aspects of business aviation, discussing pilot training and aircraft reliability and maintenance in context of flight safety  
 p0507 A72-39741  
 Unique features of the B-1 flight control systems.  
 [AIAA PAPER 72-872] p0511 A72-40062  
 Modern landing impact load calculations and old-fashioned requirements.  
 [ICAS PAPER 72-31] p0554 A72-41156  
 In-flight and flight-line monitor system to detect foreign object damage in jet engines.  
 p0564 A72-42690  
 ICAO structural airworthiness requirements relation to air transportation safety, considering maneuver and gust loads in terms of limit load concept  
 p0566 A72-42830  
 Reliability analysis in the estimation of transport-type aircraft fatigue performance.  
 p0568 A72-42971  
 Life estimation and prediction of fighter aircraft.  
 p0568 A72-42972  
 Statistical method of failure analysis for redundancy forms selection, noting aircraft safety and reliability  
 p0568 A72-42973  
 Testing procedures for the design and life estimation of fatigue-sensitive structures.  
 p0568 A72-42974  
 Optimal fleet reliability under fatigue and chance overload in service.  
 p0607 A72-44656  
 Naval helicopters applications to search and rescue, ASW, ground support and other roles, considering reliability and maintenance  
 p0607 A72-44685  
 Agricultural aircraft flight loads - Typical spectra and some observations on airworthiness.  
 p0608 A72-44734  
 Development and characteristics of coordinated, in-flight and on-ground fault isolation system for maintenance of large commercial aircraft  
 p0040 N72-11027  
 Development of technique for graphic presentation of fault isolation and problem correction for maintenance of large commercial aircraft

p0040 N72-11028  
 Development and functions of organization for multinational certification of supersonic aircraft  
 p0040 N72-11029  
 Effect of optimum accessibility on improved maintenance and reliability of commercial aircraft  
 p0041 N72-11031  
 Statistical analysis of aircraft operations to show relationship of operational readiness, maintenance, scheduling, and life expectancy  
 [AD-728656] p0089 N72-11970  
 Flight simulation of aviation trainer-2 GAT-2 for determining reliability of light twin engine aircraft  
 [AD-731135] p0169 N72-15252  
 Airspeed losses during turning flight maneuvers in gusts applied to airworthiness requirements  
 [ARC-R/M-3672] p0204 N72-15973  
 Data recording program and analysis technique for determining airworthiness of civil aircraft from 1962 to 1969  
 [RAE-TR-71034] p0205 N72-15975  
 Aviation safety measures for aircraft reliability and flight control  
 p0252 N72-18017  
 Helicopter design for improving crash survivability of aircraft and occupants  
 p0274 N72-19141  
 Continuous inspection and maintenance schedule for determining airworthiness of aircraft  
 p0318 N72-20003  
 Fatigue requirements for ensuring structural integrity of military aeroplanes and helicopters  
 p0540 N72-29900  
 Predicting structural failure by applying structural fatigue test data analysis  
 p0540 N72-29903

## AIRCRAFT SAFETY

Air transportation system design for safety and efficiency, discussing navigation facilities and surveillance systems employment for blunder prevention  
 p0012 A72-11117  
 Aircraft crash fire protection, using passenger compartment heat shield of fire-retardant polyisocyanurate foam and intumescent paint  
 p0057 A72-13484  
 Safety factors of aircraft flight instruments, discussing altimeter and artificial horizon reading errors and modifications  
 p0060 A72-13698  
 ATC for North Atlantic air transportation, emphasizing collision risk model for safety standards assessment  
 p0062 A72-14484  
 Air transport maintenance regulation as part of National Aviation System program, discussing airworthiness, safety and reliability in relation to design requirements  
 p0066 A72-14814  
 Time/frequency collision avoidance systems, discussing operating principle and economic aspects for airlines and general aviation  
 p0066 A72-14816  
 Aircraft collision avoidance system design and evaluation, developing closed form method for system alarm rate estimation  
 [AIAA PAPER 72-97] p0133 A72-16945  
 Computerized Eros II airborne collision avoidance time frequency system design, considering radio transmission, synchronization and ground stations  
 p0143 A72-18247  
 Flight flutter boundary testing, describing steps to minimize risk  
 p0145 A72-18491  
 Crashproof rotorcraft STOL aircraft for rescue operation, discussing orthodox rigid and special rotary wings design, air tunnel experiment and flight tests  
 p0147 A72-18582  
 Bird hazards to aircraft, discussing protective measures  
 p0177 A72-18771  
 Air safety - Conference, Mexico City, October 1971  
 p0178 A72-18827  
 Aircraft safety factors, noting navigational and flight system in Concorde design  
 p0178 A72-18828

- Government role in widebody aircraft introduction to air carrier service, discussing aircraft maintenance, design and fail-safe structural configurations p0179 A72-18831
- Antisticking kerosene fuels for aircraft crash fires reduction p0179 A72-18837
- Aircraft safety enhancement by computer controlled flight simulator training of air crews, discussing Boeing 747 program p0179 A72-18839
- Concorde aircraft systems reliability and safety flight and simulator testing, discussing operational and environmental conditions and maintenance procedures p0187 A72-20309
- Mercury short haul transport aircraft, emphasizing lightweight structural design with extensive use of integral machined components for fatigue safety p0187 A72-20310
- Common law liability of aviation manufacturers, discussing safety, airworthiness, maintenance, reporting, modifications and inspection requirements and evidence of negligence p0189 A72-20671
- Eight-place turbofan powered business jet aircraft design, discussing structure, fuel system, engines crew station and safety features p0194 A72-21572
- Dynamic response index /DRI/ minimization for personnel aircraft emergency catapult escape systems to reduce injury probability p0194 A72-21576
- Crashworthy upper torso restraint systems for general aviation, incorporating strap takeup devices p0195 A72-21578
- Collision avoidance systems requirements and criteria, evaluating Eros time frequency and Secant interrogation-and-reply systems p0231 A72-22822
- Runway fog dispersal system based on underground installed flight-discarded turbojet engines, discussing system efficiency and economics p0232 A72-22910
- Fixed wing agricultural aircraft, comparing different designs in terms of performance, safety, handling and economic efficiency p0232 A72-22940
- Aircraft collision near misses under IFR and VFR conditions, discussing ATC coordination, equipment failure and personal and planning problems p0233 A72-22972
- Book on general aviation safety covering statistical accident records, accident analysis, crashworthiness, preventive measures, etc p0236 A72-23750
- Aircraft maintenance optimization, considering safety, reliability, punctuality and cost factors p0246 A72-25108
- General aviation aircraft structural safety studied with 1547 accident histories, noting IFR and turbulent weather conditions predominance [SAE PAPER 720308] p0289 A72-25572
- SECANT system of aircraft separation and control by nonsynchronous technique for midair collision avoidance [SAE PAPER 720313] p0289 A72-25577
- Test facility design for aircraft crashworthiness evaluation and improvement, considering survivable accident surrounding conditions, equipment and testing methods [SAE PAPER 720323] p0290 A72-25586
- Dynamic deceleration anthropomorphic dummy tests of general aviation occupant lap belt/shoulder harness restraint systems [SAE PAPER 720325] p0291 A72-25588
- Minimum safety flight altitudes for aircraft landing systems and lateral deviations for correction maneuver p0308 A72-27269
- OMEGA effect on oceanic airway safety, noting improvement over inertial navigation systems p0352 A72-29197
- Simulator for physical forces experienced by carrier aircraft during catapult launches and arrested landings, considering external stores safe suspension p0403 A72-32620
- SECANT collision avoidance system, describing operational principles and flight test results p0417 A72-34137
- The onboard authority of the aircraft commanding officer as provided by the 1963 Tokyo Convention p0454 A72-35763
- Airport improvements needed for safety. p0460 A72-36784
- FAA implemented airport certification legislation covering minimum safety standards, operation manual, emergency plan, fire and rescue service and pavement requirements p0460 A72-36785
- Integrity of flight control system design. p0461 A72-37032
- Survivable flight control system compatibility test program. [AIAA PAPER 72-761] p0500 A72-38143
- Annual Corporate Aircraft Safety Seminar, 17th, Washington, D.C., April 17, 18, 1972, Proceedings. p0507 A72-39740
- Safety in commuter airline operation. p0508 A72-39748
- Aircraft emergency evacuation systems, discussing door designs, inflatable escape slide and slide/lifeboat combination p0563 A72-42520
- Aircraft structural safety criteria based on acceptable failure probability, determining critical load levels p0566 A72-42829
- ICAO structural airworthiness requirements relation to air transportation safety, considering maneuver and gust loads in terms of limit load concept p0566 A72-42830
- Statistical method of failure analysis for redundancy forms selection, noting aircraft safety and reliability p0568 A72-42973
- Allowable region of approach height and desirable approach path of aircraft for safe landing, presenting optimal control trajectories p0603 A72-44497
- Proceedings of conference on aviation maintenance in 1970 time period conducted at Oklahoma City, Oklahoma, December 8-10, 1970 p0039 N72-11019
- Development and functions of organization for multinational certification of supersonic aircraft p0040 N72-11029
- Description of aircraft accessory reliability program to provide improved safety of operation for commercial aircraft p0041 N72-11035
- Techniques for forecasting turbulent weather conditions below 10,000 feet for light aircraft operating in Hawaiian Islands [AD-726107] p0046 N72-11525
- Systems performance and safety in helicopter approach and landing, and radioelectronic guidance array p0085 N72-11939
- Evaluation of elastomer coatings and curtains as containment methods to prevent fuel spill from integral aircraft wing tanks following crash [FAA-RD-71-75] p0086 N72-11947
- Technology assessments for advanced aircraft performance, utility, safety, and public acceptance p0104 N72-13013
- Airline operational data from unusual events recording systems in 707, 727, and 737 aircraft [FAA-RD-71-69] p0105 N72-13022
- Congressional legislation concerning safety improvements for airports in Appalachian area p0113 N72-13927
- Recommendations for improving general aviation safety p0113 N72-13937
- Human factors engineering to determine effectiveness of auditory display for aircraft collision warning and avoidance system [AD-729765] p0153 N72-14005
- Development of criteria for evaluating airport traffic levels to determine eligibility for installation of visual flight rules towers

# SUBJECT INDEX

[AD-729443] p0161 N72-14679  
Design, development, and evaluation of locator  
equipment to provide aircraft position  
information for flight inspection of navigation  
facilities  
[FAA-RD-72-3] p0170 N72-15434  
Applying dimensional analysis techniques to  
containment/deflection problem of bursting  
high-rpm rotating parts of turbojet engines  
[NASA-CR-120841] p0172 N72-15713  
Analysis of factors contributing to general  
aviation safety for reducing current accident  
rates  
[PB-202928] p0220 N72-17015  
Aircraft design, safety, reliability, and  
maintenance  
p0252 N72-18018  
Effect of maintenance procedures on causes of  
aircraft accidents and statistical analysis of  
improved aircraft safety through elimination of  
maintenance faults  
p0253 N72-18021  
Development of method for determining ramp  
altitude clearance of aircraft approaching  
aircraft carrier for landing and identification  
of unsafe situation  
[AD-732760] p0254 N72-18032  
Design criteria for safety factors in aircraft  
crash survival  
[AD-733358] p0255 N72-18038  
Clear air turbulence radiometric detection program  
for alerting aircraft  
[AD-733762] p0261 N72-18641  
Analysis of inertial navigation system performance  
to determine effects on aircraft safety and  
collision avoidance during flight over North  
Atlantic Ocean  
[AD-733753] p0263 N72-18670  
Development of collision risk model to analyze  
effects of separation standards on aircraft  
safety during parallel tracking operations in  
North Atlantic Ocean  
[AD-733754] p0263 N72-18671  
Relating avionics maintenance to aviation safety  
p0268 N72-19015  
Applying systems analysis techniques to aircraft  
maintenance to achieve aviation safety  
p0268 N72-19017  
Computer program and numerical analysis of  
feasibility of using suction between and along  
runways to remove trailing edge vortex streets  
[IDA-LOG-HQ-69-10164] p0337 N72-21290  
Development of discrete address beacon system to  
improve operation of microwave landing system  
for high density terminal area surveillance  
[DOT-TSC-FAA-71-26] p0339 N72-21628  
Design of aircraft seat cushions and parachute  
support spacers to improve comfort and safety  
factors  
[AD-736873] p0384 N72-23032  
Application of explosives for development of  
instantaneous activation of emergency exit  
systems aboard military and civilian transport  
aircraft  
[AD-736056] p0386 N72-23046  
FAA engineering and development programs for  
aircraft safety, landing, navigation,  
communication and support services  
p0391 N72-23980  
Development of computer program to analyze  
effectiveness of pilot warning indicator systems  
in avoiding aircraft collisions  
[NASA-CR-126669] p0427 N72-24672  
Analysis of collision hazards involved in VFR  
flight near clouds and effect of safe vertical  
clearance from clouds to reduce aircraft accidents  
[AD-737804] p0427 N72-24682  
Catalog on capacity and efficiency of air traffic  
control systems  
[AD-737513] p0427 N72-24683  
Fatigue assessment of safe life and fail-safe  
structures  
[ARL/SM-REPT-334] p0438 N72-25899  
Practical application of mishap data in Army  
aircraft system safety programs  
p0439 N72-25967  
Pilot safety considerations in design and  
operation of X-24A lifting body vehicle  
p0439 N72-25969

Application of time/frequency collision avoidance  
system for ground obstacle avoidance and minimum  
altitude protection zone around airports  
p0522 N72-28672  
Collision force method for studying impact  
interaction of engine rotor blade fragment with  
containment ring  
[NASA-CR-120952] p0528 N72-29004  
High temperature resistant fabrics to replace  
current specification nylon and cotton fabrics  
in aircraft  
[AD-740600] p0536 N72-29612  
Development of materials and techniques to improve  
and optimize flame arresting in aircraft  
fuselage and wing fuel tanks  
[AD-743016] p0592 N72-31954  
Application of nondestructive testing techniques  
for improving aircraft safety and aircraft  
accident reduction  
p0634 N72-32981  
Compilation of selected aircraft accident reports  
occurring in US Civil Aviation operations during  
calendar year 1970  
[PB-210121] p0642 N72-33045

## AIRCRAFT SPECIFICATIONS

Le Bourget Exposition data for displayed civil  
transport aircraft  
p0059 A72-13638  
Aircraft electric power equipment transient  
voltage and EMC limits specifications  
p0061 A72-14043  
Trainer-combat turbojet or turboprop aircraft  
characteristics, comparing flight, weight, size,  
maintenance and development costs  
p0119 A72-16178  
Structural requirements for normal category  
plastic aircraft civil certification, noting  
compliance with Federal Aviation Regulations  
[SAE PAPER 720304] p0288 A72-25568  
HR 200 training and acrobatic two seater low wing  
metal aircraft series production, dimensions and  
maximum takeoff weight performances  
p0357 A72-30039  
Critical review of Mil-P-83300 V/STOL flying  
qualities specifications as applied to  
helicopter design and missions, suggesting  
inappropriateness for Navy helicopters  
[AHS PREPRINT 643] p0447 A72-34503  
Investigation of the commonality in development of  
military and commercial STOL transports.  
[AIAA PAPER 72-808] p0497 A72-38114  
Military specification adoption for flight  
characteristics of piloted V/STOL aircraft  
[AD-725746] p0032 N72-10048  
Air safety program for aircraft manufacturers  
p0439 N72-25974

## AIRCRAFT STABILITY

### NT HOVERING STABILITY

Aircraft stability coefficient determination by  
numerical integration fitting to differential  
equations of motion  
p0013 A72-11136  
Aircraft ride comfort problem in turbulent air,  
comparing free and fixed wing aircraft responses  
p0015 A72-11720  
Soviet book on in-flight studies of aircraft  
stability and controllability covering dynamic  
characteristics, measurements, balancing curves,  
aerodynamic forces and limiting and special  
flight regimes  
p0021 A72-12542  
Aircraft spin characteristics due to superstall,  
comparing three stall types with respect to  
recovery, yaw damping and rate of rotation  
[DGLR PAPER 71-057] p0023 A72-12718  
Aeroelastic models construction for flutter  
analysis of aircraft design, noting error risk  
reduction  
[DGLR PAPER 71-082] p0023 A72-12722  
Flight vibration testing methods for ascertaining  
flutter stability of high speed aircraft  
[DGLR PAPER 71-083] p0023 A72-12725  
Wind tunnel model instrumentation and captive  
trajectory facilities for aircraft stability,  
control and metric wing-pylon store tests for  
performance and structural predictions  
p0053 A72-12921  
Differential and difference equations approximate  
solutions in finite state machine form,

## SUBJECT INDEX

## AIRCRAFT STABILITY CONTD

- developing adaptive gain changer model in aircraft stability control system p0054 A72-13164
- Dynamic stability, control and structural response of transonic jet transport to atmospheric turbulence p0119 A72-16348
- RF-8D aircraft variable stability system ground/inflight calibration for determination of flight control system dynamics effects on flying qualities p0125 A72-16660
- Flight control systems development, discussing onboard computers use in subsystems functional integration, stabilization and landing systems, inertial navigation and flight simulation p0127 A72-16736
- Direct side force control by rudder deflection and asymmetrical drag utilization to cancel yawing moment, discussing variable stability T-33 flight tests [AIAA PAPER 72-94] p0133 A72-16946
- Model following variable stability system for X-14B VTOL aircraft, discussing hardware design and flight evaluation [AIAA PAPER 72-96] p0134 A72-16978
- Motion dynamics of aircraft-autopilot closed loop system under influence of atmospheric turbulence and electric circuitry thermal noise p0181 A72-18990
- Book on dynamics of atmospheric flight covering unsteady motion, small disturbance theory, aerodynamic characteristics, aircraft stability and control, handling qualities, etc p0192 A72-21491
- Nonlinear longitudinal aerodynamic characteristics effect on rigid aircraft response to normal acceleration due to atmospheric turbulence, using power spectral technique p0236 A72-23461
- Pitching moments effect on phugoid and height mode stability of aircraft in supersonic flight p0236 A72-23622
- Flight airworthiness requirements development for supersonic transports, V/STOL and transport and general aviation aircraft, exploring critical control and stability parameters [SAE PAPER 720306] p0288 A72-25570
- Runway motion stability of aircraft with three wheel landing gear, assuming elastic response to moment induced drift p0307 A72-27235
- Hydrofluidic stability augmentation system /HYSAS/ development for military helicopters, discussing test program and technical feasibility p0309 A72-27407
- Flight tests of stability augmentation system for light airplane improving pilot control during IFR encounter p0309 A72-27513
- Thunderstorm-associated aircraft mishaps relation to surrounding synoptic scale meteorological conditions, discussing storm interior condition contribution to flight stability upset p0347 A72-28851
- Aeroelasticity, discussing gust and maneuver load alleviation, flutter suppression, aircraft stability, computerized aeroelastic analysis, aeroelastic optimization, composite structures, etc p0393 A72-31202
- Hydrofluidic three-axis stability augmentation system to improve UH-1B helicopter damping and handling qualities during high speed gunfiring missions p0413 A72-33650
- Russian book on flight dynamics covering horizontal flight, takeoff, climb and landing characteristics, meteorological conditions, helicopters, trajectory problems, stability and controllability analysis, etc p0413 A72-33874
- An experimental investigation of STOL longitudinal flying qualities in the landing approach using the variable stability X-22A aircraft. [AHS PREPRINT 642] p0447 A72-34502
- The world speed records of the SA 341 - Gazelle. [AHS PREPRINT 651] p0447 A72-34506
- Hydrofluidic stability augmentation system for U.S. Army helicopters, emphasizing reliability, maintainability and reduced cost p0449 A72-34928
- F-111 stall inhibitor system with angle of attack limitation, describing interface with stability augmentation system p0454 A72-35577
- Special control of spiral flight curves with the neutral and maneuver points as ultimate positions of the indifference points p0461 A72-36942
- STOL transport stability and control derivative prediction methods and accuracy requirements. [AIAA PAPER 72-780] p0500 A72-38139
- Optimal selection of stability augmentation parameters for excellent pilot acceptance. p0501 A72-38227
- A generalized method for the identification of aircraft stability and control derivatives, from flight test data. p0502 A72-38260
- Problems and solutions related to the design of a control augmentation system for a longitudinally unstable supersonic transport. [AIAA PAPER 72-871] p0505 A72-39128
- Maneuver load control and relaxed static stability applied to a contemporary fighter aircraft. [AIAA PAPER 72-870] p0506 A72-39129
- A new method of calculating the natural vibrations of a free aeroplane. [ICAS PAPER 72-05] p0552 A72-41130
- Analytic prediction of aircraft spin characteristics and analysis of spin recovery. [AIAA PAPER 72-985] p0561 A72-42329
- Development of design criteria for predicting departure characteristics and spin susceptibility of fighter-type aircraft. [AIAA PAPER 72-984] p0561 A72-42330
- Evaluation of flight instrumentation for the identification of stability and control derivatives. [AIAA PAPER 72-963] p0561 A72-42346
- Aircraft longitudinal stability under conditions of varying atmospheric density, thrust force and velocity, determining critical altitude for vanishing oscillations [AIAA PAPER 72-951] p0562 A72-42358
- Steady state equations of motion, equilibrium shape and stability derivatives of elastic airplanes evaluated with finite element methods. p0566 A72-42845
- Output-feedback control law for randomly distributed multivariable system. p0597 A72-43608
- Aerial expedition for studying conditions of atmospheric boundary layer over oasis and semiarid region [AD-727535] p0034 A72-10332
- Evaluation and comparison of several methods for estimating low speed stability derivatives of two unpowered aircraft configurations [NASA-TN-D-6531] p0079 A72-11896
- Atmospheric turbulence power spectra for predicting rigid aircraft center of gravity response [AR-R/M-3665] p0089 A72-11965
- Acquisition and analysis of aerodynamic stability and control data for vertical takeoff aircraft configurations [AD-726103] p0089 A72-11969
- Flutter analysis of aircraft, taking into account servomechanism effects [DLR-PB-71-37] p0151 A72-13995
- Development of techniques for predicting aircraft stability and control aspects of V/STOL aircraft [AD-730121] p0153 A72-14004
- Flight dynamics of V/STOL aircraft including stability, noise and ground effect p0203 A72-15964
- Equations of motion for reentry trajectories and glide path of aircraft p0204 A72-15965
- Design of helicopter stability and control augmentation system using optimal control theory and computerized simulation [AD-732911] p0220 A72-17013
- Mathematical wind gust model for computer simulation of aircraft aerodynamic stability

[AD-733905] p0261 N72-18648  
Flight test method for determination of stability and performance characteristics from maneuvers in low and intermediate frequencies

## AIRCRAFT STRUCTURES

## NT AIRFRAMES

## NT FUSELAGES

## NT PLASTIC AIRCRAFT STRUCTURES

Warpage control of large Al alloy forgings machining of jumbo jet components, using packing and storage methods  
[SAE PAPER 710801] p0006 A72-10280  
Structural sandwich panel design, establishing simple stress and deflection formulas under transverse loading based on tests evaluating balsa as laminate core  
p0009 A72-10723  
Aircraft interior materials selection relative to fire hazards and smoke emission properties  
[PI PAPER 18] p0054 A72-13249  
High strength, stiffness and low density properties of boron/aluminum matrix composites in flight structures  
p0065 A72-14745  
Papers on aerospace structure by N. J. Hoff covering aircraft framework, stress analysis, structural stability, shell theories, bending, buckling, monocoque and sandwich structures, etc  
p0070 A72-15238  
Step-by-step perturbation method for calculating vibration modes of aerospace structure  
[ONERA, TP NO. 968] p0071 A72-15552  
Hallstone impact simulator for prediction of hail damage to aircraft structures, presenting data on damage to flat metal sheets and spherical caps  
[AIAA PAPER 72-163] p0134 A72-16957  
Unidirectional carbon fiber composites effects and use of stress envelopes in aircraft structure design  
p0135 A72-16997  
Concorde airframe testing for thermal effects on structural strength and fatigue life, discussing facilities for flight conditions simulation  
p0136 A72-17197  
Adhesive bonded components in aircraft and aerospace structures, discussing manufacturing, metal surface preparation, inspection and environmental exposure  
[SAE PAPER 720118] p0136 A72-17325  
Fatigue behavior of notched or cracked aircraft structure parts, examining service life prediction problem  
p0139 A72-17811  
Structural demonstration flight testing /U.S. Navy/ of new aircraft, presenting maneuver checklist  
p0145 A72-18489  
Airloads and structural integrity flight testing /U.S. Air Force/, noting dynamic response, fatigue tests and temperature data acquisition  
p0145 A72-18490  
Aircraft light alloy integral construction for stress concentration and fatigue failure avoidance, describing continuous casting process, stress relieving and ultrasonic flaw

- testing procedures p0185 A72-19725
- Mercury short haul transport aircraft, emphasizing lightweight structural design with extensive use of integral machined components for fatigue safety p0187 A72-20310
- Wilga 3 aircraft structure service life from structural fatigue theory and tests, emphasizing operational load distribution measurement p0196 A72-21634
- Large automated tape placement machine tool design and construction for laying up aircraft structures from composite materials p0196 A72-21690
- Heat treatment and machining for distortion control of large Al alloy forgings for DC 10 aircraft p0228 A72-22476
- Automatic riveting machine for fuel tight aircraft structures, describing process technique and machine design details and features p0232 A72-22906
- Corrosion resistant fabrication methods in jumbo jetliners components to reduce maintenance and repair downtime, discussing clad wing and fuselage skins p0239 A72-24025
- Structural Acoustic Monitor system for airframe structural proof testing, providing multichannel recording and aural monitoring of acoustic data derived from aircraft mounted accelerometers p0240 A72-24146
- Unsteady aerodynamic loadings of flexible aircraft with nonplanar wings and wing-tail surfaces in supersonic flow [AIAA PAPER 72-378] p0287 A72-25402
- Aircraft wing structure fatigue life estimates based on flight load time histories from counter accelerometers [SAE PAPER 720305] p0288 A72-25569
- Layered anisotropic fiber composite /Tetra-Core/ for sandwich construction and aircraft applications, discussing design, fabrication and strength characteristics [SAE PAPER 720343] p0292 A72-25599
- Crack initiation detecting and recording instrument with optical strain gages for double shear fatigue tests of aircraft fasteners p0300 A72-25823
- Optical quality requirements for aircraft transparencies, considering resolution, haze, halation, light transmission, distortion, binocular deviation, double images, scratches and inclusions p0305 A72-27003
- Optical qualities of aircraft windshields and direct vision windows, considering color, light transmission, faults, heating, distortion, inside reflections and double images p0305 A72-27004
- Aircraft windscreen design, discussing high impact strength glass, electroconductive film, transparency service life and weight reduction p0305 A72-27006
- Aircraft fuselage acrylic glazing design, covering passenger cabin window, cockpit windscreen and various surface coatings p0305 A72-27008
- Acrylics and polycarbonates properties in aircraft transparencies design, emphasizing cost and optical, mechanical, thermal and chemical properties p0305 A72-27009
- Polycarbonates applications in aircraft transparencies, discussing chemical, heat, impact and abrasion resistance, toughness and weathering p0305 A72-27010
- Aircraft windscreen reliability, discussing delamination, interface shear stress effects and analogy to metal fatigue p0306 A72-27011
- Concorde aircraft optical transparency components design characteristics and reliability tests, noting visor, pilot forward windshield, flight deck side windows and cabin windows p0306 A72-27012
- Aircraft windshield bird impact resistance, noting weight, speed, angle and window geometry effects p0306 A72-27014
- Transparent aircraft polycarbonate glazing systems shielding properties for projectile and bird impacts p0306 A72-27015
- Chemically strengthened glass for eject-through frangible canopy design in aircraft emergency escape systems, noting protection against ejection injuries p0306 A72-27016
- Emergency escape from high performance military aircraft in flight and on ground, using explosive cord for transparent canopy material breakup p0306 A72-27017
- Metal matrix composites application to aircraft structures, describing design, analysis and fabrication of aircraft bulkhead with B-Al as main structural material p0312 A72-28096
- Graphite fiber-epoxy composite systems development for F-5 aircraft landing gear door, speed brake, leading and trailing edge flaps and horizontal stabilizer p0312 A72-28097
- Russian book on An-12 turboprop transport aircraft structural and aerodynamic characteristics covering engine operation, piloting, stability, controllability, etc p0315 A72-28343
- Boron and carbon fiber reinforced plastics applications in aircraft and engine structural components, discussing dynamic and impact damping properties compared to conventional materials p0344 A72-28555
- General Dynamics model 401 air superiority single engine fighter design stressing light weight structure and maneuverability at high speeds and angles of attack p0344 A72-28575
- Optimal design of thin walled minimum weight aircraft shell structures, using linear programming p0351 A72-29143
- Stress levels and fatigue in aircraft structures subjected to jet noise, noting stress calculation for skin panels and control surfaces p0355 A72-29579
- Dynamically similar wind tunnel models for transonic aeroelastic studies of aircraft failures or structural damage and flutter margins [ONERA, TP NO. 1082] p0356 A72-29672
- Aircraft structures design and development with composite materials, considering materials characteristics relations to structural components dynamic response p0356 A72-29691
- Computer algorithms and programs contribution to aircraft structure operational reliability and fatigue life calculation p0359 A72-30288
- Ni-Cr-Ti steel aircraft structural element fatigue life calculation based on failure mechanism involving crack propagation p0360 A72-30429
- Mechanics fundamentals in aerodynamical aircraft analysis, noting force concept and Newton theory p0361 A72-30817
- Navy program for composites technology development in aircraft structures, discussing design, reliability and cost [ASME PAPER 72-DE-3] p0362 A72-30860
- L-1011 propulsion, fuel, flight control, navigation, avionics, communication, electrical, environmental control and auxiliary power systems, discussing structure and high lift devices p0400 A72-32427
- Adhesive bonding of L-1011 body shell panels for improved fatigue strength and corrosion resistance p0400 A72-32429
- Cost-saving techniques in helicopter structural test methods, suggesting system simulation, component replacement time calculation and computer techniques p0407 A72-33221
- Resonant vibration of thin walled rods and stiffened plates and cylindrical shells, noting

- aircraft and rocket structures p0413 A72-33679
- Application of boron/epoxy to the CH-54B Skycrane helicopter. [AHS PREPRINT 670] p0448 A72-34510
- Full scale airframe fatigue testing of the CH-46. [AHS PREPRINT 671] p0448 A72-34511
- Al alloys, high strength steels and Ti alloys in aircraft construction, reviewing premetal materials in heavier than air vehicles p0451 A72-35375
- Russian book on aircraft design covering flight conditions, structure and control characteristics, production and stress analysis p0451 A72-35448
- Boron- and graphite-epoxy and boron-aluminum composites forming, processing and costs for aircraft structural materials p0454 A72-35663
- Combined spot weld-adhesive bonding to join sheet metal parts with applications to propellant tanks and spacecraft and aircraft structures [SME PAPER AD 72-710] p0458 A72-36526
- Analysis of a partially cracked panel. p0458 A72-36771
- Graphite-epoxy composites application to commercial transports for weight and cost reduction p0491 A72-37680
- A flutter optimization program for aircraft structural design. [AIAA PAPER 72-795] p0496 A72-38111
- Structural development of the L-1011 Tri-Star. [AIAA PAPER 72-776] p0499 A72-38135
- High subsonic transport aircraft design development based on supercritical aerodynamic configuration and advanced structural, flight control and propulsion system technologies. [AIAA PAPER 72-756] p0510 A72-40056
- Russian book - Handbook of aircraft materials. p0548 A72-40459
- Sheet metal economics in aircraft construction based on strength/weight and stiffness/weight comparison of Al alloys and Ti alloys in relation to cost and structural weight considerations p0551 A72-41071
- Aircraft structures weight reduction through fiber-matrix composite materials, discussing anisotropic elastic and failure behavior of composite light shell structures [ICAS PAPER 72-38] p0555 A72-41163
- Russian book - Design principles in aircraft construction. p0560 A72-42074
- Digital data system with real time displays and multiprocessing capability for multitest of aircraft structure with operational manpower reduction, assessing performance p0564 A72-42696
- Book - Contributions to the theory of aircraft structures. p0566 A72-42826
- Transport aircraft wing compression panel failure in bending test due to stringer interruptions, analyzing structural deficiency via column and beam bending theories p0566 A72-42827
- Aircraft structural design loads definition by mission analysis criteria, taking into account gust loads via power spectral density method p0566 A72-42828
- Aircraft structural safety criteria based on acceptable failure probability, determining critical load levels p0566 A72-42829
- ICAO structural airworthiness requirements relation to air transportation safety, considering maneuver and gust loads in terms of limit load concept p0566 A72-42830
- Fatigue strength and fail-safe aspects of lug joint in aircraft structures, considering tension-compression load, fretting corrosion, prestress and residual stress p0567 A72-42851
- Vibration measurements of an airplane fuselage structure. I - Turbulent boundary layer excitation. II - Jet noise excitation. p0567 A72-42912
- Reliability analysis in the estimation of transport-type aircraft fatigue performance. p0568 A72-42971
- Hi-Shear and Hi-Lok fastening systems for aircraft manufacture, comparing strength and weight with conventional rivets and bolts [SAWE PAPER 901] p0594 A72-43451
- Detection of structural deterioration and associated airline maintenance problems. [SAWE PAPER 918] p0596 A72-43465
- Empty weight and cruise performance of very large subsonic jet transports. [SAWE PAPER 919] p0596 A72-43466
- Moment Sampling method as selfvalidating aircraft weight and balance accounting procedure [SAWE PAPER 920] p0596 A72-43467
- Aircraft design structural weight estimation based on post-design analysis of production aircraft, discussing weight factors application to new designs [SAWE PAPER 936] p0597 A72-43476
- The surface flaw in aircraft structures and related fracture mechanics analysis problems. p0600 A72-44228
- Liquid and solid precipitation on aircraft structure surfaces, discussing potential hazards to engine components and aircraft controls due to ice formation p0603 A72-44339
- Aircraft structures shock and blast loading characteristics from internal detonation, comparing computer program results with available data p0605 A72-44610
- Aircraft fatigue: Design, operational and economic aspects. p0608 A72-44726

- Design and certification for executive type aircraft. p0608 A72-44730
- Fan jet Falcon design and certification tests. p0608 A72-44731
- The application of Ti-6Al-4V titanium to helicopter fatigue loaded components. p0608 A72-44732
- Aircraft structures fatigue life expectancy under random acoustic excitation, describing testing methods and equipment p0609 A72-44739
- The importance of service inspection in aircraft fatigue. p0609 A72-44740
- Fatigue design and test program for the American SST. p0609 A72-44741
- Structural fatigue cost penalties in airline operations, considering inspection, maintenance and carrying capacity reduction p0610 A72-44743
- Structural fatigue cost in aircraft maintenance and repair, considering inspections, defect rectification, preventive modifications, replacements and NDT p0610 A72-44744
- Observations on designing to combat fatigue and its effects on the economics of civil transport aircraft. p0610 A72-44745
- Military aircraft construction, design and economic requirements, discussing fighter payloads, armament efficiency and fire control systems p0615 A72-45450
- Development of sprayable urethane sealant for protection of heated areas on aircraft structures [AD-727592] p0035 A72-10489
- Maximum likelihood technique for estimating deviations from parent population of aircraft fatigue failures determined from sample containing failed and non-failed members [ARC-CP-1144] p0098 A72-12925
- Forecasting technology of aircraft structural components for hypersonic cruise flight

# SUBJECT INDEX

# AIRCRAFT TIRES

Automated preliminary design of simplified wing structures to satisfy strength and flutter requirements [NASA-TN-D-6534] p0103 N72-13004

Concept development and feasibility analysis of aircraft metal structures reinforced with filamentary composites [NASA-CR-1859] p0112 N72-13887

Testing for acoustic fatigue in aircraft structures p0160 N72-14585

Effects of blast loads on structural failure in aircraft components p0172 N72-15797

Studying temperature response of metal plate to steady electric arc for determining possible damage to aircraft structures by lightning [D180-14190-1] p0172 N72-15822

Conference on shock and vibration effects on dynamic response of helicopter, aircraft, and spacecraft structures [AD-723349] p0203 N72-15962

Viscoelastic materials for additive damping in aircraft structural vibration problems p0215 N72-16802

Vibration damping and acoustic fatigue resistance of aircraft structural composites with viscoelastic core p0216 N72-16862

Variable tuning vibration absorber for control of rotor induced structural vibrations in CH-47 helicopter p0216 N72-16874

Damage criteria for parked aircraft exposed to explosions [AD-732427] p0219 N72-17011

Structural creep tests of aircraft structures under constant load-constant temperature, and under variable conditions [ISBN-642-97693-7] p0224 N72-17927

Weight estimation and analysis of major structural components of hypersonic, liquid hydrogen fueled aircraft [NASA-TN-D-6692] p0264 N72-18911

Wind tunnel tests to determine static stability and control characteristics of flexible aircraft [NASA-TN-D-6656] p0266 N72-19001

Survey and analysis of application of nondestructive inspection methods to aircraft structures [AGARD-R-587-71] p0278 N72-19541

Systematic drag measurements on rectangular and elliptical planform models with recessed surfaces or cut-outs [RAE-LIB-TRANS-1614] p0317 N72-19992

Aircraft paint film mechanical property changes caused by artificial weathering noting glass transition temperature and flexibility measurements [D-MAT-165] p0324 N72-20519

Development of numerical methods for analyzing structural properties of statically loaded wings using iteration process p0327 N72-20904

Mutual aerodynamic interference effects on flow field beneath aircraft with external stores examined by cross flow corrections method [AD-735655] p0328 N72-20974

Stress corrosion cracking in aircraft structures and various materials - historical review p0341 N72-21901

Conventional and reliability theories for analyzing safe fatigue life and safe inspection intervals for military and civil aircraft [ARL/SM-335] p0372 N72-22495

Survey and analysis of literature on fatigue damage accumulation in aircraft materials and structures [AGARD-AG-157] p0378 N72-22918

Fatigue assessment of safe life and fail-safe structures [ARL/SM-REPT-334] p0438 N72-25899

Corrosion resistance comparison of experimental coatings for steel fasteners used in high performance aircraft [AD-738805] p0471 N72-26472

Structural fatigue, thermal cycling, creep, and residual strength of aircraft metal structures reinforced with filamentary composites

[NASA-CR-2039] p0475 N72-26939

Development, stress analysis, and manufacturing of horizontal stabilizer for A-4 aircraft using graphite-epoxy laminates in primary structure [AD-738900] p0481 N72-27040

Conference on Structural Applications of Advanced Composites [AGARD-LS-55] p0535 N72-29589

Composites in structural design process p0535 N72-29592

Primary and secondary structural applications of advanced composites p0536 N72-29596

Conference on fatigue test evaluation for aircraft structures [NASA-SP-309] p0539 N72-29895

Fatigue tests of supersonic transport structures with emphasis on thermal cycle p0539 N72-29896

Fatigue tests of simulated main wing spar at joint with fuselage frame for SAAB aircraft p0539 N72-29897

Proposed changes to USAF fatigue evaluation program based on recent experience p0540 N72-29901

Method for checking fatigue resistance of structural design detail for SST p0541 N72-29905

Computer technique to analyse aircraft windshields for multiple imaging [AD-744044] p0586 N72-31034

Analysis of aircraft structural flexibility and flight controls interface with application to aircraft design criteria p0621 N72-32031

Technology and production of laminates, and problems in producing laminated aircraft structures [AD-742780] p0624 N72-32055

Annealed foil fatigue sensor for full-scale C-5A aircraft [AD-743968] p0624 N72-32058

Calculating eigenfrequencies modes and generalized masses for F-104G aircraft from drawings by finite-element method [AGARD-R-592] p0648 N72-33915

Assessment procedure for aircraft safe life structures based on fatigue life [TR-98] p0648 N72-33922

Subsonic, transonic, and supersonic aerodynamics, fatigue and structural analysis, and related aircraft studies - bibliography p0648 N72-33961

Research report on sound and vibration measurement in turbomachinery, aircraft structures, and building structures p0649 N72-33976

## AIRCRAFT TIRES

Aircraft landing gear wheel damage and antiskid mechanisms under operational conditions p0192 A72-21485

Aircraft wheel mechanics, discussing freely turning and braked wheels, tire drift and antiskid braking systems for landing gear p0285 A72-25287

Aircraft tires design and performance characteristics, considering VTOL and Concorde operating conditions p0358 A72-30098

Ground and torque relation to swivel angle and lateral displacement of wheel rim plane, using string model for tire p0557 A72-41260

Damage to aircraft tires produced by grooved runway surfaces when impacted at various sink rates, vertical loadings, inflation pressures, and ground speeds [NASA-TN-D-6690] p0219 N72-17007

Performance tests of aircraft tire under cyclic braking conditions and evaluation of aircraft antiskid braking system [NASA-TN-D-6755] p0421 N72-24014

Prediction of lateral tire dynamic properties of scale model aircraft tires using string theory [NASA-CR-2058] p0422 N72-24024

Performance tests to determine aircraft tire behavior and operating problems in various types of soils [NASA-TN-D-6813] p0514 N72-28006

## AIRCRAFT WAKES

## SUBJECT INDEX

Adaptive braking system preventing tire slip, applicable to aircraft [NASA-CR-123817] p0587 N72-31279

Numerical analysis of braking forces and frictional coefficients for aircraft tires on hard surface runways - Part 2 [ESDU-71026-PT-2] p0619 N72-32013

Analysis of operational factors involved in frictional and retarding forces between aircraft tires and hard surface runways [ESDU-71025-PT-1] p0636 N72-33001

Planing of aircraft tires on wet runways [ESDU-72008-PT-3] p0637 N72-33010

**AIRCRAFT WAKES**

**NT HELICOPTER WAKES**

**NT PROPELLER SLIPSTREAMS**

**NT SLIPSTREAMS**

Jet aircraft brake parachute loads under engine wake, evaluating velocity and drag coefficient influences p0021 A72-12504

Subsonic wind tunnel investigation of aircraft wake far field structure, measuring trailing vortex decay by yawhead pressure probe [AIAA PAPER 72-40] p0130 A72-16902

Turbulent boundary layer analogy mathematical model for turbulent mixing and buoyancy effects on aircraft trailing vortex wake motion and persistency [AIAA PAPER 72-42] p0130 A72-16903

Acoustic ray deflection by aircraft wake vortices with viscous core, observing maximum deflection angles during large aircraft landing p0457 A72-36417

Effect of ground wind shear on aircraft trailing vortices. p0507 A72-39630

Flight test studies of the formation of trailing vortices and a method to accelerate vortex dissipation. [AIAA PAPER 72-988] p0561 A72-42327

Unsteady wake effects on progressing/regressing forced rotor flapping modes. [AIAA PAPER 72-957] p0562 A72-42350

Low flying aircraft wake vortices tracking, describing sensing techniques based on acoustic pulse deflection and velocity field measurements p0565 A72-42709

Effect of air injection on the torque produced by a trailing vortex. p0594 A72-43333

Effect of several wing tip modifications on a trailing vortex. p0594 A72-43334

Trailing vortex effects on wing pressure distribution from low speed wind tunnel tests, discussing effect of wing-vortex distance p0613 A72-45331

Dynamic simulation of an aircraft under the effect of vortex wake turbulence. p0613 A72-45346

Analysis of hazards created by aircraft wakes and methods for avoiding adverse effects during congested aircraft operation [NASA-TN-X-67448] p0087 N72-11951

Flight test investigation of effect of wing tip vortices generated by large jet transport aircraft when intersected by smaller general aviation type aircraft [NASA-TN-D-6655] p0250 N72-18003

Wind tunnel test data of velocity measurements with hot wire anemometer in wake of CV-990 aircraft model [NASA-TN-X-62148] p0419 N72-23994

Air vortex wakes of B-747 aircraft [NASA-TT-F-14286] p0469 N72-26233

Analytical and experimental determination of influence of atmospheric environment on transport and decay of trailing vortex wake [AD-742305] p0576 N72-30284

**AIRCRAFT**

**U FLIGHT CREWS**

**AIRFIELD SURFACE MOVEMENTS**

Air/ground interface simulation in GPSS/360 for passenger transfer between airport terminal and aircraft p0187 A72-20342

Anthropotechnical aspects of aircraft taxiing guidance in airfield runway areas, suggesting

computerized operational system p0229 A72-22779

ICAO standardized taxiing guidance and airports surface traffic control procedures p0240 A72-24171

Runway motion stability of aircraft with three wheel landing gear, assuming elastic response to moment induced drift p0307 A72-27235

Design requirements and development plan for all weather system for controlling airport surface traffic [RD-620:63965] p0096 N72-12587

Operational evaluation of device for measuring aircraft taxi speed and distance to determine accuracy and limitations [AD-730096] p0219 N72-17009

Measurement of three track runway and taxiway profiles for determining effect of surface conditions on airplane response to ground roughness [NASA-TN-D-6932] p0622 N72-32045

[SAE PAPER 720310] p0289 A72-25574  
NASA aerodynamic technology program, emphasizing airframe and engine development for next generation subsonic CTOL jet transport requirements p0290 A72-25582  
[SAE PAPER 720319] p0290 A72-25582

- Airframe and wing fatigue life testing, discussing results recomputation for changed operating conditions  
p0358 A72-30276
- Welded steel airframe residual fatigue life tests by nonstationary random loading, applying to jet trainer aircraft landing gear  
p0358 A72-30277
- Computerized airframe manufacturing cost and weight analysis, using technique for detailed parts list generation from configuration concept as input  
[SAWE PAPER 913]  
p0596 A72-43460
- Approaches to verification and solution of magnetic particle inspection problems.  
p0610 A72-44903
- Welding airframe structures in titanium using tensile loading to overcome distortion.  
p0611 A72-45000
- Technical programmers manual for automated procedure of optimizing practical aerospace structures - Vol. 2  
[AD-725744]  
p0032 N72-10047
- Design and development of numerically controlled machine for laying composite tape used in building aircraft structured from filament reinforced resin matrix composite materials  
[AD-725765]  
p0035 N72-10425
- Compression tests of short skin-stiffener specimens of conventional titanium alloys airframe structure with attached unidirectional brazed boron-aluminum composite  
[NASA-TN-D-6548]  
p0046 N72-11428
- Elastomeric coating materials for use in sealing fastener-head countersinks in highly loaded aircraft skins susceptible to exfoliation corrosion  
[AD-728039]  
p0110 N72-13429
- Development of incremental technique for forging thin-web, tall-rib configurations for aircraft structures  
[AD-729012]  
p0110 N72-13434
- Numerical analysis of convective heat transfer within aircraft structure cavities for various conditions of flow  
[AHL/SM-REPT-330]  
p0113 N72-13913
- Standard ARM captive carry life expectancy prediction and vibration qualification testing, resulting in airframe fatigue failure  
p0173 N72-15839
- Static aeroelastic characteristics of thin cylindrical shells at subsonic speeds without use of boundary layer control or shell axial-force loading  
[AD-732291]  
p0202 N72-15954
- Development and application of nonflammable and fire retardant materials for use with spacecraft and aircraft interiors  
p0208 N72-16419
- Scale model tests to determine optimum configuration and characteristics of large jet transport aircraft during ditching  
[NASA-TM-X-2445]  
p0218 N72-17005
- Computer program for calculation of airborne store loads, shears, and moments  
[AD-733673]  
p0249 N72-17995
- Application of fracture mechanics to design, analysis, and qualification of aircraft structural systems  
[AD-731565]  
p0255 N72-18045
- Evaluation of bearing materials, shaft materials, and lubricants for airframe applications by simulating loads, motions, and temperatures on bearings in normal operation  
[AD-733705]  
p0259 N72-18505
- Evaluation of steady-state and nonsteady-state methods for measuring panel damping with emphasis on use of random process techniques and digital data reduction methods  
[NASA-CR-114423]  
p0264 N72-18909
- Definition of longitudinal stability derivatives for elastic airplanes with allowances for perturbations in forward speed  
[NASA-TN-D-6629]  
p0318 N72-20006
- Numerical-analytical techniques for predicting radiation patterns and impedance of aircraft antennas including effects of outboard members of aircraft structure  
[AD-735346]  
p0335 N72-21171
- Design and structural properties of airframes  
[AD-736207]  
p0386 N72-23047
- Development of method for calculating fatigue strength of airframe structures and predicting rate of fatigue crack propagation  
[AD-736887]

# AIRPORT PLANNING

Senate hearings on regulation of rates and practices of domestic and foreign air carriers p0542 N72-29981

Development of short haul air transportation systems based on short takeoff aircraft, port siting, route analysis, and airline service requirements [AD-742463] p0574 N72-30018

Analysis of airlines operations for several small operators to determine reasons for economic problems and alternatives for profitable services - Part 1 p0584 N72-31016

Analysis of short haul airlines operation to show history, operational problems, and economic aspects - Part 2 p0584 N72-31017

Air pollution study of jet aircraft operations at Los Angeles International Airport, California [PAPER-71-117] p0623 N72-32048

Proposal for increasing overall air traffic capability by expansion of charter service between bilateral parties p0634 N72-32983

Analysis of effects of minimum transportation regulation on development of tourism and resulting expansion of airline operations p0635 N72-32984

Economic analysis of hypersonic transport aircraft to show projected operating costs and return on investment [NASA-TM-X-62193] p0639 N72-33025

Analysis of factors affecting economical operation of air transport service in sparsely populated areas [NASA-CR-2142] p0640 N72-33028

Development and operation of management control system for efficient scheduling and safe utilization of commercial air transportation facilities p0649 N72-33972

## AIRLINERS

### U COMMERCIAL AIRCRAFT

### U PASSENGER AIRCRAFT

### AIRPLANE PRODUCTION COSTS

Military systems cost reduction via civil avionics procurement techniques, discussing cost-reliability design criteria p0399 A72-32215

Computerized airframe manufacturing cost and weight analysis, using technique for detailed parts list generation from configuration concept as input [SAE PAPER 913] p0596 A72-43460

Economic and operational aspects of fatigue - Figures of a Swiss ground attack/fighter aircraft. p0610 A72-44742

Problems of producing transport aircraft p0543 N72-29982

## AIRPORT BEACONS

Discrete address beacon system /DABS/ development for surveillance and ground-air communications in support of ATC automation. p0569 A72-43151

Radiation patterns and transmitter power needed for two-bay antenna used with VOR approach marker beacon [FAA-RD-72-33] p0261 N72-18659

Development of discrete address beacon system to improve operation of microwave landing system for high density terminal area surveillance [DOT-TSC-FAA-71-26] p0339 N72-21628

## AIRPORT LIGHTS

### NT RUNWAY LIGHTS

Airport lights system design for optical landing aids, discussing runway illumination conditions p0309 A72-27402

Airport lighting for pilot guidance during approach and landing under category I-III visibility conditions, discussing runway layouts and power requirements p0360 A72-30621

Static compressive load tests on L-837 airport marker light bases [NBS-10453] p0096 N72-12586

Development and characteristics of visual landing aids systems [NBS-10-837] p0523 N72-28673

## AIRPORT MOBILE LOUNGES

### U MOBILE LOUNGES

### AIRPORT PLANNING

STOL transport aircraft technology assessment, analyzing airports growth problems [SAE PAPER 710751] p0004 A72-10250

Acoustic echo sounder as real time monitor of airport environmental meteorological parameters p0013 A72-11137

STOL aircraft for solving noise reduction and land use problems in future transportation systems, discussing airport location and layout for growing air traffic p0013 A72-11153

Airport efficiency improvement measures, considering boarding gates, parking space, baggage handling, fire protection, monitoring and central control p0015 A72-11717

Aircraft engine noise effects in airport vicinities, discussing measurement scales, turbofan sources, noise reduction and future air traffic p0016 A72-12022

Airport terminal flow and interface transportation systems, discussing access, passenger traffic and cargo handling and government controls p0055 A72-13414

Automated meteorological telemetry and interrogation response system with terminal extensions for Paris airport p0064 A72-14695

German commercial airports adaptation to traffic development, considering economic factors p0119 A72-16187

Spiralport design for maximum utilization of airport runways for landings and takeoffs p0125 A72-16693

Water based offshore and floating island airports planning and construction, discussing economic, technical and social aspects p0126 A72-16695

Newark airport program, discussing land preparation, public facilities, terminal area, building design, support systems, organization and scheduling p0126 A72-16696

Air transport planning in coordination with urban and country development in West Germany p0126 A72-16697

Airport financing, discussing funds, long term planning, commercial principles, private enterprise, loans and revenue p0126 A72-16698

VTOL transport aircraft use in densely populated urban areas, discussing travel time, airport requirements, noise and design problems p0126 A72-16733

Lounge planning model for airport terminal design simulation, taking into account scheduled arrivals and departures, aircraft types, passenger number, gate assignments, etc p0141 A72-17979

ATC at single-runway airport analyzed by fast time simulation with high speed digital computers p0181 A72-19064

Airfield surface system fast-time computer simulation model for airport planning systems analysis p0187 A72-20341

Air/ground interface simulation in GPSS/360 for passenger transfer between airport terminal and aircraft p0187 A72-20342

Wind shear, turbulence, precipitation, temperature, visibility and ceiling effects on airport capacity, suggesting weather data integration into ATC system for pilots information p0192 A72-21521

Optimal high capacity runway systems for major airports, discussing multiple systems in anticipation of future mass air traffic requirements p0240 A72-24169

British regional airports development, discussing terminal facilities for scheduled and nonscheduled air carriers on domestic and international routes p0240 A72-24170

- STOL aircraft systems development coordination, considering vehicle design, airport facilities and related ground environment, transportation modes interface and airspace management  
p0285 A72-25255
- New York-New Jersey megalopolis offshore jetport feasibility, considering noise, air-water pollution, land conservation, cost, etc  
p0346 A72-28792
- Slant Visual Range/Approach Light Contact Height Measurement System utilizing state of art technology for airport applications  
p0347 A72-28848
- Meteorological information requirements for V/STOL aircraft design, airport location, runway orientation, aircraft operations and ATC simulation  
p0349 A72-28869
- Building soundproofing codes for airport zoning ordinances, emphasizing wider latitude in land use options  
p0354 A72-29561
- Airport runway lighting systems development, noting lamp for night flights and control console  
p0358 A72-30119
- National airports system for UK civil air transportation, discussing economic, operational, accessibility and social aspects  
p0400 A72-32321
- Airport capacity and air traffic congestion effects on airport operations in terms of time and costs  
p0401 A72-32454
- Dallas/Fort Worth airport planning and construction economics impact on community economy and life style  
p0407 A72-33307
- Airport and air transportation benefits and costs to community and industry, considering institutional, environmental and economic issues  
p0408 A72-33308
- Airport economic and social impact on environs in terms of community development  
p0408 A72-33309
- Individual regions and nationwide air traffic demands forecasting for airport planning  
p0408 A72-33311
- Commercial airport and air transport service economic impacts on business and industrial communities  
p0408 A72-33312
- Major civil airport planning, discussing information gathering and processing for aviation demand, aircraft movements revenue and cost forecasts and pricing policy evaluation  
p0409 A72-33327
- Major civil airport development plan, discussing traffic forecasts, runways, noise, airspace capacity, access systems, freight installations, maintenance facilities, navigation aids, buildings, etc  
p0409 A72-33328
- Major civil airport passenger and cargo terminal complex design and layout planning, discussing various facilities and equipment requirements  
p0409 A72-33329
- FAA policy in issuing civil airport operating certificates and establishing minimum safety standards  
p0409 A72-33330
- Passenger transfer in airports with total separation between aircraft and permanent buildings for independent functioning, noting Dulles Airport mobile lounges  
p0417 A72-34143
- Airport planning requirements - An airline view.  
p0441 A72-34224
- Airport terminal design - The passenger's point of view.  
p0441 A72-34225
- STOL airports planning objectives, discussing ground and airspace congestion relief, terminal locations, flight safety and community acceptance  
p0441 A72-34239
- Kansas City International Airport facilities and features, discussing decentralized passenger processing system  
p0442 A72-34242
- Runway marking requirements for visibility under day and night conditions, considering night reflection value, color stability, durability, noninterference with flight operations, etc  
p0442 A72-34243
- Planning model for German air transport.  
p0442 A72-34244
- Simulation models for airports performance evaluation through replication of traffic units actual movement  
p0443 A72-34414
- Airports: Key to the air transportation system; Proceedings of the Conference, Atlanta Ga., April 14-16, 1971.  
p0459 A72-36776
- Federal legislation impact on airport and airway system planning, considering budget and schedule requirements  
p0459 A72-36777
- Environmental considerations in airport development.  
p0459 A72-36778
- Economics of a new regional airport.  
p0459 A72-36779
- What's new in airport planning.  
p0459 A72-36780
- Atlanta airport redesign and expansion program including runway reconfiguration taxiway relocation and passenger and cargo terminal system improvement to relieve congestion  
p0459 A72-36781
- Boeing 747 aircraft impact on Chicago O'Hare airport design criteria, noting future terminal facilities planning  
p0459 A72-36782
- Design of V/STOL ports.  
p0460 A72-36783
- Airport improvements needed for safety.  
p0460 A72-36784
- FAA implemented airport certification legislation covering minimum safety standards, operation manual, emergency plan, fire and rescue service and pavement requirements  
p0460 A72-36785
- Concrete airport pavement thickness determination methods comparison, noting design life dependence on safety factors  
p0460 A72-36786
- Airfield flexible pavement design - A state of the art paper.  
p0460 A72-36787
- Systems approach to integrated planning of airfield pavements design, construction, operation and maintenance, emphasizing need for mathematical models, constitutive parameters and limiting criteria  
p0460 A72-36788
- Airlines and aircraft manufacturers requirements for airport pavement evaluation/data system, discussing relationships between strength, landing gear design, aircraft weight, range, etc  
p0460 A72-36789
- Day-to-day operational airplane-airport relationship, discussing runway grooving impact and friction coefficient measurement  
[AIAA PAPER 72-813] p0497 A72-38118
- Independent parallel runway landing system to relieve air traffic congestion, investigating minimum spacing required to minimize collision risk  
p0569 A72-43130
- Critical assessment of air transport planning for German Federal Republic, advocating decentralized concept of major air terminals for intercontinental jumbo jet traffic  
p0593 A72-43244
- Dala /Sweden/ regional airport, describing planning and financing, approach lighting, ILS system and facilities for tourist traffic and industrial development  
p0593 A72-43248
- Systems approach to airport passenger terminal planning.  
p0605 A72-44585
- Airports planning for West Germany, discussing geographical air traffic patterns, economic and noise aspects  
[DGLR PAPER 72-034] p0605 A72-44614
- Requirements for governmental regulation of aircraft noise

## AIRSHIPS

Unpredicted structural vibration in Comet and  
 Electra aircraft, Graf Zeppelin dirigible,  
 missile antennas, etc p0016 A72-12002  
 Rigid form airship for transportation, discussing  
 applications for special loads and scientific  
 and service purposes, and design and  
 construction problems p0556 A72-41200

## AIRSPACE

Control concepts for future ATC system relative to  
 airspace structure, management and geographic  
 and jurisdictional boundaries p0137 A72-17333  
 ATC system organization in terms of optimal  
 operating conditions for civil and military  
 airspace users, discussing navigation systems,  
 human factors, equipment reliability, etc  
 p0401 A72-32455  
 Study of the flow of air traffic and capacity of a  
 control system p0493 A72-37797  
 Terminal airspace navigation and aircraft ground  
 handling control, discussing air traffic  
 controllers and pilots functions in context of  
 workload and automation p0549 A72-40546

## AIRSPEED

Linear airspeed and runway rate field displays,  
 measuring initial response latencies, control  
 reversals and root mean square tracking errors  
 p0139 A72-17717  
 Aircraft launch envelope investigation for minimum  
 catapult end airspeed determination at carrier  
 bow, discussing optimum test pilot launch  
 technique p0146 A72-18498  
 Applications of a technique for estimating  
 aircraft states from recorded flight test data.  
 [AIAA PAPER 72-965] p0563 A72-42360  
 Linear differential pressure transducer  
 incorporating high stability variable frequency  
 oscillators and capacitance sensor for  
 application as airspeed indicator  
 [ARL/ME-132] p0159 N72-14461  
 Airspeed losses during turning flight maneuvers in  
 gusts applied to airworthiness requirements  
 [ARC-R/M-3672] p0204 N72-15973  
 Improved navigation by combining VOR/DME  
 information with air or inertial data  
 [NASA-CR-124826] p0578 N72-30586  
 Procedures for obtaining airspeed and kinetic  
 pressure data for application to aircraft  
 performance analysis and data reduction  
 [ESDU-69026] p0636 N72-33002

## AIRWORTHINESS

U AIRCRAFT RELIABILITY  
 AIRWORTHINESS REQUIREMENTS  
 U AIRCRAFT RELIABILITY  
 ALADIN 2 AIRCRAFT

Aladin 2 noiseless STOL jet aircraft project,  
 describing exhaust nozzle configuration, design  
 and economics p0021 A72-12503

## ALGORITHMS

Automated scheduling algorithm for aircraft from terminal area to touchdown, discussing system features and STOL air traffic computerized simulation

[AIAA PAPER 72-120] p0131 A72-16905  
Aircraft performance and flight path optimization algorithms for minimum fuel-fixed range, using calculus of variations

p0182 A72-19091  
Model-following control for nonlinear multivariable plants, considering implicit algorithm solution and application to variable stability aircraft control synthesis

p0185 A72-19708  
Two-variable second order system for multivariable systems predictive control, deriving algorithm for near time optimal control

p0185 A72-19709  
Algorithm and computer program to calculate low run multiple nomenclature production process optimal parameters

p0345 A72-28741  
Computer algorithm to calculate surfaces formed by equidistant conic sections, using successive approximation method

p0354 A72-29461  
Computer algorithms and programs contribution to aircraft structure operational reliability and fatigue life calculation

p0359 A72-30288  
Study of circular arc airfoils with asymptotic critical Mach number. II

p0449 A72-34745  
Determination of the operational transfer functions of a gas turbine engine on a digital computer

p0602 A72-44292  
Cost effective algorithm for optimal route aircraft scheduling for airlines by mixed integer multi-commodity flow technique and Dantzig-Wolfe decomposition

p0604 A72-44582  
Development of structural optimization algorithm for obtaining near optimum distributions of material for structural idealizations

[AD-726112] p0051 N72-11820  
Equicontrollability and application to linear time-invariant model-following problem

[NASA-CR-124768] p0110 N72-13505  
Set covering algorithm for extracted small matrices, applied to airline crew scheduling

[TR-320-3004] p0321 N72-20099  
Development of computer-oriented algorithms for application to solution of air traffic control and terminal area guidance problems

[NASA-TN-D-6773] p0382 N72-23017  
Development of algorithm based on matrix methods for solution of wind tunnel force-balance equations and iterative solution using automatic computer reduction

[NASA-TN-D-6860] p0476 N72-27002  
Development of algorithm for solving problem of controlling time-varying linear avionic system with random parameters based on adaptive dual control strategy - Part 1

[AD-744115] p0625 N72-32064

## ALIGNMENT

In-flight alignment and calibration of inertial measurement units. I - General formulation. II - Experimental results.

p0551 A72-41079  
Mark 7 arresting engine alignment measuring system and procedures for correcting misalignment

[AD-732445] p0257 N72-18272

## ALIPHATIC COMPOUNDS

NT GLYCOLS  
NT METHANE

Synthesis and properties of aliphatic ester for turbine lubrication in jet aircraft  
p0050 N72-11696

## ALKANES

NT METHANE

## ALL-WEATHER AIR NAVIGATION

Airline schedule keeping by Sud Lear all-weather landing system, discussing crew training  
p0064 A72-14688

All-weather landing aids for civil VTOL aircraft and helicopters, discussing Doppler and inertial navigations, instrument landing systems and ground visibility improvement  
p0127 A72-16780

Aircraft and airports weather instrumentation for all-weather landing and takeoff, discussing application of laser technology and digital presentation  
p0193 A72-21522

Pilot evaluation of C-5 automatic landing system in Category III weather environment  
p0310 A72-27521

Time parameter in military air operations, discussing weapon systems E and D, all-weather capability, communications, reliability and maintainability, manpower training, etc  
p0401 A72-32453

Avionics effects on airline operations timekeeping, considering gains due to all-weather capability and engine monitoring vs possible losses due to equipment failures  
p0402 A72-32461

V/STOL flight control - Trend and requirements.  
p0442 A72-34240

All weather landing for a STOL system.  
[AIAA PAPER 72-788] p0495 A72-38105

Suitability evaluation of fog simulator for weather conditions during flight approach  
[FAA-WA-71-44] p0033 N72-10233

Helicopter guidance and control systems - conference  
[AGARD-CP-86-71] p0081 N72-11915

Optimization of automatic flight control concepts for light helicopters with all-weather capability  
p0081 N72-11917

Low-cost, all-weather, self-contained navigation system for military helicopters  
p0082 N72-11921

Design requirements and development plan for all weather system for controlling airport surface traffic  
[RD-620:63965] p0096 N72-12587

Development of precision, all-weather, low-level navigation system based on ground station using rubidium clock stabilized low frequency transmissions  
[AD-729358] p0161 N72-14674

Effects of weather and meteorological parameters on cost, performance, development, and operation of military aircraft  
[AD-731749] p0217 N72-16993

Development of method for determining appropriate longitudinal and lateral decision height dispersion limits for aircraft during instrument landing approach  
[NASA-CR-2024] p0376 N72-22651

Microwave interferometers used as radio eye for aircraft navigation and collision avoidance system including comparison of cost with present systems  
[REPT-62] p0486 N72-27708

Group cohesion, interceptors, all-weather operations, and flight safety  
[AD-739229] p0488 N72-27988

Application of lidar to determine slant range visibility conditions and atmospheric transmittance aloft  
[AD-742359] p0530 N72-29021

Development and characteristics of electronic filter system to provide all-weather air navigation and landing capability  
[NASA-CR-112146] p0571 N72-29999

Design of third generation digitally tuned BP receiver for all weather low level navigation system  
[AD-741813] p0578 N72-30591

# ANCHORS (FASTENERS)

## ANCHORS (FASTENERS)

Elastomeric coating materials for use in sealing fastener-head countersinks in highly loaded aircraft skins susceptible to exfoliation corrosion  
[AD-728039] p0110 N72-13429

## ANECHOIC CHAMBERS

Design of anechoic chamber for studying supersonic and subsonic jet noise generation  
[NASA-CR-128038] p0576 N72-30249

## ANEMOMETERS

### NT HOT-WIRE ANEMOMETERS

Transonic wind tunnel calibration of dual system gust measuring probe  
[ARL/A-NOTE-334] p0484 N72-27426

## ANEMOMETRY

### U VELOCITY MEASUREMENT

### ANGLE OF ATTACK

Multivortex model of vortex sheet development on slender axisymmetric bodies at angle of attack  
p0053 A72-12919

HP-115 slender wing research aircraft linear motion and undamped Dutch roll oscillations at high angles of attack  
[AIAA PAPER 72-62] p0132 A72-16932

Finite difference method for transonic airfoil design for wide range of angles of attack and Mach numbers  
p0139 A72-17629

V-shaped wings supersonic characteristics at 0-15 deg angles of attack, investigating flow structure between wings by pitot tube rake  
p0142 A72-18129

Vanes for sensing incidence angles of airstream with respect to aircraft, noting correlation coefficient  
p0145 A72-18450

Flight initial spin testing, discussing aircraft autorotation due to stalled angle of attack and sideslip  
p0146 A72-18492

Supersonic flow around thin cruciform wing with antisymmetrical angle of attack distribution and horizontal plane with leading edge, considering flow separation at edges  
p0246 A72-25118

Unsteady aerodynamic forces on flat plate in locally perturbed incompressible potential flow, investigating angle of attack frequency response to periodic local perturbations  
p0303 A72-26579

Rotating airfoil experimental test program for verification of Himmelskamp and Dwyer-McCroskey theoretical analysis, presenting graphs of lift coefficient vs angle of attack  
p0313 A72-28124

Aerodynamic center and center of pressure of slender small aspect ratio wing near solid or free surface, determining angle of attack effect  
p0351 A72-29131

Leading edge boundary layer flow separation and reattachment processes in airfoil dynamic stall, considering effect of angle of attack rate of change  
p0396 A72-32024

Book on airfoil section designs for light aircraft covering wind tunnel studies of lift drag ratio as function of angle of attack  
p0399 A72-32250

Unsteady viscous flow effects on aerodynamic forces exerted on oscillating elliptic airfoil for various Reynolds numbers, angles of attack and frequencies  
p0400 A72-32344

F-111 stall inhibitor system with angle of attack limitation, describing interface with stability augmentation system  
p0454 A72-35577

Angle of attack increase of an airfoil in decelerating flow.  
p0459 A72-36773

Lift on airfoils with separated boundary layers.  
p0557 A72-41264

Axisymmetric jet stretcher diffuser performance for ramjet engine inlet configurations, testing at angles of attack and supersonic flow velocities  
[AIAA PAPER 72-1024] p0558 A72-41602

Wall porosity and angle of attack effects on jet stretcher flow field for supersonic engine inlet

# SUBJECT INDEX

testing, using three dimensional method of characteristics

[AIAA PAPER 72-1025] p0558 A72-41603

Full-scale inlet/engine testing at high maneuvering angles at transonic velocities.

[AIAA PAPER 72-1026] p0558 A72-41604

Experiment of supersonic air intake buzz.  
p0603 A72-44496

Tolerance of Mach 2.50 axisymmetric mixed-compression inlets to upstream flow variations causing changes in free stream Mach number and angle of attack  
[NASA-TN-X-2433] p0099 N72-12979

Development of computer program for predicting static, longitudinal aerodynamic characteristics of missile configurations for angles of attack from zero to 180 degrees  
[AD-729009] p0100 N72-12986

Integration method to derive angle of pitch, flight-path angle, and angle of attack from measurements in nonsteady flight  
[VTH-156] p0267 N72-19008

Equations for angles of attack and sideslip relative to rolling and nonrolling axis system  
[NASA-TN-X-2514] p0280 N72-19721

Structure of hypersonic flow field of blunt slab delta wing at moderately high angle of attack  
p0327 N72-20851

Vortex ring method used for calculations of aerodynamic characteristics of helicopter lifting rotors at any angle of attack in flow with comparatively high velocity  
[AD-735439] p0327 N72-20973

Design, fabrication, and test of full scale angle of attack and sideslip vanes used with flight path accelerometer in high speed wind tunnel  
[AD-736819] p0388 N72-23490

## ANGLES (GEOMETRY)

### NT ANGLE OF ATTACK

### NT DIHEDRAL ANGLE

### NT SWEEP ANGLE

## ANGULAR ACCELERATION

Flow analysis in the axial-flow compressor impeller with meridional stream acceleration.  
p0614 A72-45371

## ANGULAR CORRELATION

Correlation functions for angular vibrations of operating aerial camera during working cycle  
p0232 A72-22947

## ANGULAR MOMENTUM

Development of equations of motion for rigid body in cylindrical coordinates by Lagrangian dynamics and application to motion of aircraft in spin  
[AD-742929] p0583 N72-31006

## ANGULAR MOTION

### U ANGULAR VELOCITY

## ANGULAR VELOCITY

Twin spool jet engine system, predicting shaft speed effects on whirling frequencies due to gyroscopic action with computer model  
p0199 A72-22130

Flight vehicle angular velocity measurement by accelerometers, deriving equations of motion  
p0241 A72-24497

Turboprop engines dynamic parameters experimental determination by rpm transient response to instantaneous fuel supply changes  
p0351 A72-29137

Slender wings in roll noting dependence of rolling moment and roll damping on angular velocity and angle of attack  
p0266 N72-19004

## ANIMALS

### NT BIRDS

## ANIMATION

### U MOTION

## ANISOTROPIC SHELLS

Aircraft structures weight reduction through fiber-matrix composite materials, discussing anisotropic elastic and failure behavior of composite light shell structures  
[ICAS PAPER 72-38] p0555 A72-41163

## ANNULAR FLOW

Intercomponent complex annular ducts design for gas turbine engines  
p0238 A72-23872

Scale model tests to compare effectiveness of aerogrids and punched plates for smoothing flow

- from short annular diffusers between compressor and combustor of advanced aircraft engines  
[NASA-CR-120960] p0636 A72-32993
- ANNULAR JETS**  
U ANNULAR FLOW  
U JET FLOW
- ANNULAR NOZZLES**  
Low speed performance and boundary layer growth in optimal annular diffuser with uniform center body diameter and conically diverging wall  
p0237 A72-23856  
Turbulent boundary layer growth measurement on annular diffuser containing free vortex swirl  
p0237 A72-23857
- ANODIC COATINGS**  
Hardcoat anodizing of Al surfaces, discussing preparation, racking, equipment and post treatments  
[SAE PAPER 720341] p0292 A72-25598
- ANTENNA ARRAYS**  
NT LINEAR ARRAYS  
NT STEERABLE ANTENNAS  
ATC radar beacon system developments, considering diversity transponders, interrogator environment control, electronic scan cylindrical array antenna design and discrete address mode  
p0068 A72-14832  
Computed performance of ILS glide slope transmitting arrays sited over flat ground planes, of one dimensional perfectly conducting strips in free space  
p0123 A72-16559  
Communication and data relay satellites multibeam antennas characteristics, discussing multiple feed reflectors, bootlace lens configuration and phased arrays  
[AIAA PAPER 72-530] p0308 A72-27355  
Experimental investigation regarding Archimedeian spiral antennas for the L-band, and radiator groups constructed from them whose radiation directions are controlled by a conduction matrix  
p0549 A72-40510  
Shaped coverage patterns with satellite array antennas.  
p0550 A72-40884  
Adaptive antenna arrays for aircraft communication systems  
[AD-729106] p0156 A72-14243  
Crossed slot antenna array pattern coverage for ultrahigh frequency aircraft system  
[AD-732914] p0220 A72-17126  
Radiation patterns from adaptive loop antenna arrays for aircraft communication systems  
[AD-735096] p0275 A72-19230
- ANTENNA COMPONENTS**  
NT ANTENNA FEEDS
- ANTENNA DESIGN**  
Limited scan antenna system for precision approach radar, detailing design for reflector, aperture gain and phased array  
p0019 A72-12393  
Four uhf antennas buried beneath refractory concrete, discussing design, fabrication and power gain and azimuthal pattern measurements  
p0138 A72-17345  
Aircraft antennas design for radio links to satellites for aeronautical communication and ATC, proposing use of beam steering system  
p0354 A72-29347  
Log periodic dipole antenna systems for ILS localizers, noting reduced sensitivity to snow and ice  
p0489 A72-37279  
Application of the Volterra series to the analysis and design of an angle track loop.  
p0489 A72-37283  
Application of the computer to aerial design and development.  
p0494 A72-37873  
A metallized channel guide antenna for use over a cylindrical ground screen.  
p0548 A72-40372  
Active transistorized directional dipole VHF receiving antennas for ATC and mobile applications and field intensity measurement  
p0549 A72-40527  
Radar double beam dielectric radiator antenna design for ATC in 1250-1350 MHz range  
p0549 A72-40530
- ANTENNA FEEDS**  
Application of the computer to aerial design and development.  
p0494 A72-37873  
Dual output ultrahigh frequency aircraft antenna feed incorporating coaxial magic tee, transistor and step recovery varactor diode frequency multipliers  
[RAE-TR-70002] p0169 A72-15216
- ANTENNA FIELDS**  
U ANTENNA RADIATION PATTERNS
- ANTENNA RADIATION PATTERNS**  
Helicopter antenna placement, using scale models for three dimensional radiation pattern semiautomatic recording under free space conditions  
p0001 A72-10149  
Four uhf antennas buried beneath refractory concrete, discussing design, fabrication and power gain and azimuthal pattern measurements  
p0138 A72-17345  
Test facility for aircraft and spacecraft antennas radiation patterns and optimal installation determination  
p0309 A72-27412  
Numerical analysis of surface current density distribution and electromagnetic fields of conducting body, noting radiation patterns of radial dipole and quarter wavelength monopole  
p0344 A72-28541  
A metallized channel guide antenna for use over a cylindrical ground screen.  
p0548 A72-40372  
Determination of the radiation characteristics of aircraft antennas in flight  
p0549 A72-40534  
Diagram and gain measurements regarding antennas conducted with a helicopter for the range from 0.5 to 800 MHz  
p0549 A72-40545  
Comparison of scanning beam and Doppler type array aircraft landing systems, noting antenna radiation pattern and signal spectra  
[AT/DTRN/2-155] p0111 A72-13590  
Radiation patterns and comparisons of propagation models for use with interference predictions for VHF/UHF air navigation aids  
[AD-718465] p0171 A72-15598  
Crossed slot antenna array pattern coverage for ultrahigh frequency aircraft system  
[AD-732914] p0220 A72-17126  
Radiation patterns and transmitter power needed for two-bay antenna used with VOR approach marker beacon  
[PAA-RD-72-33] p0261 A72-18659  
Radiation patterns from adaptive loop antenna arrays for aircraft communication systems  
[AD-735096] p0275 A72-19230  
Numerical-analytical techniques for predicting radiation patterns and impedance of aircraft antennas including effects of outboard members of aircraft structure  
[AD-735346] p0335 A72-21171  
Dual antenna method for suppressing reflections from underside of moving aircraft  
[JPRS-55908] p0386 A72-23126  
Comparison of scanning beam and Doppler type array aircraft landing systems emphasizing granularity  
[AT/DTRN/2-174] p0389 A72-23663  
Procedure for using high frequency standard gain ground reference antenna for calibrating C-131 and KC-135 aircraft for antenna radiation patterns  
[AD-740553] p0532 A72-29134

# ANTHROPOMETRY

# SUBJECT INDEX

- NT STEERABLE ANTENNAS  
 NT TWO REFLECTOR ANTENNAS  
 NT WAVEGUIDE ANTENNAS  
 Lumped mass model of long airborne trailing wire antenna and derivation of equations of motion  
 p0217 N72-16899
- ANTHROPOMETRY  
 Dynamic analog anthropomorphic dummy for development and operational tests of aircraft escape systems  
 [AD-730634] p0205 N72-15977
- ANTI-AIRCRAFT MISSILES  
 Evaluation of thrust magnitude control for bomber defense missiles  
 [AD-731812] p0264 N72-18788  
 Antiaircraft missile, military training, and aircraft stability  
 [AD-739973] p0488 N72-27990
- ANTICLINAL MOUNTAINS  
 U MOUNTAINS
- ANTI-FRICTION BEARINGS  
 NT BALL BEARINGS  
 NT ROLLER BEARINGS  
 X ray measurement of elastohydrodynamic film thickness to determine lubrication of turbine engine thrust bearings at high temperatures  
 [NASA-TN-D-6608] p0093 N72-12420  
 Evaluation of bearing materials, shaft materials, and lubricants for airframe applications by simulating loads, motions, and temperatures on bearings in normal operation  
 [AD-733705] p0259 N72-18505  
 Reliability engineering of aft transmission planetary carrier bearing nut in mechanical drive assembly of CH-46 helicopter  
 [AD-743073] p0587 N72-31037
- ANTISKID DEVICES  
 Aircraft landing gear wheel damage and antiskid mechanisms under operational conditions  
 p0192 A72-21485  
 Aircraft wheel mechanics, discussing freely turning and braked wheels, tire drift and antiskid braking systems for landing gear  
 p0285 A72-25287  
 Performance tests of aircraft tire under cyclic braking conditions and evaluation of aircraft antiskid braking system  
 [NASA-TN-D-6755] p0421 N72-24014  
 Reliability engineering methods for design of landing mats simulating aircraft operations  
 [AD-743161] p0588 N72-31297
- ANTISUBMARINE WARFARE  
 Univac 1832 multiprocessor avionics computer for airborne ASW, discussing input/output controllers and interfaces and IC design features  
 p0407 A72-33245  
 S-3A Viking systems.  
 p0449 A72-34741
- ANTISUBMARINE WARFARE AIRCRAFT  
 S-3A Viking land based antisubmarine warfare maritime and reconnaissance aircraft, describing flight controls, structural design, underslung podded engines and operational equipment  
 p0139 A72-17583  
 ASW aircraft magnetic anomaly detection /MAD/ system range limitation due to residual maneuver noise, discussing real time compensation for geomagnetic gradient interference  
 p0560 A72-42322  
 Naval helicopters applications to search and rescue, ASW, ground support and other roles, considering reliability and maintenance  
 p0607 A72-44685
- ANTONOV AIRCRAFT  
 Russian book on An-12 turboprop transport aircraft structural and aerodynamic characteristics covering engine operation, piloting, stability, controllability, etc  
 p0315 A72-28343  
 Fiberglass reinforced plastic fuselage production for AN-2a aircraft, noting plastic-plastic and metal-plastic joints  
 p0354 A72-29462
- APERTURES  
 Multifunction microwave apertures - Concepts and potential.  
 p0454 A72-35574
- APOLLO FLIGHTS  
 Automated navigation aids interface with human operator, discussing Apollo flight experience and technology utilization in air and marine navigation  
 p0144 A72-18288
- APOLLO 14 FLIGHT  
 Infrasound observations of natural background and signals from Apollo 14 and aircraft, using thermistor flowmeter microphone array  
 p0302 A72-26515
- APPLICATIONS OF MATHEMATICS  
 Development of numerical methods for analyzing structural properties of statically loaded wings using iteration process  
 p0327 N72-20904
- APPROACH  
 NT INSTRUMENT APPROACH  
 Suitability evaluation of fog simulator for weather conditions during flight approach  
 [FAA-NA-71-44] p0033 N72-10233  
 Systems performance and safety in helicopter approach and landing, and radioelectronic guidance array  
 p0085 N72-11939  
 Lateral-directional handling qualities and roll control power requirements of jet aircraft in landing approach  
 [AD-725461] p0153 N72-14008  
 Limitations on approach flight paths of V/STOL aircraft including limits on descent angle due to maximum lift drag ratio  
 [NASA-CR-1901] p0165 N72-15001  
 Approach and landing flight simulator based on intermediary photography on transparent material  
 p0207 N72-16186  
 Flight tests of low lift to drag ratio approach and landing using CV 990 aircraft with similar size and performance characteristics of proposed space shuttle vehicle  
 [NASA-TN-D-6732] p0268 N72-19022  
 V/STOL display requirements for approach and landing under adverse weather conditions  
 p0374 N72-22632  
 Multipurpose wide field, three dimensional head-up display for aircraft pilots during approach and landing, and other maneuvers involving altitude changes  
 p0375 N72-22639  
 Accuracy of vertical contact analog display in simulating carrier landings, and error contributed by display resolution, temporal loading, and control complexity  
 p0375 N72-22642  
 Rate-of-closure as performance monitoring parameter during approach and landing  
 p0375 N72-22643  
 Flight evaluation of simulated carrier approach task considering engine response, flight path stability, tail lift, and direct lift control  
 [AD-736968] p0385 N72-23039
- APPROACH CONTROL  
 NT RADAR APPROACH CONTROL  
 Stellar attitude reference and navigation associative processor with high computational speed for radar approach control in ATC  
 p0017 A72-12033  
 Carrier system for controlled approach of Naval aircraft to provide pilot window to deck for tactical jet guidance for poor visibility landing  
 p0018 A72-12323  
 STOL aircraft integrated landing approach-flight control system with elevator and thrust control coupling to angle of attack, altitude and other state variables  
 [DGLR PAPER 71-063] p0022 A72-12705  
 Terminal area air traffic guidance and control, discussing automation, all-weather precision approach and landing and failure detection  
 p0066 A72-14817  
 HH-53 rescue helicopter automatic approach and hover coupler for automatic transition from forward flight at constant deceleration and rate of descent  
 p0124 A72-16653  
 Conventional open and closed loop servo analysis methods applied to Naval aircraft approach power compensator systems, using pilot model concepts  
 [AIAA PAPER 72-124] p0131 A72-16922  
 General aviation type light airplanes pilot workload during steep landing approach,

## SUBJECT INDEX

## ARC DISCHARGES

- comparing flight tested control response parameters with handling qualities criteria [ATAA PAPER 72-125] p0132 A72-16941
- Ground based Doppler navigation system for wide range elevation and azimuth aircraft approach guidance, using linear directive antenna array for conical surface definition p0142 A72-18183
- Aircraft microminiature ILS with transmitter and localizer antenna to provide pilot with bearing and glide slope information for alignment with runway p0307 A72-27106
- Helicopter automatic flight control approach/hover coupler systems, hands off stability and handling qualities p0310 A72-27522
- Airport lighting for pilot guidance during approach and landing under category I-III visibility conditions, discussing runway layouts and power requirements p0360 A72-30621
- Tactical approach landing radar tests for low lift drag ratio aircraft in unpowered flight, using F-104D as test aircraft p0395 A72-31694
- Hybrid area navigation and microwave instrument landing system, discussing approach control and terminal guidance p0398 A72-32206
- An experimental investigation of STOL longitudinal flying qualities in the landing approach using the variable stability X-22A aircraft. [AHS PREPRINT 642] p0447 A72-34502
- Investigation of data rate requirements for low visibility approach with a scanning beam landing guidance system. p0453 A72-35562
- Precision navigation for approach and landing operations. p0501 A72-38253
- Investigation of data rate requirements for low visibility approach with a scanning beam landing guidance system. p0502 A72-38259
- A landing approach guidance scheme for aircraft which are capable of executing steep approaches. p0502 A72-38278
- Aircraft accidents during nonprecision approaches under adverse weather conditions, discussing landing aids use for corporate jet aircraft. p0508 A72-39745
- Design, operation and testing of integrated STOL flight control system, noting approach accuracy and passenger comfort improvement p0547 A72-40292

# ATMOSPHERIC MODELS

# SUBJECT INDEX

## ATMOSPHERIC MODELS

### NT BREADBOARD MODELS

### NT DYNAMIC MODELS

Handbook on aviation meteorology covering atmospheric structure and composition, standard atmospheres, heat transfer, adiabatic processes, winds, cloud formations, precipitation, ice formation, fog, visibility, etc.

p0192 A72-21479

Multiscale numerical model for local weather development simulation, noting forecasting for long distance air travel.

p0348 A72-28857

## ATMOSPHERIC MOISTURE

Gas generator performance shifts involving military trim level variations by TF-30 engines in high relative humidity environment caused by condensation in inlet duct.

p0176 A72-18759

Ice formation on helicopter rotor blades, discussing atmospheric moisture and temperature conditions, blade surface temperature, centrifugal and aerodynamic forces and preventive measures.

p0309 A72-27414

Electrical discharge-produced explosions aboard supertankers during cleaning operation and electrostatic charging of supersonic aircraft during passage through heavy rain, noting water drop disintegration.

p0611 A72-44979

## ATMOSPHERIC NEUTRON FLUX DENSITY

### U NEUTRON FLUX DENSITY

### ATMOSPHERIC PHYSICS

### NT CLOUD PHYSICS

German Research and Test Institute for Aero- and Astronautics 1970 report covering flow mechanics, power conversion, aerospace medicine, atmospheric physics, etc.

p0013 A72-11151

Real gas effects in atmosphere to make sonic bang, shock wave full dispersion and thickness wide variations.

p0016 A72-11972

Handbook on aviation meteorology covering atmospheric structure and composition, standard atmospheres, heat transfer, adiabatic processes, winds, cloud formations, precipitation, ice formation, fog, visibility, etc.

p0192 A72-21479

Low flight altitude atmospheric parameters spatial and temporal variability effects on aircraft flyover noise measurement.

p0347 A72-28841

Bibliography on SST upper atmospheric environment, listing references to stratospheric structure, composition and physical dynamics, chemical reactions with pollutants, transport properties, etc.

p0413 A72-33797

## ATMOSPHERIC PRESSURE

Atmospheric temperature and pressure altitude effects on runway lengths and aircraft takeoff weights.

[ASCE PREPRINT 1242] p0002 A72-10193

Procedures for obtaining airspeed and kinetic pressure data for application to aircraft performance analysis and data reduction.

[ESDU-69026] p0636 A72-33002

## ATMOSPHERIC RADIATION

### NT AIRGLOW

### NT STRATOSPHERE RADIATION

### ATMOSPHERIC REFRACTION

Supersonic aircraft focused sonic boom suppression by slowing down during turning flight, obtaining conditions for focus cut-off at ground by atmospheric refraction.

p0599 A72-44125

## ATMOSPHERIC SCATTERING

### NT TROPOSPHERIC SCATTERING

### ATMOSPHERIC SHELLS

### U ATMOSPHERIC STRATIFICATION

### ATMOSPHERIC STRATIFICATION

Ground focus line location of sonic bang propagating in stratified atmosphere with wind for transonically accelerating aircraft.

p0184 A72-19645

Booms generated on ground by supersonic aircraft flying at high altitude through stratified

## atmosphere

p0190 A72-21019

Maneuvering aircraft sonic boom propagation and signatures prediction in stratified atmosphere by geometric acoustic method.

p0197 A72-21904

Atmospheric stratification irregularities effects on sonic boom propagation, obtaining probability density functions.

p0198 A72-21905

Aviation hazards due to stably stratified shear and turbulence zones, discussing meteorological analysis of 747 jumbo jet turbulence incident.

p0349 A72-28865

Analytical and experimental determination of influence of atmospheric environment on transport and decay of trailing vortex wake [AD-742305].

p0576 A72-30284

## ATMOSPHERIC TEMPERATURE

Atmospheric temperature and pressure altitude effects on runway lengths and aircraft takeoff weights.

[ASCE PREPRINT 1242] p0002 A72-10193

Stratospheric circulation and air temperature horizontal and vertical distribution, discussing CAT at supersonic transport heights.

p0063 A72-14676

Meteorological information assistance for Concorde aircraft test flights, discussing high tropospheric turbulence and lower stratospheric temperature predictions and instruments.

p0063 A72-14680

Sonic boom generation, propagation and minimization, discussing atmospheric turbulence and temperature gradients and aircraft configuration effects.

[AIAA PAPER 72-194] p0128 A72-16849

Horizontal temperature variations relation to stratospheric CAT based on U-2 flight data.

p0228 A72-22438

Ice formation on helicopter rotor blades, discussing atmospheric moisture and temperature conditions, blade surface temperature, centrifugal and aerodynamic forces and preventive measures.

p0309 A72-27414

Lower stratospheric turbulence and horizontal temperature gradients from RB-57F aircraft meteorological measurements.

p0349 A72-28864

Weather predictions for Concorde test flights and problems of forecasting stratospheric temperature and clear air turbulence.

[NLL-M-22439-(5828,4F)] p0484 A72-27638

Wind, temperature, and clear air turbulence in middle and upper stratosphere.

[NLL-M-22438-(5828,4F)] p0520 A72-28304

Measuring air velocity and temperature for inertial navigation using DHC 5 aircraft.

[NCAR-TN/EDD-74] p0523 A72-28675

## ATMOSPHERIC TURBULENCE

### NT CLEAR AIR TURBULENCE

### NT GUSTS

### NT LOW LEVEL TURBULENCE

Sonic boom pressure signatures during F-104 overflights at Mach 1.3 and 30,000 ft, explaining variations by atmospheric turbulence.

p0013 A72-11158

Meteorological information assistance for Concorde aircraft test flights, discussing high tropospheric turbulence and lower stratospheric temperature predictions and instruments.

p0063 A72-14680

Upper atmospheric turbulence correlation to supersonic aircraft dynamics, noting Concorde contribution.

p0063 A72-14681

Dynamic stability, control and structural response of transonic jet transport to atmospheric turbulence.

p0119 A72-16348

Optimization algorithms for jet transport aircraft inertially based flight trajectory control in turbulent atmosphere, comparing with ILS.

p0120 A72-16472

Sonic boom generation, propagation and minimization, discussing atmospheric turbulence and temperature gradients and aircraft configuration effects.

- [AIAA PAPER 72-194] p0128 A72-16849  
Atmospheric turbulence effects on aircraft flight and design, covering accidents and costs, turbulence generation, prediction, measurements and load alleviation devices
- [AIAA PAPER 72-219] p0129 A72-16885  
Rice exceedance statistics application to atmospheric turbulence, indicating strong nonGaussian second order distributions
- [AIAA PAPER 72-136] p0134 A72-16969  
Motion dynamics of aircraft-autopilot closed loop system under influence of atmospheric turbulence and electric circuitry thermal noise
- p0181 A72-18990  
Atmospheric acoustic attenuation measurement on sailplane, assessing turbulence backscattering cross section
- p0189 A72-20597  
Small scale atmospheric turbulence measurement with airborne hot-wire anemometer, discussing optimal choice of experimental parameters
- p0227 A72-22435  
Nonlinear longitudinal aerodynamic characteristics effect on rigid aircraft response to normal acceleration due to atmospheric turbulence, using power-spectral technique
- p0236 A72-23461  
Turbulence measurement, reporting and subsequent data handling by upgraded ATC system, suggesting R and D program to evaluate wake turbulence effects on airport capacity
- p0236 A72-23466  
Thunderstorm penetration by F-100 aircraft to study turbulence hazard relation to updraft size and short period fluctuation-induced acceleration changes
- p0347 A72-28852  
Lower stratospheric turbulence and horizontal temperature gradients from RB-57F aircraft meteorological measurements
- p0349 A72-28864  
Aviation hazards due to stably stratified shear and turbulence zones, discussing meteorological analysis of 747 jumbo jet turbulence incident
- p0349 A72-28865  
Small transport aircraft horizontal tail surfaces flow characteristics determination for stress calculation during flight in turbulent atmosphere
- p0359 A72-30284  
Structural mode vibration control system design for B-1 aircraft to improve ride during atmospheric turbulence and terrain following
- p0453 A72-35563  
Atmospheric turbulence and the ATC system
- p0462 A72-37049  
Numerical study of the characteristic magnitudes of turbulence on the far sound field radiated by a subsonic jet
- [ONERA, TP NO. 1058] p0492 A72-37761  
Rigid aircraft longitudinal dynamic response to random atmospheric turbulence, defining spectral gust alleviation factors in terms of mass scale and damping ratio parameters
- p0559 A72-41641  
Low-altitude atmospheric turbulence around an airport
- p0613 A72-45334  
Aerial expedition for studying conditions of atmospheric boundary layer over oasis and semiarid region
- [AD-727535] p0034 A72-10332  
Atmospheric turbulence power spectra for predicting rigid aircraft center of gravity response
- [ARC-R-3665] p0089 A72-11965  
Aircraft flights in stratosphere over western USA investigating mountain wave propagation for stratospheric turbulence forecasting

p0019 A72-12380
- STOL aircraft integrated landing approach flight control system with elevator and thrust control coupling to angle of attack, altitude and other state variables  
[DGLR PAPER 71-063] p0022 A72-12705
- Automatic flight control systems value to aircraft pilot, stressing man machine interface  
p0056 A72-13420
- Navy hovering vehicle versatile automatic control system for V/STOL flight test program, using airborne digital computer for navigation/guidance computations  
p0125 A72-16661
- BQM-34A and E/F target drone aircraft versatile automatic flight control system flight test program and results for basic and advanced flight modes  
p0125 A72-16663
- Automated ATC guidance technique for aircraft curved flight trajectories, describing flight profiles synthesizing algorithms and computerized simulation technique  
[AIAA PAPER 72-1211] p0140 A72-17922
- Development trends in airborne man machine flight control, discussing optimal division between human pilot and machine in relation to total system performance and economic factors  
p0230 A72-22781
- Optimal solutions for apportionment between automatic and manual flight control, considering number and types of displays required  
p0230 A72-22783
- DC 10 aircraft automatic flight guidance system, noting dual-dual fail-passive autoland  
p0234 A72-23448
- Automated navigation management in cockpit, considering modular navigation /HONA/ dual channel system of L-1011 TriStar  
p0234 A72-23450
- Helicopter automatic flight control approach/hover coupler systems, hands off stability and handling qualities  
p0310 A72-27522
- Autoland system flight testing in Trident 3B and British Civil Aviation Authority approval for ICAO Cat 3a weather  
p0411 A72-33539
- Airline crew familiarization with DC-10 Computerized Flight Guidance System to calculate steering signal from raw data to follow flight path  
p0494 A72-37899
- Electronic primary flight control system requirements and equipment characteristics, discussing USAF and NASA fly by wire R and D programs  
[AIAA PAPER 72-882] p0505 A72-39118
- Microwave landing system effect on the flight guidance and control system.  
[AIAA PAPER 72-755] p0510 A72-40057
- Modular navigation /HONA/ dual channel automatic area navigation system, describing computer, flight data storage and control/display units  
p0545 A72-40277
- TCE-71A area navigation system based on modular design with provision for 20 waypoints parameter storage, describing computer, control display and automatic data entry units  
p0546 A72-40278
- Automated area navigation with real time track computation, discussing information processing by on-board computer for immediate pilot instruction  
p0550 A72-40683
- Analysis and calculation of basic parameters of aircraft automatic control system components  
[JPRS-54332] p0042 N72-11039
- Some problems in developing automatic flight control systems for light helicopters  
p0082 N72-11922
- Automatic approach and hover coupler for rescue helicopters  
p0083 N72-11926
- Development of digital autopilot for transport aircraft and evaluation of system performance on simulator  
[NASA-TN-X-62094] p0086 N72-11942
- Design and evaluation of automatic pilot to reduce excursions in altitude of jet transport aircraft during atmospheric turbulence  
[NASA-TN-D-6869] p0572 N72-30009
- AUTOMATIC FREQUENCY CONTROL**  
Aircraft turboalternator governing theory for frequency error detection, comparing performance of mechanical- and electro-hydraulic governors  
p0143 A72-18249
- AUTOMATIC LANDING CONTROL**  
Automated radar terminal system /ARTS/ for monitoring and tracking all aircraft within radar range, displaying identification, altitude and ground speed information to air traffic controller  
p0010 A72-10960
- Fail-operational automatic landing system for Boeing 747 aircraft, noting reduction in allowable minimum weather conditions in U.S. and UK  
p0010 A72-10961
- Terminal area air traffic guidance and control, discussing automation, all-weather precision approach and landing and failure detection  
p0066 A72-14817
- Airborne computer programmed adaptive optimal control for subsonic vehicle automatic landing

# AUTOMATIC PILOTS

# SUBJECT INDEX

with aerodynamic performance p0120 A72-16430

U.S. Navy automatic carrier landing system /ACLS/, discussing shore and ship based test techniques and problem areas p0124 A72-16654

Flight control systems development, discussing onboard computers use in subsystems functional integration, stabilization and landing systems, inertial navigation and flight simulation p0127 A72-16736

DC-10 aircraft automatic landing performance and failure assessment monitor system p0190 A72-21003

Pilot evaluation of C-5 automatic landing system in Category III weather environment p0310 A72-27521

Statistical correlation techniques applied to jet aircraft autoland system dynamic ground tests with simulated engine and aerodynamic characteristics p0412 A72-33641

Precision navigation for approach and landing operations. p0501 A72-38253

Direct lift control feasibility for integration into F-14A automatic carrier landing system /ACLS/, using moving-base six-degree-of-freedom simulation [AIAA PAPER 72-873] p0505 A72-39127

Performance of radio altimeter in automatically landing high performance aircraft [NAL-TR-235] p0111 N72-13589

Three methods of cross coupling for added control during automatic landing approach [AD-730153] p0154 N72-14014

**AUTOMATIC PILOTS**

Soviet book on electrical equipment and instrumentation of An-24 aircraft covering power sources, control, safety systems, engine, flight and navigation instruments and autopilot p0120 A72-16400

Motion dynamics of aircraft-autopilot closed loop system under influence of atmospheric turbulence and electric circuitry thermal noise p0181 A72-18990

Airline crew familiarization with DC-10 Computerized Flight Guidance System to calculate steering signal from raw data to follow flight path p0494 A72-37899

Spectral analysis of transient data applied to auto-pilot parameter studies of coupler transfer function [AD-725068] p0035 N72-10501

Breakdown of automatic pilots or auxiliary stabilization systems on helicopters p0082 N72-11918

Development of digital autopilot for transport aircraft and evaluation of system performance on simulator [NASA-TM-X-62094] p0086 N72-11942

Experimental display referenced flight control system with pilot control force steering [AD-731805] p0206 N72-15980

Simulation of PA-30 Comanche light aircraft performance and autopilot operation during final approach configuration [AD-733757] p0255 N72-18043

Design and evaluation of automatic pilot to reduce excursions in altitude of jet transport aircraft during atmospheric turbulence [NASA-TN-D-6869] p0572 N72-30009

Analysis of aerodynamic factors applied to design of longitudinal autopilot for alleviating gust loads [AD-743722] p0641 N72-33038

**AUTOMATIC ROCKET IMPACT PREDICTORS**

**U COMPUTERIZED SIMULATION**

**AUTOMATIC TEST EQUIPMENT**

Automatic ultrasonic testing equipment for NDT tests of helicopter rotor blades p0011 A72-11021

Automated jet engine development facility, discussing assembly and test area and computer controlled operation [ASME PAPER 71-WA/GT-6] p0116 A72-15899

Bayesian analysis of onboard computer controlled aircraft avionics subsystem built-in test for

failure detection p0123 A72-16574

Computerized modular automatic test equipment for commercial airliner avionics device performance, discussing data handling ability and cost effectiveness p0143 A72-18250

Digital computer controlled testing equipment for separately driven coaxial gas turbine low and high pressure compressors, emphasizing reliability and flexibility in system design p0564 A72-42682

Digital data system with real time displays and multiprocessing capability for multitest of aircraft structure with operational manpower reduction, assessing performance p0564 A72-42696

Equipment for automatic recording and rebroadcast of pilot reports on weather conditions [FAA-WA-72-62] p0643 N72-33153

**AUTOMATION**

FAA air traffic control automation program, describing enroute and terminal ATC systems implementation p0137 A72-17327

Automated navigation aids interface with human operator, discussing Apollo flight experience and technology utilization in air and marine navigation p0144 A72-18288

Automation in planning and execution of flights, considering navigation, communication, flight instruments monitoring, control/stabilization and warning systems p0230 A72-22780

Optical image filtering to simplify and facilitate automatic aerial photointerpretation processes p0233 A72-23310

Electronics and data processing technology effects on radar state of art, discussing automated air traffic control surveillance systems p0241 A72-24490

FAA automated ATC system, discussing subsystems related to operational and nonoperational computer program components, data entry and display, communication, personnel and environments p0304 A72-27000

Research and development of advanced technologies for future air transportation needs [EVENT-118] p0111 N72-13584

Development of discrete address beacon system to provide improved surveillance and ground to air communication in support of air traffic control automation [AD-732585] p0223 N72-17598

**AUTOMOBILES**

Air transport vs other travel, discussing time, costs, popularity and technology p0057 A72-13485

Helicopters and turbotrains as space conserving alternatives for automobile urban transportation, emphasizing comfort and convenience p0452 A72-35505

Liquid propellant rocket engines for racing cars and aircraft p0525 N72-28966

## AXISYMMETRIC BODIES

Multivortex model of vortex sheet development on slender axisymmetric bodies at angle of attack p0053 A72-12919  
 Application of Cooke equivalent radius to boundary layers on axisymmetric bodies at small angle of attack [TAB-131] p0258 A72-18293  
 Computation of potential flow around axisymmetric bodies, cowls, and engine inlets using singularity method [AVA-FB-7131] p0324 A72-20331  
 Laminar hypervelocity boundary layer flow past axisymmetric hyperboloid in air of thermochemical equilibrium [DLR-FB-72-16] p0519 A72-28280

## AXISYMMETRIC FLOW

Transonic compressor design for minimum number of stages and hub/tip ratio and maximum inlet axial velocity, assuming axisymmetric flow p0121 A72-16482  
 Mach 2.65 axisymmetric mixed-compression inlet system diffuser and boundary layer bleed system performance estimates confirmed by tests [AIAA PAPER 72-45] p0134 A72-16959  
 Two dimensional and axisymmetric flow with heat addition, deriving flow field by inverse methods p0185 A72-20062  
 Turbulent flow between rotating disk and turbine engine body calculated from equations of axisymmetric viscous incompressible fluid flow p0395 A72-31702  
 Axisymmetric jet impact on ground board for different nozzle configurations and heights in VTOL aircraft aerodynamic studies p0410 A72-33404  
 Surface vorticity theory for axisymmetric potential flow past annular aerofoils and bodies of revolution with application to ducted propellers and cowls. p0503 A72-38554  
 Lighthill-based model of sound emission from axisymmetric turbulence convected by mean flow, and implications for jet noise [NASA-TN-D-6939] p0579 A72-30607

## AXLES

## U SHAFTS (MACHINE ELEMENTS)

## AZIMUTH

Bearing azimuth measurement accuracy improvement by ATC beacon system/secondary surveillance radar using monopulse technique p0461 A72-37047  
 Possible impact of area navigation upon MLS requirements for azimuth angular coverage and range. p0606 A72-44643

## B

## B-1 AIRCRAFT

B-1 aircraft design features, discussing aerodynamic configurational aspects, structural components and materials, engine inlets, fuel, hydraulic control and avionics systems p0441 A72-34223  
 B-1 production planning and engineering, discussing manpower, tooling, structural components tests, schedules and cost estimates p0442 A72-34389  
 Structural mode vibration control system design for B-1 aircraft to improve ride during atmospheric turbulence and terrain following p0453 A72-35563  
 Automatic structural mode control system with aerodynamic vanes for B-1 strategic bomber turbulence excitation during low altitude terrain following missions [AIAA PAPER 72-772] p0499 A72-38132  
 Development of an inflatable fabric structure for the early stabilization of the B-1 crew escape capsule. [AIAA PAPER 72-801] p0510 A72-40053  
 Unique features of the B-1 flight control systems. [AIAA PAPER 72-872] p0511 A72-40062

## B-103 AIRCRAFT

## U BUCCANEER AIRCRAFT

## B-52 AIRCRAFT

System analysis and synthesis for B-52 Control Configured Vehicle program, discussing flutter mode and maneuver load control and augmented stability configurations [AIAA PAPER 72-869] p0506 A72-39130  
 Crew compartment vibration environment in B-52 aircraft during low altitude, high speed flight [AD-727023] p0033 A72-10127  
 Analysis of TF-33 aircraft engine removal requirements based on statistical analysis, autocovariance, spectral analysis, and cross-covariance functions [AD-743401] p0591 A72-31791

## B-58 AIRCRAFT

Measurement of B-58 crew compartment vibration environment during high speed, low altitude flight [AD-730288] p0154 A72-14013

## B-70 AIRCRAFT

Synoptic meteorological parameters vs CAT encountered in stratosphere by XB-70 airplane, presenting frequency distributions and probability tables p0349 A72-28867  
 Analysis of mass, structural, and aerodynamic data for XB-70 aircraft at three flight conditions [NASA-CR-116773] p0086 A72-11943  
 Static pressure position error calibrations for compensated and uncompensated XB-70 nose boom pitot static tube [NASA-TN-D-6827] p0421 A72-24016  
 Statistical analysis of XB-70 aircraft responses and control inputs [NASA-TN-D-6872] p0477 A72-27013

## BAC AIRCRAFT

## BT VISCOUNT AIRCRAFT

Flight tests of BAC 221 aircraft crosswind landing and sidestep maneuvers [ARC-CP-1168] p0042 A72-11045  
 Performance tests on aerodynamically compensated pressure heads for BAC 221 aircraft noting pressure sensing errors [ARC-CP-1167] p0042 A72-11046  
 Low speed flight simulation of slender wing BAC 221 research aircraft and comparison with flight tests [RAE-TR-69257] p0204 A72-15971

## BACKGROUND NOISE

Infrasound observations of natural background and signals from Apollo 14 and aircraft, using

# BACKSCATTERING

# SUBJECT INDEX

thermistor flowmeter microphone array  
p0302 A72-26515

Evaluation of transonic and supersonic wind-tunnel background noise and effects of surface pressure fluctuation measurements.  
[AIAA PAPER 72-1004] p0557 A72-41588

**BACKSCATTERING**  
Atmospheric acoustic attenuation measurement on sailplane, assessing turbulence backscattering cross section  
p0189 A72-20597

**BAGGAGE**  
Simulation of turnaround operation of passenger aircraft using critical path method for improving aircraft/terminal utilization  
p0341 N72-21970

**BALANCING**  
Vibration technology: Balancing flexible rotors; Conference, Technische Universitaet Berlin, Berlin, West Germany, March 23, 24, 1970, Summaries  
p0456 A72-36064

Statistical analysis of influence coefficients and unbalance forces measurement errors in balancing of rotors  
p0556 A72-41229

Airline operational weighing and balancing of 747 aircraft, discussing accuracy and calibration procedures for electronic load cells, mobile platform scales and onboard aircraft weighing systems  
[SAVE PAPER 917] p0596 A72-43464

Procedures for balancing rotors of jet aircraft engines and analysis of factors influencing level of vibration  
[AD-728121] p0097 N72-12800

Application of lasers to rotary gyroscope vibration interferometry, gyroscope balancing, and gravimetric accelerometers  
[REPT-59] p0372 N72-22524

**BALL BEARINGS**  
Feasibility analysis of solid lubricated ball bearings for aircraft propulsion systems application  
p0050 N72-11700

Fatigue tests of angular-contact ball bearings with tetraester and synthetic paraffinic oil at 492 K in air environment  
[NASA-TN-D-6771] p0372 N72-22496

Comparative lubrication tests of OH-58A tail rotor drive shaft bearings  
[NASA-TM-X-68118] p0521 N72-28505

**BALLISTIC RANGES**  
Sonic boom simulation devices and techniques, including wind tunnels, ballistic ranges, spark discharges and shock tubes  
p0198 A72-21906

**BALLISTICS**  
NT TERMINAL BALLISTICS  
Propagation of ballistic noise from aircraft in nonperturbed atmosphere -aircraft in horizontal flight at constant velocity, applied to turning flight  
[ISL-12/70] p0081 N72-11914

**BALLOON SOUNDING**  
Scientific balloon data management system, discussing airborne and ground station equipment for telemetry, command and flight control  
p0060 A72-13725

**BALLOONS**  
NT TETHERED BALLOONS  
Development of Mylar enclosure for maintaining temperature of balloon-borne batteries and electronic modules  
[NASA-CASE-GSC-11620-1] p0644 N72-33379

**BALLUTES**  
Static structural analysis of meridional tape forces, permeability, and change in model contours on aft half of inflatable decelerator device  
[NASA-TN-D-6929] p0633 N72-32911

**BALSA**  
Structural sandwich panel design, establishing simple stress and deflection formulas under transverse loading based on tests evaluating balsa as laminate core  
p0009 A72-10723

**BANKING FLIGHT**  
U TURNING FLIGHT

**BARDEEN APPROXIMATION**  
U BARRIER LAYERS  
U SURFACE PROPERTIES  
**BAROMETRIC PRESSURE**  
U ATMOSPHERIC PRESSURE  
**BARRIER LAYERS**  
Fretting corrosion fatigue prevention by barrier approach, discussing test program and application to helicopter part fatigue life increase  
[AHS PREPRINT 672] p0448 A72-34512

**BARYCENTER**  
U CENTER OF GRAVITY  
**BASE PRESSURE**  
Base pressure drag reduction on rectangular wings with blunt trailing edges from low speed wind tunnel measurements  
[DFVLR-SONDDE-219] p0244 A72-24842

**BATTERIES**  
U ELECTRIC BATTERIES  
**BATTERY SEPARATORS**  
U SEPARATORS  
**BAYES THEOREM**  
Bayesian analysis of onboard computer, controlled aircraft avionic subsystem built-in test for failure detection  
p0123 A72-16574

**BAYESIAN STATISTICS**  
U BAYES THEOREM  
**BEACONS**  
NT AIRPORT BEACONS  
NT RADAR BEACONS  
NT RADIO BEACONS  
NT RADIO DIRECTION FINDERS  
Analysis of target signal requirements for aircraft navigation systems using millimeter wave radiometry from terrain radiation or ground-based beacons  
[NASA-TM-X-62082] p0035 N72-10539

**BEAM COLUMNS**  
U BEAMS (SUPPORTS)  
**BEAM SWITCHING**  
Step-scan landing system technique, using microwave fixed linear array for area coverage with pattern of narrow overlapping, individually coded sequentially switched beams  
p0144 A72-18397

**BEAMS (RADIATION)**  
NT GAMMA RAY BEAMS  
NT RADAR BEAMS  
Low cost microwave scanning beam landing systems for interim instrument landing system replacement in civil aviation  
p0399 A72-32217

Airborne recording of ILS guidance signals and determination of beam bending effects  
[RAE-TR-70222] p0096 N72-12590

Comparison of scanning beam and Doppler type array aircraft landing systems, noting antenna radiation pattern and signal spectra  
[AT/DTRN/2-155] p0111 N72-13590

Comparison of scanning beam and Doppler type array aircraft landing systems emphasizing granularity  
[AT/DTRN/2-174] p0389 N72-23663

**BEAMS (SUPPORTS)**  
NT BOX BEAMS  
NT CANTILEVER BEAMS  
NT I BEAMS  
Flat beam linear vibration analysis from mode measurement and moire technique, applying to prototype turbine compressor blade  
p0457 A72-36375

A consistent approach for treating distributed loading in the matrix force method.  
p0557 A72-41261

Superposition principle for nonclassical forced motion of stationary and rotating beams with tip masses  
[AD-735683] p0341 N72-21939

**BEARING (DIRECTION)**  
Bearing azimuth measurement accuracy improvement by ATC beacon system/secondary surveillance radar using monopulse technique  
p0461 A72-37047

Present status of self-contained navigation systems combining Doppler velocity sensors and attitude/heading references.  
p0546 A72-40282

number, airfoil parameters and flight conditions p0024 A72-12882

Constraining U-shaped frames for blade edges protection during hydrojet shot blasting of compressor blades for gas turbine engines p0304 A72-26819

French monograph on flow near rotor blade tips, discussing three dimensional circulation and boundary layer effects, energy losses, velocity and pressure distributions, etc p0363 A72-30950

Linear air mass flow injection at helicopter rotor blade tips, considering effects on trailing vortex circulation strength [AHS PREPRINT 624] p0446 A72-34498

The dissipation of tip vortices by mass injection with application to rotor systems. p0612 A72-45329

The use of complex coordinates in the study of rotor dynamics. [AIAA PAPER 72-954] p0615 A72-45413

Aerodynamics of helicopter rotor blade tip vortices [NASA-CR-112009] p0101 N72-12992

Aerodynamic design parameters and blade element performance of axial flow compressor rotor showing effects of blade solidity on stall. [NASA-TM-X-2379] p0163 N72-14989

Analytical and experimental investigation of vortex noise generated by propellers with low tip speeds [AD-731156] p0167 N72-15015

Contactless measurement of tip clearance in jet engine turbine based on radioactive isotope properties. [AD-734912] p0282 N72-19856

Design of single stage fan with tip speed of 1800 ft/sec and hub/tip ratio of 0.5 for producing pressure ratio of 2.285 to 1 [NASA-CR-120907] p0580 N72-30774

Experimental and analytical determination of boundary layers and tip flows of helicopter rotor blades [AD-745213] p0644 N72-33286

**BLAST DELECTORS**  
 Scale model tests of high thrust engine blast deflection fence combinations for protection of adjacent roadway traffic p0413 A72-33698

Jet blast deflector for controlling shipboard flight deck environment [AD-735877] p0341 N72-21963

**BLAST LOADS**  
 Aircraft structures shock and blast loading characteristics from internal detonation, comparing computer program results with available data p0605 A72-44610

Effects of blast loads on structural failure in aircraft components p0172 N72-15822

**BLEED-OFF**  
**U PRESSURE REDUCTION**

**BLEEDING**  
 Air bleeding location to cool turbojet engine turbine of supersonic aircraft, presenting graphs p0314 A72-28147

**BLIND LANDING**  
 Carrier system for controlled approach of Naval aircraft to provide pilot window to deck for tactical jet guidance for poor visibility landing p0018 A72-12323

Head-up display flying under IMC and VMC flight conditions, considering takeoff, landing and navigation modes p0190 A72-21004

**BLISTERS (PROTUBERANCES)**  
**U PROTUBERANCES**

**BLOWDOWN WIND TUNNELS**  
 Blowdown wind tunnel internal and external noise fields prediction by empirical method, considering valves, burners, turbulent boundary layers and exhaust jets as sources [AIAA PAPER 72-668] p0414 A72-34070

Generating high Reynolds-number flows. p0501 A72-38222

Flow quality improvements in a blowdown wind tunnel using a multiple shock entrance diffuser. [AIAA PAPER 72-1002] p0557 A72-41587

## BOEING AIRCRAFT

## SUBJECT INDEX

- Pressure distribution on swept wing-body junction at supersonic speeds  
[ARC-R/M-3661] p0202 N72-15949
- Strain gage measurements of buffeting properties on wing-body combinations p0470 N72-26349
- Integration of forebody and forebody/wing flow fields into airplane design criteria p0478 N72-27018
- Fatigue tests on bolted wing-body junction of military aircraft [TB-95] p0525 N72-28908
- Analysis of flow distribution near wing body configuration and determination of interference effects on another aircraft by incident shock [AD-741917] p0571 N72-29998
- BOEING AIRCRAFT**
- Boeing 347 helicopter program, discussing, simulation, wind tunnel, whirl tower, bench testing, flight test development and demonstration p0135 A72-16993
- Boeing aircraft altitude alerting systems development and design to meet FAR 91-51 requirements, discussing retrofit programs and altimeter encoding p0564 A72-42689
- PRD-49, a new composite material - Its characteristics and its application to the BO-105 helicopter. [SAWE PAPER 915] p0596 A72-43462
- BOEING MILITARY AIRCRAFT**
- U MILITARY AIRCRAFT**
- BOEING 707 AIRCRAFT**
- Boeing 707 cockpit simulator with computer generated displays, moving area navigation map and ATC information p0187 A72-20336
- Operating cost comparisons between Concorde and Boeing 707 and 747 aircraft, considering profitability p0508 A72-39818
- Design, fabrication, and ground tests of perforated stainless steel exhaust nozzle inserts for Boeing 707 aircraft noise reduction [NASA-CR-1853] p0031 N72-10043
- Midair collision of Boeing 707 airliner and Cessna 150 light plane over Compton, California on August 4, 1971 [NTSB-AAR-72-5] p0367 N72-22016
- Transitory diversion as cause of violent evasive maneuver to prevent midair collision of American and Trans World Airlines Boeing 707 aircraft [NTSB-AAR-72-7] p0367 N72-22017
- Investigation of midair collision of Boeing 707 commercial aircraft and Cessna 150 near Edison, New Jersey on 9 January, 1971 [NTSB-AAR-72-16] p0479 N72-27025
- BOEING 720 AIRCRAFT**
- Aircraft accident involving Boeing 720B aircraft during missed approach simulation at Ontario, California airport on 31 Mar. 1971 [NTSB-AAR-72-18] p0584 N72-31018
- BOEING 727 AIRCRAFT**
- Aircraft accident involving Boeing 727 aircraft during landing at Harry S. Truman Airport, Charlotte Amalie, St. Thomas, Virgin Islands on 28 Dec. 1970 [PB-208675] p0642 N72-33044
- BOEING 737 AIRCRAFT**
- Aircraft accident involving Boeing 737 aircraft during takeoff from Philadelphia, Pennsylvania airport on 19 Jul. 70 [PB-208664] p0641 N72-33042
- BOEING 747 AIRCRAFT**
- Boeing 747B growth model FAA certification, discussing engine thrust, fuel capacity, taxi and flight weights and aircraft noise reduction [SAE PAPER 710753] p0004 A72-10251
- Fail-operational automatic landing system for Boeing 747 aircraft, noting reduction in allowable minimum weather conditions in U.S. and UK p0010 A72-10961
- Pilot evaluation of Boeing 747 handling, directional stability, stall, rudder feel forces, landing, inertial navigation and reliability p0135 A72-16992
- Manufacturer viewpoint on aircraft engine safe introduction into airline service, discussing JT9D engine design for 747 aircraft p0178 A72-18830
- Shot peen contouring of Boeing 747 wing skins combined with incremental chip forming, noting principles and manufacturing process [ASH PAPER W 72-31,4] p0314 A72-28160
- Airline maintenance program and facilities for Boeing 747 aircraft based on optimized service concept p0401 A72-32430
- Meteorological data analysis for CAT encounter of Boeing 747 flight over Nantucket Island on 4 November 1970 p0411 A72-33525
- Maintenance of the 747. II - BOAC. p0449 A72-34929
- Functional equipment active and standby redundancy for flight safety and air traffic punctuality improvement, noting Boeing 747 aircraft redundant systems p0452 A72-35476
- Boeing 747 aircraft impact on Chicago O'Hare airport design criteria, noting future terminal facilities planning p0459 A72-36782
- Operating cost comparisons between Concorde and Boeing 707 and 747 aircraft, considering profitability p0508 A72-39818
- Boeing 747-F cargo aircraft, describing onboard and ground facilities for freight handling and loading p0593 A72-43245
- Airline operational weighing and balancing of 747 aircraft, discussing accuracy and calibration procedures for electronic load cells, mobile platform scales and onboard aircraft weighing systems [SAWE PAPER 917] p0596 A72-43464
- Report of aircraft incident on Boeing 747 commercial aircraft resulting from engine failure during climbout after takeoff from Honolulu, Hawaii [NTSB-AAR-71-16] p0166 N72-15005
- Personalized maintenance program for Boeing 747 aircraft p0318 N72-20004
- Flight test program and data acquisition techniques for evaluation of Boeing 747 aircraft p0328 N72-20977
- Aircraft accident report involving effects of severe turbulence on passengers and crew of Boeing 747 jet aircraft near Nantucket, Massachusetts, 4 November, 1970 [NTSB-AAR-72-14] p0466 N72-26020
- Air vortex wakes of B-747 aircraft [NASA-TT-F-14286] p0469 N72-26233
- Noise measurements obtained during visual approach monitor evaluation in 747 aircraft [NASA-CR-114478] p0515 N72-28010
- Fatigue integrity program for Boeing 747 aircraft p0539 N72-29898
- Aircraft accident involving Boeing 747 aircraft during takeoff from San Francisco International Airport on 30 July 1971 [NTSB-AAR-72-17] p0573 N72-30012
- Aircraft incident involving Boeing 747 aircraft in atmospheric turbulence near Lake Charles, Louisiana on 4 Jan. 1972 [NTSB-AAR-72-21] p0584 N72-31011
- BOEING 2707 AIRCRAFT**
- Fatigue design and test program for the American SST. p0609 A72-44741
- BOILING**
- NT FILM BOILING**
- BOLKOW AIRCRAFT**
- Bolkow 105C 5-place helicopter with twin turbine engine driven rigid glass-reinforced plastic rotor blades, emphasizing design philosophy of easy maintainability p0357 A72-29871
- BOLTS**
- Bolted connections strength in graphite fiber-epoxy resin composites reinforced by colaminated boron film p0288 A72-25476

- Fatigue tests on bolted wing-body junction of military aircraft [TB-95] p0525 N72-28908
- BOMBER AIRCRAFT**
- B-1 strategic supersonic bomber design, emphasizing variable sweep wing, landing gear, control and instrumentation p0018 A72-12226
- Titanium-boron-epoxy composite materials selection and fracture mechanics criteria for B-1 bomber structural design p0228 A72-22477
- Passive detection radar system for bombers, calculating target distance during horizontal flight p0302 A72-26316
- Interdiction bombing mission effectiveness model for bad and good weather aircraft type selection depending on weather conditions at target site p0344 A72-28400
- Control configured fighter and bomber aircraft based on flight control technology, discussing development programs p0614 A72-45386
- Force survival model for analysis of strategic bomber basing concepts in prelaunch survival mode [AD-732193] p0217 N72-16991
- Air and noise environmental pollution from B-1 aircraft [PB-201711-F] p0254 N72-18033
- Evaluation of thrust magnitude control for bomber defense missiles [AD-731812] p0264 N72-18788
- BOMBING EQUIPMENT**
- The application of non-planar lifting surface theory to the calculation of external-store loads. [AIAA PAPER 72-971] p0561 A72-42340
- BOMBS (ORDNANCE)**
- Aerodynamic characteristics of bomb in steady, incompressible, potential flow based on model [AD-733325] p0254 N72-18037
- BOMBS (PRESSURE GAGES)**
- U PRESSURE GAGES**
- BONDING**
- NT ADHESIVE BONDING
- NT EXPLOSIVE WELDING
- NT METAL BONDING
- NT METAL-METAL BONDING
- Static electrification, bonding, grounding, and lightning protection techniques applied to aircraft, spacecraft, and missiles [AD-739356] p0480 N72-27037
- BOOST**
- U ACCELERATION (PHYSICS)**
- BOOSTER RECOVERY**
- Booster launch vehicle guidance scheme for critical aborts from staging through burnout, minimizing aerodynamic phases for different landing sites p0397 A72-32182
- BORING MACHINES**
- Countersink boring machines with programmed digital control systems for precision spacing multiple hole drilling in extended aircraft engine components p0304 A72-26816
- BORON**
- High strength, stiffness and low density properties of boron/aluminum matrix composites in flight structures p0065 A72-14745
- Titanium-boron-epoxy composite materials selection and fracture mechanics criteria for B-1 bomber structural design p0228 A72-22477
- Fatigue strength characteristics of boron-epoxy reinforced Al stringers for helicopter airframe [AIAA PAPER 72-392] p0287 A72-25413
- Boron-epoxy composite design for aircraft structures, discussing materials variations, strength prediction inadequacies and full scale tests p0288 A72-25454
- Bolted connections strength in graphite fiber-epoxy resin composites reinforced by colaminated boron film p0288 A72-25476
- Dynamic properties of thermosetting plastic composites unidirectionally reinforced by high elastic moduli boron and carbon fiber for aircraft structural applications p0308 A72-27343
- Application of boron/epoxy to the CH-54B Skycrane helicopter. [AHS PREPRINT 670] p0448 A72-34510
- Boron- and graphite-epoxy and boron-aluminum composites forming, processing and costs for aircraft structural materials p0454 A72-35663
- Boron polyimide composite development. p0549 A72-40553
- Boron fiber reinforced composites technology assessment and utilization, stressing cost reduction [ICAS PAPER 72-30] p0554 A72-41155
- BORON COMPOUNDS**
- Boron/potassium nitrate parachute mortar design for aircraft and spacecraft applications, comparing with high-low propellant p0189 A72-20783
- Construction of CH-54 helicopter components from boron/epoxy materials and quality control program to determine service life of components [NASA-CR-112101] p0529 N72-29009
- BOUNDARY LAYER CONTROL**
- NT POROUS BOUNDARY LAYER CONTROL
- Buccaneer Mk 2 and F-4K Phantom takeoff and landing performance improvement due to boundary layer control by leading and trailing edge blowing p0233 A72-22973
- Calculation procedure for reaction thrust of semibounded turbulent jet in boundary layer blowing and blow type antiicing systems p0345 A72-28728
- Wind tunnel model boundary layer reduction through suction for accurate simulation of high Reynolds number full scale aircraft characteristics p0076 N72-11875
- Transonic wind tunnel model measurements of buffet loads and boundaries at various sweep and aspect ratio wing roots p0078 N72-11886
- Jet blowing for intake boundary layer control in V/STOL aircraft p0210 N72-16697
- Boundary layer suction control for eliminating corner separation in airfoil cascade [ARC-R/N-3663] p0534 N72-29244
- Low velocity wind tunnel investigation of laminar boundary layer development downstream of suction slot. [AD-742937] p0583 N72-31005
- BOUNDARY LAYER FLOW**
- NT BOUNDARY LAYER SEPARATION
- NT REATTACHED FLOW
- NT SECONDARY FLOW
- NT SEPARATED FLOW
- Book on heat and mass transfer, covering research results over 1953-1969 on supersonic aircraft and missiles cooling problems, rarefied gas dynamics boundary layer flow, etc p0120 A72-16399
- Mach 2.65 axisymmetric mixed-compression inlet system diffuser and boundary layer bleed system performance estimates confirmed by tests [AIAA PAPER 72-45] p0134 A72-16959
- Low turbulence wind tunnel with closed circuit design and pressure gradient adjustment capability for turbulent boundary layer studies p0139 A72-17713
- Plane potential flow problem for laminar boundary layer on rotating infinite cylindrical blade, using conformal coordinate transformation p0195 A72-21614
- Low speed performance and boundary layer growth in optimal annular diffuser with uniform center body diameter and conically diverging wall p0237 A72-23856
- Incompressible boundary layer velocity profile on swept wings, comparing critical Reynolds number to straight wing value p0356 A72-29639
- Boundary layer velocity profiles on a helicopter rotor blade in hovering and forward flight. [AHS PREPRINT 622] p0444 A72-34482
- Nonequilibrium boundary layer flow at leading edge of highly swept hypersonic infinite span wing [PB-204710] p0328 N72-20975

## BOUNDARY LAYER NOISE

## SUBJECT INDEX

- Analysis of basic flow elements involved in unsteady stall of two dimensional airfoil rotary wing in incompressible flow  
[NASA-CR-2009] p0366 N72-22005
- Analysis of flow distribution near wing body configuration and determination of interference effects on another aircraft by incident shock  
[AD-741917] p0571 N72-29998
- Analysis of sound produced by turbulent boundary layers, flow past single discontinuities, and rigid flow discontinuities immersed in rigid ducts  
[NASA-CR-2126] p0640 N72-33029
- Numerical analysis of three dimensional, compressible turbulent boundary layer for finite supercritical wing of F-8 transonic research aircraft  
[NASA-CR-112158] p0644 N72-33272
- Experimental and analytical determination of boundary layers and tip flows of helicopter rotor blades  
[AD-745213] p0644 N72-33286
- BOUNDARY LAYER NOISE**  
U AERODYNAMIC NOISE  
U BOUNDARY LAYERS
- BOUNDARY LAYER SEPARATION**  
Stalled blade rows dynamic performance in terms of blade channel fluid inertia and surface boundary layer-caused time delay  
p0121 A72-16487
- Wind tunnel investigation of Reynolds number effects on boundary layer separation incidence and maximum lift coefficient of high-lift device equipped aircraft model  
p0242 A72-24657
- Flow separation effects on critical lift of helicopter rotor, using blade angle of attack criterion  
p0304 A72-26893
- Leading edge boundary layer flow separation and reattachment processes in airfoil dynamic stall, considering effect of angle of attack rate of change  
p0396 A72-32024
- Three dimensional boundary layer separation on slender bodies, delta wings and propulsion intake systems, reviewing computing techniques for interfering inviscid flow fields  
p0404 A72-32826
- Swirling flows vortex breakdown in nozzles, diffusers and combustion chambers, considering analogy to boundary layer separation  
p0457 A72-36385
- Integral and correlation methods for separation and reattachment phenomena in aerodynamics, applying to turbulent boundary layer  
[ONERA, TP NO. 1072] p0492 A72-37762
- Flow separation at the edges of some types of tail sections used in supersonic aircraft and in rocket technology  
p0507 A72-39597
- Lift on airfoils with separated boundary layers.  
p0557 A72-41264
- Calculation of separation points in incompressible turbulent flows.  
p0593 A72-43328
- Application of a time-dependent boundary-layer analysis to the problem of dynamic stall.  
p0599 A72-44058
- Hypersonic boundary layer separation of delta wing in shock tunnel using color and monochrome schlieren photography  
[NPL-AERO-NOTE-1097] p0029 N72-10022
- Flow model for shock induced leading edge transonic flow turbulence and rear separation in low speed stall of airfoil  
p0073 N72-11858
- Analysis of boundary layer flow processes during airfoil dynamic stall and design of airfoil to delay onset of dynamic stall  
[AD-734699] p0267 N72-19012
- Analysis of basic flow elements involved in unsteady stall of two dimensional airfoil rotary wing in incompressible flow  
[NASA-CR-2009] p0366 N72-22005
- Experimental determination of stability and stall flutter of scale model of tilt-propeller free-wing V/STOL aircraft  
[NASA-TN-D-6831] p0463 N72-25998
- Numerical procedure for predicting airfoil stall occurrence in incompressible flow conditions  
[ONERA-TP-1088] p0463 N72-26003
- Intermittent jet blowing for controlling flow separation on trailing edge flap  
[AD-742085] p0577 N72-30291
- Calculations for inviscid flow past slender wings in form of rhombic cones with leading edge separation  
[ARC-R/M-3694] p0582 N72-30999
- BOUNDARY LAYER STABILITY**  
Heat transfer effects on reentry vehicle surfaces  
boundary layer stability and aerodynamic characteristics, noting stall angle reduction and drag increase from wind tunnel tests  
[AIAA PAPER 72-960] p0562 A72-42357
- BOUNDARY LAYER TRANSITION**  
Flat plate boundary layer transition equations for supersonic wind tunnels, taking into account free stream turbulence  
p0196 A72-21616
- Laminar/turbulent boundary layer transition on parabolic wing profile in supersonic wind tunnel, noting critical Reynolds number increase with leading edge thickness  
p0227 A72-22407
- Calculation of laminar boundary layers by means of a differential-difference method.  
p0563 A72-42578
- Surface-pressure-fluctuation measurements used for boundary layer transition detection on X-15 vertical fin at peak altitudes of 70,000 meters  
[NASA-TM-X-2466] p0102 N72-12994
- Effect of wind tunnel disturbances on boundary layer transition process at hypersonic speed and development of low noise level wind tunnel  
[NASA-TM-X-2566] p0469 N72-26239
- Pressure distribution on sweptback wing at subsonic speeds noting boundary layer transition  
[ARC-CP-1215] p0583 N72-31003
- BOUNDARY LAYERS**  
NT HYPERSONIC BOUNDARY LAYER  
NT LAMINAR BOUNDARY LAYER  
NT SUPERSONIC BOUNDARY LAYERS  
NT THREE DIMENSIONAL BOUNDARY LAYER  
NT TURBULENT BOUNDARY LAYER
- Aerodynamic forces and pressure distribution measurement on wing-body combination model, investigating boundary layer on wing upper surface  
p0018 A72-12228
- Helicopter rotor boundary layer, comparing analytical shear stress and velocity distributions obtained by momentum integral techniques with hot wire probe experimental data  
[AIAA PAPER 72-38] p0130 A72-16900
- Combined viscous-inviscid analytical procedure for predicting boundary layer effects on supersonic inlet flow field  
[AIAA PAPER 72-44] p0134 A72-16975
- Centrifugal turboengine diffuser with high enlargement area compared with logarithmic spiral types, discussing boundary layers, secondary flow, shapes and aerodynamic parameters  
p0236 A72-23747
- Turbocompressor deceleration cascades blades surface roughness effects on boundary layer, noting pressure and velocity distributions  
[ASME PAPER 72-GT-48] p0296 A72-25640
- Hub and shroud boundary layer growth in centrifugal compressor vaneless diffusers, comparing predicted and measured performance at high pressure ratio per stage  
[ASME PAPER 72-GT-54] p0296 A72-25645
- Axial flow turbines aerodynamic loading increase via control of velocity distribution and boundary layer evolution around airfoil profiles  
[ASME PAPER 72-GT-78] p0297 A72-25658
- Aerodynamic stall characteristic prediction from static experimental data for airfoils, noting boundary layer effects  
[AIAA PAPER 72-682] p0414 A72-34060
- Some results from tests in the NAE high Reynolds number two-dimensional test facility on 'shockless' and other airfoils.  
[ICAS PAPER 72-33] p0554 A72-41158
- Boundary layer behavior of turbocompressor in free stream turbulence  
[CUED/A-TURBO/TR-26] p0109 N72-13266

- Boundary layers on airfoils in oblique transonic terminal shock wave and control of shock induced separation  
[AD-731830] p0208 N72-16227
- Airfoil configurations to eliminate undesirable shock boundary layer interactions  
[AD-731566] p0250 N72-17998
- Application of Cooke equivalent radius to boundary layers on axisymmetric bodies at small angle of attack  
[TAE-131] p0258 N72-18293
- Catalog of devices and techniques for boundary layer and wake measurements on flight vehicles  
[NASA-CR-116776] p0258 N72-18424
- Measurement of noise produced by turbofan rotor following removal of casing boundary layer  
[NASA-TN-D-6763] p0379 N72-22994
- Effect of ground proximity in wind tunnel using fixed board noting boundary layer influence  
[ARC-R/M-3689] p0582 N72-30997
- BOUNDARY VALUE PROBLEMS**
- Equilibrium configuration of cable towed in circular path, presenting multivalued boundary value problem mathematical analysis  
[AD-737445] p0012 A72-11132
- Heat transfer coefficients to both sides of finite one dimensional slab subject to phase-change coating technique boundary conditions, deriving thin wing correction factors  
p0060 A72-13956
- Transonic flow past wing airfoils, obtaining numerical solution by fitting mixed initial boundary conditions  
p0186 A72-20079
- Towed cable flight vehicle system motion in uniform flow field, calculating equilibrium configuration during coordinated turn from two point boundary value problem numerical solution  
p0195 A72-21604
- Hypersonic nonlinear aerodynamic loading effect on panel flutter, examining stability for various initial conditions  
[AIAA PAPER 72-345] p0286 A72-25374
- Harmonically oscillating rectangular wing in unsteady transonic flow, obtaining two part boundary value problem for linear potential equation  
p0310 A72-27545
- Aerodynamic properties prediction procedure for thin jet-flapped airfoil in incompressible inviscid flow bounded by different types of boundaries  
p0397 A72-32147
- Study of circular arc airfoils with asymptotic critical Mach number. II  
p0449 A72-34745
- Homogeneous linear partial differential equation for optimal control with boundary condition formed by terminal component, noting weighting functions for linear plant  
p0494 A72-37989
- Calculation of laminar boundary layers by means of a differential-difference method.  
p0563 A72-42578
- Boundary value problem for calculating potential flow distribution around lifting wing fuselage configurations  
[NAL-TR-240T] p0109 N72-13272
- Numerical analysis of axial velocity of wing tip vortex and comparison with free stream velocity  
[AD-742311] p0577 N72-30285
- BOW SHOCK WAVES**
- U SHOCK WAVES**
- BOX BEAMS**
- Graphite/epoxy composite I beam and box beam components for horizontal tail stabilizers  
[AD-729050] p0107 N72-13039
- Random sequence fatigue tests of aluminum alloy box beams in unidirectional bending  
[AD-734393] p0283 N72-19932
- BRAKES (FOR ARRESTING MOTION)**
- NT AERODYNAMIC BRAKES**
- NT AIRCRAFT BRAKES**
- NT BALLUTES**
- NT DRAG CHUTES**
- NT LEADING EDGE SLATS**
- NT SPLIT FLAPS**
- NT TRAILING-EDGE FLAPS**
- NT WHEEL BRAKES**
- NT WING FLAPS**
- Determination of optimum gland dimensions and ring packings to eliminate leakage in aircraft brake piston seals  
[AD-728216] p0094 N72-12437
- Adaptive braking system preventing tire slip, applicable to aircraft  
[NASA-CR-123817] p0587 N72-31279
- Development of automatic braking system for aircraft based on sensing and controlling braked wheel decelerations  
[NASA-TN-D-6953] p0638 N72-33018
- BRAKING**
- Numerical analysis of braking forces and frictional coefficients for aircraft tires on hard surface runways - Part 2  
[ESDU-71026-PT-2] p0619 N72-32013
- BRAZING**
- Compressive strength of Ti alloy airframe skin stringer panels reinforced with B-Al composite by brazing  
[AIAA PAPER 72-359] p0286 A72-25387
- Developments in vacuum braze coating of aero-engine nozzle guide vanes.  
p0449 A72-34937
- Application of brazing techniques for remanufacturing of jet engine components to reduce cost of commercial aircraft maintenance  
p0040 N72-11024
- BREADBOARD MODELS**
- Design and development of flyable breadboard and NBL breadboard of airborne radiac  
[AD-729254] p0159 N72-14473
- BREAKAWAY**
- U BOUNDARY LAYER SEPARATION**
- BREAKERS (ELECTRIC)**
- U CIRCUIT BREAKERS**
- BREATHING**
- NT HIGH ALTITUDE BREATHING**
- BREATHING APPARATUS**
- NT OXYGEN MASKS**
- BREATHING MODE**
- U BREATHING VIBRATION**
- BREATHING VIBRATION**
- Paratroop type parachutes breathing oscillations and stability characteristics, using high speed cinematography and kinetheodolites to track during steady state descent  
p0007 A72-10307
- BREQUET AIRCRAFT**
- Wind tunnel testing of Dassault-Brequet-Dornier Alpha Jet twin engine trainer, emphasizing tests for wing-empennage flutter and jet induced interference effects  
p0357 A72-30077
- BRISTOL-SIDDELEY BS 53 ENGINE**
- Infrared spectrophotometer used for detection of trace contaminants from Pegasus and Olyapus engines in aircraft cabin atmospheres  
[QAD-MATS-174] p0031 N72-10040
- BRITISH AIRCRAFT CORP AIRCRAFT**
- U BAC AIRCRAFT**
- BROADCASTING**
- Equipment for automatic recording and rebroadcast of pilot reports on weather conditions  
[FAA-NA-72-62] p0643 N72-33153
- BROKEN CLOUDS**
- U CLOUDS (METEOROLOGY)**
- BRONINE COMPOUNDS**
- Tetrafluorodibromoethane - A new fire extinguishing agent in civil aviation  
p0455 A72-35793
- BUBBLES**
- Analysis and correlation of data on pressure fluctuations in separated flow.  
p0594 A72-43331
- BUCCANEER AIRCRAFT**
- Buccaneer Mk 2 and F-4K Phantom takeoff and landing performance improvement due to boundary layer control by leading and trailing edge blowing  
p0233 A72-22973
- BUCKLING**
- NT ELASTIC BUCKLING**
- Shallow parallel-edge sandwich shell buckling load calculation using Rayleigh-Ritz method, with application to sweptback wing panels  
[DLR-FB-71-30] p0174 N72-15879
- Buckling due to transient compressive stresses in aircraft panel during deceleration

## BUDGETING

## SUBJECT INDEX

[ESDU-70002] p0647 N72-33882  
**BUDGETING**  
 HT FEDERAL BUDGETS  
 Federal legislation impact on airport and airway system planning, considering budget and schedule requirements p0459 A72-36777  
**BUFFETING**  
 Prediction of flight penetration of wing buffeting from wind tunnel model dynamic tests [ARC-CP-1171] p0042 N72-11044  
 Method for estimating transonic buffet boundary and Reynolds number effects for straight and swept wings p0073 N72-11857  
 Transonic wind tunnel determination of Reynolds number effect on jet-flapped airfoil drag divergence, pressure distribution, and buffet onset p0074 N72-11861  
 Transonic wind tunnel model measurements of buffet loads and boundaries at various sweep and aspect ratio wing roots p0078 N72-11886  
 Strain gage measurements of buffeting properties on wing-body combinations p0470 N72-26349  
 Flight tests to determine effects of moderate deflections of wing leading and trailing edges of F-104 aircraft buffet characteristics at subsonic and transonic speeds [NASA-TN-D-6943] p0572 N72-30004  
**BUILDING MATERIALS**  
 U CONSTRUCTION MATERIALS  
**BUILDING STRUCTURES**  
 U BUILDINGS  
 BUILDINGS  
 Building soundproofing codes for airport zoning ordinances, emphasizing wider latitude in land use options p0354 A72-29561  
 Research report on sound and vibration measurement in turbomachinery, aircraft structures, and building structures p0649 N72-33976  
**BULKHEADS**  
 Forging techniques and applications for YF-12A aircraft Ti alloy bulkhead production, considering diffusion bonding and die shimming p0069 A72-14914  
**BUOYANCY**  
 Turbulent boundary layer analogy mathematical model for turbulent mixing and buoyancy effects on aircraft trailing vortex wake motion and persistency [AIAA PAPER 72-42] p0130 A72-16903  
 Buoyancy systems and parawings application in short haul passenger transportation, discussing VTOL and STOL operations p0406 A72-33183  
**BUOYS**  
 Specifications, flight test, and evaluation of low power radio buoys used for search and rescue operations [DLR-FB-71-110] p0472 N72-26520  
**BURNING**  
 U COMBUSTION  
**BURNING PROCESS**  
 U COMBUSTION  
**BURNING RATE**  
 Effects of aerodynamic coefficients, launch velocity, and burning rate on trajectory of self-suspended parachute flare [AD-731683] p0217 N72-16955  
**BURNTHROUGH (FAILURE)**  
 Interpretation of flat plate impingement pressure and temperature data for jet engine combustor burnthrough flames [AEROCHEM-TP-261] p0265 N72-18953  
**BYPASSES**  
 Thermodynamic cycle parameter effects on bypass turbofan jet engine fuel consumption and performance under various flight conditions and engine ratings p0600 A72-44281

C

**C-2 AIRCRAFT**  
 Accelerated life tests to determine effects of arrested landing stresses on C-2 aircraft structure [AD-739331] p0480 N72-27036  
**C-5 AIRCRAFT**  
 C-5A Galaxy aircraft systems and components maintainability program p0237 A72-23851  
 Pilot evaluation of C-5 automatic landing system in Category III weather environment p0310 A72-27521  
 Tests to determine design feasibility of unsurfaced soil facilities for operations of C-5A aircraft [AD-735344] p0337 N72-21398  
 Annealed foil fatigue sensor for full-scale C-5A aircraft [AD-743968] p0624 N72-32058  
**C-54 AIRCRAFT**  
 C-54 A/B aircraft engine air particle separator antiice system design features, manufacturing techniques and testing p0177 A72-18769  
**C-130 AIRCRAFT**  
 Multichannel multispectral scanner system for NASA C-130 earth resources aircraft, describing electronic equipment and calibration sources p0010 A72-10946  
 Development and evaluation of C-130 aircraft crew training program based on systems approach [AD-727055] p0091 N72-12064  
 Destructive crack propagation and fatigue tests on C-130 aircraft center wings [NASA-CR-112008] p0112 N72-13884  
 AC-130A aircraft empennage, using electrical resistance strain gages [AD-737350] p0385 N72-23037  
 Flight tests of EC-130E aircraft with X-band radome installed [ENEA-71-45] p0432 N72-25007  
 Flow measurements in trailing vortex with smoke from ground-based generator, using Lockheed Hercules [ATN-7104] p0519 N72-28277  
**C-131 AIRCRAFT**  
 Procedure for using high frequency standard gain ground reference antenna for calibrating C-131 and KC-135 aircraft for antenna radiation patterns [AD-740553] p0532 N72-29134  
**C-135 AIRCRAFT**  
 Procedure for using high frequency standard gain ground reference antenna for calibrating C-131 and KC-135 aircraft for antenna radiation patterns [AD-740553] p0532 N72-29134  
**CABIN ATMOSPHERES**  
 Infrared spectrophotometer used for detection of trace contaminants from Pegasus and Olympus engines in aircraft cabin atmospheres [QAD-MATS-174] p0031 N72-10040  
 Electromechanical device for recording infrared gaseous oxygen spectra in pressurized aircraft cabin atmosphere [CL-1971-16] p0424 N72-24498  
**CABINS**  
 Internal noise reduction in hovercraft. p0458 A72-36574  
**CABLES**  
 Aerospace wire and cables testing methods standards for evaluating mechanical, electrical and chemical properties, coating thicknesses, continuity, flaws, flammability, geometrical characteristics, etc [SAE AS 1198] p0008 A72-10384  
 Equilibrium configuration of cable towed in circular path, presenting multivalued boundary value problem mathematical analysis [AD-737445] p0012 A72-11132  
 Gas chromatography-mass spectrometry analysis of gaseous products arising from commercial aircraft cable coating pyrolysis [RAE-TR-71134] p0278 N72-19636  
**CABLES (ROPES)**  
 Towed cable flight vehicle system motion in uniform flow field, calculating equilibrium configuration during coordinated turn from two

- Thin shock layer theory of lifting properties of reentry caret and flat delta wings and waveriders at high incidence angles and Mach number p0018 A72-12345
- V-shaped wings supersonic characteristics at 0-15 deg angles of attack, investigating flow structure between wings by pitot tube rake p0142 A72-18129
- Conical caret wings supersonic characteristics, examining flow transition from weak to strong attached shock waves p0611 A72-45114
- Theoretical pressure distributions on caret and plane delta wings for supersonic flow [ARC-CP-1178] p0202 N72-15952
- Free flight measurement of blunt leading edge caret wing pressure and heat transfer at supersonic speeds [ARC-R/M-3679] p0267 N72-19007
- CARGO**
- NT AIR CARGO**
- NT AIR MAIL**
- NT BAGGAGE**
- Prediction models for dynamic environment experienced by cargo during air and rail transportation p0402 A72-32610
- Computerized design of civil aircraft using freight criteria in parametric analysis [AD-727231] p0044 N72-11061

# SUBJECT INDEX

# CASCADES

- Low altitude airdrop system using inflation-aided recovery parachutes for extraction  
[AD-735375] p0332 N72-21013
- Energy used in intercity freight transportation by water, rail, pipeline, truck, and air, and effect of fuel price increases  
[R-804-NSF] p0390 N72-23979
- Conference papers on shock and vibration including specifications, mechanical impedance, and transportation and packaging  
[AD-739574] p0474 N72-26815
- Dynamic input to cargo from floor of cargo space in selected military helicopters p0474 N72-26828
- CARGO AIRCRAFT**
- Super Guppy four engine aircraft characteristics, performance and loading device for bulky cargo air transportation p0300 A72-25812
- Dynamic input to cargo in turbojet aircraft studied during C141 and C5A flights, discussing instrumentation, test procedures, data reduction processes and results p0403 A72-32625
- Boeing 747-F cargo aircraft, describing onboard and ground facilities for freight handling and loading p0593 A72-43245
- Minimum operational costs of passenger and cargo transport aircraft, considering effects of flight distance, wind conditions and optimum speed and altitude p0603 A72-44338
- Analysis of cost effectiveness of cargo transportation by nuclear propelled aircraft and impact damage tests of nuclear reactor containment vessels  
[NASA-TN-X-2425] p0096 N72-12604
- CARRIER MODULATION**
- U MODULATION**
- CARRIER WAVES**
- Aircraft applications of composite signal OMEGA configuration with phase data combined at separate carrier with weighting coefficients, discussing advantages over uncompensated navigation systems p0352 A72-29192
- CARTRIDGE ACTUATED DEVICES**
- U ACTUATORS**
- U EXPLOSIVE DEVICES**
- CASCADE FLOW**
- One dimensional unsteady flow in turbine engines rotating and static vane cascades, discussing vibrations propagation p0014 A72-11584
- Circular arc blades two dimensional cascade performance test data for various cambers comparison with potential theory data p0121 A72-16485
- Two dimensional cascade performance data correction for rotating blade row stream surface inclination in axial flow turbines p0121 A72-16486
- Finite pitch airfoil theory relations for turbomachine moving blade rows interference effect on cascade flutter p0121 A72-16488
- Two dimensional cascade test of air-cooled turbine nozzle, describing aerodynamic characteristics and heat transfer properties p0122 A72-16489
- Cascade nozzle gas particle flow properties, discussing flow pressure experiments and theory at different streamlines p0122 A72-16490
- Flow visualization in supersonic axial compressor by short exposure schlieren photography of shock wave patterns in rotating annular cascade of compressor blades  
[ONERA, TP NO. 1026] p0136 A72-17192
- Viscous flow through movable and immovable cascades of blades, determining velocity field by airfoil center line vortex distribution p0142 A72-18131
- Cascading turbomachine blades vibration measurement in subsonic and sonic high temperature gas flows, describing test facility p0147 A72-18689
- Numerical analysis of computing velocity distribution in vortex row cascade profiles by method of singularities. p0178 A72-18787
- Aerodynamic efficiency of plane slotted blade cascades of adjustable nozzle diaphragms in transport aircraft axial flow gas turbine engines p0233 A72-23186
- Linearized method of characteristics application to supersonic flow past oscillating flat plate cascades with supersonic leading edge locus  
[AIAA PAPER 72-377] p0287 A72-25401
- Unsteady lift on airfoils in moving cascades with inlet axial flow disturbances, estimating lift on reference blade between blade channels  
[ASME PAPER 72-GT-5] p0293 A72-25608
- Jet flaps for high turning compressor cascades in incompressible axial flow, calculating blade pressure and jet slope distributions  
[ASME PAPER 72-GT-16] p0293 A72-25615
- Shocked flow and pressure loss computation for axial flow compressor cascades, using time dependent finite difference technique  
[ASME PAPER 72-GT-31] p0295 A72-25627
- Cascade technology for centrifugal compressor vane diffuser design, comparing performance results with conventional diffuser data  
[ASME PAPER 72-GT-39] p0295 A72-25633
- Supersonic turbine cascade flow properties and pressure distributions on blades, comparing calculated results with experimental data  
[ASME PAPER 72-GT-47] p0296 A72-25639
- Flow data reduction validity for supersonic axial compressors, presenting experimental results for rotating supersonic cascade  
[ASME PAPER 72-GT-100] p0299 A72-25669
- Computer program for gas turbine characteristics and influence coefficients calculation, allowing for cascade loss distribution during flow choking p0314 A72-28151
- Velocity profiles for three dimensional turbulent boundary layer on end wall of axial flow compressor cascade passage under adverse pressure gradients p0405 A72-32901
- Unsteady aerodynamic and aeroelastic effects in turbomachine blade cascades supersonic flow, discussing trends in fan and compressor technology p0551 A72-40969
- Two-dimensional subsonic linearized theory of the unsteady flow through a blade-row with small steady pitch and camber angle.  
[ICAS PAPER 72-12] p0552 A72-41137
- The determination of a general relation between the aerodynamic properties of a single airfoil and those of the same airfoil arranged in an arbitrary cascade. p0614 A72-45363
- Suction side velocity distribution parameter characteristic relationship to profile geometrical parameters in turbine blade cascade system p0614 A72-45366
- Aerodynamic characteristics of turbine blade cascades in unsteady incompressible and compressible fluid flow, considering axial flow turbine blades vibration p0615 A72-45524
- Calculation of nonstationary lift and moment coefficients for vibrating cascade of blades p0158 N72-14292
- Numerical analysis of oscillatory aerodynamic forces and moments acting on cascade of airfoils in unstalled conditions  
[AD-735205] p0340 N72-21825
- Boundary layer suction control for eliminating corner separation in airfoil cascade  
[ARC-R/M-3663] p0534 N72-29244
- CASCADE WIND TUNNELS**
- Cascade wind tunnel and water table determination for trajectories and velocities of suspended particles in fluid flow through axial compressor stage p0175 A72-18756
- Researches on the two-dimensional retarded cascade. I, II. p0560 A72-41944
- CASCADES**
- Turbojet engine compressor efficiency relationship

to cascade characteristics diagram, using influence coefficients

p0181 A72-18995

German monograph - Computational and experimental investigations regarding the operational characteristics of a three-stage axial-flow compressor with high performance per stage

p0490 A72-37490

## CASCADES (FLUID DYNAMICS)

## U FLUID DYNAMICS

## CASCODE MOSFET

## U FIELD EFFECT TRANSISTORS

## CASE HISTORIES

Private aircraft ownership and use for family travel and pleasure, discussing costs, maintenance and operational problems

[AIAA PAPER 72-812] p0497 A72-38119

Corporate aircraft pilot contribution to accident investigation in providing expertise, discussing various case histories

p0508 A72-39751

## CASES (CONTAINERS)

Performance of axial flow compressor rotor with different casing treatment configuration

[NASA-TN-D-6538] p0030 N72-10025

## CASTING

Aircraft light alloy integral construction for stress concentration and fatigue failure avoidance, describing continuous casting process, stress relieving and ultrasonic flaw testing procedures

p0185 A72-19725

Metal forming techniques for gas turbine engines, considering isothermal, radial and powder metallurgy preform forgings, contoured cross and form rolling, and squeeze casting

[ASME PAPER 72-GT-58] p0296 A72-25649

## CASTINGS

Nondestructive radioactive gas penetrant tests for porosity and fatigue damage in jet engine castings

p0009 A72-10813

Effect of several geometrically different porous castings on rotor stall limit line and overall performance improvement

[NASA-TN-D-6537] p0078 N72-11888

Casting instruction manual for steels and aluminum, magnesium and copper alloys in aeronautical manufacturing

[RAE-LIB-TRANS-1557] p0259 N72-18501

## CATALOGS (PUBLICATIONS)

Catalog on capacity and efficiency of air traffic control systems

[AD-737513] p0427 N72-24683

## CATALYTIC ACTIVITY

Possible catalytic reduction of stratospheric ozone by nitrogen oxides emitted from SST aircraft

[UCRL-20568] p0045 N72-11334

## CATAPULTS

Aircraft launch envelope investigation for minimum catapult end airspeed determination at carrier bow, discussing optimum test pilot launch technique

p0146 A72-18498

Catapult steam ingestion test of turbofan engines in A-7 aircraft, correlating compressor stall occurrences with temperature increase rate in distorted region

p0176 A72-18760

Dynamic response index /DRI/ minimization for personnel aircraft emergency catapult escape systems to reduce injury probability

p0194 A72-21576

Simulator for physical forces experienced by carrier aircraft during catapult launches and arrested landings, considering external stores safe suspension

p0403 A72-32620

Cost effectiveness analysis to determine feasibility of using catapult launch systems for large commercial aircraft to reduce aircraft noise problem

[FAA-EQ-71-11] p0085 N72-11941

Spring constants for shock analysis of aircraft carrier catapult installations

[AD-729249] p0157 N72-14288

Evaluation of method for predicting performance of steam catapults used for shipboard aircraft launching

[AD-742804] p0585 N72-31027

## CATHODE RAY TUBES

Flight display systems current state and future developments, discussing dual attitude indicators and automatic chart systems CRTs, engine displays and malfunction warning systems

p0056 A72-13423

Cathode ray tube recorder for remote airborne photographic mission

p0060 A72-13711

Interactive computer graphics with three dimensional real time CRT display of air combat maneuvers for fighter pilot training

p0302 A72-26291

Aircraft CRT electronic displays discussing operational flexibility versus control and monitor complexities, economics, reliability and human factors

p0404 A72-32636

Image contrast enhancement of cathode ray tube cockpit displays with micromesh optical filters

[DLR-FB-71-73] p0322 N72-20216

Cathode ray tube terminals for air traffic control teletypewriter systems

p0626 N72-32183

## CAUCHY PROBLEM

Velocity field of sonic flow about aircraft wing profile, solving mixed Cauchy problem

p0013 A72-11178

## CAVITATION

## U CAVITATION FLOW

## CAVITATION CORROSION

Cavitation failure of aircraft hydraulic plunger pump elements from microscopic and metallographic analysis

p0345 A72-28732

## CAVITATION FLOW

Steady two dimensional cavity flow past infinite number of airfoils using linearized theory

p0062 A72-14460

## CEILINGS (METEOROLOGY)

U.S.S.R. civil aviation regulations on takeoff and landing minimum conditions for cloud ceilings and visibility range for various aircraft characteristics and equipment

p0361 A72-30820

## CEILOMETERS

## U CLOUD HEIGHT INDICATORS

## CELESTIAL BODIES

## NT EARTH (PLANET).

## CELESTIAL NAVIGATION

Polar region performance of OMEGA navigation system, noting addition of selectable grid reference, multiple parallel DR system, manual celestial computation and bearing resolver

p0353 A72-29200

## CEMENTS

Structural suitability and cost effectiveness of ferro-cement for large subsonic wind tunnel structures

[NASA-CR-114501] p0648 N72-33916

## CENTER OF GRAVITY

Aft center of gravity travel effects on aircraft longitudinal control response characteristics

[SAE PAPER 720318] p0290 A72-25581

Received signal spectrum gravity center and effective antenna centers of airborne Doppler velocimeter in horizontal flight

p0303 A72-26730

## CENTER OF PRESSURE

Aerodynamic center and center of pressure of slender small aspect ratio wing near solid or free surface, determining angle of attack effect

p0351 A72-29131

## CENTRAL NERVOUS SYSTEM

## NT SPINAL CORD

## CENTRIFUGAL COMPRESSORS

Incompressible flow measurement and loss prediction in radial vaneless diffuser in centrifugal compressor, using hot-wire anemometers

p0238 A72-23861

Cascade technology for centrifugal compressor vaned diffuser design, comparing performance results with conventional diffuser data

[ASME PAPER 72-GT-39] p0295 A72-25633

Radial inflow compressor feasibility, discussing blade loadings for various pressure ratios and efficiency of rotor and diffuser

[ASME PAPER 72-GT-52] p0296 A72-25644

- Hub and shroud boundary layer growth in centrifugal compressor vaneless diffusers, comparing predicted and measured performance at high pressure ratio per stage  
[ASME PAPER 72-GT-54] p0296 A72-25645
- Design considerations in selecting geometries for high pressure ratio single stage centrifugal compressors  
[ASME PAPER 72-GT-91] p0298 A72-25665
- Pressurized air assisted gas turbine fuel system, describing single stage centrifugal turbocompressor and rotary-lobe compressor designs and performance characteristics  
p0456 A72-36043
- FORTRAN program for calculating velocities in meridional plane of centrifugal compressor  
[NASA-TN-D-6701] p0249 A72-17988
- Analytical correlation of centrifugal compressor design geometry for maximum efficiency with specific speed  
[NASA-TN-D-6729] p0266 A72-19002
- Diffuser effects on stable operations of centrifugal compressor stage  
[AD-730042] p0282 A72-19855
- Design and performance of low turbulence wind tunnels driven by centrifugal blowers  
[AIC-AERO-72-10] p0468 A72-26208
- FORTRAN program for predicting total efficiency - specific speed characteristics of centrifugal compressors  
[NASA-TN-X-2594] p0513 A72-27994
- CENTRIFUGAL FORCE**
- Rotational, centrifugal and Coriolis force effects on turbulent boundary layer development, discussing changes in structure and shear stress distribution  
p0238 A72-23870
- Nonlinear analysis of helicopter rotor blade free transverse vibration under air and centrifugal loadings during forward flight, using matrix method  
p0394 A72-31407
- CENTRIFUGAL PUMPS**
- Military jet engines centrifugal fuel pumps power requirements for throttled operation, noting pressure stability improvement at low flow rates  
p0456 A72-36041
- Inlet throttle centrifugal fuel pumps for jet engine augmentation, discussing design features, performance, noise, life and reliability characteristics  
p0456 A72-36044
- Combined centrifugal oil filter, pump and deaerator for gas turbine engine lubrication systems, noting heat transfer effectiveness increase  
p0456 A72-36050
- Deterioration of shaft bearings of electromotor driving aircraft centrifugal fuel pump, determining lateral force acting on impeller  
p0598 A72-43663
- Method for evaluating liquid pump operational and functional performance characteristics  
[AD-737713] p0425 A72-24541
- CENTRIFUGES**
- NT HUMAN CENTRIFUGES**
- CENTRIFUGING STRESS**
- Aircraft gas turbine rotating disks thermal and mechanical stresses under variable thermal conditions, describing test assembly  
p0014 A72-11637
- CENTRIPETAL FORCE**
- Optimal modes of operation of a centripetal-compressor wheel with preswirling of the flow  
p0616 A72-45622
- CERAMAL PROTECTIVE COATINGS**
- U CERAMETS**
- U PROTECTIVE COATINGS**
- CERAMICS**
- Ceramic fiber reinforced Ni base alloy for gas turbine blades, improving creep resistance at high temperatures  
p0227 A72-22396
- CERAMETS**
- Aircraft power plants sealing materials, emphasizing porous cermet seals heat resistance under thermal cyclic loads  
p0147 A72-18658
- CERTIFICATION**
- Boeing 747B growth model FAA Certification, discussing engine thrust, fuel capacity, taxi and flight weights and aircraft noise reduction  
[SAE PAPER 710753] p0004 A72-10251
- Concorde airworthiness certification, discussing ground and flight test programs for performance, flying qualities and structures fatigue properties evaluation  
[SAE PAPER 710756] p0004 A72-10253
- Structural requirements for normal category plastic aircraft civil certification, noting compliance with Federal Aviation Regulations  
[SAE PAPER 720304] p0288 A72-25568
- Inspectability criteria for airframes with fatigue fail safe design requirements for small airplane certification  
[SAE PAPER 720310] p0289 A72-25574
- Fatigue certification of general aviation aircraft in Australia, describing ground taxi load spectra and endurance and radiographic inspection of laminated spar caps  
[SAE PAPER 720311] p0289 A72-25575
- FAA policy in issuing civil airport operating certificates and establishing minimum safety standards  
p0409 A72-33330
- Autoland system flight testing in Trident 3B and British Civil Aviation Authority approval for ICAO Cat 3a weather  
p0411 A72-33539
- FAA implemented airport certification legislation covering minimum safety standards, operation manual, emergency plan, fire and rescue service and pavement requirements  
p0460 A72-36785
- A time-frequency localization system applied to acoustic certification of aircraft.  
[ATAA PAPER 72-836] p0505 A72-39091
- Design and certification for executive type aircraft.  
p0608 A72-44730
- Fan jet Falcon design and certification tests.  
p0608 A72-44731
- The fatigue and fail-safe program for the certification of the Lockheed Model 286 rigid rotor helicopter.  
p0608 A72-44733
- Development and functions of organization for multinational certification of supersonic aircraft  
p0040 A72-11029
- CESSNA AIRCRAFT**
- Aircraft accident involving midair collision of DC-9 on scheduled flight with Cessna 206 near Raleigh, North Carolina, 4 December, 1971  
[NTSB-AAR-72-13] p0466 A72-26018
- Investigation of midair collision of Boeing 707 commercial aircraft and Cessna 150 near Edison, New Jersey on 9 January, 1971  
[NTSB-AAR-72-16] p0479 A72-27025
- CESSNA MILITARY AIRCRAFT**
- U MILITARY AIRCRAFT**
- CESSNA 210 AIRCRAFT**
- Cessna 210 aircraft electrically driven hydraulic power pack for landing gear system, noting engine and flight tests  
[SAE PAPER 720327] p0291 A72-25589
- CH-46 HELICOPTER**
- Full scale airframe fatigue testing of the CH-46.  
[AHS PREPRINT 671] p0448 A72-34511
- Reliability engineering of aft transmission planetary carrier bearing nut in mechanical drive assembly of CH-46 helicopter  
[AD-743073] p0587 A72-31037
- CH-47 HELICOPTER**
- Variable tuning vibration absorber for control of rotor induced structural vibrations in CH-47 helicopter  
p0216 A72-16874
- Design, development, and evaluation of glass-reinforced epoxy rotor blades on CH-47 helicopter  
[AD-738203] p0423 A72-24033
- Analysis of failure rate for rotary wings on CH-47 helicopter and determination of mean-time-between-failure leading to final replacement  
[AD-739568] p0516 A72-28022

Helicopter payload gains utilizing water injection for hot day power augmentation  
[NASA-TM-X-62195] p0639 N72-33027

**CH-54 HELICOPTER**  
S-64 Skycrane helicopter current and anticipated applications in commerce and industry, considering logging operations in ecologically sensitive or rugged areas, bridge construction, etc  
p0406 A72-33185

Application of boron/epoxy to the CH-54B Skycrane helicopter.  
[AHS PREPRINT 670] p0448 A72-34510

Construction of CH-54 helicopter components from boron/epoxy materials and quality control program to determine service life of components  
[NASA-CR-112101] p0529 N72-29009

**CHAIRS**  
U SEATS

**CHALCOGENIDES**  
NT NITRIC OXIDE  
NT NITROGEN OXIDES  
NT NITROUS OXIDES

**CHANCE-VOUGHT MILITARY AIRCRAFT**  
U MILITARY AIRCRAFT

**CHANNEL FLOW**  
Hydrodynamic forces in sinusoidal vibrations of disk in water channel with toroidal vorticity wake pattern, applying results to flapping wing mechanics  
p0247 A72-25129

**CHANNELS (DATA TRANSMISSION)**  
Microelectronics and rotary transformers for obtaining reliable data channels in rotating shaft system  
[NASA-TM-X-68112] p0580 N72-30776

**CHAOTIC CLOUD PATTERNS**  
U CLOUDS (METEOROLOGY)

**CHAPMAN SHEAR LAYER**  
U SHEAR LAYERS

**CHARACTERISTIC EQUATIONS**

**CHARACTERISTIC FUNCTIONS**  
U EIGENVALUES

**CHARACTERISTIC METHOD**  
U METHOD OF CHARACTERISTICS

**CHARGE SEPARATION**  
U POLARIZATION (CHARGE SEPARATION)

**CHARTS**  
NT FLOW CHARTS  
NT GRAPHS (CHARTS)

**CHECKOUT**  
Turbojet aircraft engine overhauling planning and execution, discussing dismantling, washing, galvanic treatments, acceptance checks and quality controls  
p0118 A72-16014

Parametric approaches to statistical burn-in or debugging problems in aircraft reliability analysis  
p0343 A72-28363

System for evaluation of aircraft diagnostic and inspection equipment performance characteristics  
[AD-733283] p0255 N72-18041

Checkout of multipoint sampling rake and exhaust emission of turbofan engines  
[PB-207321] p0435 N72-25593

**CHECKOUT EQUIPMENT**  
U TEST EQUIPMENT

**CHEMICAL ANALYSIS**  
NT GAS ANALYSIS  
NT KARL FISCHER REAGENT  
NT SPECTROSCOPIC ANALYSIS  
High pressure cannular combustor with continuous analytical and sampling system for simulated gas turbine engines emission measurements  
[ASME PAPER 72-GT-88] p0298 A72-25663

Chemical analysis of materials used in maintenance of naval aircraft to determine possible contribution to water pollution  
[AD-730473] p0168 N72-15138

**CHEMICAL COMPOSITION**  
Jet fuel hydrocarbon group chemical composition effects on antiwear characteristics in sliding friction and rolling simulation experiments  
p0350 A72-29073

Jet fuel specifications for military and civil aircraft  
p0046 N72-11669

**CHEMICAL ELEMENTS**

NT ALUMINUM  
NT BORON  
NT CARBON  
NT GOLD  
NT IRON  
NT LIQUID NITROGEN  
NT RADIOACTIVE ISOTOPES  
NT REFRACTORY METALS  
NT SULFUR  
NT TUNGSTEN

**CHEMICAL ENGINEERING**

Technical utilization and transfer of chemical discoveries to solving aeronautical problems  
[NASA-TM-X-62186] p0587 N72-31144

Engineering information service for aeronautical engineering, mechanical engineering, chemical engineering, industrial fluid mechanics, and stress and strength  
p0649 N72-33962

**CHEMICAL EXTINGUISHERS**

U FIRE EXTINGUISHERS

**CHEMICAL FUELS**

NT AIRCRAFT FUELS  
NT HYDROCARBON FUELS  
NT JET ENGINE FUELS

**CHEMICAL KINETICS**

U REACTION KINETICS

**CHEMICAL LASERS**

Improved chemical lasers and current limitations of radomes  
[AD-726202] p0094 N72-12448

**CHEMICAL MACHINING**

NT ELECTROCHEMICAL MACHINING

**CHEMICAL PROPERTIES**

NT THERMOCHEMICAL PROPERTIES

Lime, cement, fly ash and sand combination airport pavement design and testing, discussing material structural and chemical properties, compressive strength, costs, etc  
p0017 A72-12023

Synthetic fire resistant hydraulic fluids, comparing chlorinated hydrocarbons and phosphate esters chemical properties with water based products  
p0200 A72-22160

Crash safe turbine fuel to reduce fire probability and severity during aircraft ground crash, investigating physical and chemical properties  
[ASME PAPER 72-GT-28] p0294 A72-25624

Fuels, lubricating oils and hydraulic fluids for supersonic aircraft, discussing chemical properties, propellant combustion efficiency and production  
p0509 A72-39930

Russian book - Handbook of aircraft materials.  
p0548 A72-40459

Thermodynamic and chemical properties of JP-4 jet fuel for 1970  
[AD-733352] p0263 N72-18764

Chemical and structural properties of urethane elastomers and resistance to rain erosion  
[AD-737624] p0426 N72-24618

Discussion of aircraft fuels and lubricants to include production, analysis, testing and fire safety  
[AGARD-AR-44] p0487 N72-27811

**CHEMICAL PROPULSION**

NT HYBRID PROPULSION

**CHEMICAL REACTIONS**

NT CARBONIZATION  
NT ENDOTHERMIC REACTIONS  
NT HYDROGENATION  
NT OXIDATION  
NT PYROLYSIS

**CHEMICAL TESTS**

NT CHEMICAL ANALYSIS  
NT GAS ANALYSIS  
NT KARL FISCHER REAGENT  
NT SPECTROSCOPIC ANALYSIS

**CHEMICALS**

Surface stabilization of snow on helicopter landing fields by chemical treatment  
[AD-738561] p0519 N72-28271

**CHEMOCNUCLEAR PROPULSION**

U NUCLEAR PROPULSION

**CHILLING**

U COOLING

## CHOICE

## U SELECTION

## CHOKES (RESTRICTIONS)

Tests to determine acoustic and aerodynamic performance of two choked flow inlets under static conditions  
[NASA-TM-X-2629]

p0632 N72-32765

## CHROMIUM ALLOYS

## NT CHROMIUM STEELS

## CHROMIUM STEELS

Ar-H microplasma welding of thin Cr steel sheets with narrow seams for aircraft engines and precision equipment casings

p0228 A72-22548

## CHRONOTRONS

## U TIME LAG

## CHUGGING

## U COMBUSTION STABILITY

## CHUTES

Aircraft emergency evacuation systems, discussing door designs, inflatable escape slide and slide/lifeboat combination

p0563 A72-42520

## CINEFLUOROGRAPHY

## U MOTION PICTURES

## U RADIOGRAPHY

## CINERADIOGRAPHY

## U MOTION PICTURES

## U RADIOGRAPHY

## CIRCLES (GEOMETRY)

## NT GREAT CIRCLES

## CIRCUIT BREAKERS

Sizing new generation aircraft wire and circuit breakers utilizing computer techniques.

p0453 A72-35568

## CIRCUIT PROTECTION

The lightning arrestor-connector - A new concept in system electrical protection.

p0504 A72-38989

## CIRCUITS

## NT ANALOG CIRCUITS

## NT ELECTRIC BRIDGES

## NT FEEDBACK CIRCUITS

## NT FIRE CONTROL CIRCUITS

## NT INTEGRATED CIRCUITS

## NT LOGIC CIRCUITS

## NT MATRICES (CIRCUITS)

## NT POWER SUPPLY CIRCUITS

## NT RLC CIRCUITS

## NT SWITCHING CIRCUITS

## CIRCULAR CYLINDERS

Tube flight vehicle system thrust and power requirements prediction by aerodynamic analysis with division of near and far flow fields

p0195 A72-21608

## CIRCULAR PLATES

Sonic boom duration effects on thin circular elastic plate transient axisymmetric vibration via Hankel and Laplace transforms

p0457 A72-36409

## CIRCULAR SHELLS

Estimating aeroelastic stability and forced response characteristics of thin walled, circular cylindrical shells  
[AD-733370]

p0250 N72-17996

## CIRCULATION

## NT ATMOSPHERIC CIRCULATION

Recirculation mechanism in jet powered V/STOL aircraft

[BNVG-PBWT-71-12]

p0036 N72-10828

## CITIES

Human tolerance to noise pollution created by helicopter landing site in central London  
[P-184]

p0087 N72-11953

## CIVIL AVIATION

General and commercial aircraft service needs in air transportation, considering FAA and CAB roles and policies

p0015 A72-11716

Civil aviation air transportation contributing factors to American economy, considering disposable income, airline fares and time-trend variable

p0016 A72-11721

Soviet book on civil aircraft high altitude equipment covering air conditioning systems, oxygen equipment and cabin pressurization

p0018 A72-12295

Soviet book on course-indicating systems and automatic navigation aids for civil aviation aircraft covering design, operation principles, error analysis and reliability

p0018 A72-12298

Civil aviation communication systems, discussing short and long range communications, satellite channel capacities, digital data link systems, ATC, weather broadcasts, etc

p0055 A72-13416

American civil aviation future development, discussing passenger and freight markets growth, aircraft types and FAA role

p0066 A72-14811

Civil aircraft technological constraints and requirements, discussing noise, congestion and performance characteristics of rotorcraft, STOL, VTOL, hypersonic and supersonic transports

p0115 A72-15774

Canadian STOL design, development, production, airports and civil air transportation applications

p0115 A72-15775

Civil aviation R and D policy study, showing priorities for aircraft noise and congestion abatement and short haul systems

p0115 A72-15780

Rotary wing aircraft design features and performance, discussing military and civilian helicopters and future developments

p0126 A72-16734

French civil aircraft displayed at 1971 Le Bourget Air Show, discussing design and performance characteristics of Airbus, Concorde, Caravelle, Corvette, Falcon, Fregate, STOL-A-904 and Mercure

p0136 A72-17193

Federal Air Regulations procedures for civil transport aircraft flight testing under natural and/or simulated icing conditions

p0147 A72-18501

Future civil air transport trends, considering passenger and cargo growth, travel frequency per capita income and STOL market

p0199 A72-22150

LOX supply systems installation for civil transport aircraft crew and/or passenger breathing oxygen

p0301 A72-26030

Charter air traffic regulations under German air law, discussing legal safeguards relative to economic, personnel, technical and organizational aspects

p0303 A72-26559

Trends in civil ATC discussing plans to increase terminal capacity, surveillance system and use of multiple synchronous satellites for ocean travel efficiency improvement

p0307 A72-27103

Instrument landing systems specifications for civil and military aviation, suggesting replacement type development based on existing configurations

p0307 A72-27110

STOL aircraft role in civil aviation, discussing short range operation, ATC, reduced noise and weather capability

p0310 A72-27518

Civil aviation approach and landing guidance systems evolution, discussing ILS development, state of art and future requirements

p0350 A72-29014

V/STOL aircraft potential for short haul civil air traffic, discussing present technology and investment costs in comparison with advanced ground transportation systems

p0357 A72-30076

U.S.S.R. civil aviation regulations on takeoff and landing minimum conditions for cloud ceilings and visibility range for various aircraft characteristics and equipment

p0361 A72-30820

Avionics equipment for signal processing onboard civil aircraft to improve flight safety, discussing uses of OMEGA navigation system and digital computers

p0393 A72-31178

Low cost microwave scanning beam landing systems for interim instrument landing system replacement in civil aviation

- p0399 A72-32217  
National airports system for UK civil air transportation, discussing economic, operational, accessibility and social aspects
- p0400 A72-32321  
ATC system organization in terms of optimal operating conditions for civil and military airspace users, discussing navigation systems, human factors, equipment reliability, etc
- p0401 A72-32455  
Management information system role in cost effective civil and military aircraft operations, discussing hardware modification and human resources and communication system adaptation
- p0401 A72-32458  
Air cushion landing system application for civil air transportation, discussing operation, braking and parking
- p0406 A72-33184  
Commercial airport and air transport service economic impacts on business and industrial communities
- p0408 A72-33312  
Civil aviation safety - Conference, Beirut, Lebanon, November-December 1971
- p0409 A72-33326  
Major civil airport planning, discussing information gathering and processing for aviation demand, aircraft movements revenue and cost forecasts and pricing policy evaluation
- p0409 A72-33327  
Major civil airport passenger and cargo terminal complex design and layout planning, discussing various facilities and equipment requirements
- p0409 A72-33329  
FAA policy in issuing civil airport operating certificates and establishing minimum safety standards
- p0409 A72-33330  
STOL aircraft for civil transport applications, considering optimum design concepts, noise reduction and terminal facility requirements
- p0409 A72-33331  
Developing countries civil aviation airlines evolution, considering government fund allocation, international money credibility, skilled manpower, equipment, fare and tourism expansion
- p0409 A72-33332  
Commercial airlines aircraft selection factors, considering size, range, economics, traffic, runway quality, maintenance and operating costs, reliability and cargo handling
- p0409 A72-33333  
Environmental considerations in airport development
- p0459 A72-36778  
USSR electric impulse de-icing system design
- p0461 A72-37033  
The future of general aviation in Europe
- p0462 A72-37093  
Supercritical aerodynamics technology, noting lifting surface cross sectional profile and structural weight reduction
- p0491 A72-37678  
Inertial platform pursuant to ARINC-571 specifications, noting capability for integration into surface navigation system or autonomous operation
- p0493 A72-37799  
Future aspects of business aviation, discussing pilot training and aircraft reliability and maintenance in context of flight safety
- p0507 A72-39741  
Corporate business aviation performance record in light of aircraft accident statistics, noting high percentage of approach-landing accidents and means for improvement
- p0507 A72-39743  
Acoustic pressure and sound intensity levels and noise annoyance international standards for civil aircraft noise reduction
- p0508 A72-39803  
Airlines requirements for European airbus, discussing design of aircraft structure, control, pressurized cabin and propulsion system
- p0545 A72-40174  
A method of solving the operational planning problem for an engineering aircraft base
- p0545 A72-40178  
An air traffic controller's view on area navigation and ATS requirements related thereto.
- p0548 A72-40299  
Application of the head-up display /HUD/ to a commercial jet transport.
- p0556 A72-41256  
Economic and social aspects of commercial aviation at supersonic speeds.
- p0559 A72-41851  
[ICAS PAPER 72-51]  
Russian book - Aviation meteorology.
- p0560 A72-42024  
Reports of accidents involving missing aircraft of US general aviation for 1968
- p0031 N72-10041  
[NTSB-AMM-71-4]  
Proceedings of conference on aviation maintenance in 1970 time period conducted at Oklahoma City, Oklahoma, December 8-10, 1970
- p0039 N72-11019  
Predictions of aircraft maintenance procedures to be employed during 1970 to 1980 time period
- p0041 N72-11033  
Computerized design of civil aircraft using freight criteria in parametric analysis
- p0044 N72-11061  
[AD-727231]  
Analysis of economic and feasibility factors pertaining to commuter oriented, short haul air transportation system in San Francisco, California area
- p0052 N72-11845  
[NASA-CR-114347]  
FAA aircraft noise abatement program
- p0088 N72-11958  
Summaries of lectures presented at annual national aviation system planning review conference
- p0099 N72-12969  
[WRCNM-2]  
Conference on technological concepts for future transport aircraft developments in civil aviation
- p0102 N72-12995  
[NASA-SP-292]  
Advanced technologies for future transport aircraft concepts in civil aviation
- p0102 N72-12996  
Supersonic aerodynamic design technology for civil aircraft
- p0102 N72-12999  
Technology assessments for advanced aircraft performance, utility, safety, and public acceptance
- p0104 N72-13013  
Technological developments for improved helicopter design and operational capabilities
- p0105 N72-13015  
Advanced technology applications for improving STOL transport aircraft aerodynamics, propulsion, structure, and flight dynamics
- p0105 N72-13016  
Advanced technologies for subsonic-transonic conventional takeoff and landing transport aircraft development
- p0105 N72-13017  
Technology advances for second generation supersonic transports
- p0105 N72-13019  
Analysis of commercial aircraft traffic during prime travel hours and effect of unrealistic scheduling on extent of congestion
- p0154 N72-14009  
[AD-725326]  
Urban general aviation airport economics, planning, and management
- p0169 N72-15244  
[NASA-CR-114406]  
Data recording program and analysis technique for determining airworthiness of civil aircraft from 1962 to 1969
- p0205 N72-15975  
[RAE-TR-71034]  
Data recording and evaluation of hard landings encountered by subsonic civil jet aircraft in airline operations noting role of flare maneuvers
- p0205 N72-15976  
[RAE-TR-70187]  
Air transportation benefits and impacts on urbanization
- p0205 N72-15979  
[AD-731858]  
Review of US civil aircraft accident data with related statistics on air carrier operations and safety records for year 1969
- p0220 N72-17016  
[PB-203183]  
Supplemental issue of aircraft accident reports for calendar year 1969
- p0220 N72-17017  
[PB-202940]  
Proposed method to automate operational functions concerned with nationwide monitoring of air

## SUBJECT INDEX

## CLEAR AIR TURBULENCE

- traffic control system and control of air  
traffic flows  
[AD-731722] p0223 N72-17594
- Historical review and present status analysis of  
civilian aviation in USSR  
[AD-734069] p0271 N72-19044
- Special events of meteorological origin affecting  
civil jet aircraft operations obtained from  
flight recorders for period Jan. 1966 to Nov. 1968  
[ARC-CP-1188] p0280 N72-19687
- Numerical analysis of flight planning and air  
traffic control procedures for civil aviation  
[AD-734881] p0281 N72-19728
- Compilation and analysis of civil aviation  
accidents occurring during calendar year 1970 to  
show conditions, circumstances, and probable cause  
[NTSB-BA-71-3-ISSUE-2] p0320 N72-20021
- Physiological effects of high altitude flight and  
development of life support systems for civil  
aircraft environmental control  
[JPBS-55454] p0322 N72-20107
- Briefs of US general aviation aircraft accidents  
involving missing aircraft and missing aircraft  
later recovered during 1969  
[PB-205097] p0333 N72-21021
- Report of aircraft accident involving Aero  
Commander aircraft at Aspen, Colorado on 22  
January, 1970  
[PB-206562] p0386 N72-23044
- Vehicle technology for civil aviation for  
seventies and beyond  
[NASA-SP-292-SUPPL] p0390 N72-23974
- Forecasts of aviation activity for fiscal years  
1972 to 1973 to indicate expected status of  
commercial and general aviation  
[AD-738360] p0423 N72-24034
- Senate report on transportation of Government  
civil and military passengers and cargo by civil  
and military air carriers  
[S-REPT-92-503] p0438 N72-25948
- FAA national policies on overall missions and  
criteria for major subsystems  
[REPT-1000.27-APP-1] p0438 N72-25949
- Laws governing military use of civil aircraft  
[AD-738360] p0438 N72-25960
- Design of security system for civil aviation cargo  
transportation  
[AD-738360] p0526 N72-28985
- Review of civil aviation accidents in US to  
determine incidents involving material failures  
[AD-738360] p0541 N72-29914
- Analysis of midair collisions in US civil aviation  
for 1969 to 1970 to determine areas of  
commonality as accident prevention measure  
[NTSB-AAS-72-6] p0623 N72-32046
- Principles of construction and operation of  
heading indicators used in civil aviation  
[JPBS-57031] p0630 N72-32640
- Analysis of effects of minimum transportation  
regulation on development of tourism and  
resulting expansion of airline operations  
[AD-738360] p0635 N72-32984
- Compilation of selected aircraft accident reports  
occurring in US Civil Aviation operations during  
calendar year 1970  
[PB-210121] p0642 N72-33045
- CL-84 AIRCRAFT**
- Aerodynamic characteristics of CL-84 tilt wing,  
V/STOL aircraft and comparison with handling  
qualities criteria documents  
[AD-738360] p0620 N72-32023
- CLADDING**
- Cyclic furnace oxidation of cobalt alloy WI-52  
clad with nickel and iron alloy foils for  
aircraft gas turbine stator vanes  
[NASA-TN-D-6730] p0324 N72-20492
- Corrosion resistant claddings for high strength  
aluminum alloys  
[AD-743311] p0645 N72-33547
- CLARK Y AIRFOIL**
- U AIRFOIL PROFILES
- CLASSIFICATIONS**
- BT HIERARCHIES
- CLEANERS**
- BT AIR FILTERS
- Surface properties and soil retention of aircraft  
painted with polyurethane paint, and  
requirements for aircraft cleaner  
[AD-736971] p0426 N72-24613
- CLEAR AIR TURBULENCE**
- Stratospheric circulation and air temperature  
horizontal and vertical distribution, discussing  
CAT at supersonic transport heights  
p0063 A72-14676
- CAT inducing atmospheric conditions effects on SST  
flight, discussing turbulence in convective  
clouds and kinetic energy spectra of atmospheric  
motions  
p0064 A72-14693
- CAT detection by airborne laser Doppler radar and  
ground based ultrasensitive microwave Doppler  
radar methods  
p0067 A72-14822
- Airborne remote CAT detection equipment, examining  
pulsed Doppler laser and IR radiometry  
p0068 A72-14831
- Horizontal temperature variations relation to  
stratospheric CAT based on U-2 flight data  
p0228 A72-22438
- Microwave equipment and technology application for  
instrument landing, terminal ATC, millimeter  
wave CAT detection and satellite communications  
p0239 A72-24036
- High level Canberra flight for three dimensional  
picture of wind and temperature fields, showing  
CAT, gravity waves and smooth flight  
characteristics  
p0311 A72-27709
- Aircraft flight conditions effect on low altitude  
critical air turbulence in terms of gust  
velocity components for CAT prediction  
p0348 A72-28861
- Synoptic meteorological parameters vs CAT  
encountered in stratosphere by XB-70 airplane,  
presenting frequency distributions and  
probability tables  
p0349 A72-28867
- Persistent intense CAT in upper level frontal  
zone, discussing synoptic features, vertical  
wind shears, radar echoes and turbulence intensity  
p0356 A72-29622
- Meteorological data analysis for CAT encounter of  
Boeing 747 flight over Nantucket Island on 4  
November 1970  
p0411 A72-33525
- Atmospheric turbulence and the ATC system  
p0462 A72-37049
- Radar detection of clear air turbulence by region  
of disturbed refractive index associated with it  
p0159 N72-14343
- Processing and analyzing clear air turbulence data  
collected by F-100, and F-106 aircraft  
[AD-732878] p0222 N72-17302
- Wake and clear air turbulence, wind shear, upsets,  
thunderstorms, and turbulence mapping  
[AD-732117] p0222 N72-17579
- Clear air turbulence radiometric detection program  
for alerting aircraft  
[AD-733762] p0261 N72-18641
- Observations of clear air turbulence in  
stratosphere by high altitude subsonic aircraft  
[NLL-M-22069-(5828.4F)] p0279 N72-19682
- Development of techniques and equipment for  
conducting programs to identify presence of  
clear air turbulence and warn high altitude,  
high speed aircraft  
[DOT-TSC-FAA-71-19] p0325 N72-20554
- Automated forecasting of clear air turbulence by  
multidimensional contingency tables  
[AD-735941] p0338 N72-21604
- Analysis of aircraft accidents caused by  
atmospheric turbulence during period 1964 to 1969  
[NTSB-AAS-71-1] p0368 N72-22020
- Correlating seasonal and diurnal variations of  
thunderstorm turbulence of anomalies in loads  
with seasonal behavior of subtropical jet over  
Western Australia  
[METEOROL-STUDY-21] p0372 N72-22598
- Analysis of clear air turbulence and related  
atmospheric structure based on data from  
Jindivik aircraft operating close to Woomera  
aerological station  
[METEOROL-STUDY-20] p0372 N72-22599
- Effects of upper atmosphere turbulence on  
operation of supersonic transport aircraft and  
methods for advance detection of atmospheric  
turbulence  
[NLL-M-22437-(5828.4F)] p0477 N72-27009

## CLIMATOLOGY

## SUBJECT INDEX

Weather predictions for Concorde test flights and problems of forecasting stratospheric temperature and clear air turbulence  
[NLL-M-22439-(5828.4P)] p0484 N72-27638

Wind, temperature, and clear air turbulence in middle and upper stratosphere  
[NLL-M-22438-(5828.4P)] p0520 N72-28304

Development of radiometric sensor to warn aircraft pilots of region of clear air turbulence along flight path  
[NASA-CASE-ERC-10081] p0520 N72-28437

Corrected wind measurement and dust velocity for airplane motion - LO-LOCAT project  
[AD-739875] p0522 N72-28659

Physical models of clear air turbulence based on summertime observation of turbulent zones  
[AD-743691] p0646 N72-33623

**CLIMATOLOGY**  
**NT MICROCLIMATOLOGY**

Thunderstorm encounter probability at SST altitudes for selected cross country routes, using radar observation data  
p0348 A72-28853

Mathematical criteria for probable and potential aircraft icing occurrence, using radiosonde and empirical climatological data  
p0348 A72-28856

Climatic changes due to stratospheric perturbation by propulsion effluents of high altitude aircraft flights  
[AIAA PAPER 72-658] p0414 A72-34076

Aircraft activity effects on air pollution in San Francisco Bay area with engine emission and climatological data  
p0034 N72-10361

**CLIMBING FLIGHT**

STOL aircraft minimum noise takeoff trajectories determination, taking into account engine thrust and listeners distance from noise source  
[AIAA PAPER 72-665] p0414 A72-34072

Noise reduction for climbing takeoff and V/STOL aircraft affecting stability  
[DLR-FB-71-10] p0042 N72-11040

Supersonic transport aircraft and BAC 221 aircraft piloted flight simulation near zero rate climb velocity for determining aircraft maneuver controllability at low speed  
[AEC-CP-1165] p0043 N72-11048

Flight test of F-8 aircraft to determine minimum time energy climbs based on energy state approximation  
[AD-738018] p0423 N72-24035

Derivation of equations for determining climb performance of aircraft based on energy considerations  
[ESDU-70023] p0637 N72-33007

**CLOCK PARADOX**

Around-the-world atomic clocks - Observed relativistic time gains.  
p0455 A72-35839

**CLOCKS**  
**NT ATOMIC CLOCKS**

Time/frequency technology application to reliable aircraft collision avoidance system, discussing precision time-ordered techniques, frequency control and synchronization and flying clocks  
p0396 A72-32072

**CLOSED LOOP SYSTEMS**  
**U FEEDBACK CONTROL**

**CLOTHING**  
**NT PROTECTIVE CLOTHING**

**CLOUD COVER**

Slant range visibility measurements by lidar for aircraft landing operations under low clouds and fog at coastal region  
p0347 A72-28847

**CLOUD HEIGHT INDICATORS**

Cloud base altitude measurement by optical telemetry using TNN 1000 apparatus, noting reduced maintenance  
p0064 A72-14691

Airport meteorological instrumentation, discussing ground wind, visibility, cloud height, air temperature and humidity detectors and radar equipment  
p0246 A72-25093

**CLOUD PHYSICS**

CAT inducing atmospheric conditions effects on SST flight, discussing turbulence in convective

clouds and kinetic energy spectra of atmospheric motions  
p0064 A72-14693

**CLOUD SEEDING**

Warm fog dissipation by helicopter downwash mixing, heat, hygroscopic particle and polyelectrolytes seeding  
p0064 A72-14694

Supercooled and warm fog dispersion technology, considering air heating, helicopter downwash and seeding methods  
p0066 A72-14812

Airport runway fog dispersal in UK, discussing cost projection for chemical seeding system combined with lidar remote sensing  
p0411 A72-33500

**CLOUD STREETS**

**U CLOUDS (METEOROLOGY)**

**CLOUDS**

**NT CLOUDS (METEOROLOGY)**

**CLOUDS (METEOROLOGY)**

Development of method for predicting occurrence of fog and stratus formations at Eglin Air Force Base, Florida  
[AD-732289] p0208 N72-16501

Economic analysis of effect of fog on air traffic and benefits of fog dispersal capability in terminal area  
[AD-735132] p0280 N72-19722

Artificial dissipation of low-lying clouds and fog  
[AD-743026] p0589 N72-31632

**COAGULATION**

Jet fuels hydrocarbon composition effect on thermal stability, considering nonaromatic components influence on aromatic hydrocarbons oxidation products coagulation  
p0024 A72-12800

**COALESCENCE**

**U COALESCING**

**COALESCING**

Continuous NDT of coalescers /jet fuel filters/ by liquid crystals, detecting split seams, cap leaks, cracks, material imperfections and epoxy filled voids  
[ASME PAPER 72-DE-25] p0362 A72-30867

**COANDA EFFECT**

Effect of flap set back and gas temperature on Coanda attachment to curved plate with application to air flow patterns on flap of scale propulsive wing model  
[AD-741583] p0577 N72-30300

**COATINGS**

**NT ALUMINUM COATINGS**

**NT ANODIC COATINGS**

**NT GLAZES**

**NT METAL COATINGS**

**NT NICKEL COATINGS**

**NT PAINTS**

**NT PLASTIC COATINGS**

**NT PROTECTIVE COATINGS**

**NT THERMAL CONTROL COATINGS**

Coatings for aircraft gas turbine engine corrosion protection and reentry heat shields  
[NASA-TM-X-68007] p0260 N72-18578

Gas chromatography-mass spectrometry analysis of gaseous products arising from commercial aircraft cable coating pyrolysis  
[RAE-TR-71134] p0278 N72-19636

**COBALT ALLOYS**

High temperature Co-base alloy for nuclear, chemical and reentry vehicle applications  
p0228 A72-22478

Cyclic furnace oxidation of cobalt alloy W-52 clad with nickel and iron alloy foils for aircraft gas turbine stator vanes  
[NASA-TN-D-6730] p0324 N72-20492

**COCKPIT SIMULATORS**

Dynamic manned vehicle cockpit simulator for visual and aural effects and acceleration changes, discussing STOL and VTOL characteristics  
p0143 A72-18246

Boeing 707 cockpit simulator with computer generated displays, moving area navigation map and ATC information  
p0187 A72-20336

Statistical analysis of cockpit simulator data on altimetry display for commercial aircraft  
p0194 A72-21573

# SUBJECT INDEX

# COLLISION AVOIDANCE

- Naval air test center participation in development of air-to-air combat simulation.  
[AIAA PAPER 72-765] p0499 A72-38130
- Integrated cockpit research procedure used to identify control and display requirements for advanced aircraft  
p0373 N72-22625
- System concept development and testing of aircraft cockpit traffic situation display for improved air traffic control  
[FTL-R-71-2] p0630 N72-32644
- COCKPITS**  
Aircraft cockpit electrical heating system, converting three phase ac energy from alternator with economy and safety  
[SAE PAPER 720329] p0291 A72-25591
- Training cockpit TL-29 mean time of failure-free operation from measurement data during development tests and two year guarantee, calculating avionic devices reliability  
p0358 A72-30281
- Flight experiments to determine horizontal visual restriction effects on T-33 aircraft front cockpit during approaches and landings  
p0395 A72-31697
- Elevator lift and cockpit position effects on flight altitude control during aircraft landing approach  
[ARC-R-3662] p0043 N72-11049
- Measurement of neutron dose transmission factors around cockpit of F-102 aircraft  
[AD-728198] p0112 N72-13668
- Design and development of military helicopter cockpit for use in search and rescue missions  
[AD-733375] p0254 N72-18036
- Image contrast enhancement of cathode ray tube cockpit displays with micromesh optical filters  
[DLR-FB-71-73] p0322 N72-20216
- Development of standardized method for evaluating physical geometry of aircrew stations - Vol. 1  
[AD-738006] p0433 N72-25015
- Efficient pilot management of cockpit control/display devices  
[AD-741945] p0573 N72-30016
- CODERS**  
Digital solid state altitude encoder for ATC transponder reporting, covering Gray and Gillham codes  
[SAE PAPER 720314] p0289 A72-25578
- COEFFICIENT OF FRICTION**  
Friction coefficient, standard wear and surface layer temperature of seal for dry friction pairs in jet engines, investigating crystal lattice parameters  
p0185 A72-19768

p0229 A72-22646
- Collision avoidance systems requirements and criteria, evaluating Eros time frequency and Secant interrogation-and-reply systems  
p0231 A72-22822

C-band pulse beacon ranging system for collision avoidance, detailing interrogation, response and system test modes

p0232 A72-22908

Aircraft collision near misses under IFR and VFR conditions, discussing ATC coordination, equipment failure and personal and planning problems

p0233 A72-22972

RCA SECANT aircraft collision avoidance system avionics design using nonsynchronous techniques

p0245 A72-24866

Pilot warning systems for visual midair collision avoidance, noting reaction to imminent threats, scanning patterns and display sector size effects [SAE PAPER 720312]

p0289 A72-25576

SECANT system of aircraft separation and control by nonsynchronous technique for midair collision avoidance

[SAE PAPER 720313] p0289 A72-25577

Information theory approaches to air navigation, discussing ATC, collision avoidance and computer applications

p0350 A72-29013

Time/frequency technology application to reliable aircraft collision avoidance system, discussing precision time-ordered techniques, frequency control and synchronization and flying clocks

p0396 A72-32072

Collision avoidance techniques for midair collisions reduction, discussing airborne and ground based systems

p0399 A72-32213

SECANT collision avoidance system, describing operational principles and flight test results

p0417 A72-34137

A time-frequency high performance collision avoidance system. [ONERA, TP NO. 1091]

p0493 A72-37764

Midair collision causes and prevention, considering pilot responsibilities, anticollision devices and procedures

p0493 A72-37800

Aircraft radar for weather data, ground mapping, avoidance modes and independent landing monitor function, presenting straight and slant approach simulation data

p0547 A72-40290

Design, operation and performance of time-frequency midair collision avoidance system, noting air traffic controller backup for departure, enroute and arrival control

p0548 A72-40295

Operation principles, capabilities and tests of midair collision avoidance system with aircraft separation control by nonsynchronous techniques

p0548 A72-40296

Midair collision prevention independent of ATC, discussing aircraft lighting, collision avoidance systems and proximity warning indicator

p0548 A72-40297

Collision avoidance system electromagnetic compatibility with radar altimeters designed for 1600 MHz aeronavigation band

p0550 A72-40881

Independent parallel runway landing system to relieve air traffic congestion, investigating minimum spacing required to minimize collision risk

p0569 A72-43130

Midair collision prevention for Army aircraft.

p0606 A72-44645

SECANT midair collision avoidance system based on nonsynchronous microsec pulse transmission and receiving via randomly selected frequency, describing modular components and operating principles

p0605 A72-44647

Human factors engineering to determine effectiveness of auditory display for aircraft collision warning and avoidance system [AD-729765]

p0153 A72-14005

Search radar monitoring of bird movements to prevent aircraft collision accidents

[AD-732945] p0253 A72-18027

Analysis of inertial navigation system performance to determine effects on aircraft safety and collision avoidance during flight over North Atlantic Ocean

[AD-733753] p0263 A72-18670

Dynamic simulation procedures to determine interaction between air traffic control system and collision avoidance system

[FAA-RD-72-10] p0280 A72-19719

System studies, equipment simulation, hardware development, and flight tests of aircraft collision hazard warning system using cooperative, continuous wave radar principle

[NASA-CR-2020] p0318 A72-20007

Numerical analysis of aircraft collision probability due to reduced separation intervals and arbitrary flight paths

[DOT-TSC-FAA-71-27] p0330 A72-20997

Design and development of collision avoidance system for use with general aviation aircraft

[NASA-CR-112023] p0338 A72-21625

Economical satellite aided vehicle avoidance system for preventing midair collisions

[NASA-CASE-ERC-10419] p0339 A72-21631

Transitory diversion as cause of violent evasive maneuver to prevent midair collision of American and Trans World Airlines Boeing 707 aircraft

[NTSB-LAR-72-7] p0367 A72-22017

Analysis of aircraft exterior lighting and marking configurations to provide visual detection at maximum range

[FAA-WA-72-29] p0368 A72-22025

Development of computer program to analyze effectiveness of pilot warning indicator systems in avoiding aircraft collisions

[NASA-CR-126669] p0427 A72-24672

Analysis of collision hazards involved in VFR flight near clouds and effect of safe vertical clearance from clouds to reduce aircraft accidents

[AD-737804] p0427 A72-24682

Design and development of collision avoidance system for use with air traffic control system

[ONERA-TP-1091] p0472 A72-26523

Development and characteristics of electronic signalling system and data processing equipment for warning system to avoid midair collisions between aircraft

[NASA-CASE-LAR-10717-1] p0485 A72-27703

Microwave interferometers used as radio eye for aircraft navigation and collision avoidance system including comparison of cost with present systems

[REPT-62] p0486 A72-27708

Design and development of system for aircraft collision avoidance for use on general aviation aircraft

p0522 A72-28670

Design and development of airborne traffic control system for aircraft collision warning and avoidance

p0522 A72-28671

Application of time/frequency collision avoidance system for ground obstacle avoidance and minimum altitude protection zone around airports

p0522 A72-28672

Annotated bibliography of air traffic control activities and collision avoidance systems for improved aviation safety - September 1968 to April 1972

[FAA-WA-72-41] p0537 A72-29672

Ecological survey to identify bird attractants near airports and procedures to reduce occurrence of bird-aircraft collisions

[AD-742227] p0574 A72-30022

#### COLLISION WARNING DEVICES U COLLISION AVOIDANCE U WARNING SYSTEMS

#### COLLISIONS NT MIDAIR COLLISIONS COLLOCATION

Collocation method for coupled bending-bending torsion vibrations of straight uniform cantilever beam with asymmetric airfoil cross section

p0405 A72-32908

#### COLLOIDS NT FOG COLOR

Tradeoffs between luminance and color coding in electronic aircraft displays, and experiments involving immediate response, tracking, tachistoscope, and human judgement

p0373 A72-22623

- Directionality and far field structure of combustion generated noise, using premixed turbulent flame models [AIAA PAPER 72-198] p0129 A72-16875
- Combustion research for reducing jet aircraft pollutant emissions, discussing fuel atomization improvement, smoke reduction and combustor design techniques p0301 A72-26037
- Factors affecting altitude reflight performance of ram-induction combustor designed for Mach 3

## COMBUSTION EFFICIENCY

cinise operation  
[NASA-TM-X-2630] p0590 N72-31777

## COMBUSTION EFFICIENCY

Fuels, lubricating oils and hydraulic fluids for supersonic aircraft, discussing chemical properties, propellant combustion efficiency and production

Combustion efficiency and exhaust emission levels correlated with operating conditions for gas turbine combustor  
[NASA-TM-D-6661] p0509 A72-39930  
p0213 N72-16721

## COMBUSTION INSTABILITY

## U COMBUSTION STABILITY

## COMBUSTION PHYSICS

The film vaporization combustor and its physical principles. I - The vaporizer section of the combustor. II - The reaction chamber and the combustion  
[DPVLR-SONDDR-194] p0504 A72-39074  
Turbulent combustion induced noise, discussing scaling rules for sound power and directional characteristics of radiated sound

Analysis of pollutant emissions from jet aircraft and combustion research for reducing emissions through combustor design and fuel atomization  
[NASA-TM-X-68000] p0506 A72-39557  
p0251 N72-18009

Ignition characteristics of aircraft fluids impinging on hot surfaces under air flow conditions found during flight  
[AD-734238] p0283 N72-19964

## COMBUSTION PRODUCTS

Jet fuels hydrocarbon composition effect on thermal stability, considering nonaromatic components influence on aromatic hydrocarbons oxidation products coagulation

Future projections of commercial jet aircraft fuel demands, estimating engine exhaust effects on air quality

Review of jet engine emissions. p0350 A72-28879

Analysis of meteorological conditions under which condensation trails are formed by water in aircraft engine exhaust

[NASA-TT-F-14047] p0491 A72-37645

Analysis of sources, constituents, and influence of operating conditions on emission characteristics of jet engine exhaust

[NASA-TM-X-68064] p0095 N72-12550

Analysis of carbon monoxide, unburned hydrocarbons, and nitrogen oxides in turbojet afterburner combustion products using infrared spectroscopy - Part 1

[AD-739176] p0429 N72-24830

Computer program for determining history of combustion products produced by turbojet engine afterburner - Part 2

[AD-739177] p0488 N72-27968

Analysis of oscillating relaxation time in combustion products of hydrocarbon fuel under supersonic nozzle flow conditions

[AD-740193] p0542 N72-29960

Development of method for calculating exhaust smoke transmission for turbine engines, number of plume paths, and viewing angles

[FAA-RD-71-23] p0572 N72-30005

Analysis of major pollutants produced by aircraft engine exhaust and development of techniques to reduce level of pollutant emission

[NASA-TM-X-68129] p0631 N72-32754

Analysis of particulate emissions contained in afterburning turbojet engine exhaust operating at ground level - Part 1

[AD-744048] p0632 N72-32768

## COMBUSTION STABILITY

## NT FLAME STABILITY

Supersonic combustion of liquid fuels, hydrogen and propane, discussing initiation and stabilization in supersonic flow

Steady combustion limits in afterburner gas turbine engine chambers

p0311 A72-27686

p0509 A72-39922

## COMBUSTION VIBRATION

Combustion noise generation by burning fuel-air mixtures induced pressure fluctuations as result

## SUBJECT INDEX

of time variable heat release rate due to turbulence

Vibrational and chemical nonequilibrium losses in stoichiometric turbojet engine using kerosene-air mixture  
[AD-742948] p0457 A72-36505  
p0591 N72-31788

## COMBUSTORS

## U COMBUSTION CHAMBERS

## COMET &amp; AIRCRAFT

Unpredicted structural vibration in Comet and Electra aircraft, Graf Zeppelin dirigible, missile antennas, etc

p0016 A72-12002

## COMFORT

Aircraft ride comfort problem in turbulent air, comparing free and fixed wing aircraft responses

Design, operation and testing of integrated STOL flight control system, noting approach accuracy and passenger comfort improvement

Analysis of riding discomfort in aircraft resulting from mechanical vibration and swing motion

[RAE-LIB-TRANS-1605] p0547 A72-40292

COMMAND AND CONTROL

Scientific balloon data management system, discussing airborne and ground station equipment for telemetry, command and flight control

Unified single rf channel tracking, telemetry and command control systems for guidance of unmanned vehicles, including pilotless aircraft and satellites

Real time computer simulation of command and control in transportation systems, detailing models, and programming technique and ATC controller effectiveness evaluation

Models of information exchange and data rates for post-1975 automated tactical air control system deployment

Operating characteristics of integrated aircraft command and control system

COMMAND GUIDANCE

CW radar system for tactical aircraft real time command, control and positioning, using combination of frequency and time multiplexing for range measurement

COMMAND SYSTEMS

U COMMAND GUIDANCE

COMMAND-CONTROL

U COMMAND AND CONTROL

COMMERCIAL AIRCRAFT

NT ELECTRA AIRCRAFT

NT EUROPEAN AIRBUS

NT LEAR JET AIRCRAFT

NT SUPERSONIC COMMERCIAL AIR TRANSPORT

Commercial transport market and technology forecasting, considering all-cargo, STOL, SST and CTOL aircraft

[SAE PAPER 710750] p0003 A72-10249

Propulsion system optimization for commercial transport aircraft design under Advanced Transport Technology study, considering impact on aircraft gross weight

[SAE PAPER 710760] p0005 A72-10257

Jet noise reduction technology, hardware and tests for NASA Quiet Engine Program to develop low noise subsonic civil transport aircraft propulsion system

[SAE PAPER 710774] p0005 A72-10266

General and commercial aircraft service needs in air transportation, considering FAA and CAB roles and policies

Deterministic model for new product innovation adoption rate in commercial aircraft jet engine market

Statistical analysis of cockpit simulator data on altimetry display for commercial aircraft

## SUBJECT INDEX

## COMPUTERIZED DESIGN

planning and monitoring and aircraft parts inventory control  
[IEEE PAPER 23,3] p0072 A72-15713

Computer controlled production test system for airborne phased array modules, describing various measurement capabilities p0120 A72-16417

Computerized analytical model of two dimensional multicomponent airfoil in viscous subsonic flow [AIAA PAPER 72-2] p0129 A72-16861

Development programs for ATC system improvement by digital computers and data displays applications p0137 A72-17328

Computerized Eros II airborne collision avoidance time frequency system design, considering radio transmission, synchronization and ground stations p0143 A72-18247

Computerized modular automatic test equipment for commercial airliner avionics device performance, discussing data handling ability and cost effectiveness p0143 A72-18250

Hybrid computer method of nonstationary spectrum analysis of aircraft noise, applying to flyover and jet aircraft noise abatement under operational conditions p0178 A72-18778

Partial load computation for axial flow compressor stages, describing computer method limitations p0229 A72-22632

Anthropotechnical aspects of aircraft taxiing guidance in airfield runway areas, suggesting computerized operational system p0229 A72-22779

Hybrid computing techniques in helicopter simulation, taking into account complex dynamic systems nonlinear effects p0232 A72-22936

STARAN IV-X associative array processor for automation in ATC environment, considering air tracking, conflict prediction and resolution functions p0237 A72-23818

Turbine aerodynamics research trends, covering engine cooling, high work factor turbines, pneumatic variable geometry and computer analysis p0301 A72-26036

Computer calculation of second order curve segment discriminant in geometrical problem associated with aircraft lofting, assessing method accuracy p0345 A72-28739

Information theory approaches to air navigation, discussing ATC, collision avoidance and computer applications p0350 A72-29013

Head-up display for aircraft three dimensional sky path observation during navigation and landing, discussing computer units, CRT and image generating subsystems p0396 A72-32042

Electronic display in future avionic systems, emphasizing computer techniques and digital data exchange systems p0403 A72-32635

Computerized aircraft landing measurement system for civil airport, using optical, seismic and IR sensors p0411 A72-33627

Sizing new generation aircraft wire and circuit breakers utilizing computer techniques. p0453 A72-35568

Computer control of aircraft landing. p0455 A72-35950

Quadruple-redundancy management for fly-by-wire control system reliability, discussing analog circuit and digital computer voter/monitor techniques [AIAA PAPER 72-884] p0505 A72-39117

Digital computer controlled testing equipment for separately driven coaxial gas turbine low and high pressure compressors, emphasizing reliability and flexibility in system design p0564 A72-42682

Computer control of the General Dynamics High Speed Wind Tunnel. p0564 A72-42697

The weight module - A keystone in the aircraft synthesis program. [SAWE PAPER 912] p0595 A72-43459

Computerized airframe manufacturing cost and weight analysis, using technique for detailed parts list generation from configuration concept as input [SAWE PAPER 913] p0596 A72-43460

L-1011 computerized weight reporting system present and future capabilities. [SAWE PAPER 932] p0596 A72-43472

The optimal control of merging aircraft - Implementation of the hybrid air traffic controller. p0599 A72-43868

Technologies of computerized flight management and control systems, automated communications systems, and navigation and surveillance systems in future avionics p0104 A72-13011

Turbine research and technology including aerodynamic effect of turbine coolant, high work-factor turbines, and computer programs for design and performance [NASA-TM-X-68115] p0524 A72-28795

Computer technique to analyse aircraft windshields for multiple imaging [AD-744044] p0586 A72-31034

COMPUTERIZED CONTROL  
U NUMERICAL CONTROL  
COMPUTERIZED DESIGN

Aircraft design interactive computer graphics technique, using human decision input response to computer output information [DGLR PAPER 71-107] p0024 A72-12733

Computer simulation techniques in aerospace ground equipment design for maintenance testing of avionic systems p0061 A72-14196

Aircraft preliminary design procedure with integrated performance simulation, using time sharing computer facility p0188 A72-20353

Transport aircraft fuselage computerized design, determining optimal structural distribution for strength and displacement constraints [AIAA PAPER 72-330] p0285 A72-25366

Computerized structural design of aerospace vehicle, stressing automated routines for finite element models generation [AIAA PAPER 72-332] p0285 A72-25367

Large amplitude flight simulator for fighter design refinement, noting extensive computer commitment. p0345 A72-28757

Active controls - Changing the rules of structural design. p0492 A72-37681

Application of the computer to aerial design and development. p0494 A72-37873

A computerized system for the preliminary design of commercial airplanes. [AIAA PAPER 72-793] p0496 A72-38110

A flutter optimization program for aircraft structural design. [AIAA PAPER 72-795] p0496 A72-38111

An integrated computer system for preliminary design of advanced aircraft. [AIAA PAPER 72-796] p0496 A72-38112

Computer program for automated design of long haul transport aircraft, discussing cost effectiveness of composite materials for aircraft structure [AIAA PAPER 72-794] p0498 A72-38121

Integration of aerospace vehicle performance and design optimization. [AIAA PAPER 72-948] p0562 A72-42355

Aircraft synthesis analysis program /ASAP/ for computerized aircraft design, enabling large number of trade-off studies for design optimization [SAWE PAPER 907] p0595 A72-43454

An aerodynamics model applicable to the synthesis of conventional fixed-wing aircraft. [SAWE PAPER 908] p0595 A72-43455

Mission analysis and performance program as part of computerized aircraft configuration synthesis process, describing interfaces with other system modules [SAWE PAPER 909] p0595 A72-43456

Automated scheduling algorithm for aircraft from terminal area to touchdown, discussing system features and STOL air traffic computerized simulation [AIAA PAPER 72-120] p0131 A72-16905

Fast time simulation application to ATC systems, discussing control action exercise within strategic/tactical spectrum p0135 A72-16994

Automated ATC guidance technique for aircraft curved flight trajectories, describing flight profiles synthesizing algorithms and computerized simulation technique [AIAA PAPER 72-121] p0140 A72-17922

Computer simulation applications - Conference, New York, December 1970 p0141 A72-17972

Military aircraft operations and logistics computerized simulation for support and maintenance cost estimates p0141 A72-17974

ATC study by computerized simulation, using successive approximation models p0141 A72-17975

Lounge planning model for airport terminal design simulation, taking into account scheduled arrivals and departures, aircraft types, passenger number, gate assignments, etc p0141 A72-17979

Aircraft safety enhancement by computer controlled flight simulator training of air crews, discussing Boeing 747 program p0179 A72-18839

ATC at single-runway airport analyzed by fast time simulation with high speed digital computers p0181 A72-19064

Boeing 707 cockpit simulator with computer generated displays, moving area navigation map and ATC information p0187 A72-20336

Airfield surface system fast-time computer simulation model for airport planning systems analysis p0187 A72-20341

Air/ground interface simulation in GPSS/360 for passenger transfer between airport terminal and aircraft p0187 A72-20342

Nonlinear computerized simulation of air cushion vehicle dynamics, using bond graph techniques p0187 A72-20343

Aircraft preliminary design procedure with integrated performance simulation, using time sharing computer facility p0188 A72-20353

Computer simulation requirements for air and ground transportation system, emphasizing mathematical models capable of system performance relation to design parameters p0188 A72-20362

Real time computer simulation of command and control in transportation systems, detailing models, and programming technique and ATC controller effectiveness evaluation p0188 A72-20363

ATC systems analysis by computerized real time environmental simulation, taking into account new aircraft types, navigation and supervision aids p0230 A72-22782

Hybrid computing techniques in helicopter simulation, taking into account complex dynamic systems nonlinear effects p0232 A72-22936

Man computer weapons effectiveness and system test environment: WESTE/ instrumentation system with Decca navigation for simulated combat environmental flight tests p0310 A72-27515

Cost effectiveness determination for different levels of reliability and maintainability of training aircraft, using computer simulation p0343 A72-28355

Aeroelasticity, discussing gust and maneuver load alleviation, flutter suppression, aircraft stability, computerized aeroelastic analysis, aeroelastic optimization, composite structures, etc p0393 A72-31202

ATC systems fast-time simulation, emphasizing importance of human operator performance realistic modeling p0396 A72-32097

Computerized navigator training simulator for complete array of air navigation instruments, discussing design and human factors p0398 A72-32208

Digital computer controlled flight simulators for undergraduate pilot, electronic warfare, air-to-air combat and helicopter training p0443 A72-34393

Simulation of an air cargo handling system p0443 A72-34472

System analysis for an airline operational environment through a computerized network simulation model. p0551 A72-41077

Principles of modelling studies of fuel systems and hydraulic systems by electronic analog computers p0567 A72-42922

Digital computer equipped facility for training simulators environmental simulation capability testing, describing electronics interface, control and display equipment p0567 A72-42928

Mathematical model for dynamics simulation of aircraft turboprop engines, using digital, analog and hybrid computers p0601 A72-44288

Lockheed airline system simulation and aircraft scheduling models p0604 A72-44579

Mathematical models of rate gyros, servo accelerometers, pressure transducers, and telemetry systems and analog computer simulation programs [NASA-CR-1768] p0034 N72-10401

Cost analysis and operational procedures of effective short range, high density computer transportation system for Metropolitan Detroit [NASA-CR-114340] p0036 N72-10984

Performance of vertical contact analog display system used in carrier landing [AD-730464] p0167 N72-15013

Turbojet engine analog simulation technique applicable to propulsion system dynamics and controls research [NASA-TN-D-6610] p0213 N72-16722

Mathematical wind gust model for computer simulation of aircraft aerodynamic stability [AD-733905] p0261 N72-18648

Computer graphic simulation of air transportation system [AD-733752] p0263 N72-18669

Computerized simulation used to obtain time optimal trajectories for P-3C ASW aircraft [AD-734167] p0272 N72-19046

## CORRELATION

NT ANGULAR CORRELATION

NT CORRELATION COEFFICIENTS

NT CORRELATION DETECTION

NT DATA CORRELATION

NT STATISTICAL CORRELATION

Integral and correlation methods for separation and reattachment phenomena in aerodynamics, applying to turbulent boundary layer

[ONERA, TP NO. 1072]

p0492 A72-37762

## CORRELATION COEFFICIENTS

Rank correlation coefficient method for complex control plants parameters selection, applying to aircraft power system monitoring

p0302 A72-26442

## CORRELATION DETECTION

IR measurement of hot jets turbulence intensity axial and transverse profiles, noting application to sound sources detection

p0242 A72-24656

## CORRELATION FUNCTIONS

U CORRELATION

## CORROSION

NT CAVITATION CORROSION

NT ELECTROCHEMICAL CORROSION

NT PRETTING CORROSION

NT FUEL CORROSION

NT SCALE (CORROSION)

NT STRESS CORROSION

Effect of sulfur in JP-5 fuel on hot corrosion of turbine blade materials operating in marine environment

[AD-725619]

p0050 N72-11706

Microstructural analysis to determine corrosion causes of rudder hub flanges

[M72-07/18-REG/HT]

p0517 N72-28132

Oxidation-corrosion-deposition characteristics of aircraft turbine engine lubricants employing glassware-type apparatus

[AD-744840]

p0644 N72-33499

## SUBJECT INDEX

Corrosion of high temperature gas turbine blade alloys caused by increase in turbine inlet temperatures and reduction in chromium content in blade metal

[AD-745474]

p0645 N72-33557

## CORROSION PREVENTION

Pretting corrosion fatigue prevention by barrier approach, discussing test program and application to helicopter part fatigue life increase

[AHS PREPRINT 672]

p0448 A72-34512

Elastomeric coating materials for use in sealing fastener-head countersinks in highly loaded aircraft skins susceptible to exfoliation corrosion

[AD-728039]

p0110 N72-13429

Chromate rinse for aircraft exposed to corrosive salt water environments

[AD-732762]

p0259 N72-18503

## CORROSION RESISTANCE

NT OXIDATION RESISTANCE

Hydraulic fluids behavior under extreme temperature, pressure and filtration conditions, considering viscosity, wear and corrosion resistance

p0135 A72-17084

Hot corrosion resistant Pt-Al coating for high temperature aircraft engine Ni alloy components, presenting cyclic sulfidation and thermal shock test results

p0184 A72-19573

Fuel lubricity effects on aircraft engine fuel pump wear, discussing remedial use of corrosion inhibitors and change to noncorroding pump construction materials

p0191 A72-21450

Clam seals comparison with elastomers, discussing aircraft use, contamination, inspection, corrosion and erosion, surface finish, service life and cost

p0199 A72-21941

Corrosion resistant fabrication methods in jumbo jetliners components to reduce maintenance and repair downtime, discussing clad wing and fuselage skins

p0239 A72-24025

Gas turbine engine compressor blade and materials fatigue strength dependence on pressure under contact friction corrosion

p0315 A72-28244

Adhesive bonding of L-1011 body shell panels for improved fatigue strength and corrosion resistance

p0400 A72-32429

Dry ultra thin film, water displacing corrosion preventive compounds for aircraft finishes

[AD-728779]

p0095 N72-12523

Corrosion resistance comparison of experimental coatings for steel fasteners used in high performance aircraft

[AD-738805]

p0471 N72-26472

Corrosion resistant claddings for high strength aluminum alloys

[AD-743311]

p0645 N72-33547

## CORROSION TESTS

Accelerated full scale aircraft turbine engine corrosion tests in controlled environment, simulating salt, high temperature and humidity conditions

[NACE PAPER 76]

p0241 A72-24320

Hot corrosion effects on Inconel-700 and Inconel-X gas turbine rotor blades during burning of high sulfur concentration residual oil fuels

[ASME PAPER 72-GT-87]

p0298 A72-25662

Corrosion properties of aircraft structure fluid contaminants noting corrosion tests and microbiological action on Britannia Comet Aircraft

[D-NAT-179]

p0573 N72-30015

## COSMIC RADIATION

U COSMIC RAYS

## COSMIC RAYS

NT PRIMARY COSMIC RAYS

NT SOLAR COSMIC RAYS

In-flight warning meter for solar and cosmic radiation dose equivalent measurements for radiological protection in SST aircraft

[CERN-71-16]

p0017 A72-12078

Galactic and solar cosmic radiation dosage to flying personnel and passengers onboard SST

p0223 N72-17721

# SUBJECT INDEX

# COST EFFECTIVENESS

## COST ANALYSIS

Variable speed constant frequency power generation equipment influence weapon system effectiveness, considering weight and cost p0011 A72-11067

Relative cost comparisons of composite applications with conventional material components selected from F-111A supersonic fighter bomber p0062 A72-14234

Computer technology projection in terms of cost and performance for future ATC system, determining data processing systems availability p0068 A72-14834

Value engineering based cost data application to design of aircraft in production p0145 A72-18435

Business V/STOL aircraft economic viability based on cost benefit analysis and comparison with turbine powered aircraft [SAE PAPER 720334] p0291 A72-25594

Aircraft transparencies from civil operator viewpoint, considering replacement cost of flight deck and cabin windows p0305 A72-27005

Cocuring technique optimization for primary aircraft components composite materials, discussing mechanical and dimensional properties test data, production cost analysis and cure time p0312 A72-28077

New York-New Jersey megalopolis offshore jetport feasibility, considering noise, air-water pollution, land conservation, cost, etc p0346 A72-28792

Navy program for composites technology development in aircraft structures, discussing design, reliability and cost [ASME PAPER 72-DE-3] p0362 A72-30860

Maintenance processes planning in air transportation, discussing aircraft availability, cost analysis and production management p0451 A72-35441

Comparative analysis of the operative costs of large amphibious hovercraft p0462 A72-37212

V/STOL - Selection and problems of the new medium p0462 A72-37215

Private aircraft ownership and use for family travel and pleasure, discussing costs, maintenance and operational problems [AIAA PAPER 72-812] p0497 A72-38119

Operating cost comparisons between Concorde and Boeing 707 and 747 aircraft, considering profitability p0508 A72-39818

S-3A aircraft weight control program organization and methods, considering cost and schedule performance [SAE PAPER 906] p0595 A72-43453

Computerized airframe manufacturing cost and weight analysis, using technique for detailed parts list generation from configuration concept as input [SAE PAPER 913] p0596 A72-43460

Minimum operational costs of passenger and cargo transport aircraft, considering effects of flight distance, wind conditions and optimum speed and altitude p0603 A72-44338

A systems analysis of subsonic versus supersonic jet travel. p0604 A72-44580

Economic and operational aspects of fatigue - Figures of a Swiss ground attack/fighter aircraft. p0610 A72-44742

Structural fatigue cost penalties in airline operations, considering inspection, maintenance and carrying capacity reduction p0610 A72-44743

Structural fatigue cost in aircraft maintenance and repair, considering inspections, defect rectification, preventive modifications, replacements and NDT p0610 A72-44744

Cost analysis and operational procedures of effective short range, high density computer transportation system for Metropolitan Detroit [NASA-CR-114340] p0036 A72-10984

Graphs and tables of service cost for intraurban transportation system [NASA-CR-114341] p0036 A72-10985

Cost analysis and economic models for European aerospace development compared to US experience [AD-725478] p0037 A72-10992

Analysis of cost effectiveness of cargo transportation by nuclear propelled aircraft and impact damage tests of nuclear reactor containment vessels [NASA-TN-X-2425] p0096 A72-12604

Parameter values requiring aircraft performance production at minimal cost [AD-730338] p0225 A72-17977

Economic analysis of effect of fog on air traffic and benefits of fog dispersal capability in terminal area [AD-735132] p0280 A72-19722

Relative incidence and cost data for orientation-error accidents in regular Army UH-1 aircraft during fiscal year 1968 [AD-735457] p0332 A72-21016

Cost analysis of microwave landing system program for civil ground systems [AD-737036] p0389 A72-23668

Capital cost analysis of airport alternatives for San Francisco Bay area for general aviation and commercial aircraft p0429 A72-24985

Analysis of airlines operations for several small operators to determine reasons for economic problems and alternatives for profitable services - Part 1 p0584 A72-31016

Analysis of short haul airlines operation to show history, operational problems, and economic aspects - Part 2 p0584 A72-31017

Development of costing concepts and methods for evaluating and comparing engine overhaul costs at various repair facilities [AD-743417] p0591 A72-31790

**COST EFFECTIVENESS**

Aircraft integrated data systems, discussing cost effectiveness, reliability and maintenance p0055 A72-13417

Computerized modular automatic test equipment for commercial airliner avionics device performance, discussing data handling ability and cost effectiveness p0143 A72-18250

Aircraft maintenance optimization, considering safety, reliability, punctuality and cost factors p0246 A72-25108

Cost effectiveness determination for different levels of reliability and maintainability of training aircraft, using computer simulation p0343 A72-28355

Strike aircraft reliability prediction in cost effectiveness analyses, showing failure probability distribution with time p0343 A72-28360

Cost effectiveness model for evaluating general aviation weather dissemination techniques, stressing design variables and time periods p0349 A72-28871

Aircraft maintenance operations and personnel requirements planning for optimal economic effectiveness, formulating relations between work productivity, downtime and aircraft utilization p0361 A72-30822

Management information system role in cost effective civil and military aircraft operations, discussing hardware modification and human resources and communication system adaptation p0401 A72-32458

Major civil airport planning, discussing information gathering and processing for aviation demand, aircraft movements revenue and cost forecasts and pricing policy evaluation p0409 A72-33327

Government regulations effects on local service airlines cost performance and growth strategies p0410 A72-33374

Multifunction microwave apertures - Concepts and potential. p0454 A72-35574

- System analysis for an airline operational environment through a computerized network simulation model. p0551 A72-41077
- Cost effective algorithm for optimal route aircraft scheduling for airlines by mixed integer multi-commodity flow technique and Dantzig-Wolfe decomposition p0604 A72-44582
- Test facilities for aeropropulsion systems, emphasizing utilization, cost and technical advantages, aircraft inlet-engine systems compatibility and test types [AIAA PAPER 72-1034] p0615 A72-45401
- Cost effectiveness analysis to determine feasibility of using catapult launch systems for large commercial aircraft to reduce aircraft noise problem [FAA-EQ-71-1] p0085 N72-11941
- Analysis of cost effectiveness of cargo transportation by nuclear propelled aircraft and impact damage tests of nuclear reactor containment vessels [NASA-TM-X-2425] p0096 N72-12604
- Cost/decision model for deferred procurement of Air Force depot maintenance capability with computerized application to F-15 inertial navigation system [AD-735351] p0334 N72-21029
- COST ESTIMATES**
- Military aircraft operations and logistics computerized simulation for support and maintenance cost estimates p0141 A72-17974
- V/STOL aircraft potential for short haul civil air traffic, discussing present technology and investment costs in comparison with advanced ground transportation systems p0357 A72-30076
- Economics of a new regional airport. p0459 A72-36779
- Economic analysis of aeronautical communication system via satellite, noting cost estimates and annual charge per user p0548 A72-40298
- Cost estimates for pintle, side mounted, and turret armament subsystems [AD-735495] p0341 N72-21988
- Intraurban STOL travel demand and modal split model incorporating commuter preference variables, and aircraft network and operating cost estimates for San Francisco [NASA-CR-114418] p0378 N72-22980
- FAA Airport and Airway System unit cost estimates and allocation study p0429 N72-24982
- Microwave interferometers used as radio eye for aircraft navigation and collision avoidance system including comparison of cost with present systems [REPT-62] p0486 N72-27708
- COST REDUCTION**
- Helicopter elastomeric bearing rotors, discussing downtime and cost reduction, maintenance, endurance and inspection p0001 A72-10150
- Aircraft design producibility to reduce production cost and enhance product profitability, using joint engineering and manufacturing team [SAE PAPER 710748] p0003 A72-10247
- Collision avoidance systems and pilot warning instruments, minimizing cost by pilot detection, evaluation and avoidance execution p0067 A72-14823
- Soviet air traffic service productivity increase and manpower saving by introduction of new airliner types p0127 A72-16779
- Supplementary Aviation Information Display for ATC, discussing remote sensing capability and cost savings p0138 A72-17424
- Combined inertial/radio navigation systems for cost reduction, noting superior accuracy of VOR and DME p0144 A72-18286
- Statistical evaluation for forged jet engine parts tensile tests cost reduction, using regression analysis p0184 A72-19484
- Naval aircraft optimal repair and replacement policies determination for operation cost minimization by dynamic programming [AD-736094] p0192 A72-21470
- Low cost 300 gallon fiber reinforced plastic aircraft wing fuel tank manufacturing technology p0196 A72-21693
- Commercial applications of quiet light aircraft technology, discussing cost and noise reduction [SAE PAPER 720339] p0292 A72-25596
- Plywrap process for low cost automated fabrication of fiber reinforced plastic composites, noting applications from missile interstages to modular housing p0312 A72-28081
- Surface integrity machining practices application to jet engines production, noting cost reduction and process selection and quality control improvement [ASM PAPER W 72-27,2] p0314 A72-28163
- Military systems cost reduction via civil avionics procurement techniques, discussing cost-reliability design criteria p0399 A72-32215
- Cost-saving techniques in helicopter structural test methods, suggesting system simulation, component replacement time calculation and computer techniques p0407 A72-33221
- Polish aircraft industry production and fabrication techniques, discussing metal working, digital controlled machining and cost reduction p0461 A72-37010
- NASA program for low cost turbojet and turbofan engine fabrication for missile and light aircraft propulsion p0491 A72-37637
- Graphite-epoxy composites application to commercial transports for weight and cost reduction p0491 A72-37680
- Boron fiber reinforced composites technology assessment and utilization, stressing cost reduction [ICAS PAPER 72-30] p0554 A72-41155
- High strength bimetallic rivets produced by inertia welding Al-Ti alloy shank with pure Ti tail, noting weight and cost reduction for aerospace vehicle production [SAE PAPER 902] p0595 A72-43452
- Application of brazing techniques for remanufacturing of jet engine components to reduce cost of commercial aircraft maintenance p0040 N72-11024
- Design and fabrication of low cost turbojet and turbofan engines [NASA-TM-X-68085] p0487 N72-27816

Wind tunnel testing of Dassault-Brequet-Dornier Alpha Jet twin engine trainer, emphasizing tests for wing-empennage flutter and jet induced interference effects  
p0357 A72-30077

## DATA ACQUISITION

Radar data automatic extraction, discussing azimuth quantization methods, moving window detection, coordinate measurement and ATCAS extractor  
p0022 A72-12650

Wind tunnels measuring equipment and procedures and data acquisition and processing systems electronics, describing computerized real time data processing system  
[DPVLR-SONDDR-156] p0024 A72-12898

Data acquisition and reduction for model aerodynamics in superconducting magnetic suspension and balance of supersonic wind tunnel facility  
p0243 A72-24766

Aerodynamic data acquisition with magnetic balance on wind tunnel model delta and AGARD G wing planforms and body of revolution  
p0243 A72-24770

Pacific Ocean meteorological data collection from military and civil aircraft in-flight reports, discussing computer processing for daily analysis and monthly and seasonal means

p0349 A72-28874  
FAA airborne OMEGA development program covering signal monitoring, airborne data collection and system operational evaluation

p0352 A72-29195  
Integrated data acquisition and processing system for inlet-aircraft engine matching, considering all-digital, analog and hybrid approach

p0400 A72-32319  
Digital recording techniques for airborne data acquisition, emphasizing laser beam holographic recorders

p0412 A72-33642  
Serial PCM system for flight test data acquisition and reduction compared with Harrier system

p0412 A72-33644  
Airborne flight test data acquisition system modular design to provide digital readings from monitoring transducers analog signal

p0412 A72-33645  
Airlines and aircraft manufacturers requirements for airport pavement evaluation/data system, discussing relationships between strength, landing gear design, aircraft weight, range, etc  
p0460 A72-36789

ATC services configuration with secondary surveillance radar and primary radar data acquisition system, discussing signal processing by automated decoder  
p0547 A72-40288

A near real time data acquisition/reduction facility for the Boeing wind tunnels.  
p0564 A72-42699

Development of computer programs for processing flight test data and standardizing in-flight performance of aircraft  
[AD-725741] p0043 N72-11054

Sensors for data acquisition systems for earth observations by spacecraft or aircraft  
[NASA-TN-X-62107] p0257 N72-18199

Implementation of instrumentation techniques for service testing of aircraft and airborne equipment to meet military requirements  
[AD-734306] p0276 N72-19300

Flight test program and data acquisition techniques for evaluation of Boeing 747 aircraft  
p0328 N72-20977

Characteristics of flight test instruments and techniques for overcoming limitation and sources of error  
p0329 N72-20984

Development of flight test procedures for use with advanced aircraft to determine cruise performance characteristics  
p0329 N72-20985

Comparison of flight test and wind tunnel data to determine areas of agreement when nonlinearities appear in aerodynamic coefficients of slender wing aircraft  
p0330 N72-20990

Determination of performance data and stability and control characteristics from aircraft performance under nonsteady flight conditions  
p0330 N72-20992

Development of techniques and equipment for determining moment of inertia of aircraft as applied to A-37 and P-1127 aircraft  
[FTC-TIH-71-1001] p0331 N72-21007

International survey of air pollution by aircraft engines and fuels  
[AGARD-AR-40] p0338 N72-21590

Development of method for aircraft performance analysis when drag is determined from engine thrust  
[ESDU-70021] p0637 N72-33005

Development of nondimensional graphical method for analyzing performance of turbine powered aircraft  
[ESDU-70022] p0637 N72-33006

Derivation of equations for determining climb performance of aircraft based on energy considerations  
[ESDU-70023] p0637 N72-33007

NT DATA CORRELATION

NT DATA REDUCTION

NT DATA STORAGE

NT OPTICAL DATA PROCESSING

NT PARALLEL PROCESSING (COMPUTERS)

NT SIGNAL PROCESSING

Computer-aided interactive graphic displays for ATC, discussing subsystems, data processing flow and operational capabilities

p0020 A72-12420

Digital computer memory system for real time processing of air and naval traffic data, discussing logic design, time comparisons and optimum use

Radar data automatic extraction, discussing azimuth quantization methods, moving window detection, coordinate measurement and ATCAS extractor

p0022 A72-12647

Wind tunnels measuring equipment and procedures and data acquisition and processing systems electronics, describing computerized real time data processing system

p0022 A72-12650

Computer technology projection in terms of cost and performance for future ATC system, determining data processing systems availability

p0024 A72-12898

Aircraft engine test data processing by polynomial relations, assuming normal measurement error distribution

p0068 A72-14834

Ground based ATC information processing systems analysis, considering controllers work load

p0181 A72-18978

Electronics and data processing technology effects on radar state of art, discussing automated air traffic control surveillance systems

p0229 A72-22778

Military weather forecasting requirements by 1980, discussing decision making, data processing, satellite data, mission and terminal forecasts, display and computer flight planning

p0241 A72-24490

ATC system, discussing flight data and radar processing functions and terminal automation program

p0246 A72-25096

Sensor measurements correlation to human visibility via sensor equivalent visibility /SEV/ concept, discussing data processing scheme

p0300 A72-25875

Pacific Ocean meteorological data collection from military and civil aircraft in-flight reports, discussing computer processing for daily analysis and monthly and seasonal means

p0347 A72-28846

Electronic data processing in airline materiel supplies operations, discussing procedural efficiency improvement through reduction of stochastic effects inherent in aircraft maintenance operations

p0349 A72-28874

Integrated data acquisition and processing system for inlet-aircraft engine matching, considering all-digital, analog and hybrid approach

p0362 A72-30823

Helicopter stability derivative extraction and data processing using Kalman filtering techniques.

p0400 A72-32319

Application of electronic data processing airport analysis in airlines operations and for manufacturers.

p0447 A72-34501

Real time telemetry processing systems, describing display features and limitations

p0489 A72-37277

Automated area navigation with real time track computation, discussing information processing by on-board computer for immediate pilot instruction

p0500 A72-38142

Applications of a technique for estimating aircraft states from recorded flight test data.

p0550 A72-40683

Time sharing system for teleprocessing of wind tunnel measurements with IBM 7040 computer as central processor

p0563 A72-42360

Processing and analyzing clear air turbulence data collected by F-100, and F-106 aircraft

p0168 N72-15186

Development of numerical process for extracting aerodynamic coefficients from flight test data

p0222 N72-17302

Modular multichannel data processing system for turbojet engine testing

p0330 N72-20991

Procedures for reducing aircraft performance data to compensate for atmospheric parameters and variations in aircraft configurations

p0628 N72-32458

[ESDU-70019]

p0637 N72-33004

## DATA PROCESSING EQUIPMENT

NT AIRBORNE/SPACEBORNE COMPUTERS  
NT ANALOG COMPUTERS  
NT DIGITAL COMPUTERS  
NT HYBRID COMPUTERS  
NT UNIVAC COMPUTERS

Real time pilot reports via digital ground-air-ground data link, discussing encoding and processing equipment, meteorological codes and automatic real time weather forecasts

p0246 A72-25079

Application of computer techniques to improvement of aircraft maintenance operations

p0039 A72-11020

Development of computer programs for processing flight test data and standardizing in-flight performance of aircraft

[AD-725741] p0043 A72-11054

Ground station data reduction equipment for airborne analog and digital magnetic tape data acquisition system

[ARL/ME-130] p0275 A72-19238

System security hardware, software, and procedural techniques in automated systems

[AD-735728] p0336 A72-21234

Data base security and access limitation requirements for post 1975 automated TACC complex with tabulated security data

[AD-735729] p0337 A72-21235

Analysis of techniques and computer programs for extracting stability derivative information from flight test records

[NASA-CR-2016] p0430 A72-24991

Applications of computers for flight test and evaluation of helicopters based on frequency analyses of load curves on main and tail rotors

[NASA-TT-F-14283] p0430 A72-24993

## DATA PROCESSORS

U DATA PROCESSING EQUIPMENT

## DATA READOUT SYSTEMS

U DATA SYSTEMS

U DISPLAY DEVICES

## DATA RECORDERS

Technical aids for experimental research in flight simulation developed at Institute of Human Engineering, Meckenheim, ERG, during 1968

[ANTHROPOTECH-1/69] p0207 A72-16185

## DATA RECORDING

Structural Acoustic Monitor system for airframe structural proof testing, providing multichannel recording and aural monitoring of acoustic data derived from aircraft mounted accelerometers

p0240 A72-24146

Digital recording techniques for airborne data acquisition, emphasizing laser beam holographic recorders

p0412 A72-33642

Data recording program and analysis technique for determining airworthiness of civil aircraft from 1962 to 1969

[RAE-TR-71034] p0205 A72-15975

Data recording and evaluation of hard landings encountered by subsonic civil jet aircraft in airline operations noting role of flare maneuvers

[RAE-TR-70187] p0205 A72-15976

## DATA REDUCTION

Gas turbine engines emission data correlation based on combustor theoretical model, proposing correction factors for data reduction to standard test conditions

[ASME PAPER 72-GT-60] p0297 A72-25651

Flow data reduction validity for supersonic axial compressors, presenting experimental results for rotating supersonic cascade

[ASME PAPER 72-GT-100] p0299 A72-25669

Statistical diagnosis of aeronautical systems reliability and maintenance, using Benzecri factorial analysis for data reduction

p0300 A72-25817

Digital data processing techniques for aircraft engine noise data reduction, analyzing fan noise spectrum

p0356 A72-29840

A generalized method for the identification of aircraft stability and control derivatives from flight test data.

p0502 A72-38260

A near real time data acquisition/reduction facility for the Boeing wind tunnels.

p0564 A72-42699

Basic formulations for developing coordinate transformations and equations of motion used with free flight and wind tunnel data reduction

[NASA-SP-3070] p0472 A72-26475

Procedures for obtaining airspeed and kinetic pressure data for application to aircraft performance analysis and data reduction

[ESDU-69026] p0636 A72-33002

Development of method for aircraft performance analysis when drag is determined from engine thrust

[ESDU-70021] p0637 A72-33005

Development of nondimensional graphical method for analyzing performance of turbine powered aircraft

[ESDU-70022] p0637 A72-33006

## DATA SAMPLING

Investigation of data rate requirements for low visibility approach with a scanning beam landing guidance system.

p0453 A72-35562

Investigation of data rate requirements for low visibility approach with a scanning beam landing guidance system.

p0502 A72-38259

Moment sampling method as selfvalidating aircraft weight and balance accounting procedure

[SAWE PAPER 920] p0596 A72-43467

## DATA STORAGE

FAA air traffic control automation program, discussing en route stage, computer program, data processing and storage and terminal area navigation and display techniques

p0019 A72-12380

Modular navigation /MONA/ dual channel automatic area navigation system, describing computer, flight data storage and control/display units

p0545 A72-40277

## DATA SYSTEMS

Army data analysis system for fixed and rotary wing aircraft flight testing, including airborne and computer controlled ground stations equipment

p0019 A72-12408

Aircraft integrated data systems, discussing cost effectiveness, reliability and maintenance

p0055 A72-13417

Aircraft integrated data systems application to flight safety analysis, engine performance monitoring, crew proficiency, autoland evaluation, operations and logistics

p0065 A72-14726

DC 9 aircraft integrated data system simulator to facilitate interacting systems checking, input circuit integrity, performance degradation and calibration

p0143 A72-18284

Application of computer techniques to improvement of aircraft maintenance operations

p0039 A72-11020

Development of data insertion techniques for automatically providing pilot with heading and attitude command information

[AD-731804] p0206 A72-15981

Development and characteristics of support system and data reduction capability for free flight test facility

[ISAS-477-VOL-37-NO-3] p0424 A72-24343

Practical application of mishap data in Army aircraft system safety programs

p0439 A72-25967

Modular multichannel data processing system for turbojet engine testing

[NASA-TM-X-68123] p0628 A72-32458

Development and operation of management control system for efficient scheduling and safe utilization of commercial air transportation facilities

p0649 A72-33972

## DATA TRANSMISSION

NT CHANNELS (DATA TRANSMISSION)  
Nationwide real time automated ATC system interconnected by data transmission links, discussing radar signal acquisition/transfer and computer complex

p0143 A72-18283

Flow measurement instrumentation for turbomachine rotors, noting telemetry type data transmission system with strain gage pressure transducers for turbocompressor

## DEGREES OF FREEDOM

Pod-mounted jet engine follower force instability,  
analyzing two degrees of freedom system dynamics

p0232 A72-22938

Helicopter stability derivative extraction and  
data processing using Kalman filtering techniques.  
[AHS PREPRINT 641] p0447 A72-34501

Flight-mechanical analysis of various flight  
conditions of conventional aircraft. V -  
Mechanical foundations /Dynamics of the rigid  
body/

p0545 A72-40175

Analysis of aircraft response to atmospheric  
turbulence based on gust field with  
nonstationary random velocity

p0381 N72-23006

In flight monitoring system to measure and record  
helicopter performance in real time for all six  
degrees of freedom

[AD-745118] p0629 N72-32476

## DEICERS

Aircraft engine anti-icing tests and evaluation  
describing ground and airborne techniques  
[AIAA PAPER 72-162] p0128 A72-16828

C-54 A/B aircraft engine air particle separator  
antice system design features, manufacturing  
techniques and testing

p0177 A72-18769

USSR electric impulse de-icing system design.

p0461 A72-37033

## DEICING SYSTEMS

### U DEICERS

## DELAMINATING

Aircraft windscreen reliability, discussing  
delamination, interface shear stress effects and  
analogy to metal fatigue

p0306 A72-27011

Practical procedure for removal of baked-on  
aluminized silicone paint from aircraft engines  
[AD-742795] p0587 N72-31174

## DELTA WINGS

Supersonic and hypersonic flows with attached  
shock waves over delta wing at angle of attack,  
deriving unified theory for flow field

p0017 A72-12030

Area rule for change in lift/drag ratio of  
hypersonic delta wing due to conical body  
addition on compression side

p0018 A72-12270

Thin shock layer theory of lifting properties of  
reentry caret and flat delta wings and  
waveriders at high incidence angles and Mach  
number

p0018 A72-12345

Unsteady pressure distribution on harmonically  
oscillating circular cylindrical fuselage body  
with conical nose and delta wing with straight,  
cubic or sinusoidal leading edges

[DGLR PAPER 71-080] p0023 A72-12730

Symmetrically deformed delta wing in supersonic  
flow, considering leading edge flow separation  
induced vortices effects on downwash, pressure  
distribution and aerodynamic characteristics

p0072 A72-15741

Thermoelastic effect on flutter and vibration of  
built up delta wings with solid, stiffened and  
honeycomb/corrugated sandwich skins

[AIAA PAPER 72-174] p0128 A72-16834

Hypersonic flow past final thickness delta wing,  
presenting conical flow equations with boundary  
value solution

p0142 A72-18128

Slender body theory for flow calculation past low  
aspect ratio delta wing with straight trailing  
edge, noting lifting vortices distribution

p0247 A72-25131

Hypersonic gun tunnel balance and pressure  
measurements on sharp leading edge delta wings,  
comparing experimental coefficients and shock  
angles with predicted values

p0299 A72-25735

Fighter aircraft maneuverability, range and  
armament requirements, discussing canard vs  
delta configurations

p0303 A72-26657

Pressure distribution over delta wing with blunted  
edges at small angles of attack in hypersonic  
wind tunnel tests

p0363 A72-31022

Three dimensional boundary layer separation on  
slender bodies, delta wings and propulsion  
intake systems, reviewing computing techniques  
for interfering inviscid flow fields

p0404 A72-32826

Analytical method of characteristics to determine  
front shock and sonic boom due to flat delta  
wing with supersonic leading edges

[DPVLR-SONDDR-205] p0410 A72-33401

Barefied hypersonic flow characteristics of delta  
wings and trailing edge spoilers.

p0450 A72-35229

Unified area rule for hypersonic and supersonic  
wing-bodies.

p0450 A72-35251

Development of the Saab-Scania Viggen.

p0492 A72-37749

Experimental investigations of separated flows on  
wing-body combinations with very slender wings  
at free-stream Mach numbers from 0.5 to 2.2.

[ICAS PAPER 72-25] p0554 A72-41150

Quasi-homogeneous approximation for wing with  
curved subsonic leading edges at supersonic  
speeds.

[ICAS PAPER 72-54] p0556 A72-41176

Hypersonic boundary layer separation of delta wing  
in shock tunnel using color and monochrome  
schlieren photography

[NPL-AERO-NOTE-1097] p0029 N72-10022

Linear functional law for alleviating gusts on  
delta wing aircraft

[ONERA-TP-925] p0037 N72-10999

Three component shock tunnel strain gage balance  
for measuring aerodynamic forces on thin delta  
wings

[ARC-R-M-3664] p0046 N72-11375

Wind tunnel measurements of Reynolds number effect  
on force and pressure coefficients for slender  
delta wing at transonic speed

p0074 N72-11863

Correlation of transonic wind tunnel test data  
with flight test results on slender wing  
airplanes for double delta configuration  
development

p0075 N72-11868

# SUBJECT INDEX

# DESCENT TRAJECTORIES

- Shock tunnel measurements of aerodynamic forces on thin delta wings for performance prediction of hypersonic vehicle cruising flight  
[ARC-CP-1148] p0080 N72-11905
- Low speed wind tunnel measurements of delta wing surface pressure variations in conical flow region  
[ARC-CP-1154] p0089 N72-11967
- Digital computer calculations of effects of variation of mass and inertia parameters on spin of delta wing fighter aircraft.  
[WRE-TN-453(WR/D)] p0099 N72-12974
- FORTRAN 4 computer program for calculating supersonic flow on windward side of conical delta wings by method of lines  
[NASA-TM-X-2438] p0109 N72-13271
- Aerodynamic characteristics of delta wings with or without trailing-edge flap in rarefied hypersonic gas flow  
[REPT-71-2] p0149 N72-13980
- Analysis of inviscid flow field on expansion side of flat delta wing at supersonic speed  
[VTH-167] p0169 N72-15277
- Flow fields over leeward surfaces of delta wings and conical bodies at high supersonic speeds  
[NPL-AERO-1319] p0202 N72-15948
- Effect of thickness on subsonic longitudinal stability characteristics of 70 deg sweepback delta wings  
[ARC-R/M-3673] p0202 N72-15950
- Theoretical pressure distributions on caret and plane delta wings for supersonic flow  
[ARC-CP-1178] p0202 N72-15952
- Analysis of inviscid flow on windward side of flat, sharp-edged delta wing at hypersonic speed and angles of attack near maximum lift  
[AD-731763] p0202 N72-15955
- Induced drag of thin delta wings with different leading edge spanwise distribution  
[PB-202358] p0203 N72-15957
- Wind tunnel/flight simulation of slender delta wing aircraft dynamic response to Dutch roll at low speed  
[ARC-R/M-3669] p0204 N72-15970
- Comparisons of hinge moments for simple delta wing and delta wing orbiter concept at Mach 6  
[NASA-TN-D-6657] p0218 N72-16997
- Mathematical model for effects of conical thickness distribution on separated flow past slender delta wings with small thickness/span ratios and sharp leading edges  
[ARC-CP-1189] p0267 N72-19006
- Vortex breakdown studied by flow visualization noting pressure gradient effect and analogy with boundary layer separation and wake bursting  
[ONERA-MT-175] p0277 N72-19328
- Unsteady pressure distribution on harmonically oscillating slender wing-fuselage configurations  
[AVA-PB-7126] p0317 N72-19997
- Aerodynamic forces, pitching moments, and pressure distributions measurements on delta wing-body combinations at transonic speed in compressible flow  
[AVA-PB-7129] p0317 N72-19998
- Structure of hypersonic flow field of blunt slab delta wing at moderately high angle of attack  
p0327 N72-20851
- Aerodynamic characteristics of delta wing orbiter in close proximity to synchronously oscillating canard booster at Mach 2  
[LTR-UA-18] p0365 N72-21992
- Linearized lifting surface theory for determining pressure distribution on subsonic delta wing  
p0379 N72-22992
- Analysis of transition fixing and Reynolds number variation on aerodynamic forces produced by thin delta wings  
[NASA-CR-112016] p0463 N72-25996
- Hypersonic wind tunnel tests on delta wing models at high incidence for pressure distribution determination  
[ARC-CP-1198] p0476 N72-27004
- Optimized design of conically cambered triangular wings with subsonic leading edges and supersonic trailing edges for drag reduction without leading edge suction  
[ARC-TR-2] p0571 N72-29992
- Dynamic aeroelastic effects on stability control and gust response of slender delta aircraft  
[ARC-R/M-3690] p0582 N72-30998
- Analysis of spanwise distribution leading edge tangential suction forces on thin sixty degree delta wing obtained in low speed wind tunnel  
[KTH-AERO-TN-58] p0618 N72-32011
- Flow characteristics about uncambered, slender delta wing at 15 deg incidence with high energy blowing from leading edge slots  
[CRANFIELD-AERO-9] p0635 N72-32992
- Wind tunnel tests to determine effects of leading edge camber on low speed aerodynamic characteristics of thin, sharp-edge delta wing  
[NASA-CR-2002] p0636 N72-32996
- Application of leading-edge-suction analogy to prediction of longitudinal load distribution of vortex lift for delta wings  
[NASA-TN-D-6994] p0636 N72-32997
- DEMAND (ECONOMICS)  
Utah-Colorado-New Mexico-Arizona regional air transportation study, assessing scheduled air carrier service demand for 1971-1990  
p0182 A72-19178
- DENSITY (MASS/VOLUME)  
Ti alloys for airframe shell construction based on room temperature strength, stiffness and densities comparison with Al alloys, stainless steel and Be data  
p0058 A72-13615
- DENSITY (NUMBER/VOLUME)  
NT ION DENSITY (CONCENTRATION)
- DENSITY MEASUREMENT  
Convective heat flow pressure and density measurements at surface of central body of air inlet with live point and axial symmetry  
p0138 A72-17560
- DEPENDENCE  
NT TIME DEPENDENCE
- DEPOSITION  
NT ELECTRODEPOSITION  
NT VACUUM DEPOSITION  
Oxidation-corrosion-deposition characteristics of aircraft turbine engine lubricants employing glassware-type apparatus  
[AD-744840] p0644 N72-33499
- DEPOSITS  
Development and application of instrument for measuring coker tube deposits based on beta ray backscatter  
[AD-743308] p0644 N72-33467
- DEPRESSURIZATION  
U PRESSURE REDUCTION
- DEPTH PERCEPTION  
U SPACE PERCEPTION
- DERIVATION CALCULUS  
U DIFFERENTIAL CALCULUS
- DESCENT  
NT PARACHUTE DESCENT  
Helicopter model tests for determining ground proximity aerodynamics in level and descending forward flight  
[AD-730364] p0155 N72-14021
- Aerodynamic performance of lifting helicopter rotor during vertical descent  
[AD-734229] p0267 N72-19011
- DESCENT TRAJECTORIES  
NT REENTRY TRAJECTORIES  
Terrain clearance during descent and approach of aircraft under radar control, discussing optimum profile, ATC, nav aids and rules  
p0002 A72-10183
- Aerodynamic and control characteristics of helicopters in level flight and steep descents at low speeds  
[AD-729847] p0154 N72-14010
- Modular aircraft elements and rotor dynamic equations for stability and control of helicopters in steep approaches  
[AD-729848] p0154 N72-14011
- Limitations on approach flight paths of V/STOL aircraft including limits on descent angle due to maximum lift drag ratio  
[NASA-CR-1901] p0165 N72-15001
- Curved final approach and landing flight path for increased airport capacity  
[RAE-TR-71059] p0257 N72-18265
- Nuclear instrument landing system for accurate aircraft position data during last phases of descent  
[SAN-828-1] p0377 N72-22655

Design, development, and specifications of ringsail parachute with emphasis on inflation characteristics of cluster canopies  
[AD-745335] p0642 N72-33051

## DESERTS

Aerial expedition for studying conditions of atmospheric boundary layer over oasis and semiarid region  
[AD-727535] p0034 N72-10332

## DESIGN OF EXPERIMENTS

## U EXPERIMENTAL DESIGN

## DESTRUCTIVE TESTS

Destructive crack propagation and fatigue tests on C-130 aircraft center wings  
[NASA-CR-112008] p0112 N72-13884

## DETECTION

## NT AIRCRAFT DETECTION

## NT CORRELATION DETECTION

## NT RADAR DETECTION

## NT SIGNAL DETECTION

## DETERIORATION

Detection of structural deterioration and associated airline maintenance problems.  
[SAFE PAPER 918] p0596 A72-43465  
Analytical methods for early-stage detection of oil deterioration in aircraft engines  
p0050 N72-11698

## DETERMINANTS

Flutter equation approximate true damping or rate-of-decay solution by determinant iteration  
p0012 A72-11133

## DETERMINATION

## U MEASUREMENT

## DETONABLE GAS MIXTURES

Construction of sonic boom simulator using detonable gas mixture in slender, shaped Mylar balloons  
[NASA-CR-1844] p0150 N72-13991

## DEWAR SYSTEMS

## U CRYOGENIC EQUIPMENT

## DH 112 AIRCRAFT

Economic and operational aspects of fatigue - Figures of a Swiss ground attack/fighter aircraft.  
p0610 A72-44742

## DH 121 AIRCRAFT

Trident aircraft air-system interrogator airborne first line test apparatus for electrical components malfunction diagnosis  
p0142 A72-18154

Quiet RTOL /reduced takeoff and landing/ short haul aircraft cost comparison with Trident 3 aircraft up to design range stage length  
p0394 A72-31320

## DHC 5 AIRCRAFT

Augmentor wing design for Buffalo STOL aircraft, discussing operational principle and wind tunnel test results  
p0550 A72-40684

Development of simulation models of two representative STOL aircraft using nonlinear equations to show gross changes in aircraft attitude, flight path, and power setting  
[DOT-TSC-FAA-71-14] p0320 N72-20018

Measuring air velocity and temperature for inertial navigation using DHC 5 aircraft  
[NCAR-TN/EDD-74] p0523 N72-28675

## DIABATIC PROCESSES

## U HEAT TRANSFER

## DIAGRAMS

## NT S-N DIAGRAMS

## NT STRESS-STRAIN DIAGRAMS

Energy flow diagrams.  
p0607 A72-44686

## DIAMOND WINGS

## U LOW ASPECT RATIO WINGS

## U SWEPT WINGS

## DIELECTRIC CONSTANT

## U DIELECTRIC PROPERTIES

## DIELECTRIC MATERIALS

## U DIELECTRICS

## DIELECTRIC PROPERTIES

Development of methods for safely grounding helicopters to remove electrostatic charge buildup with emphasis on water spray discharge  
[AD-745102] p0642 N72-33048

## DIELECTRICS

The lightning arrester-connector - A new concept in system electrical protection.  
p0504 A72-38989

## DIFFERENCE EQUATIONS

Differential and difference equations approximate solutions in finite state machine form, developing adaptive gain changer model in aircraft stability control system  
p0054 A72-13164

## DIFFERENTIAL ALGEBRA

## U DIFFERENTIAL CALCULUS

## U MATRICES (MATHEMATICS)

## DIFFERENTIAL ANALYZERS

## U ANALOG COMPUTERS

## DIFFERENTIAL CALCULUS

Flight mechanics derivative transformations by matrix methods for changing coordinate or independent variable systems  
[DFVLR-SONDD-175] p0126 A72-16706

## DIFFERENTIAL EQUATIONS

## NT PARTIAL DIFFERENTIAL EQUATIONS

Aerodynamic behavior of thin jet-flapped airfoil, investigating integrodifferential equation solution  
p0015 A72-11669

Airfoil theory singular integrodifferential equation reduction to integral equations with quasi-regular and regular kernels, applying to jet flapped wing problem  
p0054 A72-12987

Differential and difference equations approximate solutions in finite state machine form, developing adaptive gain changer model in aircraft stability control system  
p0054 A72-13164

Sensitivity functions for differential equations describing aircraft perturbed motion, noting dependence on time derivatives, system parameters and coordinates  
p0180 A72-18977

Singular surfaces for time optimal control in zero sum differential games between two aircraft in three dimensional space, assuming spherical acceleration vectogram  
p0183 A72-19279

Near optimal closed loop control laws for fixed time pursuit-evasion differential game between two aircraft in vertical plane, using dynamic modeling  
p0236 A72-23805

Application of Cooke equivalent radius to boundary layers on axisymmetric bodies at small angle of attack  
[TAB-131] p0258 N72-18293

Derivation of differential equations for optimal feedback for constant linear system  
[VTB-165] p0279 N72-19663

## DIFFERENTIAL GEOMETRY

## NT TENSOR ANALYSIS

## DIFFERENTIAL OPERATORS

## U DIFFERENTIAL EQUATIONS

## DIFFERENTIAL THERMAL ANALYSIS

Differential thermal analysis of self lubricating bearing systems  
[AD-732761] p0260 N72-18588

## DIFFRACTION

## NT WAVE DIFFRACTION

## DIFFUSERS

Mach 2.65 axisymmetric mixed-compression inlet system diffuser and boundary layer bleed system performance estimates confirmed by tests  
[AIAA PAPER 72-45] p0134 A72-16959

Centrifugal turboengine diffuser with high enlargement area compared with logarithmic spiral types, discussing boundary layers, secondary flow, shapes, and aerodynamic parameters  
p0236 A72-23747

Pressure recovery calculation for subsonic adiabatic air flow through diffusers with tail pipes, assuming turbulent inlet boundary layer  
p0237 A72-23855

Low speed performance and boundary layer growth in optimal annular diffuser with uniform center body diameter and conically diverging wall  
p0237 A72-23856

Turbulent boundary layer growth measurement on annular diffuser containing free vortex swirl  
p0237 A72-23857

Conical diffuser response to velocity distribution and turbulence intensity at inlet  
p0238 A72-23858

- Wind tunnel diffuser design for separated region, spread reduction based on egg box principle p0238 A72-23859
- Wide angle conical diffuser performance improvement by conical splitter vanes, considering static pressure recovery p0238 A72-23860
- Turbulent shear stress and kinetic energy characteristics of subsonic air flow in straight conical diffuser, using hot-wire anemometry measurements p0238 A72-23862
- Cascade technology for centrifugal compressor vane diffuser design, comparing performance results with conventional diffuser data [ASME PAPER 72-GT-39] p0295 A72-25633
- Radial inflow compressor feasibility, discussing blade loadings for various pressure ratios and efficiency of rotor and diffuser [ASME PAPER 72-GT-52] p0296 A72-25644
- Swirling flows vortex breakdown in nozzles, diffusers and combustion chambers, considering analogy to boundary layer separation p0457 A72-36385
- Flow quality improvements in a blowdown wind tunnel using a multiple shock entrance diffuser. [AIAA PAPER 72-1002] p0557 A72-41587
- Diffuser effects on stable operations of centrifugal compressor stage [AD-730042] p0282 N72-19855
- DIFFUSION**
- NT ATMOSPHERIC DIFFUSION

- Soot oxidation rate from diffusion flame measurements extrapolated for gas turbine combustion chambers p0119 A72-16368
- DIFFUSION WELDING**
- Forging techniques and applications for YF-12A aircraft Ti alloy bulkhead production, considering diffusion bonding and die shrinking p0069 A72-14914
- Solid state joining in gas turbine engines, discussing diffusion bonding, friction welding and coextrusion metal bonding [ASME PAPER 72-GT-74] p0297 A72-25656
- DIGITAL COMMAND SYSTEMS**
- Countersink boring machines with programmed digital control systems for precision spacing multiple hole drilling in extended aircraft engine components p0304 A72-26816
- Flight-test experience in digital control of a remotely piloted vehicle. [AIAA PAPER 72-883] p0510 A72-40059
- DIGITAL COMMUNICATION**
- U PULSE COMMUNICATION
- DIGITAL COMPUTERS**
- Digital computer memory system for real time processing of air and naval traffic data, discussing logic design, time comparisons and optimum use p0022 A72-12647
- STARAN IV-X associative array processor for automation in ATC environment, considering air tracking, conflict prediction and resolution functions p0237 A72-23818
- Aircraft inertial navigation system, discussing mode selection unit, digital computer and control display for operator communication with system p0394 A72-31596
- Digital attitude and heading reference system computer for aircraft heading control, discussing design and performance features p0407 A72-33244
- Future trends of airborne computers. [AIAA PAPER 72-895] p0505 A72-39109
- On-line digital computer for wind tunnel, operating systems, and real time operation [NPL-AERO-1326] p0033 N72-10184
- Digital computer calculations of effects of variation of mass and inertia parameters on spin of delta wing fighter aircraft [WRE-TN-453(WR/D)] p0099 N72-12974
- Mathematical model for computing aerodynamic forces acting on hinged helicopter rotor blades using digital computer [DLR-FB-71-67] p0166 N72-15008
- Complementary software package for use of IHAS 4 computer [AD-765681] p0336 N72-21231
- Simulation of advanced avionics digital computer simplex and multiprocessor routines [AD-739738] p0518 N72-28207
- DIGITAL DATA**
- Real time pilot reports via digital ground-air-ground data link, discussing encoding and processing equipment, meteorological codes and automatic real time weather forecasts p0246 A72-25079
- DIGITAL FILTERS**
- System methodology application to filter design for inertial reference unit calibration in digital test station for FB-111 aircraft navigation system p0237 A72-23820
- Surface acoustic wave technology in communication systems, discussing analog and digital matched filters and navigation, ATC and collision avoidance applications p0245 A72-24940
- DIGITAL NAVIGATION**
- Digital solid state altitude encoder for ATC transponder reporting, covering Gray and Gillham codes. [SAE PAPER 720314] p0289 A72-25578
- Error analysis for digital avionics system involving Doppler navigation by intermittent scanning of single beam multimode radar, noting optimum statistical data processing p0398 A72-32204
- Feasibility evaluation of microwave aircraft digital guidance equipment for helicopter approach and landing guidance system p0085 N72-11936
- DIGITAL RADAR SYSTEMS**
- Investigations on the use of a Kalman filtering method in tracking systems for air traffic control. [ICAS PAPER 72-43] p0555 A72-41168
- Reflection of digital radar view display when used in vertical position in traffic control center [FAA-RD-72-60] p0578 N72-30589
- DIGITAL SIMULATION**
- Airplane hydraulic control systems digital simulation, using method of characteristics for distributed parameter analysis of transmission line dynamics [ASME PAPER 71-WA/FE-21] p0117 A72-15928
- Air transportation modal split analysis by computer simulation program for determining utilization of alternative travel modes between origins and destinations p0141 A72-17973
- MARS digital simulation model in GPSS for determining scheduled flight operations and maintenance resources effects on aircraft availability and usage rates p0141 A72-17976
- FORTRAN digital simulation of ATC radar beacon system making possible computer generated movie display p0184 A72-19301
- Statistical analysis for single airport ATC digital simulation using Poisson distribution law, calculating optimal number of channels p0352 A72-29179
- Aircraft and other vehicle simulators for training crews, discussing evolution of needs, digital techniques, and visual and physiological experiences p0362 A72-30844
- ATC procedures training by digital radar simulators, taking into account geographic terrain, radar, wind and aircraft characteristics and flight plans

## DIGITAL SYSTEMS

## SUBJECT INDEX

p0397 A72-32098  
An investigation of vehicle dependent aspects of terminal area ATC operation.  
p0502 A72-38256  
Development and evaluation of an energy-oriented guidance logic for air combat models.  
[AIAA PAPER 72-949] p0562 A72-42354  
Output-feedback control law for randomly distributed multivariable system.  
p0597 A72-43608  
A digital model of jet engine hydraulic fuel controller  
p0602 A72-44291  
Determination of the operational transfer functions of a gas turbine engine on a digital computer  
p0602 A72-44292  
Nonlinear digital modeling of gas turbine propulsion units  
p0602 A72-44294  
Simulation procedure for mission and maintenance planning of an air force wing.  
p0607 A72-44663

## DIGITAL SYSTEMS

NT DIGITAL NAVIGATION  
NT DIGITAL RADAR SYSTEMS  
Electronic display in future avionic systems, emphasizing computer techniques and digital data exchange systems  
p0403 A72-32635  
Design and flight experience with a digital fly-by-wire control system using Apollo guidance system hardware on an F-8 aircraft.  
[AIAA PAPER 72-881] p0511 A72-40060  
Digital data system with real time displays and multiprocessing capability for multitest of aircraft structure with operational manpower reduction, assessing performance  
p0564 A72-42696  
Discrete address beacon system /DABS/ development for surveillance and ground-air communications in support of ATC automation  
p0569 A72-43151  
Turbojet engine test facility with digital system for advanced control and performance studies  
[AD-733353] p0259 N72-18469  
Analysis of man-machine interface of digital data link for air traffic control information transfer requirements  
[DOT-TSC-FAA-71-21] p0325 N72-20578  
Digital computer control of mixed-compression inlet for turbojet engine  
[NASA-TN-D-6880] p0537 N72-29803  
Design of third generation digitally tuned RF receiver for all weather low level navigation system  
[AD-741813] p0578 N72-30591  
Digital systems for controlling turbojet engine fuel flow  
[NASA-TN-D-6936] p0580 N72-30777  
Preliminary design study for advanced fighter type in-flight simulator, employing digital systems  
[AD-743970] p0628 N72-32282

## DIGITAL TECHNIQUES

ATC radar performance monitoring, considering advances in radar signal processing and digital display techniques  
p0193 A72-21525  
Digital data processing techniques for aircraft engine noise data reduction, analyzing fan noise spectrum  
p0356 A72-29840  
DAMIEN III digital magnetic tape recording system for aircraft flight test data acquisition, discussing components  
p0412 A72-33629  
Digital recording techniques for airborne data acquisition, emphasizing laser beam holographic recorders  
p0412 A72-33642  
Present status of self-contained navigation systems combining Doppler velocity sensors and attitude/heading references.  
p0546 A72-40282

## DIGITIZERS

U ANALOG TO DIGITAL CONVERTERS

## DIHEDRAL ANGLE

Initial dihedral wing-body interaction for supersonic leading edges, determining expansion

of velocity potential on root chord  
p0360 A72-30365  
V-wings and diamond ring-wings of minimum induced drag.  
p0557 A72-41263

Velocities induced by distributions of infinite kinked sources and vortex lines representing wings with sweep and dihedral in incompressible flow  
[ARC-R/M-3667] p0277 N72-19332

## DIHEDRAL EFFECT

## U LATERAL STABILITY

## DIMENSIONAL ANALYSIS

Applying dimensional analysis techniques to containment/deflection problem of bursting high-rpm rotating parts of turbojet engines  
[NASA-CR-120841] p0172 N72-15713  
Dimensional analysis in aeronautical engineering including fixed and natural units

## DOPPLER EFFECT

Radar data statistical evaluation, emphasizing  
mean Doppler shift for aircraft radial velocity  
calculation  
p0231 A72-22897  
Received signal spectrum gravity center and  
effective antenna centers of airborne Doppler  
velocimeter in horizontal flight  
p0303 A72-26730  
Laser Doppler velocimetry system design for  
optical measurement of intrablade flow velocity  
in turbomachinery  
p0396 A72-32045  
Laser Doppler velocimeter operating in forward-  
and back-scatter modes for supplementing wind  
tunnel flow field measurements in subsonic,  
transonic and supersonic regimes  
p0563 A72-42678  
Measurement of horizontal and vertical velocity  
components along center line plane of turbulent  
jet exiting into cross flow using laser Doppler  
velocimeter  
[AD-736028] p0371 N72-22351  
Development and characteristics of dual scatter  
laser Doppler velocimeter for flow distribution  
measurement in wind tunnels, helicopter  
downwash, and across high lift wing sections  
p0435 N72-25506

Modified Mach-Zehnder velocimeter and modified  
Rayleigh velocimeter  
[AD-740652] p0577 N72-30419  
Development of Doppler monopulse system for  
direction finding and evaluation of  
effectiveness with respect to ionospheric  
propagation  
[AD-741807] p0579 N72-30593

## DOPPLER NAVIGATION

All-weather landing aids for civil VTOL aircraft  
and helicopters, discussing Doppler and inertial  
navigations, instrument landing systems and  
ground visibility improvement  
p0127 A72-16780  
Ground based Doppler navigation system for wide  
range elevation and azimuth aircraft approach  
guidance, using linear directive antenna array  
for conical surface definition  
p0142 A72-18183  
Microwave Doppler scanning landing guidance system  
with radar beam comparison and signal format  
simplification suggestion  
p0144 A72-18398  
Area navigation systems, discussing VOR/DME,  
Doppler and inertial systems, CRT displays, data  
links, etc  
p0193 A72-21523  
Doppler navigation system suitability for area  
navigation, discussing routes versatility,  
accuracy and continuous velocity vector sensor  
p0398 A72-32203  
Error analysis for digital avionics system  
involving Doppler navigation by intermittent  
scanning of single beam multimode radar, noting  
optimum statistical data processing  
p0398 A72-32204  
Autonomous navigation systems, discussing Doppler  
navigation, inertial platforms and onboard  
computers  
p0546 A72-40283  
Ground-based Doppler navigation waveguide slot  
antenna design for optimal directional multilobe  
reception from aircraft  
p0549 A72-40509  
Possibilities and limitations of rotary and fixed  
wing compatible Doppler sensor designs  
p0083 N72-11923  
Advanced Doppler-inertial navigation system for  
transport helicopters  
p0084 N72-11935

## DOPPLER RADAR

Doppler system with navigation radar device,  
computer unit and data transmitter for  
continuous recording of aircraft position and  
speed  
p0024 A72-12749  
CAT detection by airborne laser Doppler radar and  
ground based ultrasensitive microwave Doppler  
radar methods  
p0067 A72-14822  
Vertical dipole antenna design for CW Doppler  
radar midair collision avoidance system  
p0123 A72-16571  
Noncontacting measurements by miniature CW Doppler  
radar with semiconductor microwave generator  
p0229 A72-22691  
Continuous wave Doppler radar with microwave  
oscillator for ATC measurements and surveillance  
p0309 A72-27403  
Present status of self-contained navigation  
systems combining Doppler velocity sensors and  
altitude/heading references.  
p0546 A72-40282  
System studies, equipment simulation, hardware  
development, and flight tests of aircraft  
collision hazard warning system using  
cooperative, continuous wave radar principle  
[NASA-CR-2020] p0318 N72-20007  
Air traffic control tasks, displays, surveillance  
technology, microwave landing guidance system,  
and communication, navigation, identification  
system  
[AD-744826] p0647 N72-33645  
DORNIER AIRCRAFT  
Wind tunnel testing of Dassault-Breguet-Dornier  
Alpha Jet twin engine trainer, emphasizing tests  
for wing-campennage flutter and jet induced  
interference effects  
p0357 A72-30077

## DOSIMETERS

In-flight warning meter for solar and cosmic radiation dose equivalent measurements for radiological protection in SST aircraft [CERN-71-16] p0017 A72-12078

## DOUGLAS MILITARY AIRCRAFT

## U MILITARY AIRCRAFT

## DOVAP

## U DOPPLER EFFECT

## DOWNTIME

Helicopter elastomeric bearing rotors, discussing downtime and cost reduction, maintenance, endurance and inspection p0001 A72-10150

Concorde engines design for maintainability and reliability to reduce turnaround time, discussing diagnostic facilities and on-wing maintenance features p0401 A72-32457

## DOWNWASH

Supercooled and warm fog dispersion technology, considering air heating, helicopter downwash and seeding methods p0066 A72-14812

Downwash behind lifting surface related to loading in ideal incompressible gas by equations of motion linearization p0182 A72-19110

Rotary wing and VTOL aircraft induced downwash effects on ground personnel, considering injuries, body heat loss, work capability impairment and sound pressure effects p0360 A72-30425

Dynamic pressure, downwash and pressure gradient corrections of wind tunnel model measurements, discussing displacement limit for adequate accuracy [DFVLR-SONDDR-214] p0503 A72-38687

Downwash distribution at surface of rectangular planform wings with prescribed subsonic aerodynamic loading for various aspect ratios p0503 A72-38809

Evaluation of the downwash integral for rectangular planforms by the BAC subsonic lifting-surface method. p0503 A72-38810

European Airbus wind tunnel model aerodynamic force and downwash measurements noting jet interference reduction p0028 A72-10012

Rotor downwash variation by changing vortice diameter, flapping, rotor speed, and radius and placing infinite span wing in flow field p0037 A72-11003

Numerical evaluation of downwash integral for lifting rectangular wings noting wing loading [NPL-AERO-NOTE-1095] p0038 A72-11012

Dispersal of ice fog using helicopter downwash [AD-731215] p0171 A72-15591

Application of downwash from helicopter rotors for dissipation of fog [AD-739487] p0481 A72-27042

Calculating downwash angles behind wings with small span-chord ratios moving at subsonic speeds using nonlinear algebraic equations p0618 A72-32009

## DRAG

## NT AERODYNAMIC DRAG

## NT FRICTION DRAG

## NT INTERFERENCE DRAG

## NT MINIMUM DRAG

## NT PRESSURE DRAG

## NT SUPERSONIC DRAG

## NT VISCOUS DRAG

## NT WAVE DRAG

Area rule for change in lift/drag ratio of hypersonic delta wing due to conical body addition on compression side p0018 A72-12270

Jet aircraft brake parachute loads under engine wake, evaluating velocity and drag coefficient influences p0021 A72-12504

Tables and graphs of canopy geometry effects on drag coefficients in cross parachutes [AD-731023] p0167 A72-15017

Applicability of methods for determining internal drag and momentum loss for small ducts [NASA-TM-X-62143] p0323 A72-20272

Intrinsic thrust and drag for air breathing ducted flow engines in flight [ESDU-69006] p0631 A72-32748

## DRAG BALANCE

## U AERODYNAMIC BALANCE

## U LIFT DRAG RATIO

## DRAG CHUTES

Jet aircraft brake parachute loads under engine wake, evaluating velocity and drag coefficient influences p0021 A72-12504

Assessments of aircraft engine net thrust measurement using drag chutes [ARC-CP-1169] p0089 A72-11964

Development and characteristics of parachute fabric for aerodynamic decelerator using lightweight, variable solidity, knitted material [NASA-CASE-LAR-10776-1] p0331 A72-21004

Design and development of spin-recovery parachute systems for military aircraft and compilation of design criteria [NASA-TN-D-6866] p0480 A72-27033

## DRAG COEFFICIENT

## U AERODYNAMIC COEFFICIENTS

## U AERODYNAMIC DRAG

## DRAG DEVICES

## NT AERODYNAMIC BRAKES

## NT BALLUTES

## NT DRAG CHUTES

## NT LEADING EDGE SLATS

## NT SPLIT FLAPS

## NT SPOILERS

## NT TRAILING-EDGE FLAPS

## NT WING FLAPS

TU-154 lift and drag augmenting devices for takeoff and landing characteristics improvement p0056 A72-13472

Flight test of direct side force control by rudder deflection and asymmetrical drag on T-33 airplane, noting use in dive bombing p0310 A72-27520

## DRAG EFFECT

## U DRAG

## DRAG MEASUREMENT

Drag and lift experimental determination for low aspect ratio rectangular wings with blunt trailing edges at Mach numbers 0.5-2.2 [DGLR PAPER 71-114] p0023 A72-12712

Systematic drag measurements on rectangular and elliptical planform models with recessed surfaces or cut-outs [BAE-LIB-TRANS-1614] p0317 A72-19992

Wind tunnel drag measurement using ridges and gaps on airfoils [ARC-R/8-3698] p0583 A72-31002

## DRAG REDUCTION

Wave drag reduction by antisymmetric wing and body arrangement, discussing application to transport aircraft at supersonic speeds p0122 A72-16534

Base pressure drag reduction on rectangular wings with blunt trailing edges from low speed wind tunnel measurements [DFVLR-SONDDR-219] p0244 A72-24842

## DRAGULATORS

## U BRAKES (FOR ARRESTING MOTION)

## U DRAG DEVICES

## DRIFT (INSTRUMENTATION)

Optimum aiding of inertial navigation systems using air data. [AIAA PAPER 72-847] p0504 A72-39082

## DRILLING

Countersink boring machines with programmed digital control systems for precision spacing multiple hole drilling in extended aircraft engine components p0304 A72-26816

## DROGUE PARACHUTES

## U DRAG CHUTES

## DROGUES

## U TOWED BODIES

## DRONE AIRCRAFT

## NT JINDIVIK TARGET AIRCRAFT

## NT TARGET DRONE AIRCRAFT

Analog and digital computer simulation analysis of performance and control of low-pressure-ratio turbojet engine for drone aircraft [NASA-TM-X-2537] p0340 A72-21817

## DRONE HELICOPTERS

Analysis of performance, weight, and cost characteristics of various airframe structural materials for drone applications  
[AD-736616] p0369 N72-22034

**DRONE HELICOPTERS**  
U DRONE AIRCRAFT  
U HELICOPTERS

**DRONE VEHICLES**  
NT DRONE AIRCRAFT  
NT JINDIVIK TARGET AIRCRAFT  
NT TARGET DRONE AIRCRAFT  
Remotely manned vehicles /RMV/ application in aerial warfare, considering antiaircraft defenses lethality increase, equipment costs and role of man during combat mission  
p0344 A72-28451

**DROP TESTS**  
Ribbon parachutes drop tests at Mach 0.57-1.70, measuring opening shock loads and functioning time sequence  
p0007 A72-10312  
Static load deflection and vertical drop tests of quarter scale model of CC-115 aircraft equipped with air cushion landing system  
[AD-743829] p0624 N72-32056

**DROP WEIGHT TESTS**  
U DROP TESTS

**DROPS (LIQUIDS)**  
NT RAINDROPS

**DRY FRICTION**  
Friction coefficient, standard wear and surface layer temperature of seal for dry friction pairs in jet engines, investigating crystal lattice parameters  
p0185 A72-19768

**DTA (ANALYSIS)**  
U DIFFERENTIAL THERMAL ANALYSIS

**DTBB-111 GROUND EFFECT MACHINE**  
U GROUND EFFECT MACHINES

**DTBB-430 GROUND EFFECT MACHINE**  
U GROUND EFFECT MACHINES

**DUCTED FANS**  
Variable pitch ultrahigh bypass ratio ducted fan engine design for STOL transport aircraft  
[ASME PAPER 72-GT-61] p0297 A72-25652  
Development of antitorque concepts for helicopter control to replace main rotor/tail rotor helicopter configurations  
[AD-731493] p0206 N72-15982  
Performance tests of fan stages operating with oblique weak shocks in rotor blade tip region and analysis of damage in leading edge tip region  
[NASA-TM-X-68027] p0428 N72-24813

**DUCTED FLOW**  
Sound attenuation in lined rectangular ducts with uniform steady flow, considering aircraft engine noise reduction  
p0070 A72-15267  
Supersonic and subsonic jet flows coexistence in constant section duct, analyzing pressure on walls and in fluid and schlieren visualization  
[ONERA, TP NO. 976] p0230 A72-22813  
Secondary flow measurements in rotating ducts, obtaining pressure distributions and cross-flow velocities  
[ASME PAPER 72-GT-17] p0294 A72-25616  
Measurement of spatially coherent and incoherent structure of axial compressor-generated noise modes propagating in duct  
[ONERA, TP NO. 1045] p0311 A72-28049  
Pressure, shear stress and yaw angle measurements in flow through aircraft intake S-shaped ducts with turbulent boundary layer at entry, noting vortex generation  
p0410 A72-33403  
Optimization of acoustic linings in presence of wall shear layers.  
p0548 A72-40334  
Extension of turbulent boundary layer computer program to include compressible adiabatic flow, heat transfer, three dimensional flow, and ducted flow  
[IC-AERO-71-24] p0158 N72-14308  
Gross thrust and nozzle mass flow measurements for air breathing, ducted flow engines  
[ESDU-69007] p0631 N72-32747  
Intrinsic thrust and drag for air breathing ducted flow engines in flight  
[ESDU-69006] p0631 N72-32748

## SUBJECT INDEX

**DUCTED PROPELLERS**  
U SHROUDED PROPELLERS

**DUCTILITY**  
Superalloys ductility and workability improvements without sacrificing elevated temperature strength for aircraft engine applications  
p0021 A72-12561

**DUCTS**  
Intercomponent complex annular ducts design for gas turbine engines  
p0238 A72-23872  
Applicability of methods for determining internal drag and momentum loss for small ducts  
[NASA-TM-X-62143] p0323 N72-20272

# DYNAMIC RESPONSE

- [AIAA PAPER 72-130] p0131 A72-16920  
Nonlinear computerized simulation of air cushion vehicle dynamics, using bond graph techniques p0187 A72-20343  
Dynamical equivalence between vehicles with motor-driven constant speed rotor under bearing friction and freely spinning torque free rotor, deriving equations of motion p0191 A72-21174  
All-moving tail plane parameters influence on glider static and dynamic characteristics, discussing lateral and longitudinal stability, maneuverability and pilot induced oscillations p0196 A72-21632  
Nonlinear dynamic motion response analysis of flight vehicles typified by continuously changing vibration damping and frequency p0235 A72-23452  
Helicopter rotor blades bending vibrations, examining scale effects, dynamic similarity and natural frequencies via series of Legendre polynomials [AD-745569] p0299 A72-25733  
Concorde dynamic behavior from flight tests, discussing integrated design effects, wing, fin and elevator flutter, gust and runway response and engine surge effects [AIAA PAPER 72-381] p0350 A72-28958  
Turboprop engines dynamic parameters experimental determination by rpm transient response to instantaneous fuel supply changes p0351 A72-29137  
The controllable twist rotor performance and blade dynamics. [AHS PREPRINT 614] p0444 A72-34483  
Hingeless rotor - Experimental frequency response and dynamic characteristics with hub moment feedback controls. [AHS PREPRINT 612] p0446 A72-34494  
F-111A inlet nozzle dynamic distortion diagnostics for airframe-propulsion integration based on flight and transonic wind tunnel tests [ICAS PAPER 72-18] p0553 A72-41143  
Ground and torque relation to swivel angle and lateral displacement of wheel rim plane, using string model for tire p0557 A72-41260  
Dynamic aspects of Fokker F-28 aircraft design. p0566 A72-42831  
Inlet steady state and dynamic performance tests with F-111A and YF-12 aircraft [NASA-TM-X-67495] p0212 N72-16709  
Prediction of lateral tire dynamic properties of scale model aircraft tires using string theory [NASA-CR-2058] p0422 N72-24024  
Procedures for evaluating effect of transfer function zeros on transient response of aircraft and determining desirable regions of pole-zero locations [NASA-TM-X-2585] p0478 N72-27024
- DYNAMIC LOADS**  
NT AERODYNAMIC LOADS  
NT BLAST LOADS  
NT CYCLIC LOADS  
NT GUST LOADS  
NT IMPACT LOADS  
NT LANDING LOADS  
NT ROLLING CONTACT LOADS  
NT SHOCK LOADS  
NT THRUST LOADS  
NT TRANSIENT LOADS  
NT VIBRATORY LOADS  
NT WING LOADING  
Dynamic input to cargo in turbojet aircraft studied during C141 and C5A flights, discussing instrumentation, test procedures, data reduction processes and results p0403 A72-32625  
Dynamic input to cargo from floor of cargo space in selected military helicopters p0474 N72-26828
- DYNAMIC MODELS**  
Aeroelastic models construction for flutter analysis of aircraft design, noting error risk reduction [DGLR PAPER 71-082] p0023 A72-12722  
Finite element discrete model for large aspect ratio wing transverse vibrations, using inhomogeneous elements with various stiffness-length relations p0054 A72-13189  
Convergent-divergent nozzles thrust model measurement on supersonic aircraft afterbody [ONERA, TP NO. 978] p0116 A72-15856  
Aircraft steering dynamics model with translational and rotational equations, considering zero sideslip and acceleration and lift bank angle transfer functions p0118 A72-16112  
Increased Reynolds number simulation with roughness set on aircraft model in transonic flow, investigating flow separation by parietal visualization technique p0140 A72-17846  
Durando model overprediction of deflected jet vortex strength in subsonic cross flow p0196 A72-21631  
Near optimal closed loop control laws for fixed time pursuit-evasion differential game between two aircraft in vertical plane, using dynamic modeling p0236 A72-23805  
Linear mathematical model for twin shaft gas turbine with isolated turbocompressor, calculating dynamic constants as function of operational modes p0360 A72-30581  
Prediction models for dynamic environment experienced by cargo during air and rail transportation p0402 A72-32610  
The dynamic modeling technique for obtaining closed-loop control laws for aircraft/aircraft pursuit-evasion problems. p0502 A72-38276  
Machine code for finite difference solution of wake vortex governing equations and far flow field prediction in trailing vortices, developing turbulent energy model [AIAA PAPER 72-989] p0561 A72-42326  
Application of a time-dependent boundary-layer analysis to the problem of dynamic stall. p0599 A72-44058  
Dynamic simulation of air traffic operations in San Francisco area to determine traffic capacity [AD-727756] p0281 N72-19724
- DYNAMIC PRESSURE**  
Jet noise simple-source theory experimental verification, determining relation of measured sound power and jet pressure levels of turbojet engine p0140 A72-17856  
Characteristic overpressure concept for sonic bangs effect on structures and dynamic magnification factor engineering formula p0140 A72-17858  
Dynamic pressure, downwash and pressure gradient corrections of wind tunnel model measurements, discussing displacement limit for adequate accuracy [DFVLR-SONDDR-214] p0503 A72-38687
- DYNAMIC PROGRAMMING**  
Naval aircraft optimal repair and replacement policies determination for operation cost minimization by dynamic programming [AD-736094] p0192 A72-21470  
Lockheed airline system simulation and aircraft scheduling models. p0604 A72-44579  
Dynamic programming method for determining optimal repair and replacement policies for Naval aircraft [AD-736094] p0334 N72-21031
- DYNAMIC PROPERTIES**  
U DYNAMIC CHARACTERISTICS  
**DYNAMIC RESPONSE**  
NT TRANSIENT RESPONSE  
N-wave dynamic magnification factors for sonic bangs response on complicated structures p0069 A72-14849  
Helicopter rotor blade response to random loads treated by theory of linear dynamic systems with time-varying coefficients [AIAA PAPER 72-169] p0132 A72-16940  
Airloads and structural integrity flight testing /U.S. Air Force/, noting dynamic response, fatigue tests and temperature data acquisition p0145 A72-18490

- Motion dynamics of aircraft-autopilot closed loop system under influence of atmospheric turbulence and electric circuitry thermal noise  
p0181 A72-18990
- Dynamic response index /DRI/ minimization for personnel aircraft emergency catapult escape systems to reduce injury probability  
p0194 A72-21576
- Aerodynamic lag effects on wing bending dynamic response at supersonic speeds, noting application to stress estimation under gust loads  
p0300 A72-25922
- Aircraft structures design and development with composite materials, considering materials characteristics relations to structural components dynamic response  
p0356 A72-29691
- Complex elastic systems natural frequencies computation from measured dynamic response to harmonic excitation, applying to helicopter and transport aircraft  
p0359 A72-30326
- Determination of airfoil and rotor blade dynamic stall response.  
[AHS PREPRINT 613] p0446 A72-34495
- On the prediction of acceleration response of air cushion vehicles to random seaways and the distortion effects of the cushion inherent in scale models.  
[AIAA PAPER 72-598] p0458 A72-36538
- Flight-mechanical analysis of various flight conditions of conventional aircraft. V - Mechanical foundations /Dynamics of the rigid body/  
p0545 A72-40175
- Rigid aircraft longitudinal dynamic response to random atmospheric turbulence, defining spectral gust alleviation factors in terms of mass scale and damping ratio parameters  
p0559 A72-41641
- Atmospheric turbulence power spectra for predicting rigid aircraft center of gravity response  
[ARC-R/M-3665] p0089 N72-11965
- Computer programs for wake geometry, and blade loads and responses  
[NASA-CR-1912] p0149 N72-13977
- Rotational loading and flutter tests on straight wing space shuttle to establish damping requirements  
[NASA-TM-X-62110] p0201 N72-15940
- Wind tunnel/flight simulation of slender delta wing aircraft dynamic response to Dutch roll at low speed  
[ARC-R/M-3669] p0204 N72-15970
- Conference on shock and vibration effects on dynamic response of helicopter, aircraft, and spacecraft structures  
[AD-723349] p0215 N72-16802
- Response of flexible helicopter rotor blade to random loading near hover  
p0475 N72-26909
- Qualitative influence of eccentricity of rotor elements on dynamic deflection of rotor  
[NASA-TT-P-14390] p0528 N72-29006
- DYNAMIC STABILITY**  
NT AERODYNAMIC STABILITY  
NT AIRCRAFT STABILITY  
NT ATTITUDE STABILITY  
NT BOUNDARY LAYER STABILITY  
NT COMBUSTION STABILITY

NT FLAME STABILITY  
NT FLOW STABILITY  
NT GYROSCOPIC STABILITY  
NT HOVERING STABILITY  
NT LATERAL STABILITY  
NT LONGITUDINAL STABILITY  
NT LOW SPEED STABILITY  
NT MOTION STABILITY  
NT ROTARY STABILITY
- Pod-mounted jet engine follower force instability, analyzing two degrees of freedom system dynamics  
p0232 A72-22938
- Hingeless blades flap-lag oscillations linear stability characteristics in hovering flight, examining precone, elastic and pitch-lag coupling and induced inflow aerodynamic effects  
p0359 A72-30289
- Stability and control dynamics of helicopter hovering with heavy sling load, analyzing maneuvers for minimal excitation of pendulous motion  
[AHS PREPRINT 630] p0445 A72-34488
- Airborne towed cargo carrying bodies dynamic stability for single-point suspension system, using linearized small perturbation analysis  
[AIAA PAPER 72-986] p0561 A72-42328
- A stability analysis for tethered aerodynamically shaped balloons.  
p0594 A72-43332
- Static and dynamic stability and controllability of rigid rotor 80-105 helicopter noting feedback effects  
p0038 N72-11008
- Gust alleviation methods and lifting rotor dynamic stability  
[NASA-CR-114387] p0079 N72-11890
- DYNAMIC STRUCTURAL ANALYSIS**  
Dynamic structural analysis by finite element method, describing error bounds for eigenvalue analysis by elimination of variables  
p0055 A72-13401
- N-wave dynamic magnification factors for sonic bangs response on complicated structures  
p0069 A72-14849
- Liapunov functional stability analysis in structural dynamics problems including wave equations with nonlinear damping  
p0235 A72-23457
- Dynamic properties of thermosetting plastic composites unidirectionally reinforced by high elastic moduli boron and carbon fiber for aircraft structural applications  
p0308 A72-27343
- Dynamics of composite materials - ASME Conference, La Jolla, California, June 1972  
p0356 A72-29690
- Resonant vibration of thin walled rods and stiffened plates and cylindrical shells, noting aircraft and rocket structures  
p0413 A72-33679
- Helicopters vibration reduction through fuselage nodalization, discussing analysis method and dynamic scale model and full scale flight test results  
[AHS PREPRINT 611] p0444 A72-34487
- Dynamic strength of tangentially wound toothed blade roots  
p0506 A72-39586
- Dynamic response of structures; Proceedings of the Symposium, Stanford University, Stanford, Calif., June 28, 29, 1971.  
p0565 A72-42755
- Computerized structural analysis and integrated design of future aircraft  
p0104 N72-13007
- Conference on effects of shock and vibration on various structural systems  
[AD-723341] p0172 N72-15812
- Dynamic elastic stability of finned beam streamlined by supersonic gas flow with application to aircraft empennage  
[AD-736487] p0369 N72-22033
- Linear elastic theory and matrix methods for calculating structural oscillations in pointed arrow wings  
p0582 N72-30993
- Development of test equipment for endurance testing of airframes to determine accumulation of fatigue damage  
[AD-744280] p0625 N72-32062
- DYNAMIC TESTS**  
Dynamic deceleration anthropomorphic dummy tests of general aviation occupant lap belt/shoulder harness restraint systems  
[SAE PAPER 720325] p0291 A72-25588
- Statistical correlation techniques applied to jet aircraft autoland system dynamic ground tests with simulated engine and aerodynamic characteristics  
p0412 A72-33641
- Dynamic and static characteristics of jet engine simulators  
p0601 A72-44286
- Prediction of flight penetration of wing buffeting from wind tunnel model dynamic tests  
[ARC-CP-1171] p0042 N72-11044

### ECOLOGICAL SYSTEMS

### U ECOLOGY

### ECOLOGY

Commercial transport aircraft engine technology contribution to world air transportation, considering social and ecological compatibility with community p0408 A72-33314

### ECONOMIC ANALYSIS

Short-short haul STOL network economics for commuter ports in Detroit region, estimating service demand, aircraft number and maintenance costs p0059 A72-13696

Price/demand/cost economic aspects of carbon fiber reinforced plastics composites in aero-engine applications p0065 A72-14743

Economic analysis of aeronautical communication system via satellite, noting cost estimates and annual charge per user p0548 A72-40298

Cost analysis and economic models for European aerospace development compared to US experience [AD-725478] p0037 N72-10992

### Economical satellite aided vehicle avoidance

system for preventing midair collisions p0339 N72-21631

[NASA-CASE-ERC-10419]

Tables on economic benefits of fog dispersal as related to air traffic operations p0372 N72-22603

[AD-735214]

### ECONOMIC FACTORS

Economic evaluation of airport fog dispersal methods in the U.S., including crushed dry ice and liquid propane p0063 A72-14677

ATC technology impact on flight operations and public value of aviation, discussing microwave landing system economic aspects p0065 A72-14810

Time/frequency collision avoidance systems, discussing operating principle and economic aspects for airlines and general aviation p0066 A72-14816

Route charges system for Europe, stressing financial necessity p0069 A72-15071

German commercial airports adaptation to traffic development, considering economic factors p0119 A72-16187

Water based offshore and floating island airports planning and construction, discussing economic, technical and social aspects p0126 A72-16695

Airport financing, discussing funds, long term planning, commercial principles, private enterprise, loans and revenue p0126 A72-16698

Development trends in airborne man machine flight control, discussing optimal division between human pilot and machine in relation to total system performance and economic factors p0230 A72-22781

Fixed wing agricultural aircraft, comparing different designs in terms of performance, safety, handling and economic efficiency p0232 A72-22940

European passenger aircraft Airbus program, discussing various configurations performance, economic factors and technical support p0307 A72-27108

STOL, VTOL and V/STOL air transportation systems development, characteristics and requirements, presenting economic forecast p0311 A72-27661

Composite materials application to gas turbine fan guide vane fabrication, noting economic factors and prototypes performance in engine tests p0313 A72-28100

Quiet RTOL /reduced takeoff and landing/ short haul aircraft cost comparison with Trident 3 aircraft up to design range stage length p0394 A72-31320

Low cost flight simulator for general aviation pilot training, containing IFR instrumentation and turbulence injection device p0399 A72-32211

Airport capacity and air traffic congestion effects on airport operations in terms of time and costs p0401 A72-32454

VTOL short haul transportation applications discussing concept evolution and economic factors p0406 A72-33181

Dallas/Fort Worth airport planning and construction economics impact on community economy and life style p0407 A72-33307

Airport and air transportation benefits and costs to community and industry, considering institutional, environmental and economic issues p0408 A72-33308

Airport economic and social impact on environs in terms of community development p0408 A72-33309

Short haul air transportation system economic and political problems, noting community acceptance and passenger service standards p0408 A72-33310

Commercial airport and air transport service economic impacts on business and industrial communities p0408 A72-33312

Aero engines and propulsion systems development contribution to air transport economics and regularity, considering environmental factors p0408 A72-33313

Air transport developments effects on economy and environment, discussing government power to control airport use and location and air pollution p0455 A72-35952

Economics of a new regional airport. p0459 A72-36779

Factors to be considered in airline scheduling. p0492 A72-37745

STOL-based short haul transportation feasibility for airport congestion alleviation from airline viewpoint, discussing system requirements, economic factors and safety [AIAA PAPER 72-807] p0497 A72-38120

Economic impact of applying advanced technologies to transport airplanes. p0499 A72-38128

Operating cost comparisons between Concorde and Boeing 707 and 747 aircraft, considering profitability p0508 A72-39818

Advanced technology applications to present and future transport aircraft. p0510 A72-40051

ILS replacement by microwave landing system, considering landing phase range from acquisition to touchdown, terminal approach handling by airborne navigation system and economic advantages p0547 A72-40294

Sheet metal economics in aircraft construction based on strength/weight and stiffness/weight comparison of Al alloys and Ti alloys in relation to cost and structural weight considerations p0551 A72-41071

Short haul intercity air transportation systems requirements for successful competition with lower cost ground modes [ICAS PAPER 72-16] p0553 A72-41141

Hypersonic transports commercial applications, examining economic and noise and air pollution aspects [ICAS PAPER 72-32] p0554 A72-41157

Economic and social aspects of commercial aviation at supersonic speeds. p0559 A72-41851

Flying crane helicopters utilization in construction industry for materials transport and structural erection work, discussing technical and economic aspects p0597 A72-43637

Lockheed airline system simulation and aircraft scheduling models. p0604 A72-44579

A systems analysis of subsonic versus supersonic jet travel. p0604 A72-44580

Airports planning for West Germany, discussing geographical air traffic patterns, economic and noise aspects [DGLR PAPER 72-034] p0605 A72-44614

Airline operational problems from traffic volume increase, discussing flight safety, passenger comfort, schedule adherence and economy aspects [DGLR PAPER 72-037] p0606 A72-44618

Military aircraft construction, design and economic requirements, discussing fighter payloads, armament efficiency and fire control systems p0615 A72-45450

Evaluation of airway operations systems in Indonesia, Laos, Malaysia, and Thailand with proposed courses of action, equipment requirements, and economic factors in aeronautical telecommunications p0033 N72-10171

Economic criteria for domestic airline mergers p0113 N72-13931

Effects of aerospace and air transport industries on United States economy p0150 N72-13988

Analysis of airlines operations for several small operators to determine reasons for economic problems and alternatives for profitable services - Part 1 p0584 N72-31016

Analysis of short haul airlines operation to show history, operational problems, and economic aspects - Part 2 p0584 N72-31017

## ECONOMICS

## NT DEMAND (ECONOMICS)

Civil aviation air transportation contributing factors to American economy, considering disposable income, airline fares and time-trend variable p0016 A72-11721

Soviet look on air transport economics covering efficiency and control improvement, maintenance, work and wages, tariffs, cost and revenues, etc p0061 A72-14098

Book on IATA organization and functions, discussing international aviation history, conference machinery, enforcement of conference resolutions, air transportation economics, public corporations, etc p0237 A72-23846

Business V/STOL aircraft economic viability based on cost benefit analysis and comparison with turbine powered aircraft [SAE PAPER 720334] p0291 A72-25594

Book on world airlines economic regulation, analyzing multilateral international agreements, national aviation interests and competitive situation p0300 A72-25923

Book on air transportation, covering history, government agencies roles in economic and safety regulation of air carriers, accounting, financial and legal aspects, etc p0315 A72-28205

Aeronautical communication satellite technical and economic survey, considering wave propagation, noise, aircraft antennas and VHF and UHF links p0393 A72-31180

Commercial airlines aircraft selection factors, considering size, range, economics, traffic, runway quality, maintenance and operating costs, reliability and cargo handling p0409 A72-33333

Urban general aviation airport economics, planning, and management [NASA-CR-114406] p0169 N72-15244

Economic analysis of transport aircraft operating in transonic region with consideration of materials, aerodynamic configuration, and cruise speed [NASA-TM-X-62159] p0477 N72-27015

Future aircraft fuel resource availability and pricing, processing methods, and economic projections for period 1970 to 2000 [NASA-TM-X-62180] p0631 N72-32742

Analysis of effects of minimum transportation regulation on development of tourism and resulting expansion of airline operations p0635 N72-32984

## ECONOMY

Effects of Canadian air traffic controllers strike on economy and other transportation systems p0378 N72-22969

## EDDIES

## U VORTICES

## EDDY CURRENTS

X ray, ultrasonic and eddy current nondestructive testing of aircraft structure for maintenance and special problems p0180 A72-18840

Nondestructive eddy current method for crack detection in turbine blades [AD-743105] p0591 N72-31786

## EDDY DIFFUSION

## U TURBULENT DIFFUSION

## EDGES

## NT LEADING EDGES

## NT SHARP LEADING EDGES

## NT TRAILING EDGES

## EDUCATION

## NT FLIGHT TRAINING

## NT PILOT TRAINING

Application of Apollo Project data and training concepts to maintenance of large commercial aircraft p0040 N72-11026

Development and evaluation of C-130 aircrew training program based on systems approach

## SUBJECT INDEX

## ELASTIC DEFORMATION

- [AD-727055] p0091 N72-12064  
Academic program, research projects, and related activities of Israel Institute of Technology Department of Aeronautical Engineering  
[AD-726162] p0099 N72-12972  
Procedures for training pilots in assessment of flight systems during attendance at Empire Test Pilot School, England  
p0330 N72-20995  
Combat readiness, military training, and noise control  
[AD-739972] p0526 N72-28989
- EFFECTIVE PERCEIVED NOISE LEVELS**  
Aircraft noise duration correction for effective perceived noise level /EPNL/ computation, eliminating mathematical anomaly incurred by present FAA and ICAO prescribed method  
p0567 A72-42909  
Accuracy of aircraft noise rating procedure relative to perceived sound levels  
[NASA-CR-1883] p0101 N72-12988  
Jet aircraft noise measurements during level flights, using 727, KC-135, 707-320B, and DC-9  
[AD-739870] p0482 N72-27050
- EFFECTIVENESS**  
**NT COST EFFECTIVENESS**  
Supplement to intercity air transportation effectiveness model  
[PB-200470] p0106 N72-13024  
Computer program and subprogram descriptions for intercity air transportation effectiveness  
[PB-200471] p0106 N72-13025  
Model subprogram design for intercity air transportation effectiveness analysis by computer  
[PB-200472] p0106 N72-13026  
Subprogram design specification for intercity air transportation effectiveness model  
[PB-200475] p0106 N72-13029  
Acceptance tests for intercity air transportation effectiveness computer programs  
[PB-200476] p0106 N72-13030  
Computer program for intercity air transportation effectiveness model  
[PB-200477] p0107 N72-13031  
Computer operators manual for intercity air transportation effectiveness programs  
[PB-200478] p0107 N72-13032  
Manual for programmers for intercity air transportation effectiveness computer programs  
[PB-200479] p0107 N72-13033  
Manual for programming intercity air transportation effectiveness model  
[PB-200482] p0107 N72-13036  
Intercity air transportation effectiveness model  
[PB-200469] p0108 N72-13246
- EFFECTORS**  
**U CONTROL EQUIPMENT**
- EFFICIENCY**  
**NT COMBUSTION EFFICIENCY**  
**NT COMPRESSOR EFFICIENCY**  
**NT ENERGY CONVERSION EFFICIENCY**  
**NT NOZZLE EFFICIENCY**  
**NT POWER EFFICIENCY**  
**NT PROPELLER EFFICIENCY**  
**NT PROPULSIVE EFFICIENCY**  
**NT THERMODYNAMIC EFFICIENCY**
- EIGENVALUES**  
Dynamic structural analysis by finite element method, describing error bounds for eigenvalue analysis by elimination of variables  
p0055 A72-13401  
Ground effect wing vehicles stability in forward motion, deriving characteristic equations by linear analysis  
p0244 A72-24844  
Preliminary design of a sailplane wing for dynamic gust loads  
p0611 A72-44992
- EJECTION**  
Wind tunnel tests on prototype munitions dispenser designed for external carriage on tactical aircraft  
p0173 N72-15835  
Performance tests of protective clothing to determine effectiveness against air blast during high speed ejection  
p0274 N72-19147
- EJECTION INJURIES**  
Emergency and test ejections with Martin-Baker seats, discussing fatality and injury causes and seat reliability  
p0194 A72-21565  
Dynamic response index /DRI/ minimization for personnel aircraft emergency catapult escape systems to reduce injury probability  
p0194 A72-21576  
Seat cushion evaluation for behavior during helicopter crash or aircraft ejection and spinal injury probability  
p0194 A72-21577  
Chemically strengthened glass for eject-through frangible canopy design in aircraft emergency escape systems, noting protection against ejection injuries  
p0306 A72-27016  
Effects of Q forces on injuries during ejection/extraction escape in USAF  
p0274 N72-19144
- EJECTION SEATS**  
SR-71 aircraft ejection seat, obtaining ejection survival rate from case histories  
p0193 A72-21562  
Emergency and test ejections with Martin-Baker seats, discussing fatality and injury causes and seat reliability  
p0194 A72-21565  
Emergency systems for helicopter crew and passenger survivability improvement, discussing use of ejection seats, extraction systems parachute bail-out and shaped explosive charges  
p0195 A72-21581  
Lockheed ADP SR-1 ejection seat system for safe aircrew recovery under zero-zero, high Mach and altitude conditions, describing escape experiences with SR-71 aircraft  
p0345 A72-28701  
Effects on ejection seat catapult performance of using live load as compared to equivalent rigid load  
[AD-730635] p0205 N72-15978
- EJECTORS**  
Performance of low pressure ratio ejectors for engine nacelle cooling.  
[SAE AIR 1191] p0458 A72-36530  
Vertical takeoff aircraft wind tunnel model with high pressure ejectors to determine jet interference on aerodynamic coefficients  
p0028 N72-10007  
Thrust lift augmentation and noise reduction characteristics of compact ejectors with applications to V/STOL aircraft  
[AD-732842] p0220 N72-17025  
Structural design optimization of thrust ejector for propulsion system of vertical takeoff aircraft  
[NASA-TT-P-14305] p0523 N72-28784
- EKMAN LAYER**  
**U BOUNDARY LAYER TRANSITION**
- ELASTIC BENDING**  
Hingeless rotor helicopter blade steady state response with nonuniform inflow and elastic blade bending  
[AIAA PAPER 72-65] p0132 A72-16933  
Bending and torsional mode deformations of two dimensional elastic wing under sinusoidal and random gust  
p0407 A72-33229
- ELASTIC BODIES**  
Random vibration of linearly elastic lumped mass systems containing, nonlinear damping to ideal stationary Gaussian white noise excitation  
p0235 A72-23460
- ELASTIC BUCKLING**  
Residual buckling strength of Al alloy elastic column with fatigue crack  
[SESA PAPER 1914A] p0014 A72-11511
- ELASTIC CONSTANTS**  
**U ELASTIC PROPERTIES**
- ELASTIC DAMPING**  
Higher order forces effect on shock absorbing systems of masses interconnected by elastic and damping members of aircraft landing gears  
p0231 A72-22861
- ELASTIC DEFORMATION**  
**NT ELASTIC BENDING**  
**NT ELASTIC BUCKLING**  
Hingeless elastic helicopter blades coupled flap-lag motion under quasi-steady aerodynamic loads, reducing equations of motion to coupled

## ELASTIC PLATES

## SUBJECT INDEX

- nonlinear differential equations p0393 A72-31211
- ELASTIC PLATES**  
 Dynamic deflection of elastic rectangular plate hinged to rigid base moving under sinusoidal pressure impulse action, noting base inertia effect p0306 A72-27091  
 Sonic boom duration effects on thin circular elastic plate transient axisymmetric vibration via Hankel and Laplace transforms p0457 A72-36409
- ELASTIC PROPERTIES**  
 NT AEROELASTICITY  
 NT ELASTOPLASTICITY  
 NT PROPORTIONAL LIMIT  
 NT THERMOELASTICITY  
 NT VISCOELASTICITY  
 Massless-spring modeling of suspension-line elasticity during parachute unfurling process using Runge-Kutta integration technique [NASA-TN-D-6671] p0224 A72-17930  
 Dynamic elastic stability of finned beam streamlined by supersonic gas flow with application to aircraft empennage [AD-736487] p0369 A72-22033  
 Aerodynamic characteristics of progressing and regressing forced rotary wing flapping modes [NASA-CR-114481] p0516 A72-28019
- ELASTIC STABILITY**  
 U DAMPING
- ELASTIC STRENGTH**  
 U PROPORTIONAL LIMIT
- ELASTIC SYSTEMS**  
 Complex elastic systems natural frequencies computation from measured dynamic response to harmonic excitation, applying to helicopter and transport aircraft p0359 A72-30326
- ELASTIC WAVES**  
 NT AERODYNAMIC NOISE  
 NT AIRCRAFT NOISE  
 NT COHERENT ACOUSTIC RADIATION

 Electrodischarge and electrochemical machining applications in continuous repetitive production of aircraft jet engine components p0013 A72-11150  
 Electrical discharge-produced explosions aboard supertankers during cleaning operation and electrostatic charging of supersonic aircraft during passage through heavy rain, noting water drop disintegration p0611 A72-44979

# SUBJECT INDEX

# ELECTRIC WELDING

## ELECTRIC ENERGY STORAGE

Design, development, and evaluation of electric storage batteries used for aircraft power supplies  
[AD-733289] p0256 N72-18057

## ELECTRIC EQUIPMENT

Soviet book on electrical equipment and instrumentation of An-24 aircraft covering power sources, control, safety systems, engine, flight and navigation instruments and autopilot  
p0120 A72-16400

Proceedings of conference on advanced aircraft electrical systems with emphasis on solid state power management  
[AD-731077] p0169 N72-15234

Development and evaluation of built-in test equipment for aircraft systems  
[AD-734853] p0321 N72-20028

## ELECTRIC EQUIPMENT TESTS

Trident aircraft air-system interrogator airborne first line test apparatus for electrical components malfunction diagnosis  
p0142 A72-18154

## ELECTRIC FIELDS

Static electrification, bonding, grounding, and lightning protection techniques applied to aircraft, spacecraft, and missiles  
[AD-739356] p0480 N72-27037

Development of methods for safely grounding helicopters to remove electrostatic charge buildup with emphasis on water spray discharge  
[AD-745102] p0642 N72-33048

## ELECTRIC FILTERS

NT DIGITAL FILTERS

NT LINEAR FILTERS

NT LOW PASS FILTERS

NT OPTICAL FILTERS

Design and performance of filter resonators for helicopter noise reduction  
[AD-734812] p0275 N72-19222

## ELECTRIC GENERATORS

NT AC GENERATORS

NT ROTATING GENERATORS

NT TURBOGENERATORS

Aircraft hybrid electrical power systems, describing variable frequency generation and high voltage dc distribution  
p0011 A72-11068

German Research and Test Institute for Aero- and Astronautics 1970 report covering flow mechanics, power conversion, aerospace medicine, atmospheric physics, etc  
p0013 A72-11151

Aircraft electric power generation history, noting aircraft performance effect on electrical system design  
p0186 A72-20201

Internal engine generator application to commercial transport aircraft.  
p0453 A72-35566

Analysis and comparison of operation of two forms of cycloconverter using natural and forced commutation with application to aircraft electricity generating systems  
[RAE-TR-70092] p0091 N72-11979

Feasibility of direct current 200 V commercial aircraft electrical power system noting weight comparison with alternating current system  
[ARC-CP-1186] p0273 N72-19062

Design and characteristics of integrated engine-generator system for installation on aircraft turbojet and turbofan engines  
[NASA-TM-X-2579] p0468 N72-26037

Design and testing of brushless dc starter generator system  
[AD-738707] p0468 N72-26041

Analysis of secondary power system for use with advanced rotary wing aircraft for reliable production of electric power  
[AD-739480] p0482 N72-27069

Configuration and specifications of integrated engine-generator mounted on turbine engine shaft for secondary electric power generation  
[NASA-TM-X-68139] p0643 N72-33058

## ELECTRIC IGNITION

Turboprop electric igniter climatic test problems and equipment for assessing quality control  
p0182 A72-19112

## ELECTRIC IMPULSES

U ELECTRIC PULSES

## ELECTRIC LEADS

U ELECTRIC WIRE

## ELECTRIC MOTORS

Structural design and electrical drive mechanism of helicopter hoist for rescue operations  
p0358 A72-30097

Electrical components in gas turbine control systems.  
p0563 A72-42521

Design and characteristics of integrated engine-generator system for installation on aircraft turbojet and turbofan engines  
[NASA-TM-X-2579] p0468 N72-26037

Configuration and specifications of integrated engine-generator mounted on turbine engine shaft for secondary electric power generation  
[NASA-TM-X-68139] p0643 N72-33058

## ELECTRIC NETWORKS

Airport power supply system to meet increased load terminal demands, describing main and emergency standby network layout and equipment  
p0612 A72-45272

Analysis of wiring weight, conductor weight, and conductor losses as function of system voltage in aircraft electrical power systems  
[AD-732001] p0207 N72-16164

## ELECTRIC POWER

Variable speed constant frequency power generation equipment influence weapon system effectiveness, considering weight and cost  
p0011 A72-11067

Concorde aircraft electrical power systems design, noting dc and emergency supplies and installation  
p0053 A72-12910

Aircraft electric power equipment transient voltage and EMC limits specifications  
p0061 A72-14043

Airborne equipment electric power supply standards to provide characteristics limits for compatibility with ground support systems  
[SAE AS 1212] p0458 A72-36535

## ELECTRIC POWER CONVERSION

U ELECTRIC GENERATORS

## ELECTRIC POWER PLANTS

NT NUCLEAR POWER PLANTS

Airport power supply system to meet increased load terminal demands, describing main and emergency standby network layout and equipment  
p0612 A72-45272

## ELECTRIC POWER SUPPLIES

Aircraft electrical power systems design dependence on latitude, minimum weight requirement, reliability degree, environmental conditions and acceleration  
p0344 A72-28693

Design and development of electric power supplies for use with transport aircraft in 1980 to 1985 time period  
[NASA-CR-120939] p0517 N72-28028

Configuration and specifications of integrated engine-generator mounted on turbine engine shaft for secondary electric power generation  
[NASA-TM-X-68139] p0643 N72-33058

## ELECTRIC POWER TRANSMISSION

Remote power control for aircraft generating and distribution systems.  
p0461 A72-37034

## ELECTRIC PULSES

USSR electric impulse de-icing system design.  
p0461 A72-37033

## ELECTRIC RELAYS

Reduced voltage relay operation in aircraft high voltage ac power systems, describing RLC circuit theory, laboratory test arrangement and performance measurements  
p0394 A72-31215

## ELECTRIC SPARKS

Sonic boom simulation devices and techniques, including wind tunnels, ballistic ranges, spark discharges and shock tubes  
p0198 A72-21906

## ELECTRIC STRAIN GAGES

U STRAIN GAGES

## ELECTRIC TERMINALS

Design and evaluation of reliable integrated termination devices  
[AD-744476] p0626 N72-32245

## ELECTRIC WELDING

NT PLASMA ARC WELDING

## ELECTRIC WIRE

## ELECTRIC WIRE

## NT EXPLODING WIRES

Thin wall airframe wire insulation relative thermal life and temperature rating evaluation procedure using Arrhenius plot

p0233 A72-23270

Avionics systems electrical interface connection design information document creation and dissemination, using EMPRENT computer program

p0244 A72-24864

Sizing new generation aircraft wire and circuit breakers utilizing computer techniques.

p0453 A72-35568

## ELECTRIC WIRING

## U ELECTRIC WIRE

## ELECTRICAL BREAKDOWN

## U ELECTRICAL FAULTS

## ELECTRICAL ENERGY

## U ELECTRIC POWER

## ELECTRICAL ENGINEERING

Engineering and operational factors of electronic multisensor aircraft displays

p0375 N72-22636

## ELECTRICAL FAULTS

Trident aircraft air-system interrogator airborne first line test apparatus for electrical components malfunction diagnosis

p0142 A72-18154

Onboard localization of aircraft electrical equipment failures, using list checkout, automatic indication and dynamic programming method

p0304 A72-26895

High intensity sound effects on electronic equipment and components in aircraft noise environment, noting whisker diode and printed circuit board damage

p0403 A72-32621

## ELECTRICAL INSULATION

Thin wall airframe wire insulation relative thermal life and temperature rating evaluation procedure using Arrhenius plot

p0233 A72-23270

## ELECTRICAL PROPERTIES

## NT DIELECTRIC PROPERTIES

## ELECTRICALLY SUSPENDED GYROSCOPES

## U ELECTROSTATIC GYROSCOPES

## ELECTRICITY

## NT ATMOSPHERIC ELECTRICITY

## NT STATIC ELECTRICITY

## ELECTROCHEMICAL CELLS

## NT ELECTRIC BATTERIES

## ELECTROCHEMICAL CORROSION

Elastomeric protective coating requirements from existing electrochemical metallic corrosion theories

p0062 A72-14238

## ELECTROCHEMICAL MACHINING

Electrodischarge and electrochemical machining applications in continuous repetitive production of aircraft jet engine components

p0013 A72-11150

## ELECTROCONDUCTIVITY

Aircraft windscreen design, discussing high impact strength glass, electroconductive film, transparency service life and weight reduction

p0305 A72-27006

## ELECTRODEPOSITION

Electrodeposition of paints on aircraft aluminum and magnesium alloys [D-MAT/AV-175]

p0535 N72-29570

## ELECTRODYNAMICS

## NT ELECTROHYDRODYNAMICS

## ELECTROGENERATORS

## U ELECTRIC GENERATORS

## ELECTROHYDRAULIC CONTROL

## U ELECTRIC CONTROL

## U HYDRAULIC CONTROL

## ELECTROHYDRODYNAMICS

Multiplex electrohydraulic system for aircraft fly by wire actuators with majority voting and pressure logic, discussing frequency response and environmental tests

p0199 A72-22152

## ELECTROKINETICS

Electrofluid dynamic energy conversion for wind tunnel augmentation

p0468 N72-26210

## SUBJECT INDEX

## ELECTROLUMINESCENCE

Flight test data on all-electroluminescent lighted display panel in aircraft cockpit

p0376 N72-22644

## ELECTROLUMINESCENT LAMPS

## U ELECTROLUMINESCENCE

## ELECTROLYTIC GRINDING

## U ELECTROCHEMICAL MACHINING

## ELECTROMAGNETIC COMPATIBILITY

Pulse coded processing system EMC performance measurement, considering CW and pulsed interference effects and application to ATC radar beacon system transponders

p0061 A72-14033

Computer aided, intrasystem electromagnetic compatibility prediction programs, discussing mathematical models and program philosophies

p0061 A72-14039

Aircraft electric power equipment transient voltage and EMC limits specifications

p0061 A72-14043

Time discrimination utilization in EMC, considering automatic position telemetering system using time division technique

p0061 A72-14047

Collision avoidance system electromagnetic compatibility with radar altimeters designed for 1600 MHz aeronavigation band

p0550 A72-40881

## ELECTROMAGNETIC CONTROL

## U ELECTROMAGNETS

## U REMOTE CONTROL

## ELECTROMAGNETIC DEDUCTION

## U MAGNETIC INDUCTION

## ELECTROMAGNETIC FIELDS

## NT FAR FIELDS

Numerical analysis of surface current density distribution and electromagnetic fields of conducting body, noting radiation patterns of radial dipole and quarter wavelength monopole

p0344 A72-28541

## ELECTROMAGNETIC INTERFERENCE

## NT ELECTROMAGNETIC NOISE

## NT RADIO FREQUENCY INTERFERENCE

## NT THERMAL NOISE

## NT WHITE NOISE

Pulse coded processing system EMC performance measurement, considering CW and pulsed interference effects and application to ATC radar beacon system transponders

p0061 A72-14033

Minimum frequency separation between avionics receivers and transmitters for acceptable interference level

p0189 A72-20929

Radiation patterns and comparisons of propagation models for use with interference predictions for VHF/UHF air navigation aids [AD-718465]

p0171 N72-15598

## ELECTROMAGNETIC MEASUREMENT

Electromagnetic position sensor for magnetically supported model in wind tunnel, discussing design, operation principles and performance

p0243 A72-24773

Determination of the radiation characteristics of aircraft antennas in flight

p0549 A72-40534

## ELECTROMAGNETIC NOISE

## NT THERMAL NOISE

## NT WHITE NOISE

Subtraction circuit design for impulse noise elimination at front end of aircraft oriented OMEGA navigation system receiver

p0354 A72-29204

Aeronautical communication satellite technical and economic survey, considering wave propagation, noise, aircraft antennas and VHF and UHF links

p0393 A72-31180

## ELECTROMAGNETIC PROPAGATION

## U ELECTROMAGNETIC WAVE TRANSMISSION

## ELECTROMAGNETIC PROPERTIES

## NT COLOR

## NT OPTICAL PROPERTIES

## NT OPTICAL REFLECTION

## NT REFLECTANCE

## NT REFRACTIVITY

## NT TRANSPARENCY

## ELECTROMAGNETIC RADIATION

## NT AIRGLOW

- Onboard localization of aircraft electrical equipment failures, using list checkout, automatic indication and dynamic programming method p0304 A72-26895
- Design, operation and testing of integrated STOL flight control system, noting approach accuracy and passenger comfort improvement p0547 A72-40292
- ELECTRONIC MODULES
- Computerized modular automatic test equipment for commercial airliner avionics device performance, discussing data handling ability and cost effectiveness p0143 A72-18250

## ELECTRONIC PACKAGING

Airborne flight test data acquisition system modular design to provide digital readings from monitoring transducers analog signal

p0412 A72-33645

An all solid-state MIC transmit-receive module.

p0489 A72-37268

TCE-71A area navigation system based on modular design with provision for 20 waypoints parameter storage, describing computer, control display and automatic data entry units

p0546 A72-40278

Development of air navigation system using liquid crystals and electronic equipment to determine direction to selected VOR station

[NASA-CR-112062] p0389 N72-23664

Development of Mylar enclosure for maintaining temperature of balloon-borne batteries and electronic modules

[NASA-CASE-GSC-11620-1] p0644 N72-33379

## ELECTRONIC PACKAGING

Planar coax micropackaging of minicomputers for aircraft navigation and military systems, noting environmental tests

p0115 A72-15772

Weight saving, vibration proofing and heat dissipating techniques in avionics packaging, considering B-1 bomber electronic multiplexing system example

p0508 A72-39768

## ELECTRONIC SIGNAL MEASUREMENT

## U SIGNAL MEASUREMENT

## ELECTRONIC SWITCHES

## U SWITCHING CIRCUITS

## ELECTRONICS

Electronics and aerospace systems - IEEE Conference, Washington, D.C., October 1971

p0018 A72-12376

Bell lifting rotor systems, examining company contributions in electronics and avionics

p0245 A72-24877

NAECON '72; Proceedings of the National Aerospace Electronics Conference, Dayton, Ohio, May 15-17, 1972.

p0452 A72-35551

## ELECTROSTATIC CHARGE

Electrostatic charge on an aircraft and lightning striking the aircraft

p0545 A72-40171

Static electricity in fueling of supertankers

p0557 A72-41375

Electrical discharge-produced explosions aboard supertankers during cleaning operation and electrostatic charging of supersonic aircraft during passage through heavy rain, noting water drop disintegration

p0611 A72-44979

Electrostatic charging in handling of aviation fuels, resulting in incendiary sparking in fuel tank

p0048 N72-11686

## ELECTROSTATIC FIELDS

## U ELECTRIC FIELDS

## ELECTROSTATIC GYROSCOPES

USAF development of electrostatic gyros for inertial air navigation, noting flight tests and associated airborne digital computer

p0453 A72-35558

## ELECTROSTATICS

Development of methods for safely grounding helicopters to remove electrostatic charge buildup with emphasis on water spray discharge

[AD-745102] p0642 N72-33048

## ELEMENTARY PARTICLES

## NT NUCLEONS

## ELEVATORS (CONTROL SURFACES)

Aircraft flight characteristics for landing approach by spoiler-elevator deflection coupling, considering pitch, flight path angle and speed

p0410 A72-33423

Elevator lift and cockpit position effects on flight altitude control during aircraft landing approach

[ARC-R-M-3662] p0043 N72-11049

## EMBEDDING

Hexamethylene diisocyanate for rehardening of EC-2273 potting compound in F-4 aircraft electrical components

[AD-726180] p0094 N72-12518

## SUBJECT INDEX

## EMERGENCIES

Techniques for reducing injuries during emergency landing of light, fixed-wing aircraft

[FTSB-AAS-72-3] p0465 N72-26011

Inflight emergency on DC-10 aircraft near Windsor, Ontario, Canada on 12 June 1972 due to accidental opening of cargo door in fuselage

[SB-72-69/878A] p0572 N72-30006

## EMERGENCY LIFE SUSTAINING SYSTEMS

Dynamic response index /DRI/ minimization for personnel aircraft emergency catapult escape systems to reduce injury probability

p0194 A72-21576

Lockheed ADP SR-1 ejection seat system for safe aircrew recovery under zero-zero, high Mach and altitude conditions, describing escape experiences with SR-71 aircraft

p0345 A72-28701

## EMISSION

## NT ELECTROLUMINESCENCE

## NT THERMAL EMISSION

## EMISSION SPECTRA

High resolution observation of stratospheric submillimeter thermal emission spectrum by helium-cooled InSb electron bolometer on board Comet 2E aircraft

p0245 A72-25023

## EMISSOGRAPHS

## U RECORDING INSTRUMENTS

## EMPLOYEE RELATIONS

Effects of Canadian air traffic controllers strike on economy and other transportation systems

p0378 N72-22969

## EMULSIONS

## NT PHOTOGRAPHIC EMULSIONS

Various gelled or emulsified fuels for reducing aircraft crash-fire hazard

p0049 N72-11689

## ENCODERS

## U CODERS

## ENDOTHERMIC REACTIONS

Cooling advanced engines by endothermic reactions of hydrocarbon fuels by absorbing sensible and latent heat

p0047 N72-11672

## ENERGY ABSORPTION

Energy absorbing seat design for light aircraft, describing development and static and dynamic testing

[SAE PAPER 720322] p0290 A72-25585

An assessment of energy absorbing devices for prospective use in aircraft impact situations

p0565 A72-42764

Development and characteristics of turbine type energy absorber arresting gear for use on aircraft carriers

[AD-728692] p0108 N72-13249

## ENERGY BUDGETS

## NT ATMOSPHERIC HEAT BUDGET

Fluid flow across balance surface moving at constant velocity relative to coordinate system, calculating energy balance of turbojet engine

p0550 A72-40814

Energy flow diagrams

p0607 A72-44686

## ENERGY CONVERSION EFFICIENCY

A method for estimation of axial turbomachinery stage characteristics on the basis of experimentally obtained data with a runner tested in a free blow-out aerodynamical scheme

p0614 A72-45364

Flow analysis in the axial-flow compressor impeller with meridional stream acceleration

p0614 A72-45371

## ENERGY DISSIPATION

Secondary losses reduction procedure in axial flow turbine stages, using boundary layer fences on blades profile suction side

p0229 A72-22634

French monograph on flow near rotor blade tips, discussing three dimensional circulation and boundary layer effects, energy losses, velocity and pressure distributions, etc

p0363 A72-30950

Weight saving, vibration proofing and heat dissipating techniques in avionics packaging, considering B-1 bomber electronic multiplexing system example

p0508 A72-39768

# SUBJECT INDEX

# ENGINE DESIGN

## ENERGY DISTRIBUTION

### NT SPECTRAL ENERGY DISTRIBUTION

### ENERGY EXCHANGE

### U ENERGY TRANSFER

### ENERGY LOSSES

### U ENERGY DISSIPATION

### ENERGY METHODS

Supersonic aircraft energy turns.

p0599 A72-44196

### ENERGY REQUIREMENTS

USSR electric impulse de-icing system design.

p0461 A72-37033

Radiation patterns and transmitter power needed

for two-bay antenna used with VOR approach

marker beacon

[FAA-RD-72-33]

p0261 N72-18659

Energy used in intercity freight transportation by

water, rail, pipeline, truck, and air, and

effect of fuel price increases.

[R-804-NSP]

p0390 N72-23979

### ENERGY SOURCES

Computer memory loading, compiler language

revisions for military applications, and

research and development in aircraft power systems

[AD-734143]

p0275 N72-19255

### ENERGY SPECTRA

CAT inducing atmospheric conditions effects on SST

flight, discussing turbulence in convective

clouds and kinetic energy spectra of atmospheric

motions

p0064 A72-14693

### ENERGY STORAGE

### NT ELECTRIC ENERGY STORAGE

### ENERGY TRANSFER

### NT LINEAR ENERGY TRANSFER (LET)

Flutter problem wing-air flow energy exchange at

instability limit, obtaining vibration mode

shapes from homogeneous boundary value problem

analog model

p0054 A72-13191

Wave energy exchanger for hybrid propulsion system.

[ICAS PAPER 72-47]

p0555 A72-41172

Energy flow diagrams.

p0607 A72-44686

Basic turbine concepts including flow, energy

transfer, and performance characteristics

p0473 N72-26687

### ENGINE CONTROL

### NT TURBOJET ENGINE CONTROL

Concorde engine performance, reviewing control,

reheat and exhaust systems

[SAE PAPER 710775]

p0005 A72-10267

Aircraft power plant management, discussing

integration of intake, engine and exhaust system

from control standpoint

p0055 A72-13418

Olympus engine flight testing for lightweight and

antiicing, engine control and noise and

vibration assessments in support of Concorde

aircraft development

p0197 A72-21898

Transient Characteristics and steady state

off-design operation of mixed and unmixed type

turbobfan engines, noting peculiarities in

control characteristics

p0228 A72-22626

Optimal control of two shaft gas turbine engine in

helicopter, using cybernetic equipment.

p0231 A72-22862

Propulsion control systems design for military and

commercial V/STOL aircraft, considering power

management performance with minimum weight and

maximum reliability and maintainability

[ASME PAPER 72-GT-79]

p0297 A72-25659

Fluidics - A potential technology for aircraft

engine control.

p0494 A72-38047

A fluidic sensor for closed loop engine

acceleration control.

p0495 A72-38049

Electrical components in gas turbine control

systems.

p0563 A72-42521

Thermodynamic cycle parameter effects on bypass

turbobfan jet engine fuel consumption and

performance under various flight conditions and

engine ratings

p0600 A72-44281

Use of modeling and simulation methods in the

design of gas turbine engine control systems

p0601 A72-44283

Optimal synthesis of a two-parameter continuous

controller for a jet engine with an afterburner

p0601 A72-44284

Planning and management requirements for aircraft

jet engine control system research and development

p0601 A72-44285

Synthesis of the control systems of a two-shaft

helicopter gas turbine engine

p0601 A72-44289

Use of fluidic elements for jet engine controllers

p0601 A72-44290

Analog model of gas turbine engine control

systems, using statistical estimates and flow

rate, heat conduction and dynamic equations

p0602 A72-44293

Nonlinear digital modeling of gas turbine

propulsion units

p0602 A72-44294

Digital computer control of mixed-compression

inlet for turbojet engine

[NASA-TN-D-6880]

p0537 N72-29803

### ENGINE COOLANTS

Aircraft engines high pressure turbine guide vanes

air cooling by internal insert, analyzing

thermal stresses

[AIAA PAPER 72-7]

p0129 A72-16864

Low conductivity insulating coating /graded

thermal barrier/ to cool gas turbine engine with

high pressure ratio and inlet temperature

[AIAA PAPER 72-361]

p0286 A72-25389

Turbine aerodynamics research trends, covering

engine cooling, high work factor turbines,

pneumatic variable geometry and computer analysis

p0301 A72-26036

Heat generation sources in high speed cylindrical

roller bearings for gas turbine oil cooler design

p0313 A72-28111

Cooling advanced engines by endothermic reactions

of hydrocarbon fuels by absorbing sensible and

latent heat

p0047 N72-11672

### ENGINE DESIGN

Propulsion system optimization for commercial

transport aircraft design under advanced

Transport Technology study, considering impact

on aircraft gross weight

[SAE PAPER 710760]

p0005 A72-10257

Advanced technology air transports propulsion

system requirements, considering design, engine

performance and reliability, maintenance,

airline problems, noise and pollution control

[SAE PAPER 710761]

p0005 A72-10258

Graphite fiber composite fan blade design for

subsonic turbofan engines, discussing weight and

fatigue sensitivity reductions and performance

test results

[SAE PAPER 710771]

p0005 A72-10265

Small three spool, reverse and mixed flow turbobfan

engine for business jets, discussing fuel

consumption reduction, thermodynamic

performance, efficiency and maintainability

[SAE PAPER 710776]

p0005 A72-10268

Aircraft power plant design and installation

influence on operational effectiveness,

discussing manufacturers and operators

cooperation for reliability and maintainability

enhancement

[SAE PAPER 710777]

p0006 A72-10269

Airline Propulsion Team approach to DC-10 aircraft

power plant design for maximum operational

effectiveness

[SAE PAPER 710778]

p0006 A72-10270

CF6 high bypass ratio turbobfan engine design

improvements for fuel consumption, thrust/weight

ratio, starting, noise level, smoke emission,

maintenance, monitoring and accessory replacement

[SAE PAPER 710779]

p0006 A72-10271

PT6 and JT15D gas turbine aircraft engines

development and service experience

p0015 A72-11699

Q/STOL jet aircraft engines design for low noise

levels, describing takeoff thrust, bypass ratio

and turbine stages

p0020 A72-12501

Disk shaped lift engine providing additional

thrust during takeoff and transition phases of

- V/STOL aircraft, returning to ground by jet after task accomplishment p0025 A72-12900
- Propulsion twin spool power plant design and dimensioning with selective high pressure cut-off for supersonic aircraft with part of flight in subsonic range [DPVLR-SONDDR-169] p0058 A72-13608
- NASA Quiet Engine experimental program for jet aircraft noise reduction, discussing aerodynamic and acoustic evaluation and tests of three fans p0059 A72-13679
- GE CF6-50 high-bypass two-spool engine development, discussing configuration, installation, endurance tests and various failures p0059 A72-13681
- Aircraft air breathing propulsion technology, discussing two-place aircraft, turbofan power plants, helicopter engines and V/STOL, CTOL, subsonic transports and supersonic aircraft p0067 A72-14825
- Jet aircraft noise reduction, discussing engine design modifications p0070 A72-15167
- Soviet book on thermal and gas dynamic design of gas turbines in aircraft and liquid propellant rocket engines, covering three dimensional flows, temperature distribution, component cooling, etc p0070 A72-15246
- Aircraft noise measurement units and methods, discussing engine design for noise reduction p0118 A72-16026
- High intensity combustion chamber design for gas turbine of jet engine, considering primary, secondary and dilution zones p0122 A72-16491
- Aircraft gas turbine engine and components post-war development in Japan p0122 A72-16499
- Aircraft and reusable spacecraft propulsion systems current status and future development, discussing noise and exhaust emission problems, V/STOL bypass and fan engines, ramjets, etc p0127 A72-16735
- Gas turbine engine inlet solid particle separator designed as integral engine part, discussing semireverse flow superiority p0175 A72-18755
- Inlet duct and turbofan engine compatibility without stalling and surge conditions obtained by design optimization and wind tunnel testing p0176 A72-18761
- Manufacturer viewpoint on aircraft engine safe introduction into airline service, discussing JT9D engine design for 747 aircraft p0178 A72-18830
- Astafan turbofan engine with variable pitch fan rotor blades for thrust variation, discussing gearbox and core engine design p0188 A72-20459
- Commercially available aircraft turbofan engines specifications, describing design features and performance characteristics p0189 A72-20625
- Soviet civil gas turbine engines construction and performance, noting relatively high specific fuel consumption p0191 A72-21275
- Intercomponent complex annular ducts design for gas turbine engines p0238 A72-23872
- STOL and V/STOL transport aircraft design requirements consideration based on common propulsion and lift engine types use, noting fan lift solution superiority p0244 A72-24865
- T63/250 engine program current status, covering turboshaft helicopter engine and fixed wing aircraft powerplant models and applications [SAE PAPER 720350] p0292 A72-25601
- Two spool geared fan jet engine design and development for general aviation, discussing performance, reliability and ecological aspects [SAE PAPER 720351] p0292 A72-25602
- High bypass ratio JT15D-1 turbofan engine design and development testing [SAE PAPER 720352] p0292 A72-25603
- Small radial inflow turbines for space applications, considering blade-shroud clearance, blade loading and exit diffuser design [ASME PAPER 72-GT-42] p0295 A72-25636
- Variable pitch ultrahigh bypass ratio ducted fan engine design for STOL transport aircraft [ASME PAPER 72-GT-61] p0297 A72-25652
- Integral and remote powered lift fan engines design for large civilian VTOL transports [ASME PAPER 72-GT-65] p0297 A72-25654
- Propulsion system design for military VTOL aircraft, emphasizing subsonic cruise to maximum thrust ratio and exhaust downwash characteristics [ASME PAPER 72-GT-73] p0297 A72-25655
- Design considerations in selecting geometries for high pressure ratio single stage centrifugal compressors [ASME PAPER 72-GT-91] p0298 A72-25665
- Mixing parameter design of high loading spray type combustor for lift jet engine, using primary zone [ASME PAPER 72-GT-99] p0298 A72-25668
- Steady state radial inlet pressure distortion index for axial flow compressor, examining radial velocity, continuity equation and mathematical model [ASME PAPER 72-GT-109] p0299 A72-25673
- Turbomeca Astafan geared fan engine with axial centrifugal compressor design, specifications and performance p0311 A72-27748
- Gas turbine units with constant pressure cycle, discussing design and optimization method p0314 A72-28149
- Stage removal and addition effect on multistage axial compressor for application in engine design p0395 A72-31706
- Integrated data acquisition and processing system for inlet-aircraft engine matching, considering all-digital, analog and hybrid approach p0400 A72-32319
- RB 211 three-shaft turbofan engine for L-1011 airliner, describing design for noise reduction p0400 A72-32428
- Concorde engines design for maintainability and reliability to reduce turnaround time, discussing diagnostic facilities and on-wing maintenance features p0401 A72-32457
- Commercial transport aircraft engine technology contribution to world air transportation, considering social and ecological compatibility with community p0408 A72-33314
- Jet aircraft gas turbine engine technology impact on safety, reliability, airline profitability and international trade p0408 A72-33315
- NASA/General Electric joint development of low noise propulsion technology, describing demonstrator engine A design, components development and aerodynamic/acoustic performance evaluation [AIAA PAPER 72-657] p0414 A72-34077
- F-100 and F-401 turbofan engine design and development for F-15 and F-14, discussing impingement cooling, Ti alloys, powder metallurgy and metal composites, etc p0442 A72-34390
- Lynx helicopter RS 360 turboshaft engine, describing modular design for maintainability p0449 A72-34927
- NASA program for low cost turbojet and turbofan engine fabrication for missile and light aircraft propulsion p0491 A72-37637
- Pulsed jet engine of Messerschmitt-Boelkow-Blohm without valve flaps p0494 A72-38031
- Influence of the structural format on the range of critical rotational speeds of rotors in aircraft engines p0508 A72-39801
- Quiet engine design for V/STOL and reduced takeoff and landing /RTOL/ aircraft, discussing various engine noise sources, countermeasures and tolerance levels p0509 A72-39819
- Russian book - The ASH-62IR engine /4th enlarged edition/.

## SUBJECT INDEX

## ENGINE INLETS

- Iterative solution to aerodynamic design of axial flow compressors used in turbojet engines, calculating meridional velocity distribution p0548 A72-40463
- Theoretical and experimental study of a dual-mode ramjet /flight range from Mach 3.5 to 7/ [ICAS PAPER 72-24] p0550 A72-40930
- Elements of the theory of gas-turbine-unit designs p0553 A72-41149
- Engine selection for specific aircraft design and mission, considering bypass and pressure ratios and turbine temperature effects on performance and weight p0559 A72-41700
- [SAWE PAPER 910] p0595 A72-43457
- IL-62 aircraft propulsion system design and installation details, operational surveillance system and maintenance operations p0597 A72-43639
- Basic dimensionless geometrical relations for the combustion chambers of aircraft gas turbine engines p0598 A72-43674
- Contribution to the determination of the characteristics of a gas turbine engine for a helicopter and to the choice of the throttling law p0600 A72-44277
- Development and application of modular design concept to improve jet aircraft engine maintenance p0040 N72-11030
- Cascade calculations and tests of blunt trailing edge blades used in advanced axial compressor concepts [AD-725789] p0045 N72-11308
- Analysis of gear reduction concepts for power train systems used with low bypass ratio, single spool, geared turbofan engine for aircraft propulsion [NASA-CR-72735] p0093 N72-12413
- Influence of engine design and thrust vector control on transition characteristics of VTOL transport aircraft [NASA-TT-F-14059] p0151 N72-13993
- Design of low pressure ratio fan lift engines for civilian VTOL transport aircraft [NASA-TN-X-67977] p0162 N72-14793
- Heat transfer design analysis of air-cooled plug-nozzle system for supersonic cruise aircraft engine [NASA-TN-X-2475] p0174 N72-15892
- Aerodynamic and mechanical design of two-stage, highly-loaded fan for advanced aircraft, and tests with uniform and distorted inlet flow [NASA-CR-120859] p0326 N72-20763
- Thermodynamic and geometric characteristics of pulsejet engines [REPT-891] p0326 N72-20765
- Numerical analysis of parameters in multistage gas turbine engines and components [AD-736489] p0340 N72-21827
- Effect of slots and vortex generators on efficiency and stable operation of highly loaded compressor stages [NASA-CR-72793] p0377 N72-22791
- Development and characteristics of short length, double-annular, ram-induction combustor for turbofan engine operating at Mach 3 [NASA-CR-120908] p0377 N72-22792
- Interference problems of airframe engine integration in aircraft design optimization [AGARD-LS-53] p0478 N72-27016
- Determination of thrust and drag characteristics for integrated aircraft engine design optimization p0478 N72-27023
- Design and fabrication of low cost turbojet and turbofan engines [NASA-TN-X-68085] p0487 N72-27816
- Design and development of movable turbine inlet guide vanes to provide aerodynamic choking for jet engine [NASA-CASE-LAR-10642-1] p0487 N72-27820
- Mission requirements and design modifications for air breathing engines used in space shuttles [NASA-TN-X-68098] p0524 N72-28794
- Performance test of three stage turbine engine with tandem blading to determine steady state stresses and vibration effects [NASA-CR-2097] p0538 N72-29806
- Operating principles of main components of fuel flow control unit for USSR turbofan engine [AD-742368] p0539 N72-29816
- Engine design studies for subsonic commercial transport aircraft [NASA-TN-X-2625] p0580 N72-30778
- History of Curtis D-12 aircraft engine to show design, development, manufacture, and application p0590 N72-31781
- Design and operation of first-stage and two-stage of small, low cost turbofan engine to determine specific work, torque, mass flow, and efficiency [NASA-TN-D-6967] p0626 N72-32072
- Theory, design, and operating principles of aircraft turbomachines [AD-744183] p0632 N72-32773
- ENGINE FAILURE**
- STOL aircraft roll moment control possibility for externally-blown jet flap due to engine failure p0015 A72-11700
- Lubrication system filtration effects on rolling element bearing life and extended mean time to failure of gas turbine engines p0175 A72-18754
- Aircraft gas turbine engine monitoring for failure prevention, evaluating condition through spectrum analysis and real time correlation techniques p0177 A72-18766
- Engine out flight training safety, recommending certification requirements or training procedures, changes p0179 A72-18834
- Attack helicopters engine failure problems, discussing flight test results in transition from powered high speed flight to autorotational flight p0190 A72-21011
- Russian book on aircraft engine reliability covering defects, fractures and failure analysis, service life prediction, production deficiencies and operational conditions p0301 A72-26068
- Hydraulic transmission for driving helicopter tail rotor, noting compensatory system for engine failure p0311 A72-27862
- Russian book - The ASH-62IR engine /4th enlarged edition/. p0548 A72-40463
- Report of aircraft incident on Boeing 747 commercial aircraft resulting from engine failure during climbout after takeoff from Honolulu, Hawaii [NTSB-AAR-71-16] p0166 N72-15005
- Afterburning steady state performance and operational limits of TF-30 turbofan engine [NASA-TN-D-6839] p0477 N72-27014
- Engine failure dependence on flying hours and sortie history [AD-743400] p0591 N72-31792
- Aircraft accident involving Boeing 737 aircraft during takeoff from Philadelphia, Pennsylvania airport on 19 Jul. 70 [PB-208664] p0641 N72-33042
- ENGINE INLETS**
- Dusty inlet air filtering in aircraft turbine engines, discussing engine operation, dust and filter characteristics p0119 A72-16179
- Turbine inlet temperature sensor for gas turbine engines, using noble metal thermoelements with high signal level [SAE PAPER 720160] p0136 A72-17322
- Simulated testing of turbojet engine ingestion of missile exhaust, determining design criteria for aircraft engine inlets from altitude chamber test data p0176 A72-18758
- Turbine inlet gas temperature limiting systems design and operation in turboprop engines, describing blocking mechanism, delaying element and altitude compensation p0311 A72-27863
- Integrated data acquisition and processing system for inlet-aircraft engine matching, considering all-digital, analog and hybrid approach p0400 A72-32319

- Engine inlet total pressure distortion effects on multistage axial compressor and turbojet/turbofan engine performance and stability, considering inlet-engine compatibility [ICAS PAPER 72-19] p0553 A72-41144
- Calculation of the recirculation flow of VTOL lift engines. [ICAS PAPER 72-42] p0555 A72-41167
- Installation caused flow distortion and its effect on noise from a fan designed for turbofan engines. [AIAA PAPER 72-1006] p0558 A72-41590
- Axisymmetric jet stretcher diffuser performance for ramjet engine inlet configurations, testing at angles of attack and supersonic flow velocities [AIAA PAPER 72-1024] p0558 A72-41602
- Wall porosity and angle of attack effects on jet stretcher flow field for supersonic engine inlet testing, using three dimensional method of characteristics [AIAA PAPER 72-1025] p0558 A72-41603
- Full-scale inlet/engine testing at high maneuvering angles at transonic velocities. [AIAA PAPER 72-1026] p0558 A72-41604
- Analytical method for combining the interaction of inlet distortion and turbulence. p0594 A72-43330
- Analysis of interaction of oblique shock with bow shock of blunt leading edge and application to design of hypersonic ramjet inlets [AD-726111] p0045 N72-11312
- Transonic performance of double flux engine nacelle air intake and afterbody at high Reynolds numbers p0075 N72-11866
- Application of linear stochastic optimal control theory to design of control system for air inlet of supersonic propulsion system [NASA-TN-X-67905] p0079 N72-11897
- Development of methods for determining inlet shock position from wall static profiles in mixed compression supersonic inlet [NASA-TN-X-2397] p0096 N72-12780
- Computation of potential flow around axisymmetric bodies, cowl, and engine inlets using singularity method [AVA-FB-7131] p0324 N72-20331
- Performance tests of turbojet engine with axisymmetric mixed-compression supersonic inlet and single spool rotor [NASA-TN-X-2558] p0390 N72-23837
- Application of streamline curvature method for determining performance of turbofans and comparison with empirical results [NAL-TR-268T] p0476 N72-26999
- Development and evaluation of fluidic turbine inlet gas temperature sensors [NAL-TR-265] p0484 N72-27428
- Design and development of movable turbine inlet guide vanes to provide aerodynamic choking for jet engine [NASA-CASE-LAR-10642-1] p0487 N72-27820
- Digital computer control of mixed-compression inlet for turbojet engine [NASA-TN-D-6880] p0537 N72-29803
- Momentum loss measured for determination of drag in wind tunnel model of advanced manned interceptor with engine package containing twin internal airflow passages [AD-741744] p0539 N72-29817
- Summary of static strength tests conducted on Concorde aircraft nacelle structure p0542 N72-29916
- Tests to determine acoustic and aerodynamic performance of two choked flow inlets under static conditions [NASA-TN-X-2629] p0632 N72-32765
- ENGINE MONITORING INSTRUMENTS**
- Flight display systems current state and future developments, discussing dual attitude indicators and automatic chart systems CRTs, engine displays and malfunction warning systems p0056 A72-13423
- Aircraft integrated data systems application to flight safety analysis, engine performance monitoring, crew proficiency, autoland evaluation, operations and logistics p0065 A72-14726
- Aircraft gas turbine engine monitoring for failure prevention, evaluating condition through spectrum analysis and real time correlation techniques p0177 A72-18766
- Engine condition monitoring - The Pan Am approach: Phase II. p0450 A72-35324
- Automated airborne recording system to obtain data on aircraft engines, subsystems and operational performance, considering cost and economic benefits [AIAA PAPER 72-752] p0498 A72-38126
- In-flight and flight-line monitor system to detect foreign object damage in jet engines. p0564 A72-42690
- ENGINE NOISE**
- JET ROCKET ENGINE NOISE**
- Jet aircraft turbofan engine fan compressor noise reduction by acoustic linings, giving R and D results [BAS PAPER 71 SA6] p0003 A72-10223
- Aircraft engine noise effects in airport vicinities, discussing measurement scales, turbofan sources, noise reduction and future air traffic p0016 A72-12022
- Air breathing propulsion systems for reducing engine noise level, discussing stoichiometric gas turbine engines, V/STOL propsans and variable-geometry supersonic inlet and exhaust nozzles p0057 A72-13486
- Aircraft industry noise reduction efforts to meet FAA requirements for CTOL and STOL aircraft, emphasizing turbofan and compressor noise suppression and/or attenuation p0067 A72-14820
- Turbojet engine noise causes and reduction techniques, noting U.S. antinnoise standards p0069 A72-14925
- Sound attenuation in lined rectangular ducts with uniform steady flow, considering aircraft engine noise reduction p0070 A72-15267
- Army aircraft gas turbine engines pollution potential evaluation program, considering smoke emission, noise and invisible pollutants p0177 A72-18772
- Engine fan-compressor maximum noise reduction for given aircraft configuration by acoustic linings on nacelle inlet and exhaust walls p0183 A72-19268
- JT8D engine exhaust noise field, considering internal noise sources contribution from exhaust duct sound pressure measurements p0184 A72-19331
- Turbojet and turbofan engines noise signatures and sonic boom effects, discussing frequency spectra, atmospheric attenuation and noise suppression systems p0186 A72-20163
- Acoustical theory application to jet engine noise reduction, developing mathematical model for blade shock wave spacing in noise generation process p0189 A72-20542
- Turbofan engine trends for short haul conventional and STOL aircraft, considering variable pitch fans, reduction gears, thrust reversal and noise and environmental pollution [ASME PAPER 72-GT-86] p0298 A72-25661
- NASA quiet engine program, discussing noise reduction technology for subsonic civil transport aircraft propulsion system [ASME PAPER 72-GT-96] p0298 A72-25667
- Open-air jet engine test stand for flame stabilization, jet and compressor noise studies, noting provisions for rapid installation changes p0309 A72-27416
- Bibliography on noise control covering surface transportation, machinery and aircraft noise, industrial criteria, biodynamics, legislation and measurement p0356 A72-29588
- Digital data processing techniques for aircraft engine noise data reduction, analyzing fan noise spectrum p0356 A72-29840
- Lift fan blade interaction discrete frequency noise, discussing potential and viscous

# SUBJECT INDEX

# ENGINE STARTERS

- interactions relation to rotor-stator spacing  
p0395 A72-32019
- Low noise aircraft-engine configuration  
feasibility, discussing turbofan engine noise  
reduction  
p0400 A72-32322
- NASA/General Electric joint development of low  
noise propulsion technology, describing  
demonstrator engine A design, components  
development and aerodynamic/acoustic performance  
evaluation  
[AIAA PAPER 72-657] p0414 A72-34077
- Effect on supersonic jet noise of nozzle plenum  
pressure fluctuations.  
p0450 A72-35243
- NASA R and D programs for quiet STOL aircraft and  
engines development  
p0457 A72-36503
- Combustion noise generation by burning fuel-air  
mixtures induced pressure fluctuations as result  
of time variable heat release rate due to  
turbulence  
p0457 A72-36505
- Aircraft noise problem in piston engine to  
turbofan jumbo jet transports, discussing need  
for noise reduction research  
[AIAA PAPER 72-815] p0497 A72-38117
- Turbulent combustion induced noise, discussing  
scaling rules for sound power and directional  
characteristics of radiated sound  
p0506 A72-39557
- Quiet engine design for V/STOL and reduced takeoff  
and landing /BTOL/ aircraft, discussing various  
engine noise sources, countermeasures and  
tolerance levels  
p0509 A72-39819
- NASA Quiet Engine program R and D on conventional  
takeoff and landing subsonic cruise aircraft  
engine noise  
[ICAS PAPER 72-48] p0556 A72-41173
- Installation caused flow distortion and its effect  
on noise from a fan designed for turbofan engines.  
[AIAA PAPER 72-1006] p0558 A72-41590
- NASA's quiet engine programs.  
p0569 A72-43152
- Experiment of supersonic air intake buzz.  
p0603 A72-44496
- Tone noise from rotor/stator interactions in high  
speed fans.  
p0610 A72-44917
- Noise generation by rotating blades of axial flow  
fan in infinite annulus  
[AD-726126] p0051 N72-11714
- Analysis of noise levels created by military  
aircraft, ground support equipment, and terminal  
facilities  
[AD-728454] p0090 N72-11972
- Annual report of Institute of Sound and Vibration  
Research including aircraft, engine, and  
turbomachinery noise, silencers, and human  
responses to noise  
p0112 N72-13614
- Annual report 1969 of Institute of Sound and  
Vibration Research including aircraft, engine,  
and turbomachinery noise, audiology, and  
structural vibration  
p0112 N72-13615
- Investigating lift fan noise reduction by  
configuration modifications in LP336/A  
[NASA-CR-1934] p0218 N72-17004
- Aircraft noise reduction by extinction with  
reversed phase sound in acoustic interference  
[NBB-BB-55-71-0] p0332 N72-21011
- Acoustic measurements to determine aerodynamic  
noise characteristics of single stage fan with  
1.5 pressure ratio and 1160 feet per second tip  
speed  
[NASA-CR-120789] p0365 N72-21994
- Measurement of noise produced by turbofan rotor  
following removal of casing boundary layer  
[NASA-TN-D-6763] p0379 N72-22994
- Characteristics of free turbulence as source of  
aerodynamic noise and application to analysis of  
noise created by jet engines  
p0383 N72-23021
- Analysis of effect of aerodynamically-induced  
fluctuation forces on sound produced by axial  
flow compressor rotor and stator combinations  
[NASA-CR-2012] p0419 N72-23991
- Analysis of noise generated by target type thrust  
reversers used on augmentor-wing short takeoff  
aircraft  
[NASA-TM-X-68082] p0477 N72-27012
- Effect of front and rear fan installations on flow  
distortion and noise in subsonic aircraft engines  
[NASA-TM-X-68105] p0520 N72-28287
- NASA quiet engine technology for reducing noise  
levels in conventional and subsonic aircraft  
[NASA-TM-X-68121] p0580 N72-30775
- Development of advanced technology for identifying  
and minimizing sources of noise in aircraft  
engines  
[NASA-TM-X-68131] p0622 N72-32043
- ENGINE PARTS
- Electrodischarge and electrochemical machining  
applications in continuous repetitive production  
of aircraft jet engine components  
p0013 A72-11150
- Jet engine component overhaul procedures for  
fatigue damage repair, detailing distressed  
metal removal, replacement and welding techniques  
p0020 A72-12499
- Aircraft gas turbine engine and components  
post-war development in Japan  
p0122 A72-16499
- Statistical evaluation for forged jet engine parts  
tensile tests cost reduction, using regression  
analysis  
p0184 A72-19484
- Recrystallized silicon carbide and reaction bonded  
silicon nitride as construction materials for  
gas turbine engine components, describing  
thermal and mechanical properties  
[ASME PAPER 72-GT-20] p0294 A72-25619
- Countersink boring machines with programmed  
digital control systems for precision spacing  
multiple hole drilling in extended aircraft  
engine components  
p0304 A72-26816
- Boron and carbon fiber reinforced plastics  
applications in aircraft and engine structural  
components, discussing dynamic and impact  
damping properties compared to conventional  
materials  
p0344 A72-28555
- Air dust erosive damage to helicopter gas turbine  
engine parts, discussing inertial rotorless  
filtering systems  
p0346 A72-28786
- Aircraft engine components fatigue life assessment  
under small cycle temperature conditions,  
including temperature field and stress-strain  
determination in critical spot  
p0358 A72-30279
- Aircraft gas turbine engine Ni base alloy disks  
and shafts thermomechanical treatment,  
considering yield strength and high and low  
cycle fatigue resistance  
p0407 A72-33299
- Russian book - Production of the principal  
elements and units of aircraft engines  
p0452 A72-35456
- Methods and sequences for producing precision  
forged structural and jet engine components from  
metal powder preforms of titanium alloys  
[AD-736477] p0372 N72-22511
- Mechanical properties of gas turbine vanes and disks  
[JPRS-55987] p0428 N72-24825
- Mechanical properties of gas turbine disk material  
after operation  
p0428 N72-24827
- Purge system and components of HRE AIM  
[NASA-CR-112060] p0437 N72-25715
- Quality control and reliability engineering  
procedures applied to aircraft engine parts  
[JPRS-56674] p0538 N72-29809
- ENGINE STARTERS
- Airstart flight testing for single engine  
fighter/attack aircraft, including flight  
conditions, windmilling, fuel flows, gas  
temperature, ignition and acceleration  
p0146 A72-18496
- Onboard and ground based hydraulic starter systems  
design, construction and operation for aircraft  
turbine engines  
p0192 A72-21484
- Hydraulic starter systems for aircraft turbine  
engines, examining operation loads and fluid

## ENGINE TESTING LABORATORIES

## SUBJECT INDEX

supply and pressure requirements p0285 A72-25284

The starting of turbine engines in helicopters. [AHS PREPRINT 662] p0448 A72-34509

Design and testing of brushless dc generator system [AD-738707] p0468 A72-26041

Starting characteristics of aircraft turbine engines in flight and on ground [AD-740291] p0538 A72-29812

**ENGINE TESTING LABORATORIES**

Arnold Engineering Development Center turbine engine testing facilities and techniques for flight conditions and environment simulation, air/fuel flow and thrust measurement, etc [ASME PAPER 71-WA/GT-8] p0116 A72-15901

Aircraft engine anti-icing tests and evaluation describing ground and airborne techniques [AIAA PAPER 72-162] p0128 A72-16828

Open-air jet engine test stand for flame stabilization, jet and compressor noise studies, noting provisions for rapid installation changes p0309 A72-27416

**ENGINE TESTS**

**NT COLD FLOW TESTS**

Augmentor wing jet STOL research aircraft development progress report covering design, engine tests, performance prediction, control simulation and stability augmentation [SAE PAPER 710757] p0004 A72-10254

Graphite fiber composite fan blade design for subsonic turbofan engines, discussing weight and fatigue sensitivity reductions and performance test results [SAE PAPER 710771] p0005 A72-10265

Thermal shock fatigue tests on aircraft gas turbine engine inlet nozzles, showing cracks as function of material p0014 A72-11373

NASA Quiet Engine experimental program for jet aircraft noise reduction, discussing aerodynamic and acoustic evaluation and tests of three fans p0059 A72-13679

GE CP6-50 high-bypass two-spool engine development, discussing configuration, installation, endurance tests and various failures p0059 A72-13681

Automated jet engine development facility, discussing assembly and test area and computer controlled operation [ASME PAPER 71-WA/GT-6] p0116 A72-15899

USAF small gas turbine test complex, discussing machinery, equipment, simulated testing, altitude chambers and instrumentation [ASME PAPER 71-WA/GT-7] p0116 A72-15900

Jet engine test facilities for JT9D experimental and production models [ASME PAPER 71-WA/GT-12] p0117 A72-15904

F-14 Tomcat test program for hydraulic systems, spinning, low speed performance, stalling, afterburning turbofan engines, in-flight refueling and automatic telemetry equipment p0138 A72-17582

Fighter/attack aircraft turbojet and turbofan engines testing with/without afterburners p0146 A72-18495

Airstart flight testing for single engine fighter/attack aircraft, including flight conditions, windmilling, fuel flows, gas temperature, ignition and acceleration p0146 A72-18496

Catapult steam ingestion test of turbofan engines in A-7 aircraft, correlating compressor stall occurrences with temperature increase rate in distorted region p0176 A72-18760

Circumferential inlet pressure distortion index derivation for high hub-tip ratio multistage axial flow compressor from one dimensional isentropic flow expressions p0176 A72-18762

Aircraft engine test data processing by polynomial relations, assuming normal measurement error distribution p0181 A72-18978

Accelerated full scale aircraft turbine engine corrosion tests in controlled environment, simulating salt, high temperature and humidity conditions

[NACA PAPER 76] p0241 A72-24320

Dynamic model of high bypass ratio turbofan engines for L-1011 wind tunnel flutter test program [AIAA PAPER 72-376] p0286 A72-25400

Cessna 210 aircraft electrically driven hydraulic power pack for landing gear system, noting engine and flight tests [SAE PAPER 720327] p0291 A72-25589

High bypass ratio JT15D-1 turbofan engine design and development testing [SAE PAPER 720352] p0292 A72-25603

Composite materials application to gas turbine fan guide vane fabrication, noting economic factors and prototypes performance in engine tests p0313 A72-28100

Gas turbine engine hot part equivalent tests duration determination by analytical method based on Larson-Miller parametric description of stress rupture strength p0315 A72-28243

Procedure for the continuous sampling and measurement of gaseous emissions from aircraft turbine engines. [SAE ARP 1256] p0458 A72-36532

The S4MA hypersonic wind tunnel - Its use for tests of ramjet engines with supersonic combustion of hydrogen p0493 A72-37823

Axisymmetric jet stretcher diffuser performance for ramjet engine inlet configurations, testing at angles of attack and supersonic flow velocities [AIAA PAPER 72-1024] p0558 A72-41602

Wall porosity and angle of attack effects on jet stretcher flow field for supersonic engine inlet testing, using three dimensional method of characteristics [AIAA PAPER 72-1025] p0558 A72-41603

Full-scale inlet/engine testing at high maneuvering angles at transonic velocities. [AIAA PAPER 72-1026] p0558 A72-41604

Characteristics of an ejector-type engine simulator for STOL model testing. [AIAA PAPER 72-1028] p0558 A72-41607

Digital computer controlled testing equipment for separately driven coaxial gas turbine low and high pressure compressors, emphasizing reliability and flexibility in system design p0564 A72-42682

High response two-transducer pressure measurement for evaluating nonuniform and unsteady inlet airflow distortion effects on supersonic jet engine stability and performance p0564 A72-42683

Experience with the NRC 10 ft. x 20 ft. V/STOL propulsion tunnel - Some practical aspects of V/STOL engine model testing. p0600 A72-44247

Aircraft gas turbine engine controllers and fuel pump testing under extreme fuel temperatures, noting cavitation characteristics p0601 A72-44287

Mathematical model for dynamics simulation of aircraft turboprop engines, using digital, analog and hybrid computers p0601 A72-44288

Test facilities for aeropropulsion systems, emphasizing utilization, cost and technical advantages, aircraft inlet-engine systems compatibility and test types [AIAA PAPER 72-1034] p0615 A72-45401

Effect of several geometrically different porous castings on rotor stall limit line and overall performance improvement [NASA-TN-D-6537] p0078 A72-11888

Jet engine calibration tests conducted in altitude chamber to determine gross thrust values for future engine and nozzle evaluations [NASA-TN-X-2398] p0079 A72-11895

Development of techniques for evaluating performance of air breathing engines and measurement of significant operating parameters [NASA-TN-X-68305] p0329 A72-20983

Development of procedure for calculating off-design-point performance of turbojet and turbofan engines [LR-555] p0378 A72-22798

Starting characteristics of aircraft turbine engines in flight and on ground

- Environmental impact survey on consolidation of  
all Air Force advanced helicopter training at  
Hill AFB, Utah  
[PB-198764-F] p0221 N72-17203
- Environmental impact statement for Earth Resources  
Aircraft program  
[NASA-TM-X-68550] p0476 N72-27008
- Environmental impact survey of airport in Park  
Falls, Wisconsin  
[PB-204025-F] p0483 N72-27284
- Environmental impact surveys of quiet engine program  
[NASA-TM-X-68545] p0487 N72-27814
- Environmental impact statement on proposed  
improvements to Manti-Ephraim Airport, Ephraim,  
Utah  
[PB-207064-F] p0626 N72-32270
- Environmental impact statement on proposed  
extension and widening of existing paved runway  
at Baxley Municipal Airport, Baxley, Georgia  
[PB-206167-F] p0626 N72-32271
- Environmental impact statement on proposed  
construction of Dade County Airport, Trenton,  
Georgia  
[PB-205578-F] p0627 N72-32272
- Environmental impact statement on proposed  
construction of Jasper-Pickens County Airport,  
Jasper, Georgia  
[PB-204959-F] p0627 N72-32273
- Environmental impact statement on proposed  
development of Neillsville Municipal Airport,  
Neillsville, Wisconsin  
[PB-204576-F] p0627 N72-32274
- Environmental impact statement of proposal for  
installation of instrument landing system and  
approach lighting system at Ottumwa Industrial  
Airport, Ottumwa, Iowa  
[PB-207235-F] p0627 N72-32275
- Environmental impact statement on proposed airport  
construction at West Jefferson, North Carolina  
[PB-206552-F] p0627 N72-32276
- Environmental impact statement on proposed  
construction of Hemphill Municipal Airport,  
Hemphill, Texas  
[PB-206262-F] p0627 N72-32277
- Environmental impact statement on airport  
development in Effingham, Illinois  
[PB-205790-F] p0643 N72-33256
- ENVIRONMENTAL TESTS**
- NT CORROSION TESTS
- NT HIGH TEMPERATURE TESTS
- NT LOW TEMPERATURE TESTS
- Planar coax micropackaging of minicomputers for  
aircraft navigation and military systems, noting  
environmental tests  
p0115 A72-15772
- Environmental tests on carbon fiber Vulcan  
airbrake flap, including thermal cycling,  
sustained loading, immersion, corrosion and  
lightning strike tests  
p0135 A72-16998
- JT15D turbofan engine antiicing system  
development, discussing icing test program and  
results  
p0176 A72-18765
- C-54 A/B aircraft engine air particle separator  
antiice system design features, manufacturing  
techniques and testing  
p0177 A72-18769
- Turboprop electric igniter climatic test problems  
and equipment for assessing quality control  
p0182 A72-19112
- Field and laboratory sonic boom simulators, noting  
required characteristics  
p0234 A72-23323
- Prediction models for dynamic environment  
experienced by cargo during air and rail  
transportation  
p0402 A72-32610
- Low temperature environmental chamber for F-111  
proof load testing, describing components of  
cold air forced convection recirculation system  
with liquid nitrogen injection  
p0402 A72-32612
- Dynamic input to cargo in turbojet aircraft  
studied during C141 and C5A flights, discussing  
instrumentation, test procedures, data reduction  
processes and results  
p0403 A72-32625
- Helicopter/ship dynamic interface testing for  
launch and recovery capabilities under sea  
environment conditions, discussing visual  
landing aids, wind, visibility and ship motions  
[AHS PREPRINT 650] p0447 A72-34505
- Evaluation of simulated pilot/system performance  
in manually controlled IFR formation flight task  
for OH-1 helicopter under various environmental  
and operational conditions  
[AD-725209] p0031 N72-10044
- Inventory of facilities for conducting  
acceleration, environmental, impact, structural  
shock, heat, vibration, and noise tests - Vol. 3  
[NASA-CR-1876] p0092 N72-12183
- Development of methods for conducting climatic  
tests with emphasis on design, construction, and  
operation of climatic hangar  
[AD-733299] p0257 N72-18268
- Environmental tests to determine behavior of  
titanium alloys under hot salt, stress corrosion  
conditions existing in jet engines  
[NASA-TM-X-68015] p0259 N72-18541
- Durability tests on components of VFW-H3 gyrodyne  
with determination of rotary wing fatigue life  
[NASA-TT-F-14284] p0421 N72-24023
- Aerodynamic characteristics and performance of  
OH-6 helicopter with emphasis on flight loads  
imposed during combat operations  
[AD-738202] p0422 N72-24032
- Evaluation of tricolor visual approach path  
indicator for suitability as part of two segment  
visual approach slope indicator system  
[FAA-ARD-72-49] p0590 N72-31653
- Analysis of sixty element per linear inch plasma  
display/memory device for use in military aircraft  
[AD-744096] p0626 N72-32069

Air dust erosive damage to helicopter gas turbine  
engine parts, discussing inertial rotorless  
filtering systems p0346 A72-28786

Erosion effects on gas turbine engine compressor  
blades due to dust ingestion, discussing means  
for alleviating performance and service life  
losses [ICAS PAPER 72-02] p0552 A72-41127

End oriented, fiber reinforced plastic composites  
as rain erosion resistant materials [AD-738079] p0426 N72-24616

Chemical and structural properties of urethane  
elastomers and resistance to rain erosion  
[AD-737624] p0426 N72-24618

**ERROR ANALYSIS**  
Terminal aerodrome forecasts usefulness and  
accuracy assessment p0010 A72-10864

Optimal stochastic /Kalman/ filters application to  
integrated air and submarine navigation systems,  
discussing measurement errors modeling as bias  
and colored noise p0017 A72-12050

Dynamic structural analysis by finite element  
method, describing error bounds for eigenvalue  
analysis by elimination of variables p0055 A72-13401

Book on mechanization and error analysis of  
inertial navigation systems, stressing  
terrestrial applications p0140 A72-17944

Aircraft engine test data processing by polynomial  
relations, assuming normal measurement error  
distribution p0181 A72-18978

Error analysis for digital avionics system  
involving Doppler navigation by intermittent  
scanning of single beam multimode radar, noting

optimum statistical data processing p0398 A72-32204

Error analysis of hybrid aircraft inertial  
navigation systems. [AIAA PAPER 72-848] p0504 A72-39081

A versatile Kalman technique for aircraft or  
missile state estimation and error analysis  
using radar tracking data. [AIAA PAPER 72-838] p0505 A72-39089

Statistical analysis of influence coefficients and  
unbalance forces measurement errors in balancing  
of rotors p0556 A72-41229

Evaluation of flight instrumentation for the  
identification of stability and control  
derivatives. [AIAA PAPER 72-963] p0561 A72-42346

Error analysis on range and azimuth resolution  
characteristics of digital radar air traffic  
control system [AD-730056] p0223 N72-17592

Causes of altimeter errors p0268 N72-19016

Characteristics of flight test instruments and  
techniques for overcoming limitation and sources  
of error p0329 N72-20984

Error analysis on wind tunnel effects in strain  
gage balance measurements p0470 N72-26346

Numerical analysis of cause and effect of errors  
in inertial navigation systems based on gyro  
horizon operation p0472 N72-26522

**ERROR BAND**  
U ACCURACY  
**ERROR CORRECTING DEVICES**  
Correction factors for Aerodynamic Research  
Institute Goettingen transonic wind tunnel,  
comparing calculated values with AGARD  
calibration models test results [DFVLR-SONDDR-167] p0058 A72-13610

Heat transfer coefficients to both sides of finite  
one dimensional slab subject to phase-change  
coating technique boundary conditions, deriving  
thin wing correction factors p0060 A72-13956

Aircraft turboalternator governing theory for  
frequency error detection, comparing performance  
of mechanical- and electro-hydraulic governors  
p0143 A72-18249

**ERROR FUNCTIONS**  
Computerized error function method of wreckage  
trajectory analysis in aircraft accident  
investigation, using fundamental equations of  
motion p0054 A72-13250

European A300B airbus flying control hydraulic  
system and landing gear design for safety and  
reliability, fatigue life, weight and maintenance  
p0009 A72-10724

European A300B airbus flap and slat systems and  
tailplane actuator for longitudinal pitch trim  
control p0009 A72-10725

A-300B European Airbus cantilever wing design and  
manufacture, discussing skin forming,  
skin-stringer and torsion-box assembly,  
automatic riveting and root-end profile  
machining procedures p0062 A72-14301

European passenger aircraft Airbus program,  
discussing various configurations performance,  
economic factors and technical support p0307 A72-27108

European Airbus program, noting international  
cooperation juridical sources, content and  
organization, aircraft performance, financing,  
project chronology and Franco-German agreement  
p0346 A72-28795

The air bus as the aircraft of near future. II p0451 A72-35439

Airlines requirements for European airbus,  
discussing design of aircraft structure,  
control, pressurized cabin and propulsion system p0545 A72-40174

European airbus wind tunnel model aerodynamic  
force and downwash measurements noting jet  
interference reduction p0028 N72-10012

**EUROPEAN SPACE PROGRAMS**  
Cost analysis and economic models for European  
aerospace development compared to US experience  
[AD-725478] p0037 N72-10992

**EVALUATION**  
Development of computer system and data processing  
subsystems for measurement and evaluation of air  
traffic control procedures [DOT-TSC-FAA-71-23] p0326 N72-20583

Methods for performing evaluation and processing  
data following flight tests of air traffic  
control beacon [AD-738680] p0486 N72-27709

**EVAPORATION**  
The film vaporization combustor and its physical  
principles. I - The vaporizer section of the  
combustor. II - The reaction chamber and the  
combustion [DFVLR-SOHD-194] p0504 A72-39074

**EVAPORATIVE COOLING**  
**NT FILM COOLING**  
**NT SWEAT COOLING**  
**EVASIVE ACTIONS**  
Optimal thrust reversing in pursuit evasion games  
between two aircraft in horizontal plane,  
considering cost functions and termination  
criteria

## EXCITATION

## SUBJECT INDEX

Transitory diversion as cause of violent evasive maneuver to prevent midair collision of American and Trans World Airlines Boeing 707 aircraft [NTSB-AAR-72-7] p0183 A72-19282 p0367 N72-22017

**EXECUTIVE AIRCRAFT**

U GENERAL AVIATION AIRCRAFT

U PASSENGER AIRCRAFT

**EXHAUST DIFFUSERS**

Small radial inflow turbines for space applications, considering blade-shroud clearance, blade loading and exit diffuser design [ASME PAPER 72-GT-42] p0295 A72-25636

**EXHAUST FLOW SIMULATION**

NT ATMOSPHERIC ENTRY SIMULATION

NT FLIGHT SIMULATION

Simulated testing of turbojet engine ingestion of missile exhaust, determining design criteria for aircraft engine inlets from altitude chamber test data p0176 A72-18758

High pressure cannular combustor with continuous analytical and sampling system for simulated gas turbine engines emission measurements [ASME PAPER 72-GT-88] p0298 A72-25663

Jet engine simulation with low speed wind tunnel models for interference drag measurement p0027 N72-10005

Wind tunnel tests of forward-mounted overwing turbofan engine model with determination of jet interference effects and lift-dependent drag [ARC-CP-1207] p0527 N72-28998

**EXHAUST GASES**

Aircraft gas turbine engine emission reduction, showing nitrogen oxide control with water injection [ASME PAPER 71-WA/GT-9] p0116 A72-15902

Diffusion and fallout of polluting particulates emitted by aircraft engines, discussing effect of wing-tip vortices, plume visibility and monitoring, simulation and modeling [ASME PAPER 71-WA/AV-2] p0117 A72-15950

Aircraft gas turbine engines smoke emission sampling by stained filter technique, comparing Navy specifications AS 1833 with SAE method ARP 1179 p0177 A72-18770

Gas turbine engines emission data correlation based on combustor theoretical model, proposing correction factors for data reduction to standard test conditions [ASME PAPER 72-GT-60] p0297 A72-25651

Propulsion system design for military VTOL aircraft, emphasizing subsonic cruise to maximum thrust ratio and exhaust downwash characteristics [ASME PAPER 72-GT-73] p0297 A72-25655

Aircraft gas turbine engines exhaust emission characteristics identification, considering ambient temperature and humidity effects [ASME PAPER 72-GT-75] p0297 A72-25657

High pressure cannular combustor with continuous analytical and sampling system for simulated gas turbine engines emission measurements [ASME PAPER 72-GT-88] p0298 A72-25663

Combustion research for reducing jet aircraft pollutant emissions, discussing fuel atomization improvement, smoke reduction and combustor design techniques p0301 A72-26037

Exhaust composition and smoke emission reduction from aircraft with gas turbine power plants p0308 A72-27270

Estimated peak regional concentration of SST exhaust in stratosphere from expected flight operation levels p0346 A72-28837

Future projections of commercial jet aircraft fuel demands, estimating engine exhaust effects on air quality

Climatic changes due to stratospheric perturbation by propulsion effluents of high altitude aircraft flights [AIAA PAPER 72-658] p0414 A72-34076

SST contrails stratospheric dispersion by aircraft wake, atmospheric turbulence and exhaust gases temperature induced buoyancy [AIAA PAPER 72-650] p0415 A72-34084

Stratospheric pollution by SST exhaust gases, discussing water vapor and nitrogen oxides effects on ozone concentration p0451 A72-35327

Procedure for the continuous sampling and measurement of gaseous emissions from aircraft turbine engines. [SAE ARP 1256] p0458 A72-36532

Numerical prediction of the diffusion of exhaust products of supersonic aircraft in the stratosphere p0493 A72-37824

Aircraft gas turbine engines environmental effects, considering thermal radiation, acoustic emissions and exhaust gases in relation to propulsion system design parameters p0602 A72-44296

Aircraft activity effects on air pollution in San Francisco Bay area with engine emission and climatological data p0034 N72-10361

Propulsion systems for low emission urban vehicles and analysis of exhaust emissions from fossil-fueled heat engines [PB-200144] p0036 N72-10830

Combustion efficiency and exhaust emission levels correlated with operating conditions for gas turbine combustor [NASA-TN-D-6661] p0213 N72-16721

Statistical analysis of turboprop engine exhaust emissions in atmosphere [PB-202961] p0222 N72-17319

Analysis of pollutant emissions from jet aircraft and combustion research for reducing emissions through combustor design and fuel atomization [NASA-TN-X-68000] p0251 N72-18009

Design and development of F-15 fighter aircraft and analysis of effects of aircraft operation on air pollution and noise [PB-201710-P] p0254 N72-18034

Hydrocarbons, carbon monoxide, carbon dioxide, and nitrogen oxides in gaseous emissions from limited sample of military and commercial aircraft turbine engines [PB-204177] p0283 N72-19968

Exhaust measurement from five aircraft piston engines [PB-204196] p0283 N72-19969

Statistical analysis of aircraft exhaust emission measurements, using random sampling [PB-204869] p0321 N72-20029

Carbon monoxide, hydrocarbons, and nitrogen oxide exhaust emissions from aircraft [PB-204879] p0321 N72-20030

Assessment of aircraft emission control technology and feasibility analysis of various control methods [PB-204878] p0333 N72-21017

Exhaust emissions tests of aircraft propulsion and auxiliary power gas turbine engines [PB-204920] p0333 N72-21018

Instruments for measuring air pollution emitted by aircraft engines [PB-204794] p0338 N72-21592

Annotated bibliography on environmental pollution caused by aircraft emissions [AD-735943] p0388 N72-23655

Air pollution for peak traffic periods at Heathrow Airport, London, for April through September for 1970 p0426 N72-24649

Analysis of sources, constituents, and influence of operating conditions on emission characteristics of jet engine exhaust [NASA-TN-X-68064] p0429 N72-24830

Analytical measurements of exhaust emissions from aircraft turbine engines using Jet A fuel [BN-RI-7634] p0435 N72-25584

Analysis of emissions from aircraft piston and gas turbine engines - tables

NT PODS (EXTERNAL STORES)  
Weapon firing and external store separation tests by flight test methods for determining safe weapon release envelope  
p0146 A72-18499

Simulator for physical forces experienced by carrier aircraft during catapult launches and arrested landings, considering external stores safe suspension  
p0403 A72-32620

Aerodynamic interference between aircraft components - Illustration of the possibility for prediction.  
[ICAS PAPER 72-49] p0556 A72-41174

The application of non-planar lifting surface theory to the calculation of external-store loads.  
[AIAA PAPER 72-971] p0561 A72-42340

Development of impact shock test criteria and shock spectrum simulation test for ejection mechanism used with externally carried ordnance on aircraft  
p0216 A72-16834

Computer program for calculation of airborne store loads, shears, and moments  
[AD-733673] p0249 A72-17995

Development of magnetic artificial gravity test facility for use in wind tunnel tests to simulate separation of external stores from aircraft in flight  
[NASA-CR-1955] p0266 A72-19000

Mutual aerodynamic interference effects on flow field beneath aircraft with external stores examined by cross flow corrections method  
[AD-735655] p0328 A72-20974

Arrangement of external stores on fighter aircraft and effects on aerodynamic characteristics  
[NASA-TN-D-6775] p0366 A72-22003

Resonance tests of target aircraft fitted with wing tip pods using multipoint excitation method  
[ARL/SN-3711] p0465 A72-26012

Numerical procedure for predicting interference of external stores on F-4 aircraft at subsonic speed - Part 1  
[NASA-CR-112065-1] p0466 A72-26021

Numerical procedure for predicting interference of external stores on F-4 aircraft at supersonic speed - Part 2  
[NASA-CR-112065-2] p0466 A72-26022

Computer programming manual for theoretical prediction of interference loads caused by external stores on F-4 aircraft - Part 3  
[NASA-CR-112065-3] p0466 A72-26023

Effect of fin-opening shock environment on guided modular dispenser weapons

p0474 A72-26876

Wind tunnel tests to determine aerodynamic characteristics of rectangular shaped containers carried as external stores on helicopters  
[NASA-TN-X-62169] p0513 A72-27995

Computer simulation of helicopter flight conditions to determine dynamic effects of external load combinations on helicopter performance  
[AD-740772] p0530 A72-29020

**EXTERNALLY BLOWN FLAPS**  
Review of work on external flow jet flaps noting lift coefficient  
[ARC-CP-1194] p0431 A72-24998

**EXTINGUISHERS**  
U FIRE EXTINGUISHERS

**EXTRACTION**  
NT SOLVENT EXTRACTION

**EXTRAPOLATION**  
Extrapolation of sonic boom pressure signatures by waveform parameter method and comparison with F-function method  
[NASA-TN-D-6832] p0463 A72-26004

**EXTRATERRESTRIAL RADIATION**  
NT GALACTIC RADIATION  
NT PRIMARY COSMIC RAYS  
NT SOLAR COSMIC RAYS

**EXTREMA**  
U RANGE (EXTREMES)

**EXTREMUM VALUES**  
Extremal field properties in optimal control problem applied to aircraft flight over assigned distance with minimum fuel consumption  
p0139 A72-17727

Pressure jumps lower bounds across supersonic transports induced shock waves in homogeneous atmosphere, using Whitham function in terms of Riemann integral  
p0244 A72-24846

Extremal field properties in optimal control problem applied to aircraft flight over assigned distance with minimum fuel consumption  
p0285 A72-25329

Extreme value analysis of flight load measurements.  
p0609 A72-44737

## F

## F-4 AIRCRAFT

Buccaneer Mk 2 and F-4K Phantom takeoff and landing performance improvement due to boundary layer control by leading and trailing edge blowing  
p0233 A72-22973

Electromechanical redundant activating mechanism for F-4 aircraft dual tandem hydraulic power servo, noting application to fly by wire control  
p0360 A72-30422

Synthesis and analysis of a fly-by-wire flight control system for an F-4 aircraft.  
[AIAA PAPER 72-880] p0505 A72-39119

Solvent removal by immersion of EC-2273 potting compound from F-4 aircraft electrical components  
[AD-725493] p0046 A72-11473

Hexamethylene diisocyanate for rehardening of EC-2273 potting compound in F-4 aircraft electrical components  
[AD-726180] p0094 A72-12518

Measurement of aircraft noise generated by F-4B aircraft during ground and airborne operation  
[AD-731092] p0167 A72-15016

Hybrid simulation of F-4 aircraft for evaluating display devices and pilot performance in manual fuel consumption optimization  
[AD-731713] p0208 A72-16315

Dynamic programming method for determining optimal repair and replacement policies for Naval aircraft  
[AD-736094] p0334 A72-21031

Development of training program for RF-4C aircraft aerial refueling training based on computer systems data  
[AD-736409] p0370 A72-22037

Numerical procedure for predicting interference of external stores on F-4 aircraft at subsonic speed - Part 1  
[NASA-CR-112065-1] p0466 A72-26021

Numerical procedure for predicting interference of external stores on F-4 aircraft at supersonic speed - Part 2  
[NASA-CR-112065-2] p0466 A72-26022

## SUBJECT INDEX

## FABRICATION

- Computer programming manual for theoretical prediction of interference loads caused by external stores on F-4 aircraft - Part 3 [NASA-CR-112065-3] p0466 N72-26023
- Simulation of dynamic spin of F-4 aircraft under pilot control using human centrifuge facility [AD-739326] p0483 N72-27278
- Flight load parameters of F-4J aircraft for 49.5 flight hours [AD-743476] p0623 N72-32050
- F-5 AIRCRAFT**
- Graphite fiber-epoxy composite systems development for F-5 aircraft landing gear door, speed brake, leading and trailing edge flaps and horizontal stabilizer p0312 A72-28097
- Analysis of military requirements and specifications for aircraft performance using F-5 aircraft [AD-738625] p0481 N72-27039
- F-8 AIRCRAFT**
- F-8D aircraft variable stability system ground/inflight calibration for determination of flight control system dynamics effects on flying qualities p0125 A72-16660
- Design and flight experience with a digital fly-by-wire control system using Apollo guidance system hardware on an F-8 aircraft [AIAA PAPER 72-881] p0511 A72-40060
- Flight tests to determine optimum energy flight path of F-8D aircraft and comparison with previous schedules to reach supersonic speed [AD-737377] p0385 N72-23035
- Flight test of F-8 aircraft to determine minimum time energy climbs based on energy state approximation [AD-738018] p0423 N72-24035
- Numerical analysis of three dimensional, compressible turbulent boundary layer for finite supercritical wing of F-8 transonic research aircraft [NASA-CR-112158] p0644 N72-33272
- F-14 AIRCRAFT**
- F-14A fighter accelerated flight test program with 18-month saving and 3600 flight time hours before 1973 operability p0063 A72-14591
- Automated telemetry system/providing real time analytical capability and reduction of flight test time for F-14 p0063 A72-14592
- F-14 Tomcat test program for hydraulic systems, spinning, low speed performance, stalling, afterburning turbofan engines, in-flight refueling and automatic telemetry equipment p0138 A72-17582
- F-14 naval fighter aircraft flight test programs, discussing instrumentation and low-speed test results p0190 A72-21005
- F-100 and F-401 turbofan engine design and development for F-15 and F-14, discussing impingement cooling, Ti alloys, powder metallurgy and metal composites, etc p0442 A72-34390
- Real time flight flutter testing via Z-transform analysis technique [AIAA PAPER 72-784] p0495 A72-38101
- Direct lift control feasibility for integration into F-14A automatic carrier landing system /ACLS/, using moving-base six-degree-of-freedom simulation [AIAA PAPER 72-873] p0505 A72-39127
- Environmental impact and adverse environmental effects of Navy F-14 aircraft operation [PB-199851-P] p0206 N72-15983
- F-15 AIRCRAFT**
- F-100 and F-401 turbofan engine design and development for F-15 and F-14, discussing impingement cooling, Ti alloys, powder metallurgy and metal composites, etc p0442 A72-34390
- Design and development of F-15 fighter aircraft and analysis of effects of aircraft operation on air pollution and noise [PB-201710-P] p0254 N72-18034
- Cost/decision model for deferred procurement of Air Force depot maintenance capability with computerized application to F-15 inertial navigation system [AD-735351] p0334 N72-21029
- F-28 TRANSPORT AIRCRAFT:**
- Dynamic aspects of Fokker F-28 aircraft design. p0566 A72-42831
- Fatigue testing of the F-28 Fellowship. p0608 A72-44729
- Fatigue crack propagation in Fokker F-28 full-scale wing structure under cyclic gust flight simulation loading [NLR-TR-71043-U] p0488 N72-27955
- F-100 AIRCRAFT**
- Processing and analyzing clear air turbulence data collected by F-100, and F-106 aircraft [AD-732878] p0222 N72-17302
- F-102 AIRCRAFT:**
- Measurement of neutron dose transmission factors around cockpit of F-102 aircraft [AD-728198] p0112 N72-13668
- F-104 AIRCRAFT**
- Statistical evaluation of operational load forces on undercarriage of F-104 aircraft [RAE-LIB-TRANS-1591] p0101 N72-12989
- Flight tests to determine effects of moderate deflections of wing leading and trailing edges of F-104 aircraft buffet characteristics at subsonic and transonic speeds [NASA-TN-D-6943] p0572 N72-30004
- Calculating eigenfrequencies modes and generalized masses for F-104G aircraft from drawings by finite-element method [AGARD-R-592] p0648 N72-33915
- F-105 AIRCRAFT**
- Design and development of six-degree-of-freedom visual approach and landing simulator for training F-105 pilots [AD-733240] p0257 N72-18267
- Design and development of visual approach and landing simulator using F-105 aircraft components and closed circuit television system [AD-745200] p0643 N72-33259
- F-106 AIRCRAFT**
- Processing and analyzing clear air turbulence data collected by F-100, and F-106 aircraft [AD-732878] p0222 N72-17302
- Inspect and repair as necessary (IRAN) procedure effectiveness for depot maintenance of F-106 [AD-736410] p0370 N72-22039
- F-111 AIRCRAFT**
- Relative cost comparisons of composite applications with conventional material components selected from F-111A supersonic fighter bomber p0062 A72-14234
- F-111 aircraft landing gear and speedbrake hydraulic system control by single dual-function valve, describing design features and performance characteristics p0190 A72-21024
- Composite F-111 fuselage design, analysis and testing, considering graphite, boron and glass-epoxy and boron-aluminum systems p0287 A72-25453
- Low temperature environmental chamber for F-111 proof load testing, describing components of cold air forced convection recirculation system with liquid nitrogen injection p0402 A72-32612
- F-111 stall inhibitor system with angle of attack limitation, describing interface with stability augmentation system p0454 A72-35577
- F-111A inlet nozzle dynamic distortion diagnostics for airframe-propulsion integration based on flight and transonic wind tunnel tests [ICAS PAPER 72-18] p0553 A72-41143
- Inlet steady state and dynamic performance tests with F-111A and F-12 aircraft [NASA-TN-X-67495] p0212 N72-16709
- Flight test analysis of flow characteristics of air intake system of F-111A aircraft at supersonic speed [NASA-TN-D-6679] p0265 N72-18996
- FAB (PROGRAMMING LANGUAGE)**
- U FORTRAN**
- FABRICATION**
- Graphite filament reinforced plastics strength, performance properties, fabrication processes

and tooling concepts  
[SME PAPER EM 71-205] p0011 A72-10968

Corrosion resistant fabrication methods in jumbo  
jetliners components to reduce maintenance and  
repair downtime, discussing clad wing and  
fuselage skins p0239 A72-24025

Plywrap process for low cost automated fabrication  
of fiber reinforced plastic composites, noting  
applications from missile interstages to modular  
housing p0312 A72-28081

Composite materials fabrication, emphasizing high  
strength/stiffness to weight ratio as critical  
performance requirements p0312 A72-28082

DC 10 aircraft wing stringers fabrication and  
processing, discussing stress relieving and  
stretch form contouring techniques, aging and  
tempering processes and flaw detection  
[ASM PAPER W 72-31,3] p0314 A72-28161

**FABRICS**  
NT PARACHUTE FABRICS  
**FABRY-PEROT LASERS**  
**U LASERS**  
**FAIL-SAFE SYSTEMS**

Fail-operational automatic landing system for  
Boeing 747 aircraft, noting reduction in  
allowable minimum weather conditions in U.S. and  
UK p0010 A72-10961

Government role in widebody aircraft introduction  
to air carrier service, discussing aircraft  
maintenance, design and fail-safe structural  
configurations p0179 A72-18831

Engine out flight training safety, recommending  
certification requirements or training  
procedures changes p0179 A72-18834

DC 10 aircraft automatic flight guidance system,  
noting dual-dual fail-passive autolandings  
p0234 A72-23448

Achieving fail safe design in rotors.  
[AHS PREPRINT 673] p0448 A72-34513

Analysis of a partially cracked panel.  
p0458 A72-36771

Quadruple-redundancy management for fly-by-wire  
control system reliability, discussing analog  
circuit and digital computer voter/monitor  
techniques [AIAA PAPER 72-884] p0505 A72-39117

Failsafe hydraulic actuator flight control for jet  
aircraft. p0506 A72-39351

Concorde electrically signalled fly by wire  
control system with mechanical linkages for  
standby fail-safe redundancy p0551 A72-41068

The fatigue and fail-safe program for the  
certification of the Lockheed Model 286 rigid  
rotor helicopter. p0608 A72-44733

The importance of service inspection in aircraft  
fatigue. p0609 A72-44740

Fatigue assessment of safe life and fail-safe  
structures [ARL/SM-REPT-334] p0438 A72-25899

**FAILURE**  
NT BURNTHROUGH (FAILURE)  
NT ENGINE FAILURE  
NT FAILURE ANALYSIS  
NT STRUCTURAL FAILURE  
NT SYSTEM FAILURES

Noise pollution, structural failure, transonic  
speed engineering, and aircraft design p0214 A72-16766

**FAILURE ANALYSIS**  
Bayesian analysis of onboard computer controlled  
aircraft avionics subsystem built-in test for  
failure detection p0123 A72-16574

DC-10 aircraft automatic landing performance and  
failure assessment monitor system p0190 A72-21003

Russian book on aircraft engine reliability  
covering defects, fractures and failure  
analysis, service life prediction, production

deficiencies and operational conditions p0301 A72-26068

Onboard localization of aircraft electrical  
equipment failures, using list checkout,  
automatic indication and dynamic programming  
method p0304 A72-26895

Transport aircraft wing compression panel failure  
in bending test due to stringer interruptions,  
analyzing structural deficiency via column and  
beam bending theories p0566 A72-42827

Statistical method of failure analysis for  
redundancy forms selection, noting aircraft  
safety and reliability p0568 A72-42973

Theoretical and analytical aspects of metal  
fatigue failure and relationships to fracture  
mechanics [AD-725028] p0036 A72-10957

Maximum likelihood technique for estimating  
deviations from parent population of aircraft  
fatigue failures determined from sample  
containing failed and non-failed members  
[ARC-CP-1144] p0098 A72-12925

Engine operating parameters that affect low-cycle  
fatigue and creep damage of critical components  
of naval aircraft engines during fleet operations  
[AD-728045] p0162 A72-14802

Applying systems analysis techniques to aircraft  
maintenance to achieve aviation safety p0268 A72-19017

Investigating failure of gas turbine vanes under  
influence of thermal cycles in simulated modes  
of engine start-up and shut down p0428 A72-24815

Analysis of failure rate for rotary wings on CH-47  
helicopter and determination of  
mean-time-between-failure leading to final  
replacement [AD-739568] p0516 A72-28022

Analysis of helicopter accidents to determine  
effectiveness of crash resistant fuel system  
installed in UH-1 helicopter [AD-739567] p0517 A72-28023

Quality control and reliability engineering  
procedures applied to aircraft engine parts  
[JPMS-56674] p0538 A72-29809

Predicting structural failure by applying  
structural fatigue test data analysis p0540 A72-29903

Review of civil aviation accidents in US to  
determine incidents involving material failures  
p0541 A72-29914

Reliability engineering of aft transmission  
planetary carrier bearing nut in mechanical  
drive assembly of CH-46 helicopter  
[AD-743073] p0587 A72-31037

**FAILURE MODES**  
Static compressive load tests on L-837 airport  
marker light bases [NBS-10453] p0096 A72-12586

**FAIRCHILD MILITARY AIRCRAFT**  
**U MILITARY AIRCRAFT**  
**FAN IN WING AIRCRAFT**

Fan-in-wing model noise due to cross flow  
generated in- and outflow distortions and  
unsteady rotor blade forces [ASME PAPER 72-GT-92] p0298 A72-25666

Flow distortion and performance measurements on a  
12-inch fan-in-wing model for a range of forward  
speeds and angle of attack settings. p0560 A72-42323

Flow distortion and performance measurements on 12  
in. fan-in-wing model for range of forward  
speeds and angle of attack settings in closed  
wind tunnel p0211 A72-16702

Fan and wing force data on wind tunnel model of  
VTOL lift fan in two dimensional wing, with and  
without exit louvers [NASA-TN-D-6654] p0263 A72-18775

Wind tunnel tests to determine performance of fan  
in wing model at various angles of attack and  
airspeeds p0649 A72-33966

**FANLIFT DEVICES**  
**U LIFT FANS**

FANS

- Fan and compressor noise evaluation, and model formulation and testing [FAA-RD-71-73] p0086 N72-11946
- Effect of front and rear fan installations on flow distortion and noise in subsonic aircraft engines [NASA-TN-X-68105] p0520 N72-28287

FAR FIELDS

- Subsonic wind tunnel investigation of aircraft wake far field structure, measuring trailing vortex decay by yawhead pressure probe [AIAA PAPER 72-40] p0130 A72-16902
- Far field sonic boom approach effects, describing Whitham theory extension for ultimate N wave deviations for body configurations with continuous or discontinuous tangent p0405 A72-33010
- Machine code for finite difference solution of wake vortex governing equations and far flow field prediction in trailing vortices, developing turbulent energy model [AIAA PAPER 72-989] p0561 A72-42326

PASTENERS

- NT ANCHORS (PASTENERS)

- NT LOCKS (PASTENERS)
- NT NUTS (PASTENERS)
- NT RIVETS
- NT SCREWS

- Crack initiation detecting and recording instrument with optical strain gages for double shear fatigue tests of aircraft fasteners p0300 A72-25823
- Hi-Shear and Hi-Lok fastening systems for aircraft manufacture, comparing strength and weight with conventional rivets and bolts [SAE PAPER 901] p0594 A72-43451
- Corrosion resistance comparison of experimental coatings for steel fasteners used in high performance aircraft [AD-738805] p0471 N72-26472

FATIGUE (MATERIALS)

- NT BENDING FATIGUE
- NT METAL FATIGUE
- NT THERMAL FATIGUE

- Inspectability criteria for airframes with fatigue fail safe design requirements for small airplane certification [SAE PAPER 720310] p0289 A72-25574
- Fatigue certification of general aviation aircraft in Australia, describing ground taxi load spectra and endurance and radiographic inspection of laminated spar caps [SAE PAPER 720311] p0289 A72-25575
- Cooling efficiency and load endurance of aircraft turbine engine blades as function of ambient temperature and air flow rates p0304 A72-26892
- Stress levels and fatigue in aircraft structures subjected to jet noise, noting stress calculation for skin panels and control surfaces p0355 A72-29579
- Reliability analysis in the estimation of transport-type aircraft fatigue performance. p0568 A72-42971
- Optimal fleet reliability under fatigue and chance overload in service. p0607 A72-44656
- Aircraft fatigue: Design, operational and economic aspects. p0608 A72-44726
- Optimum design of joints - The stress severity factor concept. p0608 A72-44728
- The importance of service inspection in aircraft fatigue. p0609 A72-44740
- Structural fatigue cost penalties in airline operations, considering inspection, maintenance and carrying capacity reduction p0610 A72-44743
- Structural fatigue cost in aircraft maintenance and repair, considering inspections, defect rectification, preventive modifications, replacements and NDT p0610 A72-44744
- Observations on designing to combat fatigue and its effects on the economics of civil transport aircraft.

- Feasibility analysis of active vibration isolation in landing gear system of aircraft to reduce wing fatigue from ground induced vibration during taxiing [AD-730141] p0155 N72-14016
- Development of nondestructive test methods for detection of early fatigue and fracture damage in metals and alloys [AD-730348] p0224 N72-17937
- Survey and analysis of literature on fatigue damage accumulation in aircraft materials and structures [AGARD-AG-157] p0378 N72-22918
- Development of method for calculating fatigue strength of airframe structures and predicting rate of fatigue crack propagation [AD-736887] p0390 N72-23936
- Effect of oxidation-resistant coatings on fatigue strength of nickel-based alloy for turbine engine blades [JPRS-55972] p0426 N72-24608
- Chafing characteristics of wire braided military helicopter hoses [AD-738842] p0471 N72-26409
- Structural fatigue, thermal cycling, creep, and residual strength of aircraft metal structures reinforced with filamentary composites [NASA-CR-2039] p0475 N72-26939
- Mechanism of fatigue enhancement in selected high strength aluminum alloys related to unique microstructures [AD-738450] p0484 N72-27584
- Review of civil aviation accidents in US to determine incidents involving material failures p0541 N72-29914
- Development of test equipment for endurance testing of airframes to determine accumulation of fatigue damage [AD-744280] p0625 N72-32062
- Subsonic, transonic, and supersonic aerodynamics, fatigue and structural analysis, and related aircraft studies - bibliography p0648 N72-33961

FATIGUE DIAGRAMS

U S-N DIAGRAMS

FATIGUE LIFE

- European A300B airbus flying control hydraulic system and landing gear design for safety and reliability, fatigue life, weight and maintenance p0009 A72-10724
- Ti alloys for aircraft structures, emphasizing weldability, tensile fatigue and residual strengths, shear-carrying qualities and fuselage shell design p0058 A72-13616
- Aircraft performance parameters in terms of effect on lifting system service and fatigue life and on design p0182 A72-19111
- Fatigue strength characteristics of boron-epoxy reinforced Al stringers for helicopter airframe [AIAA PAPER 72-392] p0287 A72-25413
- Gas turbine engine compressor blade and materials fatigue strength dependence on pressure under contact friction corrosion p0315 A72-28244
- Airframe and wing fatigue life testing, discussing results recomputation for changed operating conditions p0358 A72-30276
- Welded steel airframe residual fatigue life tests by nonstationary random loading, applying to jet trainer aircraft landing gear p0358 A72-30277
- Aircraft engine components fatigue life assessment under small cycle temperature conditions, including temperature field and stress-strain determination in critical spot p0358 A72-30279
- Computer algorithms and programs contribution to aircraft structure operational reliability and fatigue life calculation p0359 A72-30288
- Ni-Cr-Ti steel aircraft structural element fatigue life calculation based on failure mechanism involving crack propagation p0360 A72-30429

Adhesive bonding of L-1011 body shell panels for improved fatigue strength and corrosion resistance  
p0400 A72-32429

Aircraft gas turbine engine Ni base alloy disks and shafts thermomechanical treatment, considering yield strength and high and low cycle fatigue resistance  
p0407 A72-33299

Fretting corrosion fatigue prevention by barrier approach, discussing test program and application to helicopter part fatigue life increase  
[AHS PREPRINT 672] p0448 A72-3412

The use of airborne magnetic tape recorders for fatigue life monitoring.  
p0449 A72-34812

Fatigue strength of overloaded stiffeners in cracked panels, evaluating stress intensity factor and overload coefficients for fatigue crack propagation via finite element method  
[ICAS PAPER 72-40] p0555 A72-41165

An advanced strain level counter for monitoring aircraft fatigue.  
p0564 A72-42688

Fatigue strength and fail-safe aspects of lug joint in aircraft structures, considering tension-compression load, fretting corrosion, prestress and residual stress  
p0567 A72-42851

Testing procedures for the design and life estimation of fatigue-sensitive structures.  
p0568 A72-42974

Gas turbine blade models of heat resistant Zhs6K alloy under operational temperature variations, observing fatigue strength  
p0598 A72-43735

The New Zealand light aircraft fatigue meter program.  
p0609 A72-44735

Aircraft structures fatigue life expectancy under random acoustic excitation, describing testing methods and equipment  
p0609 A72-44739

Fatigue design and test program for the American SST.  
p0609 A72-44741

Engine operating parameters that affect low-cycle fatigue and creep damage of critical components of naval aircraft engines during fleet operations  
[AD-728045] p0162 A72-14802

Fatigue life under cyclic loads of notched aluminum-copper-magnesium alloy  
[DLR-FB-71-23] p0170 A72-15530

Anti-fretting corrosion coatings for aluminum alloys at temperature up to 150 C noting fatigue strength  
[D-MAT-174] p0170 A72-15531

Conventional and reliability theories for analyzing safe fatigue life and safe inspection intervals for military and civil aircraft  
[ARL/SH-335] p0372 A72-22495

Durability tests on components of VFW-H3 gyrodyne with determination of rotary wing fatigue life  
[NASA-TT-P-14284] p0421 A72-24023

Fatigue strength and durability of gas turbine vane models under isothermal and temperature changing conditions  
p0428 A72-24826

Fatigue assessment of safe life and fail-safe structures  
[ARL/SH-REPT-334] p0438 A72-25899

Design features of DC 10 aircraft that assure structural reliability against fatigue cracks  
p0540 A72-29899

Fatigue requirements for ensuring structural integrity of military aeroplanes and helicopters  
p0540 A72-29900

Proposed changes to USAF fatigue evaluation program based on recent experience  
p0540 A72-29901

Fatigue test of model E-2 A/B aircraft, using 3000 arrested landings  
[AD-743478] p0624 A72-32060

Assessment procedure for aircraft safe life structures based on fatigue life  
[TR-98] p0648 A72-33922

**FATIGUE TESTING MACHINES**  
The use of airborne magnetic tape recorders for fatigue life monitoring.

**FATIGUE TESTS**  
p0449 A72-34812

Nondestructive radioactive gas penetrant tests for porosity and fatigue damage in jet engine castings  
p0009 A72-10813

Metal fatigue damage nondestructive detection, discussing inspection methods, equipment, advantages, limitations and test results  
[AD-741977] p0020 A72-12898

Endurance tests of D16AlO alloy sheets under high intensity acoustic, harmonic and electrodynamic vibrator loading  
p0056 A72-13470

Concorde airframe testing for thermal effects on structural strength and fatigue life, discussing facilities for flight conditions simulation  
p0136 A72-17197

Fatigue behavior of notched or cracked aircraft structure parts, examining service life prediction problem  
p0139 A72-17811

Airloads and structural integrity flight testing /U.S. Air Force/, noting dynamic response, fatigue tests and temperature data acquisition  
p0145 A72-18490

Wilga 3 aircraft structure service life from structural fatigue theory and tests, emphasizing operational load distribution measurement  
p0196 A72-21634

Metric swaged pipe coupling design and development for aircraft hydraulic systems, presenting fatigue test results  
p0199 A72-21940

DC-10 aircraft structural design, flight handling characteristics and fatigue tests  
p0234 A72-23446

Statistical evaluation of welded airframe component fatigue damage increment during cyclic loading with constant force amplitude  
p0245 A72-24922

Aircraft wing structure fatigue life estimates based on flight load time histories from counter accelerometers  
[SAE PAPER 720305] p0288 A72-25569

Crack initiation detecting and recording instrument with optical strain gages for double shear fatigue tests of aircraft fasteners  
p0300 A72-25823

Airframe and wing fatigue life testing, discussing results recomputation for changed operating conditions  
p0358 A72-30276

Cost-saving techniques in helicopter structural test methods, suggesting system simulation, component replacement time calculation and computer techniques  
p0407 A72-33221

Results of preliminary studies of a bearingless helicopter rotor concept.  
[AHS PREPRINT 600] p0445 A72-34490

Full scale airframe fatigue testing of the CH-46.  
[AHS PREPRINT 671] p0448 A72-34511

Fretting corrosion fatigue prevention by barrier approach, discussing test program and application to helicopter part fatigue life increase

# FEEDFORWARD CONTROL

# SUBJECT INDEX

Design of stability augmentation system for WG13 rigid rotor helicopter p0084 N72-11930  
Flight test of three-axis hydrofluidic stability augmentation system in helicopter p0085 N72-11937  
Equicontrollability and application to linear time-invariant model-following problem [NASA-CR-124768] p0110 N72-13505  
Design of optimal feedback controller for multivariate linear systems having subsystem sensitivity constraints [NASA-TN-X-68041] p0387 N72-23195  
Determination of limit cycle and structural resonance characteristics of aircraft stability augmentation systems by ground and flight tests [NASA-TN-D-6867] p0465 N72-26017  
Design and evaluation of automatic pilot to reduce excursions in altitude of jet transport aircraft during atmospheric turbulence [NASA-TN-D-6869] p0572 N72-30009

## FEEDFORWARD CONTROL

Conventional open and closed loop servo analysis methods applied to Naval aircraft approach power compensator systems, using pilot model concepts [AIAA PAPER 72-124] p0131 A72-16922  
Multiloop piloting aspects of longitudinal approach path control. [ICAS PAPER 72-46] p0555 A72-41171

## FEEDING DEVICES

U ANTENNA FEEDS

## FEEL

U SENSORY FEEDBACK

## FENCES (BARRIERS)

Scale model tests of high thrust engine blast deflection fence combinations for protection of adjacent roadway traffic p0413 A72-33698

## FERRITES

Ferrite component for waveguide commutator used as microwave switching element and modulator, noting application in navigation instruments and avionics p0598 A72-43768

## FERROMAGNETIC MATERIALS

Approaches to verification and solution of magnetic particle inspection problems. p0610 A72-44903

## FET (TRANSISTORS)

U FIELD EFFECT TRANSISTORS

## FIBER STRENGTH

Layered anisotropic fiber composite /Tetra-Core/ for sandwich construction and aircraft applications, discussing design, fabrication and strength characteristics [SAE PAPER 720343] p0292 A72-25599

## FIBERGLASS

U GLASS FIBERS

## FIBERS

NT CARBON FIBERS

NT GLASS FIBERS

NT NYLON (TRADEMARK)

NT REINFORCING FIBERS

High temperature resins for use in graphite fiber composites for jet engines [NASA-CR-72983] p0324 N72-20508

Thermal aspects of using filamentary composite materials for airframes on atmospheric entry spacecraft [SD-72-SH-0015] p0435 N72-25542

## FIBROUS MATERIALS

U FIBERS

## FIDELITY

U ACCURACY

## FIELD EFFECT TRANSISTORS

Single and dual gate GaAs-FET integrated amplifiers in C band. p0489 A72-37270

## FIELD STRENGTH

Electromagnetic waves penetration through conducting gasket used to protect sensitive devices in aircraft, investigating field strength variation with distance from gasket p0402 A72-32571

## FIGHTER AIRCRAFT

NT HARRIER AIRCRAFT

NT JAGUAR AIRCRAFT

Trainer-combat turbojet or turbofan aircraft characteristics, comparing flight, weight, size,

maintenance and development costs

p0119 A72-16178

Combat aircraft lateral aiming performance

optimization and evaluation based on criterion

of bullet stream response to pilot roll commands

p0124 A72-16657

Fighter pilots training by simulators, determining

learning effectiveness by mathematical model

based on renewal theory

[AIAA PAPER 72-161] p0128 A72-16827

Fighter/attack aircraft turbojet and turbofan

engines testing with/without afterburners

p0146 A72-18495

Airstart flight testing for single engine

fighter/attack aircraft, including flight

conditions, windmilling, fuel flows, gas

temperature, ignition and acceleration

p0146 A72-18496

VAK 191 B V/STOL reconnaissance fighter prototype

test program, describing simulations, bench,

ground, static, hovering and flight tests

p0182 A72-19249

V/STOL weapon system VJ-101, describing He-231

design development from tailsitter concept to

canard configuration with tilting wing-tip engines

p0183 A72-19251

Interactive computer graphics with three

dimensional real time CRT display of air combat

maneuvers for fighter pilot training

p0302 A72-26291

Fighter aircraft maneuverability, range and

armament requirements, discussing canard vs

delta configurations

p0303 A72-26657

German VAK 191B V/STOL fighter aircraft design,

development and flight tests, noting redundant

control systems

p0307 A72-27166

General Dynamics model 401 air superiority single

engine fighter design stressing light weight

structure and maneuverability at high speeds and

angles of attack

p0344 A72-28575

Large amplitude flight simulator for fighter

design refinement, noting extensive computer

commitment

p0345 A72-28757

Optimum low noise engine selection for transport

and combat aircraft relative to range or payload

performance, considering CTOL, VTOL, SST and

fighter aircraft

p0397 A72-32127

Multimode flight control for precision weapon

delivery.

p0453 A72-35561

Pilot-fighter aircraft system mathematical model

relating pilot performance to air to ground

weapon delivery accuracy

p0453 A72-35564

Development of the Saab-Scania Viggen.

p0492 A72-37749

The VAK 191 B VTOL fighter and reconnaissance

aircraft

p0493 A72-37825

Design for air combat.

[AIAA PAPER 72-749] p0498 A72-38124

Naval air test center participation in development

of air-to-air combat simulation.

[AIAA PAPER 72-765] p0499 A72-38130

Optimum turns to a specified track for a

supersonic aircraft.

p0502 A72-38277

Advanced fighter controls flight simulator for

all-systems compatibility testing.

[AIAA PAPER 72-837] p0505 A72-39090

Maneuver load control and relaxed static stability

applied to a contemporary fighter aircraft.

[AIAA PAPER 72-870] p0506 A72-39129

Development of design criteria for predicting

departure characteristics and spin

susceptibility of fighter-type aircraft.

[AIAA PAPER 72-984] p0561 A72-42330

Development and evaluation of an energy-oriented

guidance logic for air combat models.

[AIAA PAPER 72-949] p0562 A72-42354

Game theoretical modeling of fighter aircraft

turning tactics competition in pursuit combat,

using minimax technique

[AIAA PAPER 72-950] p0563 A72-42359

Life estimation and prediction of fighter aircraft.  
p0568 A72-42972

Control requirements for control configured vehicles.  
p0614 A72-45349

Control configured fighter and bomber aircraft based on flight control technology, discussing development programs  
p0614 A72-45386

Military aircraft construction, design and economic requirements, discussing fighter payloads, armament efficiency and fire control systems  
p0615 A72-45450

Application of linear mathematical model to represent human operator performance in controlling attacking fighter aircraft  
[AD-725069] p0031 A72-10042

Digital computer calculations of effects of variation of mass and inertia parameters on spin of delta wing fighter aircraft  
[WRE-TN-453 (WR/D)] p0099 A72-12974

Differential game solution to practical two aircraft pursuit-evasion problem in three dimensional space  
[AD-729777] p0156 A72-14224

Effectiveness evaluation of automatic spin prevention system for fighter aircraft  
[NASA-TN-D-6670] p0252 A72-18012

Longitudinal stability and control derivatives of jet fighter aircraft extracted from flight test data by utilizing maximum likelihood estimation  
[NASA-TN-D-6532] p0252 A72-18013

Application of differential games technique to determine aircraft propulsion versus engagement parameters  
[AD-731578] p0255 A72-18046

Onboard aircraft and missile radar systems for interception of airborne targets  
p0256 A72-18158

Application of statistical methods for establishing positive maneuver loads design criteria for fighter aircraft  
[AD-735472] p0332 A72-21015

Arrangement of external stores on fighter aircraft and effects on aerodynamic characteristics  
[NASA-TN-D-6775] p0366 A72-22003

Wind tunnel measurements of aerodynamic damping and oscillatory stability in pitch and yaw for scale model of carrier based variable-sweep fighter aircraft with twin vertical tails  
[NASA-TN-X-2555] p0369 A72-22027

Pontryagin minimum principle applied to aircraft heading change and aircraft interception  
[ETN-4] p0420 A72-24007

Group cohesion, interceptors, all-weather operations, and flight safety  
[AD-739229] p0488 A72-27988

Wind tunnel tests to determine low speed aerodynamic characteristics of large scale model of advanced fixed wing fighter aircraft with thin, cranked leading edge wing  
[NASA-TN-D-6919] p0513 A72-27998

Wind tunnel tests to determine aerodynamic characteristics of VTOL fighter aircraft model with external swiveling lift engines  
[NASA-TN-X-62167] p0515 A72-28012

Momentum loss measured for determination of drag in wind tunnel model of advanced manned interceptor with engine package containing twin internal airflow passages  
[AD-741744] p0539 A72-29817

Evaluation of accelerometer and strain gage data obtained by counting methods of load-time histories for jet fighter aircraft  
p0541 A72-29912

Wind tunnel tests to determine effects of in-flight thrust reverser on stability and control characteristics of single-engine fighter aircraft model  
[NASA-TN-D-6886] p0573 A72-30010

Application of maximum likelihood estimation from flight test data to determine lateral control and stability derivatives for jet fighter aircraft  
[NASA-TN-D-6905] p0584 A72-31013

Full scale wind tunnel tests to determine dynamic stability derivatives of variable-sweep fighter configuration with twin vertical tails  
[NASA-TN-D-6909] p0622 A72-32044

FIGURE OF MERIT

Helicopter design figure of merit weight ratios definition in terms of rotor thrust coefficient, substituting pure airframe structure weight for conventionally used empty weight  
[SAFE PAPER 916] p0596 A72-43463

FILAMENT WINDING

Filament winding techniques for rotor blade applications.  
p0501 A72-38165

Boron polyimide composite development.  
p0549 A72-40553

FILAMENT WOUND CONSTRUCTION

U FILAMENT WINDING

FILAMENTS

Filamentary composite materials for aircraft fuselage structures  
[NASA-CR-112110] p0645 A72-33561

FILM BOILING

The film vaporization combustor and its physical principles. I - The vaporizer section of the combustor. II - The reaction chamber and the combustion  
[DPVLR-SONDDR-194] p0504 A72-39074

FILM COOLING

Film cooled turbine vanes external heat transfer distribution in turbulent gas stream, measuring heat transfer coefficients with and without blowing  
[AIAA PAPER 72-9] p0129 A72-16877

Film cooling effectiveness for air-gas flow section of gas turbine engine under actual operating conditions  
p0314 A72-28170

FILTERS

Dual purpose filter-separators for dirt and water removal from fuel  
p0047 A72-11676

FIN STABILIZERS

U STABILIZERS (FLUID DYNAMICS)

FINANCIAL MANAGEMENT

Airport financing, discussing funds, long term planning, commercial principles, private enterprise, loans and revenue  
p0126 A72-16698

Military systems cost reduction via civil avionics procurement techniques, discussing cost-reliability design criteria  
p0399 A72-32215

Financial methods employed in creating Brazilian aircraft industry via mixed public-private ownership  
p0410 A72-33375

Economics of a new regional airport.  
p0459 A72-36779

Budget management for modernization and expansion of airports  
p0423 A72-24337

Financial and aircraft production problems of airline industry  
p0543 A72-29983

FINISHES

NT GLAZES

Wind tunnel tests to determine drag characteristics of airfoil covered with compliant coating of polyvinyl chloride membrane over polyurethane damping layer  
[AD-729921] p0160 A72-14607

FINITE DIFFERENCE THEORY

Finite difference method for transonic airfoil design for wide range of angles of attack and Mach numbers  
p0139 A72-17629

Finite difference method application to axial flow compressors rotating stall-nonlinear analysis, taking into account blade row characteristics  
[ASME PAPER 72-GT-3] p0292 A72-25606

Transonic airfoil section design to given surface pressure distribution, applying finite difference procedures to transonic small disturbance equations  
[AIAA PAPER 72-679] p0414 A72-34062

Study of circular arc airfoils with asymptotic critical Mach number. II  
p0449 A72-34745

Machine code for finite difference solution of wake vortex governing equations and far flow field prediction in trailing vortices, developing turbulent energy model

## FINITE ELEMENT METHOD

## SUBJECT INDEX

- [AIAA PAPER 72-989] p0561 A72-42326  
Flow field analysis of aircraft configurations  
using finite difference technique for numerical  
solution to three dimensional, unified,  
supersonic/hypersonic, small disturbance equations  
[NASA-CR-1926] p0221 A72-17207

# FLIGHT HAZARDS

# SUBJECT INDEX

Development of mathematical model for evaluating compatibility of flight crew personnel and aircraft crew stations - Vol. 4  
[AD-738008] p0433 N72-25017  
Validation of man-model joint movement parameters to determine compatibility of flight crews and aircraft compartments - Vol. 5  
[AD-738009] p0433 N72-25018  
Analysis, design, fabrication, and testing of integrally armored crashworthy seats for aircrews  
[AD-742733] p0586 N72-31030

## FLIGHT HAZARDS

Medical and physiological hazards for SST passengers and crews, discussing cumulative cosmic radiation and high altitude decompression risks  
p0300 A72-25816  
Aviation hazards due to stably stratified shear and turbulence zones, discussing meteorological analysis of 747 jumbo jet turbulence incident  
p0349 A72-28865  
Head-up display performance in Falcon fan-jet aircraft during taxiing, takeoff, cruise, descent and landing approach, noting low-visibility hazards reduction during landing phase  
p0508 A72-39744  
Electrostatic charge on an aircraft and lightning striking the aircraft  
p0545 A72-40171  
Aircraft incident report involving DC-9 aircraft contacting surface of ocean near Martha's Vineyard, Massachusetts on 22 June, 1971  
[NTSB-AAR-72-4] p0250 N72-18002  
Aircraft accident report of Aero Commander aircraft at Aspen, Colorado on January 22, 1970  
[NTSB-AAR-72-1] p0254 N72-18029  
Accidents involving rotorcraft in US general aviation for calendar year 1970  
[NTSB-AMM-72-3] p0421 N72-24019  
Aircraft accident investigation of crash of Beech E18S aircraft during landing approach at Peoria, Illinois airport on 21 October, 1971  
[NTSB-AAR-72-15] p0466 N72-26019  
Conditions, circumstances, and probable causes of aircraft accidents occurring in US general aviation during calendar year 1970  
[NTSB-BA-72-1] p0516 N72-28016  
Analysis of US air carrier accidents during 1964 to 1969  
[NTSB-AAS-72-5] p0528 N72-29007  
Inflight emergency on DC-10 aircraft near Windsor, Ontario, Canada on 12 June 1972 due to accidental opening of cargo door in fuselage  
[SB-72-69/878A] p0572 N72-30006  
Ecological survey to identify bird attractants near airports and procedures to reduce occurrence of bird-aircraft collisions  
[AD-742227] p0574 N72-30022  
Report of aircraft accident involving midair collision of Convair 580 and DHC-6 aircraft over Lake Winnebago, Wisconsin on 29 June 1972  
[SA-433] p0581 N72-30970

## FLIGHT INSTRUMENTS

NT APPROACH INDICATORS  
NT ATTITUDE INDICATORS  
NT AUTOMATIC PILOTS  
NT FLIGHT TEST INSTRUMENTS  
NT GYRO HORIZONS  
NT HORIZON SCANNERS  
NT RADIO ALTIMETERS  
Flight display systems current state and future developments, discussing dual attitude indicators and automatic chart systems CRTs, engine displays and malfunction warning systems  
p0056 A72-13423  
Airline crew familiarization with DC-10  
Computerized Flight Guidance System to calculate steering signal from raw data to follow flight path  
p0494 A72-37899  
Area navigation and its affect on aircraft operation and systems design.  
[AIAA PAPER 72-754] p0498 A72-38125  
The evolution of head-up displays.  
p0506 A72-39333  
Variometer system for sailplanes sinking or climbing rates direct readout, describing pressure difference measuring concept based on

reservoir-capillary system

p0545 A72-40225  
Aircraft instrument panel redesign to alleviate crew task, proposing integral displays and controls for flight information  
p0547 A72-40291  
Evaluation of flight instrumentation for the identification of stability and control derivatives.  
[AIAA PAPER 72-963] p0561 A72-42346  
Variometer system for sailplanes sinking or climbing rates direct readout, describing pressure difference measuring concept based on reservoir-capillary system  
p0603 A72-44451  
Evaluation program for frequency separated display principle in aircraft instrument panels  
[AD-735915] p0334 N72-21027  
Human perceptual characteristic data relating to individual electronic flight display design  
p0373 N72-22622  
Development and characteristics of electronic filter system to provide all-weather air navigation and landing capability  
[NASA-CR-112146] p0571 N72-29999  
Efficient pilot management of cockpit control/display devices  
[AD-741945] p0573 N72-30016  
Flight instruments including vertical indicators and spatial orientation  
[JPRS-56624] p0589 N72-31452  
Schematic diagram for spatial orientation instrument using mechanical devices  
p0589 N72-31454  
Analysis of factors affecting accuracy of inertial air navigation systems  
[JPRS-51241] p0589 N72-31639  
Simulated night visual approaches to two airports to evaluate pilot performance with and without head-up display device  
[NASA-TN-X-62188] p0639 N72-33024

## FLIGHT LOAD RECORDERS

Extreme value analysis of flight load measurements.  
p0609 A72-44737  
Laboratory simulation of Mach 3 cruise heating on wing structure representative of X-15 aircraft for flight loads measurement  
[NASA-TN-D-6749] p0283 N72-19922  
Evaluation of accelerometer and strain gage data obtained by counting methods of load-time histories for jet fighter aircraft  
p0541 N72-29912  
Design, development, and application of flight recorders and crash location instruments used in NATO nations  
[AGARD-AR-39] p0628 N72-32457

## FLIGHT MECHANICS

Flight mechanics derivative transformations by matrix methods for changing coordinate or independent variable systems  
[DFVLR-SOHHDR-175] p0126 A72-16706  
Book on dynamics of atmospheric flight covering unsteady motion, small disturbance theory, aerodynamic characteristics, aircraft stability and control, handling qualities, etc  
p0192 A72-21491  
Nonlinear dynamics of flight vehicle - Conference, University of Technology, Loughborough, England, March 1972  
p0234 A72-23451  
Nonlinear dynamic motion response analysis of flight vehicles typified by continuously changing vibration damping and frequency  
p0235 A72-23452  
Approximate method for nonlinear differential equations of motion solution in-flight dynamics, applying to control surface buzz and slender wing oscillations  
p0235 A72-23453  
Conventional aircraft flight mechanics, reviewing vector analytical treatment of rigid body statics  
p0455 A72-35794  
Flight-mechanical analysis of various flight conditions of conventional aircraft. V - Mechanical foundations /Dynamics of the rigid body/  
p0545 A72-40175  
Flight mechanics analysis of various flight conditions for conventional aircraft. V -

## FLIGHT PERFORMANCE

General, technical, and physical descriptions of Air Combat Maneuvering Range system simulation - Vol. 1  
[AD-741194] p0581 N72-30986

Analysis of quantitative results obtained by Air Combat Maneuvering Range simulation system - Vol. 2  
[AD-741195] p0581 N72-30987

Development of optimization method for computing optimal open loop inputs for dynamical system by observing only output and application to STOL aircraft operation  
[NASA-TN-D-6978] p0585 N72-31022

Wind tunnel tests to determine damping characteristics of vanes and to calibrate flight path accelerometer at subsonic and supersonic speeds  
[AD-742994] p0589 N72-31480

Analysis of aircraft noise generation and optimization of flight paths to minimize effects of aircraft noise during takeoff  
[NASA-TT-P-14468] p0622 N72-32042

### FLIGHT PERFORMANCE

#### U FLIGHT CHARACTERISTICS

#### FLIGHT PLANS

Flight planning by ATC, discussing problems due to runway feeding from several converging airways  
p0055 A72-13415

MARS digital simulation model in GPSS for determining scheduled flight operations and maintenance resources effects on aircraft availability and usage rates  
p0141 A72-17976

Automation in planning and execution of flights, considering navigation, communication, flight instruments monitoring, control/stabilization and warning systems  
p0230 A72-22780

Military weather forecasting requirements by 1980, discussing decision making, data processing, satellite data, mission and terminal forecasts, display and computer flight planning  
p0246 A72-25096

The Gander automated air traffic system.  
p0492 A72-37748

Cost effective algorithm for optimal route aircraft scheduling for airlines by mixed integer multi-commodity flow technique and Dantzig-Wolfe decomposition  
p0604 A72-44582

Analysis of flight plan data and flight schedules with published schedules and flight data plans to determine accuracy of flight planning  
[DOT-TSC-FAA-72-10] p0322 N72-20189

Planning and management of air traffic control system based on random sample of flight plans filed at flight service stations during calendar year 1970  
[AD-735970] p0339 N72-21641

#### FLIGHT RECORDERS

STRADA landing trajectory recording system for real time flight path restitution during approach and landing, using computer and lidar techniques  
p0404 A72-32895

Airline operational data from unusual events recording systems in 707, 727, and 737 aircraft  
[FAA-RD-71-69] p0105 N72-13022

Data recording program and analysis technique for determining airworthiness of civil aircraft from 1962 to 1969  
[RAE-TR-71034] p0205 N72-15975

Special events of meteorological origin affecting civil jet aircraft operations obtained from flight recorders for period Jan. 1966 to Nov. 1968  
[ARC-CP-1188] p0280 N72-19687

Correlating seasonal and diurnal variations of thunderstorm turbulence of anomalies in loads with seasonal behavior of subtropical jet over Western Australia  
[METEOROL-STUDY-21] p0372 N72-22598

DAHIEN 3 - numerical PCM recording system for use in aircraft flight tests  
[RAE-LIB-TRANS-1638] p0517 N72-28175

Design, development, and application of flight recorders and crash location instruments used in NATO nations  
[AGARD-AR-39] p0628 N72-32457

## SUBJECT INDEX

Flight recorder insulation and thermal protection for record tapes from crash fires  
[FAA-NA-72-49] p0633 N72-32937

### FLIGHT RULES

#### NT INSTRUMENT FLIGHT RULES

#### NT VISUAL FLIGHT RULES

Flight safety from general aviation viewpoint in West Germany, discussing ATC and flight rules relative to airspace use  
[DGLR PAPER 72-036] p0605 A72-44615

### FLIGHT SAFETY

Control technique and flight quality for crew workload reduction to improve military and civil aircraft flight safety  
p0059 A72-13640

Aircraft integrated data systems application to flight safety analysis, engine performance monitoring, crew proficiency, autoland evaluation, operations and logistics  
p0065 A72-14726

Cockpit information for pilot and flight crew as key to transport aircraft accident prevention, discussing cockpit layout and displays in terms of flight safety requirements  
p0066 A72-14813

Flight safety and ATC planning in German Federal Republic and on international level, discussing regional control stations, radio frequencies, navigation systems, automation, etc  
p0127 A72-16738

Engine out flight training safety, recommending certification requirements or training procedures changes  
p0179 A72-18834

Book on air transportation, covering history, government agencies roles in economic and safety regulation of air carriers, accounting, financial and legal aspects, etc  
p0315 A72-28205

Aircraft copilot assistance to pilot in flight phases, emphasizing takeoff and landing and man machine system reliability  
p0361 A72-30815

Avionics equipment for signal processing onboard civil aircraft to improve flight safety, discussing uses of OMEGA navigation system and digital computers  
p0393 A72-31178

Civil aviation safety - Conference, Beirut, Lebanon, November-December 1971  
p0409 A72-33326

FAA policy in issuing civil airport operating certificates and establishing minimum safety standards  
p0409 A72-33330

Functional equipment active and standby redundancy for flight safety and air traffic punctuality improvement, noting Boeing 747 aircraft redundant systems  
p0452 A72-35476

The onboard authority of the aircraft commanding officer as provided by the 1963 Tokyo Convention  
p0454 A72-35763

Future aspects of business aviation, discussing pilot training and aircraft reliability and maintenance in context of flight safety  
p0507 A72-39741

Flight safety research, discussing NASA aviation hazards R and D programs involving fire, lightning and static, steep approaches, aircraft wakes, fog and visibility  
p0507 A72-39742

Trends in the control of air-traffic flows in the air space  
p0597 A72-43640

Flight safety from general aviation viewpoint in West Germany, discussing ATC and flight rules relative to airspace use  
[DGLR PAPER 72-036] p0605 A72-44615

Air traffic, collision risks, defense zones, airspace structure and central planning agency for flight safety problems reform  
[DGLR PAPER 72-038] p0605 A72-44617

Airline operational problems from traffic volume increase, discussing flight safety, passenger comfort, schedule adherence and economy aspects  
[DGLR PAPER 72-037] p0606 A72-44618

Flight safety standards and air traffic control problems of supersonic aircraft passenger service

## SUBJECT INDEX

## FLIGHT SIMULATION

- [NASA-TT-F-13952] p0250 N72-18000  
Aviation safety measures for aircraft reliability and flight control
- p0252 N72-18017  
Impact of inertial navigation on air safety and modeling techniques to assess effects of air traffic control satellite surveillance system [AD-733758] p0262 N72-18667  
Helicopter design for improving crash survivability of aircraft and occupants p0274 N72-19141  
Dynamic simulation procedures to determine interaction between air traffic control system and collision avoidance system [PAA-RD-72-10] p0280 N72-19719  
Compilation and analysis of civil aviation accidents occurring during calendar year 1970 to show conditions, circumstances, and probable cause [NTSB-BA-71-3-ISSUE-2] p0320 N72-20021  
Development of techniques and equipment for conducting programs to identify presence of clear air turbulence and warn high altitude, high speed aircraft [DOT-TSC-FAA-71-19] p0325 N72-20554  
Numerical analysis of aircraft collision probability due to reduced separation intervals and arbitrary flight paths [DOT-TSC-FAA-71-27] p0330 N72-20997  
Design and development of collision avoidance system for use with general aviation aircraft [NASA-CR-112023] p0338 N72-21625  
Evaluation of FAA advanced flow control procedures for air traffic control based on digital simulation of New York City air traffic [DOT-TSC-FAA-72-8] p0339 N72-21630  
Planning and management of air traffic control system based on random sample of flight plans filed at flight service stations during calendar year 1970 [AD-735970] p0339 N72-21641  
Analysis of air traffic control procedures employed on air routes over North Atlantic Ocean [PB-204862] p0340 N72-21642  
Development of analytical model for determining probability of successful instrument landing and assessment of interaction of factors with flight crew [NASA-CR-2022] p0370 N72-22099  
Development of wide range of broadcast control concepts for improved air traffic control and utilization of air space [NASA-CR-126157] p0373 N72-22620  
Design, development, and characteristics of aircraft approach control system and application to typical jet transport aircraft [NASA-CR-2023] p0376 N72-22652  
Analysis of air traffic control systems based on equipment specifications, data processing equipment, display simulation, and cost benefits [AD-735322] p0377 N72-22657  
Briefs of accidents involving amateur and home-built aircraft in US during 1969 [PB-206040] p0385 N72-23040  
Analysis of US general aviation aircraft accidents for calendar year 1969 p0431 N72-25003  
Analysis of air traffic control capabilities with emphasis on flight safety and systems functions [PAA-RD-72-2] p0472 N72-26524  
Development and characteristics of electronic signalling system and data processing equipment for warning system to avoid midair collisions between aircraft [NASA-CASE-LAR-10717-1] p0485 N72-27703  
Group cohesion, interceptors, all-weather operations, and flight safety [AD-739229] p0488 N72-27988  
Analysis of problems encountered by pilots of jet aircraft and application of engineering psychology to eliminate difficulties [NASA-TT-F-14351] p0514 N72-28008  
Development of broadcast system of flight traffic control for increased flight safety based on increased pilot participation of control procedures [NASA-CR-127452] p0522 N72-28662  
Simulator evaluation of instrument landing system back course approaches and comparison with front course approaches to determine flyability problems with glide slope [PAA-PS-600-8] p0537 N72-29671  
Annotated bibliography of air traffic control activities and collision avoidance systems for improved aviation safety - September 1968 to April 1972 [PAA-NA-72-41] p0537 N72-29672  
Application of nondestructive testing techniques for improving aircraft safety and aircraft accident reduction p0634 N72-32981  
Development and operation of management control system for efficient scheduling and safe utilization of commercial air transportation facilities p0649 N72-33972
- ### FLIGHT SIMULATION
- Adaptive model following control systems design by hyperstability approach for flight control and simulation [AIAA PAPER 72-95] p0134 A72-16956  
Boeing 347 helicopter program, discussing simulation, wind tunnel, whirl tower, bench testing, flight test development and demonstration p0135 A72-16993  
Fast time simulation application to ATC systems, discussing control action exercise within strategic/tactical spectrum p0135 A72-16994  
Lightning simulation laboratory for aircraft strike testing, using high energy generators p0178 A72-18774  
Cost-saving techniques in helicopter structural test methods, suggesting system simulation, component replacement time calculation and computer techniques p0407 A72-33221  
Aircraft radar for weather data, ground mapping, avoidance modes and independent landing monitor function, presenting straight and slant approach simulation data p0547 A72-40290  
Evaluation of simulated pilot/system performance in manually controlled IFR formation flight task for UH-1 helicopter under various environmental and operational conditions [AD-725209] p0031 N72-10044  
Supersonic transport aircraft and BAC 221 aircraft piloted flight simulation near zero rate climb velocity for determining aircraft maneuver controllability at low speed [ARC-CP-1165] p0043 N72-11048  
Minimum level of Reynolds number for reliable flow simulation in transonic test facilities [NASA-TM-X-67412] p0074 N72-11859  
Feasibility of transonic wind tunnel testing of large cord swept wing panel model for simulating wing shock location at flight Reynolds number [NASA-TM-X-67414] p0075 N72-11870  
Measurement accuracy and flow simulation for transonic testing in wind tunnels [NASA-TM-X-67415] p0076 N72-11872  
Transonic wind tunnel testing requirements for simulating transonic aerodynamic data at flight Reynolds numbers p0076 N72-11873  
Equivalent body of revolution for simulating high Reynolds number effect on transonic flow past two dimensional airfoil p0076 N72-11874  
Wind tunnel model boundary layer reduction through suction for accurate simulation of high Reynolds number full scale aircraft characteristics p0076 N72-11875  
Specifications for high Reynolds number wind tunnel design for flow simulation in swept wing aircraft development tests p0077 N72-11883  
Piloted flight simulation of slender wing supersonic transport aircraft during low speed landing approach with use of TV visual display [ARC-R/M-3660] p0089 N72-11966  
Wind tunnel/flight simulation of slender delta wing aircraft dynamic response to Dutch roll at low speed [ARC-R/M-3669] p0204 N72-15970  
Low speed flight simulation of slender wing BAC 221 research aircraft and comparison with flight tests

# FLIGHT SIMULATORS

[RAE-TR-69257] p0204 N72-15971  
Hybrid simulation of F-4 aircraft for evaluating display devices and pilot performance in manual fuel consumption optimization  
[AD-731713] p0208 N72-16315  
Advantages of thrust vectoring in manned air combat simulation  
p0210 N72-16694  
Flight simulation of remotely controlled lifting body model  
[DLR-FB-71-82] p0319 N72-20010  
Flight test and simulation analysis of S-67 helicopter stabilator  
[AD-735766] p0369 N72-22030  
Simulation of UH-1 helicopter flight characteristics to evaluate performance of manual formation flight display system  
[AD-737313] p0385 N72-23041  
Simulation study of airspace control corridor for Boston terminal area  
[AD-739130] p0472 N72-26526  
Fatigue crack propagation in Fokker F-28 full-scale wing structure under cyclic gust flight simulation loading  
[NLR-TR-71043-U] p0488 N72-27955  
Crack propagation in full-scale wing structure under different simulated flight conditions  
p0540 N72-29902  
Application of simulation and analysis techniques for establishing flying qualities criteria for piloted aircraft  
p0620 N72-32026  
Measurement of human operator performance in single axis tracking task during simulated turbulent conditions  
p0621 N72-32034

# FLIGHT SIMULATORS

## NT COCKPIT SIMULATORS

Toulouse-Bretigny link involving ATC and flight simulators with Concorde cockpit replica  
p0069 A72-15072  
Flight simulator for aircraft design, emphasizing compromise between performance and control requirements to avoid excess weight and drag  
p0142 A72-18245  
Aircraft safety enhancement by computer controlled flight simulator training of air crews, discussing Boeing 747 program  
p0179 A72-18839  
Night Carrier Landing Trainer flight and carrier environment simulator for A-7 aircraft pilot training, discussing performance predictions from computer data analysis  
p0182 A72-19137  
Large amplitude flight simulator for fighter design refinement, noting extensive computer commitment  
p0345 A72-28757  
Aircraft and other vehicle simulators for training crews, discussing evolution of needs, digital techniques, and visual and physiological experiences  
p0362 A72-30844  
Low cost flight simulator for general aviation pilot training, containing IFR instrumentation and turbulence injection device  
p0399 A72-32211  
Flight training simulator criteria and design considerations, noting avionics, model aircraft, control console and teaching aspects  
p0411 A72-33501  
Digital computer controlled flight simulators for undergraduate pilot, electronic warfare, air-to-air combat, and helicopter training  
p0443 A72-34393  
Simulated blind approach trainer for general aviation aircraft pilot training, discussing design concept and instrumentation with emphasis on components simplicity and economy  
p0450 A72-35325  
Use of the flight simulator in the design of a STOL research aircraft.  
[AIAA PAPER 72-762] p0499 A72-38129  
Naval air test center participation in development of air-to-air combat simulation.  
[AIAA PAPER 72-765] p0499 A72-38130  
Survivable flight control system compatibility test program.  
[AIAA PAPER 72-761] p0500 A72-38143

# SUBJECT INDEX

Advanced fighter controls flight simulator for all-systems compatibility testing.  
[AIAA PAPER 72-837] p0505 A72-39090  
Use of fixed and moving base flight simulators for the aerodynamic design and development of the S-3A airplane.  
[AIAA PAPER 72-764] p0510 A72-40052  
Flight simulator used to determine lateral and directional aerodynamic characteristics of STOL transport aircraft  
[FAA-BD-71-81] p0041 N72-11037  
Flight simulator exercise for investigation of pilot performance in low visibility conditions during approach and landing  
[RAE-TR-71044] p0042 N72-11042  
Tabulation and description of facilities available in government and industry for real time engineering flight simulation  
[NASA-CR-1877] p0157 N72-14274  
Flight simulation of aviation trainer-2 GAT-2 for determining reliability of light twin engine aircraft  
[AD-731135] p0169 N72-15252  
Research on noise reduction, flying simulators, and gust alleviators  
p0204 N72-15969  
Technical aids for experimental research in flight simulation developed at Institute of Human Engineering, Meckenheim, ERG, during 1968  
[ANTHROPOTECH-1/69] p0207 N72-16185  
Approach and landing flight simulator based on intermediary photography on transparent material  
p0207 N72-16186  
Wind tunnel test section for simulating high Reynolds number over transonic speed range.  
[NASA-CASE-MFS-20509] p0221 N72-17183  
Design and development of six-degree-of-freedom visual approach and landing simulator for training F-105 pilots  
[AD-733240] p0257 N72-18267  
Development and characteristics of flight simulator for providing data on aerodynamic characteristics of C-8A aircraft modified for STOL operation  
[NASA-CR-114434] p0367 N72-22013  
Flight simulator facility emphasizing lateral-directional control  
[NASA-TM-X-62155] p0423 N72-24335  
Evaluation cockpit and control by variable stability system in total in-flight simulator  
[AD-738314] p0424 N72-24357  
Fixed base simulator study of direct lift control on VC-10 aircraft  
[ARC-CP-1199] p0432 N72-25010  
Device for applying simulated g-forces to arm of aircraft simulator pilot  
[NASA-CASE-LAR-10550-1] p0482 N72-27271  
Simulation of dynamic spin of F-4 aircraft under pilot control using human centrifuge facility  
[AD-739326] p0483 N72-27278  
Design, development, and fabrication of total inflight simulator facility  
[AD-739230] p0483 N72-27279  
Simulation study of lift-roll coupling on handling qualities of hovering VTOL aircraft using thrust for roll control  
[NASA-TN-D-6906] p0516 N72-28020  
Interface and options definition for advanced simulation in undergraduate pilot training visual simulator, including electrical properties and edge smoothing  
[AD-739585] p0518 N72-28262  
Hybrid computer program in FORTRAN 4 to simulate pilot controlled aircraft  
[AD-740434] p0533 N72-29223  
Simulator evaluation of instrument landing system back course approaches and comparison with front course approaches to determine flyability problems with glide slope  
[FAA-FS-600-8] p0537 N72-29671  
General, technical, and physical descriptions of Air Combat Maneuvering Range system simulation - Vol. 1  
[AD-741194] p0581 N72-30986  
Analysis of quantitative results obtained by Air Combat Maneuvering Range simulation system - Vol. 2  
[AD-741195] p0581 N72-30987

# SUBJECT INDEX

# FLIGHT TESTS

- Preliminary design study for advanced fighter type in-flight simulator, employing digital systems [AD-743970] p0628 N72-32282
- Fixed base, variable stability, carrier approach landing simulator, mechanized on hybrid computer [AD-743768] p0628 N72-32283
- Fixed base simulator evaluation of effect of pictorial display realism on frequency of control reversals due to roll disturbances [NASA-TN-X-62191] p0639 N72-33023
- Evaluation of translational rate for V/STOL aircraft in hover condition using six degree of freedom motion simulator [NASA-TN-X-62194] p0639 N72-33026
- Simulator analysis of aerodynamic characteristics of short takeoff and landing transport aircraft during approach and landing [NASA-TN-D-6898] p0640 N72-33030
- Design and development of visual approach and landing simulator using F-105 aircraft components and closed circuit television system [AD-745200] p0643 N72-33259
- FLIGHT STABILITY TESTS**
- Direct side force control by rudder deflection and asymmetrical drag utilization to cancel yawing moment, discussing variable stability T-33 flight tests [AIAA PAPER 72-94] p0133 A72-16946
- Flight test instrumentation system for measurement of aircraft performance, stability and control characteristics during nonsteady flight p0412 A72-33639
- Correlation of transonic wind tunnel test data with flight test results on slender wing airplanes for double delta configuration development p0075 N72-11868
- Transonic wind tunnel testing requirements for simulating transonic aerodynamic data at flight Reynolds numbers p0076 N72-11873
- Free flight stability testing at transonic speeds of Orion slender wing models with zero lift using terminal velocity technique [ARC-CP-1174] p0202 N72-15951
- Integration method to derive angle of pitch, flight-path angle, and angle of attack from measurements in nonsteady flight [VTH-156] p0267 N72-19008
- Flight test method for determination of stability and performance characteristics from maneuvers in low and intermediate frequencies [VTH-163] p0267 N72-19009
- Flight test of three-axis fluidic stability augmentation system for UH-1 helicopter [AD-734343] p0271 N72-19043
- Inflight measurement of yawing moment of inertia of HP-115 aircraft using wing-tip parachutes [ARC-R/M-3691] p0585 N72-31025
- Equations of motion for flight vehicles with semi-passive, roll control systems, utilizing flight stability [SCL-RR-72-0007] p0623 N72-32049
- FLIGHT TEST INSTRUMENTS**
- DAMIEN III digital magnetic tape recording system for aircraft flight test data acquisition, discussing components p0412 A72-33629
- Flight test instrumentation system for measurement of aircraft performance, stability and control characteristics during nonsteady flight p0412 A72-33639
- Serial PCM system for flight test data acquisition and reduction compared with Barrier system p0412 A72-33644
- Engine compressor face rake for flight test instrumentation F-14A/TF-30. p0564 A72-42686
- FLIGHT TEST VEHICLES**
- B-52 test vehicle flight demonstration program for control configured vehicles /CCV/ technology concepts validation, noting gross weight reduction [AIAA PAPER 72-747] p0498 A72-38123
- Proceedings of conference on aircraft flight test procedures, data acquisition, data processing, and correlation with wind tunnel test results [AGARD-CP-85] p0328 N72-20976
- Flight test procedures for determining stall and spin characteristics of high performance aircraft p0328 N72-20979
- Boundary layer pressure distribution measured on Shark 1 free flight test vehicle at Mach numbers from 1.5 to 2.2 and high Reynolds numbers [ARC-CP-1208] p0527 N72-28999
- Design of rotor system research aircraft for flight testing advanced helicopter and compound rotor systems - Vol. 1 [NASA-CR-112152] p0638 N72-33014
- Design of rotor system research aircraft for flight testing advanced helicopter and compound rotor systems - Vol. 2 [NASA-CR-112153] p0638 N72-33015
- Design of rotor system research aircraft for flight testing advanced helicopter and compound rotor systems - Vol. 3 [NASA-CR-112154] p0638 N72-33016
- Design of rotor system research aircraft for flight testing advanced helicopter and compound rotor systems - Vol. 4 [NASA-CR-112155] p0638 N72-33017
- FLIGHT TESTS**
- NT FLIGHT STABILITY TESTS**
- Tristar commercial jet transport aircraft development, discussing design and flight tests for operating efficiency, reliability and safety [SAE PAPER 710755] p0004 A72-10252
- Concorde airworthiness certification, discussing ground and flight test programs for performance, flying qualities and structures fatigue properties evaluation [SAE PAPER 710756] p0004 A72-10253
- Flight test procedures for subsonic transport aircraft pitot static pressure system, recommending trailing cone calibration method [SAE ARP 921] p0008 A72-10389
- Army data analysis system for fixed and rotary wing aircraft flight testing, including airborne and computer controlled ground stations equipment p0019 A72-12408
- Flight vibration testing methods for ascertaining flutter stability of high speed aircraft [DGLR PAPER 71-083] p0023 A72-12725
- F-14A fighter accelerated flight test program with 18-month saving and 3600 flight time hours before 1973 operability p0063 A72-14591
- Automated telemetry system providing real time analytical capability and reduction of flight test time for F-14 p0063 A72-14592
- Meteorological information assistance for Concorde aircraft test flights, discussing high tropospheric turbulence and lower stratospheric temperature predictions and instruments p0063 A72-14680
- U.S. Navy automatic carrier landing system /ACLS/, discussing shore and ship based test techniques and problem areas p0124 A72-16654
- A-7 D/E navigation/weapon delivery system flight testing, using photogrammetric technique p0124 A72-16656
- Flight testing of Army helicopters terrain following and/or avoidance systems concepts for operational capability, performance and cost evaluation p0124 A72-16658
- MF-8B aircraft variable stability system ground/inflight calibration for determination of flight control system dynamics effects on flying qualities p0125 A72-16660
- Navy hovering vehicle versatile automatic control system for V/STOL flight test program, using airborne digital computer for navigation/guidance computations p0125 A72-16661
- Aircraft flight control system MTBF field operational and MIL-STD-781 testing, establishing data baseline for reliability predictions p0125 A72-16662
- BQM-34A and E/P target drone aircraft versatile automatic flight control system flight test program and results for basic and advanced flight modes p0125 A72-16663

- Flight test evaluation of A-7D/E emergency backup flight control system, describing hydraulic power control systems design and function  
p0125 A72-16664
- Model following variable stability system for X-14B VTOL aircraft, discussing hardware design and flight evaluation  
[AIAA PAPER 72-96] p0134 A72-16978
- Boeing 347 helicopter program, discussing simulation, wind tunnel, whirl tower, bench testing, flight test development and demonstration  
p0135 A72-16993
- F-14 Tomcat test program for hydraulic systems, spinning, low speed performance, stalling, afterburning turbofan engines, in-flight refueling and automatic telemetry equipment  
p0138 A72-17582
- Papers on critical and exploratory flight testing covering rotary wings, lifting bodies and jet engine airstart  
p0145 A72-18487
- Procedures followed by test pilot on first flight of new aircraft design  
p0145 A72-18488
- Structural demonstration flight testing /U.S. Navy/ of new aircraft, presenting maneuver checklist  
p0145 A72-18489
- Airloads and structural integrity flight testing /U.S. Air Force/, noting dynamic response, fatigue tests and temperature data acquisition  
p0145 A72-18490
- Flight flutter boundary testing, describing steps to minimize risk  
p0145 A72-18491
- Flight initial spin testing, discussing aircraft autorotation due to stalled angle of attack and sideslip  
p0146 A72-18492
- Rotary wing aircraft first flight and envelope expansion at design gross weight  
p0146 A72-18493
- Airstart flight testing for single engine fighter/attack aircraft, including flight conditions, windmilling, fuel flows, gas temperature, ignition and acceleration  
p0146 A72-18496
- Weapon firing and external store separation tests by flight test methods for determining safe weapon release envelope  
p0146 A72-18499
- Thunderstorm flight testing for evaluation of rain, ice, lightning and turbulence effects on aircraft, engine and systems operating characteristics  
p0147 A72-18500
- Federal Air Regulations procedures for civil transport aircraft flight testing under natural and/or simulated icing conditions  
p0147 A72-18501
- Crashproof rotorcraft STOL aircraft for rescue operation, discussing orthodox rigid and special rotary wings design, air tunnel experiment and flight tests  
p0147 A72-18582
- VAK 191 B V/STOL reconnaissance fighter prototype test program, describing simulations, bench, ground, static, hovering and flight tests  
p0182 A72-19249
- F-14 naval fighter aircraft flight test programs, discussing instrumentation and low-speed test results  
p0190 A72-21005
- Test pilot role in attack aircraft avionics systems integration consisting of head-up display, projected map, digital computer, inertial platform, radar and Doppler systems, etc  
p0190 A72-21012
- Olympus engine flight testing for relighting and antiicing, engine control and noise and vibration assessments in support of Concorde aircraft development  
p0197 A72-21898
- Airfoil ram-wing air-water hybrid vehicle X-113 Am design and operational principles based on aerodynamic ground effect, discussing flight tested performance characteristics  
p0232 A72-22971
- Flight testing of automated modular area navigation system for L-1011, describing computer, data storage and control-display units and electronic automatic chart system  
p0240 A72-24271
- Aircraft wing structure fatigue life estimates based on flight load time histories from counter accelerometers  
[SAE PAPER 720305] p0288 A72-25569
- Flight tests of combination flight director displays and attitude command control system effect on general aviation aircraft handling qualities during ILS approach  
[SAE PAPER 720316] p0289 A72-25580
- Supercritical thick wing for structural weight reduction and increased cruise speeds flight tested on Navy T2-C aircraft  
[SAE PAPER 720320] p0290 A72-25583
- Cessna 210 aircraft electrically driven hydraulic power pack for landing gear system, noting engine and flight tests  
[SAE PAPER 720327] p0291 A72-25589
- Boron/epoxy and graphite/epoxy composites application to aircraft structural design, discussing flight test and developmental programs  
p0302 A72-26234
- German VAK 191B V/STOL fighter aircraft design, development and flight tests, noting redundant control systems  
p0307 A72-27166
- Flight tests of stability augmentation system for light airplane improving pilot control during IFR encounter  
p0309 A72-27513
- Man computer weapons effectiveness and system test environment /WESTE/ instrumentation system with Decca navigation for simulated combat environmental flight tests  
p0310 A72-27515
- Project pilot criteria for preparation and execution of flight test specifications  
p0310 A72-27517
- L-1011 flight test program, discussing aircraft design, flight station, controls, flying qualities, etc  
p0310 A72-27519
- Flight test of direct side force control by rudder deflection and asymmetrical drag on T-33 airplane, noting use in dive bombing  
p0310 A72-27520
- Weapon systems reliability assessment based on limited prototype flight test results  
p0343 A72-28359
- Concorde dynamic behavior from flight tests, discussing integrated design effects, wing, fin and elevator flutter, gust and runway response and engine surge effects  
[AIAA PAPER 72-381] p0350 A72-28958
- Airborne OMEGA navigation system performance, discussing transmission facilities, three frequency receiver, flight tests and optimization of receiving antenna  
p0352 A72-29191
- Preproduction OMEGA aircraft receivers and antennas development and flight testing, noting signal loss problems in high noise or precipitation static environments  
p0353 A72-29198
- OMEGA receiver integration into Navy P-3C airborne computerized navigation system, describing flight test, maintainability and laboratory simulation programs  
p0353 A72-29202
- Test flights into weather at midlatitudes and tropical systems with airborne OMEGA navigation system, discussing E field and H field antennas  
p0353 A72-29203
- VFW 614 twin jet transport aircraft flight test program, detailing general task plan, test equipment installations and test schedule  
p0360 A72-30679
- Inclined wind tunnel test section for free gliding investigation and aerodynamic design of flexible wing two body system  
p0394 A72-31403
- Flight experiments to determine horizontal visual restriction effects on T-33 aircraft front cockpit during approaches and landings  
p0395 A72-31697

## SUBJECT INDEX

## FLIGHT TESTS CONTD

- Dynamic input to cargo in turbojet aircraft studied during C141 and C5A flights, discussing instrumentation, test procedures, data reduction processes and results  
p0403 A72-32625
- Autoland system flight testing in Trident 3B and British Civil Aviation Authority approval for ICAO Cat 3a weather  
p0411 A72-33539
- Airborne flight test data acquisition system modular design to provide digital readings from monitoring transducers analog signal  
p0412 A72-33645
- SECANT collision avoidance system, describing operational principles and flight test results  
p0417 A72-34137
- Helicopter testing of inertial navigation systems. [AHS PREPRINT 634]  
p0443 A72-34478
- S-67 flight test program. [AHS PREPRINT 653]  
p0443 A72-34479
- Flight investigation of design features of the S-67 winged helicopter. [AHS PREPRINT 601]  
p0444 A72-34485
- Helicopter stability derivative extraction and data processing using Kalman filtering techniques. [AHS PREPRINT 641]  
p0447 A72-34501
- A pilot's opinion - VTOL control design requirements for the instrument approach task. [AHS PREPRINT 644]  
p0447 A72-34504
- The world speed records of the SA 341 - Gazelle. [AHS PREPRINT 651]  
p0447 A72-34506
- Configuration and flight test of the only operational Air Force area navigation system.  
p0453 A72-35557
- USAF development of electrostatic gyros for inertial air navigation, noting flight tests and associated airborne digital computer  
p0453 A72-35558
- Aircraft flight test facilities deficiencies and modernization impediments, recommending integrated facility research program establishment  
p0491 A72-37676
- A time-frequency high performance collision avoidance system. [ONERA, TP NO. 1091]  
p0493 A72-37764
- Flight test report on L-1011 aerodynamic characteristics, discussing high and low speed performance, stability and control, stall behavior, etc  
p0494 A72-38030
- VJ-101 V/STOL aircraft design, development and flight testing, discussing takeoff and landing, hovering and transition flight and associated control problems  
p0494 A72-38032
- Real time flight flutter testing via Z-transform analysis technique. [AIAA PAPER 72-784]  
p0495 A72-38101
- The development of dynamic flight test techniques for the extraction of aircraft performance. [AIAA PAPER 72-785]  
p0495 A72-38102
- Flyover noise testing of commercial jet airplanes. [AIAA PAPER 72-786]  
p0495 A72-38103
- Status of U.S. Navy stall/post-stall/spin flight testing. [AIAA PAPER 72-787]  
p0495 A72-38104
- A-X Air Force flight evaluation. [AIAA PAPER 72-770]  
p0499 A72-38131
- Generating high Reynolds-number flows.  
p0501 A72-38222
- A generalized method for the identification of aircraft stability and control derivatives from flight test data.  
p0502 A72-38260
- Flight-test experience in digital control of a remotely piloted vehicle. [AIAA PAPER 72-883]  
p0510 A72-40059
- Design and flight experience with a digital fly-by-wire control system using Apollo guidance system hardware on an F-8 aircraft. [AIAA PAPER 72-881]  
p0511 A72-40060
- F-111A inlet nozzle dynamic distortion diagnostics for airframe-propulsion integration based on flight and transonic wind tunnel tests [ICAS PAPER 72-18]  
p0553 A72-41143
- Improved qualitative flight data rating scales.  
p0556 A72-41257
- Flying experience with the SC1 research aircraft and the P1127 prototype at the Royal Aircraft Establishment, Bedford, England.  
p0560 A72-42324
- Flight test studies of the formation of trailing vortices and a method to accelerate vortex dissipation. [AIAA PAPER 72-988]  
p0561 A72-42327
- Applications of a technique for estimating aircraft states from recorded flight test data. [AIAA PAPER 72-965]  
p0563 A72-42360
- Ka-26 helicopter operational flight testing in high mountain environment, discussing takeoff, landing and climb performance as function of altitude dependent engine characteristics  
p0597 A72-43638
- Influence of wing deformations measured during flight tests upon the flight performance of a glider made of synthetic materials. I  
p0603 A72-44452
- The fatigue and fail-safe program for the certification of the Lockheed Model 286 rigid rotor helicopter.  
p0608 A72-44733
- Flight test investigation of the aerodynamic behavior of various-sized stabilizers on a small helicopter.  
p0612 A72-45328
- Crew compartment vibration environment in B-52 aircraft during low altitude, high speed flight [AD-727023]  
p0033 N72-10127
- Ground and air tests of flight inspection marker beacon receiving system. [FAA-NA-71-29]  
p0033 N72-10173
- Flight tests of BAC 221 aircraft crosswind landing and sidestep maneuvers [ARC-CP-1168]  
p0042 N72-11045
- Development of computer programs for processing flight test data and standardizing in-flight performance of aircraft [AD-725741]  
p0043 N72-11054
- Comparison of wind tunnel and theoretical techniques for determining full scale aerodynamic flight drag factors [NASA-TM-X-67413]  
p0075 N72-11869
- Free flight models for transonic testing at high Reynolds numbers [NASA-TM-X-67416]  
p0077 N72-11878
- Autonomous navigation system for SA-330 helicopter and flight test methods  
p0084 N72-11929
- Flight test of three-axis hydrofluidic stability augmentation system in helicopter  
p0085 N72-11937
- Free flight tests to determine deployment characteristics and aerodynamic loads for all-flexible parawings with 4000 square foot wing area [NASA-TM-X-2326]  
p0087 N72-11956
- Development and flight test of survivable aircraft control system using fly-by-wire and integrated actuator package techniques [AD-729207]  
p0108 N72-13041
- Flight tests of ribbon parachutes with 2000 lb store at low altitude [SC-DC-71-4022]  
p0151 N72-13994
- Flight test of modified F-106B aircraft with underwing engine nacelles to study airframe installation effects on 3 variable-flap ejector nozzles [NASA-TM-X-2478]  
p0162 N72-14791
- Flight tests of parafoil glider and comparison of flight test data with wind tunnel data using small scale and full scale models [AD-731143]  
p0167 N72-15012
- Low speed flight simulation of slender wing BAC 221 research aircraft and comparison with flight tests [RAE-TR-69257]  
p0204 N72-15971
- Concorde power plant development, emphasizing flight test problems  
p0211 N72-16705
- History of first tests of ramjet engines [AD-732275]  
p0214 N72-16728
- Flight tests to determine methods for reducing airport community noise based on operationally optimum approach profiles [NASA-CR-114417]  
p0250 N72-18001
- Longitudinal stability and control derivatives of jet fighter aircraft extracted from flight test data by utilizing maximum likelihood estimation

- [NASA-TN-D-6532] p0252 N72-18013  
Fly by wire and integrated actuator package  
techniques for developing survivable flight  
control system in jet aircraft  
[AD-733582] p0255 N72-18040  
Flight tests of strapdown inertial navigation  
system in helicopter to determine feasibility  
for simulating systems using inertial navigation  
equipment  
[AD-733430] p0262 N72-18663  
Flight test analysis of flow characteristics of  
air intake system of F-111A aircraft at  
supersonic speed  
[NASA-TN-D-6679] p0265 N72-18996  
Maximum likelihood technique used to extract  
aerodynamic parameters of Navion airplane from  
flight data  
[NASA-TN-D-6643] p0268 N72-19019  
Flight tests to determine characteristics of blade  
slap in rotary wings and effect on helicopter  
performance  
[NASA-CR-1983] p0269 N72-19026  
Determining stability and control derivatives of  
airplanes from flight data using modified  
Newton-Raphson minimization technique  
[NASA-TN-D-6579] p0279 N72-19659  
Proceedings of conference on aircraft flight test  
procedures, data acquisition, data processing,  
and correlation with wind tunnel test results  
[AGARD-CP-85] p0328 N72-20976  
Flight test program and data acquisition  
techniques for evaluation of Boeing 747 aircraft

# SUBJECT INDEX

# FLOW CHARACTERISTICS

- Digital computer program for investigating effects of instrument error on aircraft stability and control derivatives from flight test data  
[NASA-CR-112122] p0622 A72-32041
- In flight monitoring system to measure and record helicopter performance in real time for all six degrees of freedom  
[AD-745118] p0629 A72-32476
- Procedures for reducing aircraft performance data to compensate for atmospheric parameters and variations in aircraft configurations  
[ESDU-70019] p0637 A72-33004
- Development of method for aircraft performance analysis when drag is determined from engine thrust  
[ESDU-70021] p0637 A72-33005
- Derivation of equations for determining climb performance of aircraft based on energy considerations  
[ESDU-70023] p0637 A72-33007
- Aerodynamic characteristics of SC-1 and P-1127 V/STOL aircraft with emphasis on flight tests to determine control system performance  
p0649 A72-33968
- FLIGHT TIME**
- Minimum flight time routes model at SST altitudes, taking into account temperature, meteorological and wind factors  
p0063 A72-14678
- Aircraft on-time operation and air traffic problems, considering solution requirement formulation and funding suggestions  
p0402 A72-32462
- Statistical analysis of flight time, takeoff and landing weight, fuel weight at takeoff and landing for transport jet aircraft  
[TB-88] p0480 A72-27035
- FLIGHT TRAINING**
- Engine out flight training safety, recommending certification requirements or training procedures changes  
p0179 A72-18834
- Aircraft safety enhancement by computer controlled flight simulator training of air crews, discussing Boeing 747 program  
p0179 A72-18839
- Instructor station design for automated flight training systems, considering human factors and informational requirements  
p0183 A72-19277
- Military aviation navigator training, discussing objectives, methods, instructors and equipment  
p0398 A72-32207
- Canadian Armed Forces air navigation training program, noting emphasis on training flights  
p0398 A72-32209
- USAF Academy air navigation training program, discussing systems development course and descriptive and applied astronomy  
p0399 A72-32210
- Flight training simulator criteria and design considerations, noting avionics, model aircraft, control console and teaching aspects  
p0411 A72-33501
- Maneuver acceleration measured for estimating loads during civil aircraft training and test flying  
[ARC-CP-1176] p0042 A72-11043
- Development and evaluation of C-130 aircrew training program based on systems approach  
[AD-727055] p0091 A72-12064
- Flight simulation of aviation trainer-2 GAT-2 for determining reliability of light twin engine aircraft  
[AD-731135] p0169 A72-15252
- FLIGHT VEHICLES**
- Air law concept as totality of legal regulations related to atmosphere use by flying devices, discussing relation to international environmental protection  
p0011 A72-11107
- Airborne computer programmed adaptive optimal control for subsonic vehicle automatic landing with aerodynamic performance  
p0120 A72-16430
- Air jet propelled flight vehicles optimal design parameters for constant altitude flight at given speed  
p0181 A72-18991
- Towed cable flight vehicle system motion in uniform flow field, calculating equilibrium configuration during coordinated turn from two point boundary value problem numerical solution  
p0195 A72-21604
- Tube flight vehicle system thrust and power requirements prediction by aerodynamic analysis with division of near and far flow fields  
p0195 A72-21608
- Flying machine using reaction forces on body moving in compressible fluids within piston device equivalent to air pressure pump  
p0197 A72-21798
- Soviet book on control system technology for flight vehicles covering production of mechanical, hydraulic, pneumatic, electric and electronic elements  
p0199 A72-22024
- Nonlinear dynamics of flight vehicle - Conference, University of Technology, Loughborough, England, March 1972  
p0234 A72-23451
- Nonlinear dynamic motion response analysis of flight vehicles typified by continuously changing vibration damping and frequency  
p0235 A72-23452
- Flight vehicle angular velocity measurement by accelerometers, deriving equations of motion  
p0241 A72-24497
- Russian book - Calculation and analysis of flight-vehicle motion: Engineering handbook  
p0451 A72-35451
- Russian book - Assembly and testing of hydraulic and pneumatic systems of flight vehicles  
p0490 A72-37300
- Experimental results regarding drag in supersonic flow without lift in the case of flight bodies with three in front pointed bodies  
[DFVLR-SONDDR-215] p0503 A72-38686
- Electro-optical attitude sensing device for landing approach of flight vehicle  
[NASA-CASE-XMS-01994-1] p0222 A72-17326
- Catalog of devices and techniques for boundary layer and wake measurements on flight vehicles  
[NASA-CR-116776] p0258 A72-18424
- Influence of aerodynamic heat transfer on design of high speed flight vehicles  
[ESDU-69009] p0637 A72-33008
- FLORIDA**
- Development of method for predicting occurrence of fog and stratus formations at Eglin Air Force Base, Florida  
[AD-732289] p0208 A72-16501
- FLOW CHARACTERISTICS**
- NT BOUNDARY LAYER STABILITY**
- NT FLAME STABILITY**
- NT FLOW DISTRIBUTION**
- NT FLOW STABILITY**
- NT FLOW VELOCITY**
- Parachutes flow characteristics in low speed free descent, discussing glide angle effect on total drag and water channel flow pattern studies  
p0007 A72-10309
- Slender body theory for flow calculation past low aspect ratio delta wing with straight trailing edge, noting lifting vortices distribution  
p0247 A72-25131
- Supersonic turbine cascade flow properties and pressure distributions on blades, comparing calculated results with experimental data  
[ASME PAPER 72-GT-47] p0296 A72-25639
- Computer program for gas turbine characteristics and influence coefficients calculation, allowing for cascade loss distribution during flow choking  
p0314 A72-28151
- Small transport aircraft horizontal tail surfaces flow characteristics determination for stress calculation during flight in turbulent atmosphere  
p0359 A72-30284
- Boundary layer velocity profiles on a helicopter rotor blade in hovering and forward flight.  
[AHS PREPRINT 622] p0444 A72-34482
- Rarefied hypersonic flow characteristics of delta wings and trailing edge spoilers.  
p0450 A72-35229
- Experimental study of flows in supersonic compressors  
[ICAS PAPER 72-11] p0552 A72-41136

- New results concerning the numerical calculation of the sonic flow around a given airfoil section  
p0563 A72-42639
- Investigation of the interaction between a circular wing and a flow of ideal liquid  
p0598 A72-43796
- Optimal modes of operation of a centripetal-compressor wheel with preswirling of the flow  
p0616 A72-45622
- Effect of grooved casing treatment on flow range capability of single-stage axial flow compressor [NASA-TN-X-2459]  
p0163 N72-14985
- Computer program for preliminary design analysis of axial flow turbines based on mean-diameter flow analysis [NASA-TN-D-6702]  
p0263 N72-18774
- Transonic and supersonic wind tunnel test data on intake performance of supersonic mixed compression inlet flow [NASA-CR-1977]  
p0264 N72-18786
- Comparison of flow characteristics of two transonic compressors  
p0282 N72-19852
- Conference on flow characteristics of turbomachinery [AD-735021]  
p0283 N72-19858
- Flow characteristics of turbine airfoil cooling system components [NASA-CR-120883]  
p0483 N72-27290
- Flow characteristics about uncambered, slender delta wing at 15 deg incidence with high energy blowing from leading edge slots [CRANFIELD-AERO-9]  
p0635 N72-32992
- FLOW CHARTS**
- Flow and circulation diagrams formed by events involved in optimum aircraft design configuration and structural weight selection, outlining calculation methods  
p0490 A72-37452
- Energy flow diagrams.

# FLOW EQUATIONS

# SUBJECT INDEX

[AD-744860] p0636 N72-32998

**FLOW EQUATIONS**

Elliptic-hyperbolic relaxation algorithm for solution to three dimensional nonlinear transonic small disturbance potential equation for flow about swept wings [AIAA PAPER 72-677] p0414 A72-34063

Calculation of laminar boundary layers by means of a differential-difference method. p0563 A72-42578

Simulation and analysis of trajectories and velocities of solid particles suspended in fluid passing through axial flow compressor stage [AD-725596] p0097 N72-12798

Flow charts, subroutines, and computer program for solving unified supersonic/hypersonic, small disturbance equations for flow around aircraft configurations [NASA-CR-1927] p0222 N72-17208

Characteristics of jets flowing from air entry holes of combustion chamber of gas turbine for jet flow parallel to and normal to primary flow through turbine [NAT-TR-227] p0258 N72-18279

Computerized design of axial compressor stage using radial three dimensional equilibrium flow equations [AD-733437] p0259 N72-18507

Velocities induced by distributions of infinite kinked sources and vortex lines representing wings with sweep and dihedral in incompressible flow [ARC-R/M-3667] p0277 N72-19332

Development of procedures for determining planar inviscid supercritical flow over airfoils [AGARD-AG-156] p0365 N72-22001

Derivation of equations for flow noise theory and numerical analysis of special flow configurations and boundaries p0382 N72-23019

Compilation of technical reports on theoretical aerodynamics and air flow - Vol. 1 [SBN-11-470151-2] N72-26993

Development of local linearization and transonic equivalence rule for predicting properties of transonic flows about wing-body combinations [NASA-CR-2103] p0526 N72-28994

Numerical analysis of flow distribution about nonaxisymmetric bodies at subsonic and supersonic speeds [NASA-TT-P-14547] p0628 N72-32302

**FLOW FIELDS**

**U FLOW DISTRIBUTION**

**FLOW GEOMETRY**

Aircraft engine exhaust geometry effects on smoke plume visibility, describing carbon particles light absorption characteristics by Beer-Lambert law [ASME PAPER 71-WA/GT-10] p0116 A72-15903

Wide angle conical diffuser performance improvement by conical splitter vanes, considering static pressure recovery p0238 A72-23860

Effect of the slope and curvature of meridional current lines on the long-blade twist in axial turbomachines p0507 A72-39588

Researches on the two-dimensional retarded cascade. I, II. p0560 A72-41944

Suction side velocity distribution parameter characteristic relationship to profile geometrical parameters in turbine blade cascade system p0614 A72-45366

Basic turbine concepts including flow, energy transfer, and performance characteristics p0473 N72-26687

**FLOW MEASUREMENT**

Gas turbine nozzles aerodynamic throat area air flow measurement, describing accuracy, standards, reference nozzles and mounting flanges [SAE ARP 1195] p0008 A72-10390

Axial flow multistage compressor design, discussing high speed flow measurements and Reynolds number and blade airfoil shape effect on aerodynamic performance p0121 A72-16483

German monograph on shaft and wall effect in aerodynamic measurements with three orifice pressure probes in wind tunnels p0227 A72-22320

Small scale atmospheric turbulence measurement with airborne hot-wire anemometer, discussing optimal choice of experimental parameters p0227 A72-22435

Turbulent boundary layer growth measurement on annular diffuser containing free vortex swirl p0237 A72-23857

Secondary flow measurements in rotating ducts, obtaining pressure distributions and cross-flow velocities [ASME PAPER 72-GT-17] p0294 A72-25616

Flow measurement instrumentation for turbomachine rotors, noting telemetry type data transmission system with strain gage pressure transducers for turbocompressor [ASME PAPER 72-GT-55] p0296 A72-25646

Aircraft atmospheric flow measurements of horizontal and vertical motions on mesoscales, using inertial reference system p0359 A72-30300

Laser Doppler velocimetry system design for optical measurement of intrablade flow velocity in turbomachinery p0396 A72-32045

Investigation of Freon fire-extinguishing systems with a nucleonic gage. p0458 A72-36674

Pressure transmitter for flow parameter measurements of aerodynamic nozzles and static pressure taps rotating on turbine rotor blades p0560 A72-42250

Jet impingement under VTOL aircraft. p0616 A72-45779

Main methods of fuel flow measurement and factors for consideration in deciding on type of meter to use for various requirements [AGARDOGRAPH-160-VOL-3] p0434 N72-25420

Development and characteristics of dual scatter laser Doppler velocimeter for flow distribution measurement in wind tunnels, helicopter downwash, and across high lift wing sections p0435 N72-25506

Flow measurements in trailing vortex with smoke from ground-based generator, using Lockheed Hercules [ATN-7104] p0519 N72-28277

**FLOW PATTERNS**

**FLOW RESISTANCE**

NT AERODYNAMIC DRAG

NT FRICTION DRAG

NT SUPERSONIC DRAG

NT VISCOUS DRAG

**FLOW SEPARATION**

**U BOUNDARY LAYER SEPARATION**

**U SEPARATED FLOW**

**FLOW STABILITY**

NT BOUNDARY LAYER STABILITY

NT FLAME STABILITY

Aerodynamic noise generation mechanism of ideally expanded supersonic jet based on large scale flow instabilities, deriving mathematical model p0241 A72-24331

Flow quality improvements in a blowdown wind tunnel using a multiple shock entrance diffuser. [AIAA PAPER 72-1002] p0557 A72-41587

Experiment of supersonic air intake buzz. p0603 A72-44496

Investigation of the stability of the tip vortex generated by hovering propellers and rotors. p0612 A72-45327

Laminar hypervelocity boundary layer flow past axisymmetric hyperboloid in air of thermochemical equilibrium [DLR-FB-72-16] p0519 N72-28280

Wind tunnel tests to predict aircraft wake turbulence due to tip trailing vortex [NASA-CR-62078] p0534 N72-29237

Scale model tests to compare effectiveness of aerogrids and punched plates for smoothing flow from short annular diffusers between compressor and combustor of advanced aircraft engines [NASA-CR-120960] p0636 N72-32993

## FLOW THEORY

## NT MIXING LENGTH FLOW THEORY

Subsonic linearized theory for symmetrical cranked wings at zero incidence, presenting corrected formulas for streamwise and spanwise perturbation velocity components due to wing thickness

p0013 A72-11154

High speed jet noise source physical properties interpretation by theory and scale-model experiments for supersonic transport aircraft noise suppression problem

p0016 A72-11973

Supersonic and hypersonic flows with attached shock waves over delta wing at angle of attack, deriving unified theory for flow field

p0017 A72-12030

Book on fluid dynamics covering theories of perfect, viscous and compressible fluids, infinite and finite span wings, boundary layer flow, etc

p0070 A72-15357

Computerization of panel flutter boundary calculations with aerodynamic forces derived from linear three dimensional unsteady potential flow theory

[AIAA PAPER 72-403]

p0287 A72-25424

Rotating airfoil experimental test program for verification of Himmelskamp and Dwyer-McCroskey theoretical analysis, presenting graphs of lift coefficient vs angle of attack

p0313 A72-28124

Two-dimensional subsonic linearized theory of the unsteady flow through a blade-row with small steady pitch and camber angle.

[ICAS PAPER 72-12]

p0552 A72-41137

Calculation of potential flow about aerofoils using approximation by splines.

p0566 A72-42849

Simulation and analysis of trajectories and velocities of solid particles suspended in fluid passing through axial flow compressor stage

[AD-725596]

p0097 N72-12798

Development of procedures for determining planar inviscid supercritical flow over airfoils

[AGARD-AG-156]

p0365 N72-22001

Derivation of equations for flow noise theory and numerical analysis of special flow configurations and boundaries

p0382 N72-23019

Spectral methods for analyzing jet noise and numerical analysis of sound pressure components and sound generation by wave-type jet turbulence

p0383 N72-23022

Compilation of technical reports on theoretical aerodynamics and air flow - Vol. 1

[SBN-11-470151-2]

N72-26993

## FLOW VELOCITY

Velocity field of sonic flow about aircraft wing profile, solving mixed Cauchy problem

p0013 A72-11178

Gas-particle flow trajectories, velocities and pressure distribution in axial flow turbine stage, using cascade tunnel and high speed photographic techniques

[ASME PAPER 72-GT-57]

p0296 A72-25648

Gas turbine engine combustion chamber, investigating swirl vane air flow rate effects on circumferential nonuniformity of gas temperature field at outlet

p0314 A72-28132

Contracting or diverging stream flow mean velocity change effects on airfoil pressure distribution, circulation and lift, deriving vortex distribution expression

p0396 A72-32023

Subsonic wind tunnel for pulsed flows with speed modulation as periodic function of time

p0404 A72-32898

Monitor and regulator for automatic speed control and flow velocity measurement in wind tunnel

p0411 A72-33609

Uniformly exact solution of the problem of the flow past a slender profile

p0509 A72-39904

Iterative solution to aerodynamic design of axial flow compressors used in turbojet engines, calculating meridional velocity distribution

p0550 A72-40930

New results concerning the numerical calculation of the sonic flow around a given airfoil section

p0563 A72-42639

Aircraft clamp-on flowmeter using IR heat source in thermostat bridge to monitor flow rate in hydraulic lines

p0565 A72-42715

Effects of transport velocity of wake vortex on aerofoil oscillations.

p0603 A72-44494

Construction of velocity diagrams for design or analysis of turbines

p0473 N72-26688

## FLOW VISUALIZATION

Flow visualization in supersonic axial compressor by short exposure schlieren photography of shock wave patterns in rotating annular cascade of compressor blades

[ONERA, TP NO. 1026]

p0136 A72-17192

Supersonic and subsonic jet flows coexistence in constant section duct, analyzing pressure on walls and in fluid and schlieren visualization

[ONERA, TP NO. 976]

p0230 A72-22813

Hydraulic tank application to internal flow visualization in turbomachinery, describing test equipment and methods used for axial flow model

p0241 A72-24654

Flow separation reduction by transverse jet blowing, illustrating flow patterns by water tunnel visualization on cylinders, perpendicular flat plates, contoured walls, steps, wings, etc

[ONERA, TP NO. 1070]

p0300 A72-25814

Visualization study of flow near the trailing edge of an oscillating airfoil.

p0511 A72-40067

Holographic interferometry and laser Doppler velocimeter techniques for flow visualization and flow distribution measurement in aircraft turbine engines

[AD-730063]

p0158 N72-14321

Vortex breakdown studied by flow visualization noting pressure gradient effect and analogy with boundary layer separation and wake bursting

[ONERA-NT-175]

p0277 N72-19328

Visualization of unsteady flow around oscillating airfoils and rotary wings, and within turbomachines in hydraulic tunnels

[ONERA-NT-180]

p0277 N72-19329

Analysis of helicopter rotary wing performance with recirculatory flow visualization during wind tunnel tests

[AD-734873]

p0277 N72-19352

Retrodiffusion holographic interferometry visualizing turbocompressor flow

[ONERA-NT-190]

p0471 N72-26358

Analysis of helicopter rotor wake patterns using water tunnel test facility

[AD-739946]

p0482 N72-27052

Effect of flap set back and gas temperature on Coanda attachment to curved plate with application to air flow patterns on flap of scale propulsive wing model

[AD-741583]

p0577 N72-30300

## FLOWMETERS

## NT HOT-WIRE FLOWMETERS

Flow rate metering by multiple Venturi systems, discussing internal fluid mechanics for design optimization

[ASME PAPER 71-WA/FE-27]

p0117 A72-15926

Aircraft clamp-on flowmeter using IR heat source in thermostat bridge to monitor flow rate in hydraulic lines

p0565 A72-42715

## FLUID DYNAMICS

## NT AERODYNAMICS

## NT AEROTHERMODYNAMICS

## NT ELECTROHYDRODYNAMICS

## NT GAS DYNAMICS

## NT HYDRODYNAMICS

## NT HYPERSONICS

## NT RAREFIED GAS DYNAMICS

## NT ROTOR AERODYNAMICS

Book on fluid dynamics covering theories of perfect, viscous and compressible fluids, infinite and finite span wings, boundary layer flow, etc

p0070 A72-15357

Airplane hydraulic control systems digital simulation, using method of characteristics for

# SUBJECT INDEX

# FRACTURE MECHANICS

Blade stress analysis, wind tunnel models, and test procedures for investigating conversion process of folding tilt-rotor aircraft - Vol. 4 [AD-735733] p0334 N72-21028

Design and construction of hydraulic controlled rotor with erectable blade recovery system [DGLR-71-020-PT-1] p0382 N72-23013

Wind tunnel tests to determine aerodynamic characteristics of folding helicopter rotor in various configurations [NASA-CR-114464] p0573 N72-30013

**FORCE DISTRIBUTION**

Force and pressure distribution measurements on delta wing-body combination in compressible flow, investigating Reynolds number effect [DGLR PAPER 71-118] p0022 A72-12707

Higher order forces effect on shock absorbing systems of masses interconnected by elastic and damping members of aircraft landing gears p0231 A72-22861

Kinetic jet engine energy as lifting force on turbojet wings [JPERS-54785] p0100 N72-12984

Forward speed effect on lift power of two dimensional jet ground effect support p0476 N72-27006

**FORCED OSCILLATION**

**U FORCED VIBRATION**

**FORCED VIBRATION**

Unsteady wake effects on progressing/regressing forced rotor flapping modes. [AIAA PAPER 72-957] p0562 A72-42350

**FORCED VIBRATORY MOTION EQUATIONS**

**U FORCED VIBRATION**

**FOREBODIES**

**NT NOSES (FOREBODIES)**

Forebody and forebody/wing configuration data for supersonic inlet performance and distortion during maneuvering flight p0212 N72-16710

**FORECASTING**

**NT NUMERICAL WEATHER FORECASTING**

**NT PERFORMANCE PREDICTION**

**NT PREDICTION ANALYSIS TECHNIQUES**

**NT TECHNOLOGICAL FORECASTING**

**NT WEATHER FORECASTING**

Individual regions and nationwide air traffic demands forecasting for airport planning p0408 A72-33311

Major civil airport planning, discussing information gathering and processing for aviation demand, aircraft movements revenue and cost forecasts and pricing policy evaluation p0409 A72-33327

Major civil airport development plan, discussing traffic forecasts, runways, noise, airspace capacity, access systems, freight installations, maintenance facilities, navigation aids, buildings, etc p0409 A72-33328

Statistical forecasting models for USAF CONUS outbound cargo airlift requirements by averaging and exponential smoothing models p0604 A72-44578

Airport traffic forecasts for Washington, D.C. for 1972 to 1983 p0283 N72-19975

Forecasts of instrument flight rules air traffic controlled by FAA control centers for determining requirements for manpower, facilities, and equipment [REPT-72-00186] p0376 N72-22646

Forecasts of aviation activity for fiscal years 1972 to 1973 to indicate expected status of commercial and general aviation [AD-738360] p0423 N72-24034

Forecast of airport activity for major communities in U.S. p0635 N72-32986

**FORECASTS**

**U FORECASTING**

**FOREIGN POLICY**

**NT INTERNATIONAL COOPERATION**

**FOREIGN TRADE**

Potential foreign market for surplus U.S. airlines jet transports [REPT-72-00185] p0378 N72-22968

**FORENSIC SCIENCES**

**U LAW (JURISPRUDENCE)**

**FOREST FIRES**

Basic requirements for airborne infrared forest fire detection system [AD-726953] p0034 N72-10396

**FOREST MANAGEMENT**

Radar altimeters and large scale aerial photography for forest inventory p0588 N72-31447

**FORGING**

Forged Inconel alloy 718 metal powder preforms for dense aircraft engine compressor rotor blades p0014 A72-11441

Forging techniques and applications for YF-12A aircraft Ti alloy bulkhead production, considering diffusion bonding and die shimming p0069 A72-14914

Statistical evaluation for forged jet engine parts tensile tests cost reduction, using regression analysis p0184 A72-19484

Heat treatment and machining for distortion control of large Al alloy forgings for DC 10 aircraft p0228 A72-22476

Metal forming techniques for gas turbine engines, considering isothermal, radial and powder metallurgy preform forgings, contoured cross and form rolling, and squeeze casting [ASME PAPER 72-GT-58] p0296 A72-25649

Development of incremental technique for forging thin-web, tall-rib configurations for aircraft structures [AD-729012] p0110 N72-13434

**FORM PERCEPTION**

**U SPACE PERCEPTION**

**FORMING TECHNIQUES**

**NT CASTING**

**NT EXPLOSIVE FORMING**

**NT FORGING**

**NT PRESSING (FORMING)**

**NT ROLL FORMING**

Shot peen contouring of Boeing 747 wing skins combined with incremental chip forming, noting principles and manufacturing process [ASME PAPER 72-31,4] p0314 A72-28160

**FORMULAS (MATHEMATICS)**

Formulae for components of perturbation velocity in linearized subsonic theory for symmetrical cranked wing panels at zero angle of attack [NPL-AERO-NOTE-1090] p0029 N72-10021

Formulas accounting for earth ellipsoid flattening and flight altitude corrections of air navigation measurements [SER-C/DISS-166] p0523 N72-28677

**FORTAN**

FORTAN digital simulation of ATC radar beacon system making possible computer generated movie display p0184 A72-19301

**FOURIER TRANSFORMATION**

Inverse integral Fourier transforms to solve steady periodic motions of wing close to solid surface, deriving equations of lift and principal moment p0196 A72-21701

Spatial Fourier transform for wave scattering from rough surfaces [AD-734044] p0278 N72-19576

**FRACTOGRAPHY**

Metallographic and fractographic analyses of cracking in T53-L13 gas turbine engine compressor disks p0010 A72-10816

Approaches to verification and solution of magnetic particle inspection problems. p0610 A72-44903

**FRACTURE MECHANICS**

The surface flaw in aircraft structures and related fracture mechanics analysis problems. p0600 A72-44228

Theoretical and analytical aspects of metal fatigue failure and relationships to fracture mechanics [AD-725028] p0036 N72-10957

Stress and strain history at point of stress concentration to determine effects of spectrum block size in fatigue testing [AD-726164] p0098 N72-12928

# **FRACTURING**

# **SUBJECT INDEX**

Development of nondestructive test methods for detection of early fatigue and fracture damage in metals and alloys  
[AD-730348] p0224 N72-17937

Application of fracture mechanics to design, analysis, and qualification of aircraft structural systems  
[AD-731565] p0255 N72-18045

Fracture mechanics and crack behavior of steel plate and forging materials for aircraft  
[AD-737779] p0426 N72-24601

Application of applied fracture mechanics in design analysis to provide improved aircraft structural integrity  
p0541 N72-29909

# **FRACTURING**

Causes of compression fractures and resumption of duties by Greek pilots after recovery  
p0274 N72-19149

# **FRAGMENTATION**

Results of experimentation to provide data for designing turbomachine rotor burst fragment containment rings  
[AD-744950] p0640 N72-33034

# **FRAMES**

NT AIRFRAMES  
NT UNDERCARRIAGES

# **FRANCE**

Research equipment, methods, and facilities at Propulsion Test Center, France  
p0209 N72-16690

Research and development at ONERA facilities, France, in 1971  
p0581 N72-30981

# **FRAUNHOFER LINE DISCRIMINATORS**

Fraunhofer line discriminator as remote sensor of fluorescent dyes used in pollution detection  
[NASA-CR-125643] p0258 N72-18448

Sensitivity of Fraunhofer line fluorometer for photodensitometric dye concentration measurements in water  
[NASA-CR-125653] p0258 N72-18450

# **FRAUNHOFER REGION**

# **U FAR FIELDS**

# **FREE FLIGHT**

Inclined wind tunnel test section for free gliding investigation and aerodynamic design of flexible wing two body system  
p0394 A72-31403

Free flight models for transonic testing at high Reynolds numbers  
[NASA-TM-X-67416] p0077 N72-11878

Drag of supercritical body of revolution in free flight at transonic speeds and comparison with wind tunnel data  
[NASA-TN-D-6580] p0079 N72-11898

Free flight stability testing at transonic speeds of Orion slender wing models with zero lift using terminal velocity technique  
[ARC-CP-1174] p0202 N72-15951

Free flight measurement of blunt leading edge caret wing pressure and heat transfer at supersonic speeds  
[ARC-R/M-3679] p0267 N72-19007

Development and characteristics of support system and data reduction capability for free flight test facility  
[ISAS-477-VOL-37-NO-3] p0424 N72-24343

Effect of fin-opening shock environment on guided modular dispenser weapons  
p0474 N72-26876

Boundary layer pressure distribution measured on Shark 1 free flight test vehicle at Mach numbers from 1.5 to 2.2 and high Reynolds numbers  
[ARC-CP-1208] p0527 N72-28999

# **FREE FLIGHT TEST APPARATUS**

Free flight simulation tests for V/STOL aircraft nonlinear attitude control system adaptation to helicopter pitch and roll control  
[DGLR PAPER 71-060] p0023 A72-12714

Free flight supersonic model for determining static and dynamic aerodynamic characteristics  
[NAL-TR-237] p0100 N72-12981

Miniature capacitive accelerometer for use in free flight wind tunnel telemetry  
[NASA-TM-X-2644] p0589 N72-31460

# **FREE FLOW**

Flat plate boundary layer transition equations for supersonic wind tunnels, taking into account

free stream turbulence

p0196 A72-21616

Boundary layer behavior of turbocompressor in free stream turbulence  
[CUED/A-TURBO/TR-26] p0109 N72-13266

Free streamline theory for determining pressure distribution on airfoil with flow separation  
[NAL-TR-247] p0371 N72-22333

Jets introduced obliquely into free stream flow and jet impingement on curved surfaces  
[NASA-CR-127121] p0469 N72-26227

# **FREE JETS**

The lift coefficient of a supercavitating jet-flapped foil in a free jet.  
p0556 A72-41236

Nozzle shape, temperature, and velocity effects on free hypersonic jet exhaust properties  
p0029 N72-10013

Free jet tests of full-scale supersonic intake/engine combination of Concorde power plant  
p0211 N72-16704

# **FREE OSCILLATIONS**

# **U FREE VIBRATION**

# **FREE STREAM EFFECTS**

# **U FREE FLOW**

# **FREE STREAMS**

# **U FREE FLOW**

# **FREE VIBRATION**

Nonlinear analysis of helicopter rotor blade free transverse vibration under air and centrifugal loadings during forward flight, using matrix method  
p0394 A72-31407

Natural frequencies and vibration modes of free glider, using symmetrical matrix to replace three dimensional structure by approximate model  
p0410 A72-33409

A new method of calculating the natural vibrations of a free aeroplane.  
[ICAS PAPER 72-05] p0552 A72-41130

Preliminary design of a sailplane wing for dynamic gust loads  
p0611 A72-44992

Effects of Reynolds number and frequency parameters on buzz characteristics at subsonic speeds using free oscillation method  
[NPL-AERO-1312] p0045 N72-11291

# **FREEING POINTS**

# **U MELTING POINTS**

# **FREIGHT**

# **U CARGO**

# **FREIGHT COSTS**

Air cargo growth potential, marketing and profitability, considering need for improvements in ground handling, rate structure, container standardization, documentation, etc  
p0344 A72-28452

Energy used in intercity freight transportation by water, rail, pipeline, truck, and air, and effect of fuel price increases  
[R-804-NSF] p0390 N72-23979

# **FREIGHTERS**

Transoceanic helium cooled thermal reactor powered air cushion freighter of gross weight 4500 metric tons, discussing design and performance characteristics  
p0062 A72-14431

Potential effects of air cushion vehicle /ACV/ multithousand ton freighter on city development  
p0115 A72-15776

# **FREON**

Investigation of Freon fire-extinguishing systems with a nucleonic gage.  
p0458 A72-36674

Aerodynamic suitability of Freon 12 for wind tunnel testing of transport aircraft models at increasing Reynolds numbers and subcritical and supercritical Mach numbers  
[NASA-TM-X-67417] p0077 N72-11879

# **FREQUENCIES**

# **NT AUDIO FREQUENCIES**

# **NT HIGH FREQUENCIES**

# **NT INFRASONIC FREQUENCIES**

# **NT INTERMEDIATE FREQUENCIES**

# **NT LOW FREQUENCIES**

# **NT MICROWAVE FREQUENCIES**

# **NT RADIO FREQUENCIES**

# **NT RESONANT FREQUENCIES**

# **NT ULTRAHIGH FREQUENCIES**

## SUBJECT INDEX

## FRICTION MEASUREMENT

- NT VERY HIGH FREQUENCIES  
Effects of Reynolds number and frequency parameters on buzz characteristics at subsonic speeds using free oscillation method  
[NPL-AERO-1312] p0045 N72-11291
- FREQUENCY ASSIGNMENT  
Communication aspects of aeronautical satellite system, considering aircraft equipment, ground stations, ATC, type of access and frequency assignment  
p0310 A72-27658
- FREQUENCY BANDS  
U FREQUENCIES
- FREQUENCY CONTROL  
NT AUTOMATIC FREQUENCY CONTROL  
Aircraft turbo-alternator speed control for constant frequency power supply, presenting theoretical relationships for electrohydraulic or mechanohydraulic control loops  
p0071 A72-15462  
Time/frequency technology application to reliable aircraft collision avoidance system, discussing precision time-ordered techniques, frequency control and synchronization and flying clocks  
p0396 A72-32072  
Requirements for high frequency aircraft antennas  
[AD-735886] p0335 N72-21176
- FREQUENCY CONVERSION  
U FREQUENCY CONVERTERS
- FREQUENCY CONVERTERS  
NT FREQUENCY MULTIPLIERS  
Analysis and comparison of operation of two forms of cycloconverter using natural and forced commutation with application to aircraft electricity generating systems  
[RAE-TR-70092] p0091 N72-11979
- FREQUENCY DISTRIBUTION  
Time/frequency techniques in land, sea and air transportation environments, discussing characteristics and electronic traffic control systems applications  
p0396 A72-32073  
Extreme value analysis of flight load measurements  
p0609 A72-44737
- FREQUENCY DIVISION MULTIPLEXING  
Aircraft FDM and TDM systems, considering signal processing, cable requirements and applications to aircraft weapon systems and telemetry  
[SAE AIR 1207] p0458 A72-36529  
Evaluation of technological risk areas of time/frequency air traffic control system  
[AD-733761] p0262 N72-18668
- FREQUENCY MODULATION  
Performance of AM/FM radio navigation equipment for military aircraft  
[AD-729533] p0161 N72-14678  
Adaptive narrow band, frequency modulation, voice communication system  
p0437 N72-25783
- FREQUENCY MULTIPLIERS  
Dual output ultrahigh frequency aircraft antenna feed incorporating coaxial magic tee, transistor and step recovery varactor diode frequency multipliers  
[RAE-TR-70002] p0169 N72-15216
- FREQUENCY RANGES  
Silicone based elastomers acoustic excitation damping properties at 213-423 K, discussing testing technique and results at 200-1000 Hz  
p0351 A72-29090
- FREQUENCY REGULATION  
U FREQUENCY CONTROL
- FREQUENCY RESPONSE  
Multiplex electrohydraulic system for aircraft fly by wire actuators with majority voting and pressure logic, discussing frequency response and environmental tests  
p0199 A72-22152  
Aircraft pilot seating protection from dynamic environment by active vibration isolation, discussing human frequency response characteristics  
p0302 A72-26391  
Unsteady aerodynamic forces on flat plate in locally perturbed incompressible potential flow, investigating angle of attack frequency response to periodic local perturbations  
p0303 A72-26579
- Hingeless rotor - Experimental frequency response and dynamic characteristics with hub moment feedback controls.  
[AHS PREPRINT 612] p0446 A72-34494  
Ground and torque relation to swivel angle and lateral displacement of wheel rim plane, using string model for tire  
p0557 A72-41260
- Wind tunnel tests to determine dynamic characteristics of hingeless rotors with hub moment feedback controls and rotor frequency response - Vol. 1  
[NASA-CR-114427] p0253 N72-18024
- FREQUENCY SHIFT  
Minimum frequency separation between avionics receivers and transmitters for acceptable interference level  
p0189 A72-20929
- FREQUENCY SYNCHRONIZATION  
Time/frequency technology application to reliable aircraft collision avoidance system, discussing precision time-ordered techniques, frequency control and synchronization and flying clocks  
p0396 A72-32072
- FREQUENCY TRANSLATION  
U FREQUENCY CONVERTERS
- FRETTING CORROSION  
Fretting corrosion fatigue prevention by barrier approach, discussing test program and application to helicopter part fatigue life increase  
[AHS PREPRINT 672] p0448 A72-34512  
Anti-fretting corrosion coatings for aluminum alloys at temperature up to 150 C noting fatigue strength  
[D-MAT-174] p0170 N72-15531
- FRICTION  
NT AERODYNAMIC DRAG  
NT DRY FRICTION  
NT FRICTION DRAG  
NT INTERNAL FRICTION  
NT SKIN FRICTION  
NT SLIDING FRICTION  
NT SUPERSONIC DRAG  
NT VISCOUS DRAG  
Russian papers on solid bodies friction mechanism and properties covering adhesion, lubricants effects, wear in presence of aircraft fuels and temperature effects  
p0315 A72-28180  
Runway friction under dry and artificially wet conditions  
[PS-160-65-68-4] p0371 N72-22248
- FRICTION COEFFICIENT  
U COEFFICIENT OF FRICTION
- FRICTION DRAG  
NT AERODYNAMIC DRAG  
NT SUPERSONIC DRAG  
NT VISCOUS DRAG  
Resistance characteristics in smooth water of hulls of planing and hydrofoil craft  
[AD-742752] p0588 N72-31311
- FRICTION FACTOR  
Physicochemical processes in metal surface layers subjected to contact friction with aircraft fuels presence, noting secondary compounds and thermal oxidation acceleration  
p0315 A72-28183  
Gas turbine engine compressor blade and materials fatigue strength dependence on pressure under contact friction corrosion  
p0315 A72-28244  
Influence of test time and contact stresses on antiwear properties of jet fuels under rolling friction  
[AD-738883] p0471 N72-26471  
Performance tests to determine aircraft tire behavior and operating problems in various types of soils  
[NASA-TN-D-6813] p0514 N72-28006  
Analysis of operational factors involved in frictional and retarding forces between aircraft tires and hard surface runways  
[ESDU-71025-PT-1] p0636 N72-33001
- FRICTION LOSS COEFFICIENT  
U FRICTION FACTOR
- FRICTION MEASUREMENT  
Skin friction measurement in nonisobaric subsonic flow with pressure gradient over airfoil section

# **FRICTION PRESSURE DROP**

# **SUBJECT INDEX**

by surface impact probes p0018 A72-12275

Day-to-day operational airplane-airport relationship, discussing runway grooving impact and friction coefficient measurement [AIAA PAPER 72-813] p0497 A72-38118

**FRICTION PRESSURE DROP**

**U SKIN FRICTION**

**FRICTION REDUCTION**

Evaluation of bearing materials, shaft materials, and lubricants for airframe applications by simulating loads, motions, and temperatures on bearings in normal operation [AD-733705] p0259 N72-18505

**FRONTAL AREAS (METEOROLOGY)**

**U FRONTS (METEOROLOGY)**

**FRONTS (METEOROLOGY)**

Persistent intense CAT in upper level frontal zone, discussing synoptic features, vertical wind shears, radar echoes and turbulence intensity p0356 A72-29622

**FROST**

Light transmission, reflection and environment problems of hydrophilic coatings for fog and frost protection in aviation instrument window design p0563 A72-42519

**FUEL COMBUSTION**

Supersonic jet engine fuels production by gasoline vapor pyrolysis, discussing physico-chemical characteristics and combustion properties p0606 A72-44625

Turbulent mixing of fuel and air in supersonic combustion ramjet engine [AD-740909] p0581 N72-30964

**FUEL CONSUMPTION**

Small three spool, reverse and mixed flow turbofan engine for business jets, discussing fuel consumption reduction, thermodynamic performance, efficiency and maintainability [SAE PAPER 710776] p0005 A72-10268

Altitude-velocity dependence of turboprop engine equivalent horse power, propeller output and specific fuel consumption, discussing performance characteristics relation to ambient air temperature p0136 A72-17100

Extremal field properties in optimal control problem applied to aircraft flight over assigned distance with minimum fuel consumption p0139 A72-17727

Aircraft performance and flight path optimization algorithms for minimum fuel-fixed range, using calculus of variations p0182 A72-19091

High turbine entry temperature effects on gas turbine engine specific power and fuel consumption, noting thrust/weight ratio increase in turbojet and turbofan engines p0187 A72-20311

Soviet civil gas turbine engines construction and performance, noting relatively high specific fuel consumption p0191 A72-21275

Extremal field properties in optimal control problem applied to aircraft flight over assigned distance with minimum fuel consumption p0285 A72-25329

Liquid metal regenerator design and test evaluation for gas turbine engine fuel consumption improvement [ASME PAPER 72-GT-33] p0295 A72-25629

Propulsion system flexibility in V/STOL aircraft with one lift-cruise engine, discussing takeoff thrust requirements and cruise fuel consumption efficiency [ASME PAPER 72-GT-105] p0299 A72-25670

Stratospheric meteorological characteristics effects on Concorde supersonic flight performance, fuel consumption, dynamic behavior and passenger comfort p0349 A72-28876

Future projections of commercial jet aircraft fuel demands, estimating engine exhaust effects on air quality p0350 A72-28879

Specific fuel consumption and specific thrust optimization methods in turbofan cycles, noting optimum fan pressure ratio increase with turbine

inlet temperature p0492 A72-37746

Thermodynamic cycle parameter effects on bypass turbofan jet engine fuel consumption and performance under various flight conditions and engine ratings p0600 A72-44281

Hybrid simulation of F-4 aircraft for evaluating display devices and pilot performance in manual fuel consumption optimization [AD-731713] p0208 N72-16315

Energy used in intercity freight transportation by water, rail, pipeline, truck, and air, and effect of fuel price increases [R-804-NSF] p0390 N72-23979

**FUEL CONTAMINATION**

Surface active agent detection by device using ultrasonic vibrating mechanism to emulsify water with fuel, determining water retention or turbidity by photoelectric cell p0062 A72-14419

Proposed gas turbine procurement standards for gaseous and liquid fuel specifications emphasizing fuel contaminants [ASME PAPER 71-WA/GT-3] p0116 A72-15896

Purity requirements of aircraft gas turbine fuels, considering mechanical impurities, water, microorganisms, and surface active, corrosive, resinlike and paraffin substances p0188 A72-20373

**FUEL CONTROL**

Turboprop engines dynamic parameters experimental determination by rpm transient response to instantaneous fuel supply changes p0351 A72-29137

Fluidic heat sensors for measuring fuel temperature in jet engines p0600 A72-44280

A digital model of jet engine hydraulic fuel controller p0602 A72-44291

Variable-orifice gas turbine system for fuel rate control in aircraft [NASA-CASE-LEW-11187-1] p0035 N72-10824

Operating principles of main components of fuel flow control unit for USSR turbofan engine [AD-742368] p0539 N72-29816

**FUEL CORROSION**

JP-5 fuel sulfur content effect on aircraft engine turbine blades hot corrosion under marine environmental conditions p0175 A72-18752

Purity requirements of aircraft gas turbine fuels, considering mechanical impurities, water, microorganisms, and surface active, corrosive, resinlike and paraffin substances p0188 A72-20373

Hot corrosion effects on Inconel-700 and Inconel-X gas turbine rotor blades during burning of high sulfur concentration residual oil fuels [ASME PAPER 72-GT-87] p0298 A72-25662

Effect of fuel on gas corrosion in jet engine combustion chambers p0495 A72-38091

**FUEL ECONOMY**

**U FUEL CONSUMPTION**

**FUEL FLOW**

Fuel flow control by sensing airflow conditions at discharge of engine compressor [AD-734542] p0282 N72-19857

Main methods of fuel flow measurement and factors for consideration in deciding on type of meter to use for various requirements [AGARDOGRAPH-160-VOL-3] p0434 N72-25420

Digital systems for controlling turbojet engine fuel flow [NASA-TN-D-6936] p0580 N72-30777

**FUEL INJECTION**

Fuel vaporizer for gas turbine engine, investigating heat transfer coefficient p0122 A72-16492

**FUEL PUMPS**

Fuel lubricity effects on aircraft engine fuel pump wear, discussing remedial use of corrosion inhibitors and change to noncorroding pump construction materials p0191 A72-21450

Military jet engines centrifugal fuel pumps power requirements for throttled operation, noting

# SUBJECT INDEX

# FUNCTIONAL INTEGRATION

- pressure stability improvement at low flow rates  
p0456 A72-36041
- Inlet throttle centrifugal fuel pumps for jet engine augmentation, discussing design features, performance, noise, life and reliability characteristics  
p0456 A72-36044
- Aircraft gas turbine engine fuel pump design, discussing sizing for given mass flow and pressure requirements with procedure for temperature rise calculations  
p0456 A72-36049
- Deterioration of shaft bearings of electromotor driving aircraft centrifugal fuel pump, determining lateral force acting on impeller  
p0598 A72-43663
- Aircraft gas turbine engine controllers and fuel pump testing under extreme fuel temperatures, noting cavitation characteristics  
p0601 A72-44287
- Design, development, and characteristics of variable delivery, positive displacement fuel pump for use with J-85 turbine engine fuel system [AD-735259]  
p0338 N72-21496
- Method for evaluating liquid pump operational and functional performance characteristics [AD-737713]  
p0425 N72-24541
- FUEL SYSTEMS**
- NT AIRCRAFT FUEL SYSTEMS**
- Pressurized air assisted gas turbine fuel system, describing single stage centrifugal turbocompressor and rotary-lobe compressor designs and performance characteristics  
p0456 A72-36043
- Principles of modelling studies of fuel systems and hydraulic systems by electronic analog computers  
p0567 A72-42922
- Aviation fueling facilities and fueling operation  
p0047 N72-11678
- Analysis of helicopter accidents to determine effectiveness of crash resistant fuel system installed in OH-1 helicopter  
p0517 N72-28023
- Hydrocarbon fuel systems for ramjet-powered vehicles [AD-738634]  
p0524 N72-28801
- FUEL TANKS**
- NT WING TANKS**
- Aircraft hydrocarbon fuel tank lightning protection in airframes, using adhesive bonding, high strength materials and high modulus fiber structures  
p0177 A72-18767
- Low cost 300 gallon fiber reinforced plastic aircraft wing fuel tank manufacturing technology  
p0196 A72-21693
- Utilization of wing and empennage volume for aircraft fuel tankage, presenting equations and charts for quick determination of available volume  
p0299 A72-25811
- Analysis of fire and explosion hazards in aircraft fuel tanks and methods for predicting fuel/air concentrations in tanks  
p0044 N72-11056
- Electrostatic charging in handling of aviation fuels, resulting in incendiary sparking in fuel tank  
p0048 N72-11686
- Fire and explosion protection fuel tank ullages, including oxygen reduction, vapor or mist inerting, and plastic foam fillers  
p0049 N72-11690
- Lightning discharge ignition of fuel vapors beneath titanium alloy aircraft skin [NASA-CR-120827]  
p0224 N72-17949
- Pressure tight seal for superalloy used in hypersonic aircraft fuel tank joints [NASA-CASE-LAR-10170-1]  
p0338 N72-21471
- Evaluation of several halogenated hydrocarbons for ignition and explosion suppressants in aircraft fuel tanks damaged by incendiary ammunition [AD-737383]  
p0390 N72-23966
- Design and tests of two insulation systems for liquid methane fuel tanks for supersonic cruise aircraft [NASA-CR-120930]  
p0473 N72-26545
- Fuel vapor spontaneous ignition in Concorde fuel tank for maximum oxygen concentration determination to limit ignition pressure
- [ARC-CP-1209]  
p0537 N72-29799
- Flight tests to determine effectiveness of liquid nitrogen fuel tank inerting system for fire prevention on DC-9 aircraft [FAA-RD-72-53]  
p0579 N72-30769
- Development of materials and techniques to improve and optimize flame arresting in aircraft fuselage and wing fuel tanks [AD-743016]  
p0592 N72-31954
- FUEL TESTS**
- Viscosity and additive effects on jet engine fuel antiwear properties improvement  
p0016 A72-11968
- Surface active agent detection by device using ultrasonic vibrating mechanism to emulsify water with fuel, determining water retention or turbidity by photoelectric cell  
p0062 A72-14419
- Purity requirements of aircraft gas turbine fuels, considering mechanical impurities, water, microorganisms, and surface active, corrosive, resinlike and paraffin substances  
p0188 A72-20373
- Jet engine fuel fire hazard evaluation by controlled laboratory tests, analyzing ignition characteristics under simulated survivable aircraft crash accidents [SAE PAPER 720324]  
p0290 A72-25587
- Properties evaluation of lubricants and fuels for use in advanced aircraft gas turbine [NASA-CR-122842]  
p0049 N72-11694
- FUEL VALVES**
- Performance of self-sealing breakaway valves in preventing fuel spillage and fires in survival aircraft crashes [AD-738204]  
p0425 N72-24547
- FUEL-AIR RATIO**
- Supersonic diffusion flame in duct configuration to study mixing with combustion of two parallel methane and air flows  
p0057 A72-13545
- Turbulence and fuel-air mixing in supersonic combustion ramjet  
p0427 N72-24807
- FUELING**
- U REFUELING**
- FUELS**
- NT AIRCRAFT FUELS**
- NT CRYOGENIC ROCKET PROPELLANTS**
- NT HYDROCARBON FUELS**
- NT JET ENGINE FUELS**
- FULL SCALE FATIGUE TESTS**
- U FATIGUE TESTS**
- U FULL SCALE TESTS**
- FULL SCALE TESTS**
- Wind tunnel model tests of DH 121 aircraft and comparison with drag estimates and full scale flight data [ARC-CP-1170]  
p0205 N72-15974
- Subsonic wind tunnel for testing full scale aircraft [NASA-TN-X-62106]  
p0276 N72-19291
- FUNCTIONAL ANALYSIS**
- NT FOURIER TRANSFORMATION**
- NT HARMONIC ANALYSIS**
- NT INTEGRAL EQUATIONS**
- NT LAPLACE TRANSFORMATION**
- NT SINGULAR INTEGRAL EQUATIONS**
- NT VOLTERRA EQUATIONS**
- Optimal control synthesis for linear passive stationary plants with symmetrical coefficient matrices of minimized functional  
p0234 A72-23431
- Liapunov functional stability analysis in structural dynamics problems including wave equations with nonlinear damping  
p0235 A72-23457
- Development of controller synthesis techniques for large aircraft using distributive parameters and time delays [AD-740873]  
p0529 N72-29013
- Development of optimization method for computing optimal open loop inputs for dynamical system by observing only output and application to STOL aircraft operation [NASA-TN-D-6978]  
p0585 N72-31022
- FUNCTIONAL INTEGRATION**
- Aircraft and spacecraft integrated avionics systems design with emphasis on telemetry, discussing space shuttle subsystems integration

**FUNCTIONALS**  
 Optimal control synthesis for linear passive stationary plants with symmetrical coefficient matrices of minimized functional

p0019 A72-12403

**FUNCTIONS (MATHEMATICS)**

NT CONFORMAL MAPPING  
 NT COORDINATE TRANSFORMATIONS  
 NT ERROR FUNCTIONS  
 NT FOURIER TRANSFORMATION  
 NT KERNEL FUNCTIONS  
 NT LAPLACE TRANSFORMATION  
 NT LIAPUNOV FUNCTIONS  
 NT NORMAL DENSITY FUNCTIONS  
 NT PERIODIC FUNCTIONS  
 NT POISSON DENSITY FUNCTIONS  
 NT PROBABILITY DISTRIBUTION FUNCTIONS  
 NT SPLINE FUNCTIONS  
 NT TIME FUNCTIONS  
 NT TRANSFER FUNCTIONS  
 NT WEIGHTING FUNCTIONS

p0503 A72-38514

Linear functional law for alleviating gusts on delta wing aircraft  
 [ONERA-TP-925]

p0037 N72-10999

**FUSELAGE MOUNTING**  
**U AIRCRAFT PRODUCTION****FUSELAGES**

Acoustic power radiated by jet aircraft fuselage structure exposed to turbulent boundary layer pressure field, evaluating noise reduction treatments

p0002 A72-10216

Wing-fuselage combination aerodynamic coefficients, comparing experimental data with subsonic linear and nonlinear theoretical results  
 [DGLR PAPER 71-115]

p0023 A72-12723

Shear and direct stresses on fuselage model cross section due to concentrated radial loads on frame comparing measurement with prediction by matrix force analysis

p0144 A72-18322

Emergency Life Saving Instant Exit system in aircraft fuselage for use after crash landing, discussing design and ground testing

p0195 A72-21583

Transport aircraft fuselage computerized design, determining optimal structural distribution for strength and displacement constraints  
 [AIAA PAPER 72-330]

p0285 A72-25366

Composite F-111 fuselage design, analysis and testing, considering graphite, boron and glass-epoxy and boron-aluminum systems

p0287 A72-25453

Subsonic and supersonic flow around nonaxisymmetric fuselages, deriving streamlines differential equations based on camber line distribution of source, dipole and quadrupole singularities  
 [DPVLR-SONDDR-189]

p0303 A72-26578

Aircraft fuselage acrylic glazing design, covering passenger cabin window, cockpit windscreen and various surface coatings

p0305 A72-27008

Fiberglass reinforced plastic fuselage production for AN-2m aircraft, noting plastic-plastic and metal-plastic joints

p0354 A72-29462

Calculation of pressure distribution on cylindrical fuselage with perpendicular lifting jet using singularity method

p0029 N72-10014

Boundary value problem for calculating potential flow distribution around lifting wing fuselage configurations  
 [NAL-TR-240T]

p0109 N72-13272

Helicopter fuselage vibration response analysis, using hybrid computer

p0216 N72-16854

Man machine interactive display computer systems with application to fuselage design  
 [ISD-121]

p0542 N72-29927

Filamentary composite materials for aircraft fuselage structures  
 [NASA-CR-112110]

p0645 N72-33561

**FUSION WELDING**

NT BRAZING  
 NT PLASMA ARC WELDING

High strength bimetallic rivets produced by inertia welding Al-Ti alloy shank with pure Ti tail, noting weight and cost reduction for aerospace vehicle production  
 [SAWE PAPER 902]  
 Welding airframe structures in titanium using tensile loading to overcome distortion.

p0595 A72-43452

p0611 A72-45000

**G****G FORCE****U ACCELERATION (PHYSICS)****G-222 AIRCRAFT**

G-222 aircraft design and operation, examining marketing problems

p0054 A72-13098

**GAGES****U MEASURING INSTRUMENTS****GAIN (AMPLIFICATION)****U AMPLIFICATION****GALACTIC RADIATION**

Galactic and solar cosmic radiation dosage to flying personnel and passengers onboard SST

p0223 N72-17721

**GALERKIN METHOD**

Galerkin method application to nonconservative nonself-adjoint aeroelasticity problems based on interpretation as mathematical formulation of virtual work principle

p0178 A72-18788

**GALLIUM ARSENIDES**

Single and dual gate GaAs FET integrated amplifiers in C band.

p0489 A72-37270

**GALLIUM COMPOUNDS****NT GALLIUM ARSENIDES****GAME THEORY**

Singular surfaces for time optimal control in zero sum differential games between two aircraft in three dimensional space, assuming spherical acceleration vectogram

p0183 A72-19279

Optimal thrust reversing in pursuit evasion games between two aircraft in horizontal plane, considering cost functions and termination criteria

p0183 A72-19282

Near optimal closed loop control laws for fixed time pursuit-evasion differential game between two aircraft in vertical plane, using dynamic modeling

p0236 A72-23805

The dynamic modeling technique for obtaining closed-loop control laws for aircraft/aircraft pursuit-evasion problems.

p0502 A72-38276

Game theoretical modeling of fighter aircraft turning tactics competition in pursuit combat, using minimax technique  
 [AIAA PAPER 72-950]

p0563 A72-42359

Differential game solution to practical two aircraft pursuit-evasion problem in three dimensional space

p0156 N72-14224

Application of Markov game approach to planar air combat problems  
 [NASA-CR-1979]

p0218 N72-17006

**GAMMA RADIATION****U GAMMA RAYS****GAMMA RAY BEAMS**

Investigation of Freon fire-extinguishing systems with a nucleonic gage.

p0458 A72-36674

**GAMMA RAYS**

Design and development of flyable breadboard and NRL breadboard of airborne radiac  
 [AD-729254]

p0159 N72-14473

**GAS ANALYSIS**

Airborne gas chromatograph for real time diffusion analyses, describing flight test results with sulfur hexafluoride plumes

p0228 A72-22451

Procedure for the continuous sampling and measurement of gaseous emissions from aircraft turbine engines.  
 [SAE ARP 1256]

p0458 A72-36532

**GAS BEARINGS**

Air lubricated bearings for high performance

- aircraft gas turbines, studying design and performance in turboshaft engine  
[ASME PAPER 72-GT-38] p0295 A72-25632
- Theoretical prediction of dynamic behavior of rotary wings supported in hydrostatic and hydrodynamic gas lubricated journal bearings  
[AD-732211] p0208 N72-16350
- Design and tests of gas lubricated hydrodynamic bearings for use in gas turbine environment  
[AD-744844] p0645 N72-33508
- GAS CHROMATOGRAPHY**  
Airborne gas chromatograph for real time diffusion analyses, describing flight test results with sulfur hexafluoride plumes  
p0228 A72-22451
- GAS COMPOSITION**  
Exhaust composition and smoke emission reduction from aircraft with gas turbine power plants  
p0308 A72-27270
- GAS COOLED REACTORS**  
Transoceanic helium cooled thermal reactor powered air cushion freighter of gross weight 4500 metric tons, discussing design and performance characteristics  
p0062 A72-14431
- GAS DISCHARGE COUNTERS**  
U COUNTERS
- GAS DISSOCIATION**  
Laminar hypervelocity boundary layer flow past axisymmetric hyperboloid in air of thermochemical equilibrium  
[DLR-FB-72-16] p0519 N72-28280
- GAS DYNAMICS**  
NT AERODYNAMICS  
NT AEROTHERMODYNAMICS  
NT HYPERSONICS  
NT RAREFIED GAS DYNAMICS  
NT ROTOR AERODYNAMICS  
German book on flow technology and fluid flow machines covering hydrodynamics, gas dynamics, aerodynamics, airfoils, wind tunnels, propellers, helicopters, turbomachines, blade cascades, etc  
p0247 A72-25122
- Development mechanisms of turbulent jet flows  
[VKI-LS-36] p0033 N72-10245
- Electrofluid dynamic energy conversion for wind tunnel augmentation  
p0468 N72-26210
- GAS FLOW**  
NT AIR CURRENTS  
NT AIR FLOW  
NT JET STREAMS (METEOROLOGY)  
NT MERIDIONAL FLOW  
NT NONEQUILIBRIUM FLOW  
NT TRANSITION FLOW  
NT VERTICAL AIR CURRENTS  
Acoustic, turbulent and thermal fluctuating motions interdependence in gas flow, considering application to aerodynamic noise theory  
p0055 A72-13405
- Cascade nozzle gas particle flow properties, discussing flow pressure experiments and theory at different streamlines  
p0122 A72-16490
- Film cooled turbine vanes external heat transfer distribution in turbulent gas stream, measuring heat transfer coefficients with and without blowing  
[AIAA PAPER 72-9] p0129 A72-16877

Gas turbine nozzles aerodynamic throat area air flow measurement, describing accuracy, standards, reference nozzles and mounting flanges [SAE ARP 1195] p0008 A72-10390

Thermal shock fatigue tests on aircraft gas turbine engine inlet nozzles, showing cracks as function of material p0014 A72-11373

Aircraft gas turbine rotating disks thermal and mechanical stresses under variable thermal conditions, describing test assembly p0014 A72-11637

PT6 and JT15D gas turbine aircraft engines development and service experience p0015 A72-11699

USAF small gas turbine test complex, discussing machinery, equipment, simulated testing, altitude chambers and instrumentation [ASME PAPER 71-WA/GT-7] p0116 A72-15900

Aircraft gas turbine engine emission reduction, showing nitrogen oxide control with water injection [ASME PAPER 71-WA/GT-9] p0116 A72-15902

Soot oxidation rate from diffusion flame measurements extrapolated for gas turbine combustion chambers p0119 A72-16368

Fuel vaporizer for gas turbine engine, investigating heat transfer coefficient p0122 A72-16492

Aircraft gas turbine engine and components post-war development in Japan p0122 A72-16499

Gas turbine blade temperature measurement by radiation pyrometer, discussing thermal radiation sensing and fiber optics transmission, signal processing and real time temperature characteristic display [SAE PAPER 720159] p0136 A72-17321

Turbine inlet temperature sensor for gas turbine engines, using noble metal thermocouples with high signal level [SAE PAPER 720160] p0136 A72-17322

Lubrication system filtration effects on rolling element bearing life and extended mean time to failure of gas turbine engines p0175 A72-18754

Gas turbine engine inlet solid particle separator designed as integral engine part, discussing semireverse flow superiority p0175 A72-18755

Aircraft gas turbine engine monitoring for failure prevention, evaluating condition through spectrum analysis and real time correlation techniques p0177 A72-18766

Aircraft gas turbine engines smoke emission sampling by stained filter technique, comparing Navy specifications AS 1833 with SAE method ARP 1179 p0177 A72-18770

Army aircraft gas turbine engines pollution potential evaluation program, considering smoke emission, noise and invisible pollutants p0177 A72-18772

National Environmental Policy Act /PL 91-190/ impact on Army aircraft turbine engine development in terms of performance, additional cost and time p0177 A72-18773

High turbine entry temperature effects on gas turbine engine specific power and fuel consumption, noting thrust/weight ratio increase in turbojet and turbofan engines p0187 A72-20311

Soviet civil gas turbine engines construction and performance, noting relatively high specific fuel consumption p0191 A72-21275

Optimal control of two shaft gas turbine engine in helicopter, using cybernetic equipment p0231 A72-22862

Two spool gas turbine engine characteristics with speed reduction, determining time dependence of turbocompressor rpm, gas temperature and engine power

Aerodynamic efficiency of plane slotted blade cascades of adjustable nozzle diaphragms in transport aircraft axial flow gas turbine engines p0233 A72-23185

Intercomponent complex annular ducts design for gas turbine engines p0233 A72-23186

Hydrothermodynamic foundations of hydrofoil engines employing gas-water mixtures and gas turbine generators, analyzing thrust coefficient and power efficiency p0238 A72-23872

Low conductivity insulating coating /graded thermal barrier/ to cool gas turbine engine with high pressure ratio and inlet temperature, [AIAA PAPER 72-361] p0247 A72-25128

Gas turbine engine icing, discussing atmospheric conditions, damage due to ice ingestion and anti-ice systems p0286 A72-25389

Recrystallized silicon carbide and reaction bonded silicon nitride as construction materials for gas turbine engine components, describing thermal and mechanical properties [ASME PAPER 72-GT-6] p0293 A72-25609

Liquid metal regenerator design and test evaluation for gas turbine engine fuel consumption improvement p0294 A72-25619

Air lubricated bearings for high performance aircraft gas turbines, studying design and performance in turboshaft engine [ASME PAPER 72-GT-33] p0295 A72-25629

Metal forming techniques for gas turbine engines, considering isothermal, radial and powder metallurgy preform forgings, contoured cross and form rolling, and squeeze casting [ASME PAPER 72-GT-58] p0295 A72-25632

Gas turbine engines emission data correlation based on combustor theoretical model, proposing correction factors for data reduction to standard test conditions p0296 A72-25649

Solid state joining in gas turbine engines, discussing diffusion bonding, friction welding and coextrusion metal bonding [ASME PAPER 72-GT-60] p0297 A72-25651

Aircraft gas turbine engines exhaust emission characteristics identification, considering ambient temperature and humidity effects [ASME PAPER 72-GT-74] p0297 A72-25657

Hot corrosion effects on Inconel-700 and Inconel-X gas turbine rotor blades during burning of high sulfur concentration residual oil fuels [ASME PAPER 72-GT-75] p0297 A72-25657

High pressure cannular combustor with continuous analytical and sampling system for simulated gas turbine engines emission measurements [ASME PAPER 72-GT-87] p0298 A72-25662

Constraining U-shaped frames for blade edges protection during hydrojet shot blasting of compressor blades for gas turbine engines [ASME PAPER 72-GT-88] p0298 A72-25663

Exhaust composition and smoke emission reduction from aircraft with gas turbine power plants p0304 A72-26819

Composite materials application to gas turbine fan guide vane fabrication, noting economic factors and prototypes performance in engine tests p0308 A72-27270

Heat generation sources in high speed cylindrical roller bearings for gas turbine oil cooler design p0313 A72-28100

Turbulent intensity induced by wakes near secondary air jet inlet to gas turbine engine flame tube p0313 A72-28111

Gas turbine engine combustion chamber, investigating swirl vane air flow rate effects on circumferential nonuniformity of gas temperature field at outlet p0313 A72-28131

Gas turbine units with constant pressure cycle, discussing design and optimization method p0314 A72-28132

Film cooling effectiveness for air-gas flow section of gas turbine engine under actual operating conditions p0314 A72-28149

# SUBJECT INDEX

# GENERAL AVIATION AIRCRAFT

## GAUSSIAN DISTRIBUTIONS

U NORMAL DENSITY FUNCTIONS

## GAUSSMETERS

U MAGNETOMETERS

## GCR (REACTORS)

U GAS COOLED REACTORS

## GEAR TEETH

Ion sputtering process used to deposit coating compounds on titanium alloy gear teeth  
[AD-729839] p0160 N72-14504

## GEARS

Astafan turbopfan engine with variable pitch fan rotor blades for thrust variation, discussing gearbox and core engine design p0188 A72-20459

Reduction of noise and acoustic-frequency vibrations in aircraft transmissions.  
[AHS PREPRINT 661] p0448 A72-34508

Analysis of gear reduction concepts for power train systems used with low bypass ratio, single spool, geared turbopfan engine for aircraft propulsion  
[NASA-CR-72735] p0093 N72-12413

Reduction of noise produced by helicopter geared power trains by application of vibration and acoustics technology  
[AD-742735] p0586 N72-31031

Scuff resistant properties of steel materials used to finish spur and helical gears.  
[AD-742655] p0629 N72-32503

Load-life model for calculating fatigue life and reliability of helicopter spur gear mesh.  
[AD-744504] p0629 N72-32507

Tests to evaluate performance of spiral bevel gears made from VASCO-X2 steel when operated without lubricating oil  
[AD-744506] p0645 N72-33506

## GELLED PROPELLANTS

Crash safe turbine fuel program, using gelled fuels  
p0049 N72-11687

Various gelled or emulsified fuels for reducing aircraft crash-fire hazard  
p0049 N72-11689

## GELS

Evaluation of safety performance of emulsified and gelled aviation fuels in simulated full scale aircraft crash environment  
[AD-729330] p0161 N72-14784

## GENERAL AVIATION AIRCRAFT

Electromechanical nose wheel steering system for general aviation aircraft ground maneuverability improvement, describing design  
p0010 A72-10963

General and commercial aircraft service needs in air transportation, considering FAA and CAB roles and policies  
p0015 A72-11716

Air traffic control long range planning for airlines and general aviation, discussing use of IFR, RNAV and IPC equipment  
p0066 A72-14818

Airborne collision avoidance system equipment for general aviation aircraft, discussing logic functions, transmission modes, data handling tradeoffs and ATC procedure interactions  
p0068 A72-14830

General aviation type light airplanes pilot workload during steep landing approach, comparing flight tested control response parameters with handling qualities criteria  
[AIAA PAPER 72-125] p0132 A72-16941

Dassault Falcon 10 turbopfan powered executive aircraft, attributing safe stall characteristics to wing design optimization  
p0191 A72-21274

Eight-place turbopfan powered business jet aircraft design, discussing structure, fuel system, engines crew station and safety features  
p0194 A72-21572

Mystere business jet aircraft flight instruments, acceleration, control and stall characteristics.  
p0197 A72-21900

Book on general aviation safety covering statistical accident records, accident analysis, crashworthiness, preventive measures, etc  
p0236 A72-23750

Flight airworthiness requirements development for supersonic transports, V/STOL and transport and general aviation aircraft, exploring critical

control and stability parameters

[SAE PAPER 720306] p0288 A72-25570

General aviation equipment standards in light of air traffic system safety needs, emphasizing Technical Standard Order system  
[SAE PAPER 720307] p0288 A72-25571

General aviation aircraft structural safety studied with 1547 accident histories, noting IFR and turbulent weather conditions predominance  
[SAE PAPER 720308] p0289 A72-25572

Fatigue certification of general aviation aircraft in Australia, describing ground taxi load spectra and endurance and radiographic inspection of laminated spar caps  
[SAE PAPER 720311] p0289 A72-25575

Flight tests of combination flight director displays and attitude command control system effect on general aviation aircraft handling qualities during ILS approach  
[SAE PAPER 720316] p0289 A72-25580

Dynamic deceleration anthropomorphic dummy tests of general aviation occupant lap belt/shoulder harness restraint systems  
[SAE PAPER 720325] p0291 A72-25588

Stall warning system for general aviation aircraft, using signal discriminator for rough or gusting air  
[SAE PAPER 720331] p0291 A72-25592

Business V/STOL aircraft economic viability based on cost benefit analysis and comparison with turbine powered aircraft  
[SAE PAPER 720334] p0291 A72-25594

Transport aircraft aerodynamic design technology application to general aviation propeller driven twin engine aircraft, discussing wing loading and aspect ratio optimization  
[SAE PAPER 720337] p0291 A72-25595

General aviation crashworthy personnel restraint systems, discussing strap take-up devices, comfort, fit and ease of use  
p0345 A72-28726

Winds aloft forecast use to predict southwestern mountain lee wave behavior for general aviation cross country flights  
p0348 A72-28863

Cost effectiveness model for evaluating general aviation weather dissemination techniques, stressing design variables and time periods  
p0349 A72-28871

Low cost flight simulator for general aviation pilot training, containing IFR instrumentation and turbulence injection device  
p0399 A72-32211

The future of general aviation in Europe.  
p0462 A72-37093

Private aircraft ownership and use for family travel and pleasure, discussing costs, maintenance and operational problems  
[AIAA PAPER 72-812] p0497 A72-38119

Annual Corporate Aircraft Safety Seminar, 17th, Washington, D.C., April 17, 18, 1972, Proceedings.  
p0507 A72-39740

Future aspects of business aviation, discussing pilot training and aircraft reliability and maintenance in context of flight safety  
p0507 A72-39741

Corporate business aviation performance record in light of aircraft accident statistics, noting high percentage of approach-landing accidents and means for improvement  
p0507 A72-39743

Aircraft accidents during nonprecision approaches under adverse weather conditions, discussing landing aids use for corporate jet aircraft  
p0508 A72-39745

Flight safety from general aviation viewpoint in West Germany, discussing ATC and flight rules relative to airspace use  
[DGLR PAPER 72-036] p0605 A72-44615

International and regional scheduled air traffic terminals and general aviation airports characteristic objectives and operational aspects, discussing ATC, safety and noise problems  
[DGLR PAPER 72-033] p0605 A72-44616

Design and certification for executive type aircraft.  
p0608 A72-44730

An assessment of repeated loads on general aviation and transport aircraft.

Reports of accidents involving missing aircraft of US general aviation for 1968 [NTSB-AMM-71-4] p0609 A72-44736  
 Briefs of US general aviation accidents involving corporate/executive aircraft in 1968 [PB-201439] p0031 N72-10041  
 Summary of NASA research and experience related to spin and recovery characteristics of light general aviation aircraft [NASA-TN-D-6575] p0043 N72-11052  
 Recommendations for improving general aviation safety p0101 N72-12990  
 Urban general aviation airport economics, planning, and management [NASA-CR-114406] p0113 N72-13937  
 Review of general aviation aircraft accidents for calendar year 1969 p0169 N72-15244  
 Analysis of factors contributing to general aviation safety for reducing current accident rates [PB-202928] p0206 N72-15984  
 Flight test investigation of effect of wing tip vortices generated by large jet transport aircraft when intersected by smaller general aviation type aircraft [NASA-TN-D-6655] p0220 N72-17015  
 Computer program for determining characteristics of propellers used in general aviation aircraft to include blade shape parameter and integrated design lift coefficient [NASA-CR-114399] p0250 N72-18003  
 Briefs of US general aviation aircraft accidents involving air taxi operations during 1969 [PB-205096] p0251 N72-18004  
 Compilation of US general aviation accidents for 1969 in which impairment of judgement and efficiency by alcohol was involved [PB-204991] p0333 N72-21022  
 Compilation of accidents involving helicopters and rotor craft for United States general aviation operations during 1969 [PB-204812] p0333 N72-21023  
 Briefs of US general aviation accidents involving aerial application operations during 1969 [PB-204811] p0333 N72-21024  
 Compilation of United States general aviation accidents involving weather as cause or cause related factor year 1969 [PB-204926] p0333 N72-21025  
 Use of shoulder harness in general aviation aircraft to prevent or minimize injury during crashes [FAA-AM-72-3] p0334 N72-21026  
 Design and development of collision avoidance system for use with general aviation aircraft [NASA-CR-112023] p0335 N72-21077  
 Midair collision of Boeing 707 airliner and Cessna 150 light plane over Compton, California on August 4, 1971 [NTSB-AAR-72-5] p0338 N72-21625  
 Aircraft accidents involving corporate executive aircraft in US general aviation for calendar year 1970 [NTSB-AMM-72-5] p0367 N72-22016  
 Aircraft accidents involving air taxi operations in US general aviation for calendar year 1970 [NTSB-AMM-72-4] p0421 N72-24018  
 Flight tests to determine effects of various approach angles on performance of executive transport jet aircraft [FAA-FS-600-71] p0421 N72-24022  
 Forecasts of aviation activity for fiscal years 1972 to 1973 to indicate expected status of commercial and general aviation [AD-738360] p0423 N72-24034  
 Passenger, cargo, and mail statistics for commuter air carriers FY 1971 p0429 N72-24981  
 Capital cost analysis of airport alternatives for San Francisco Bay area for general aviation and commercial aircraft p0429 N72-24985  
 Analysis of US general aviation aircraft accidents for calendar year 1969 p0431 N72-25003

Computer program for predicting performance, noise, weight, and cost of general aviation aircraft propellers for 1980 time period [NASA-CR-2066] p0431 N72-25005  
 Application of unconventional wing pivoting about spanwise axis forward of aerodynamic center for gust alleviation in general aviation aircraft [NASA-CR-2046] p0475 N72-26996  
 Conditions, circumstances, and probable causes of aircraft accidents occurring in US general aviation during calendar year 1970 [NTSB-BA-72-1] p0516 N72-28016  
 Design and development of system for aircraft collision avoidance for use on general aviation aircraft p0522 N72-28670  
 Airport facility requirements for corporate/executive/business aircraft operations p0525 N72-28976  
 San Francisco Bay area airport and airspace capacity analysis to meet 1985 demand forecast p0526 N72-28978

## GERMANY

German Federal Republic territorial air traffic regulations covering general, VFR and IFR rules, equipment and personnel examination and certification, safety, takeoff and landing, accidents, etc p0021 A72-12621

- German book on air traffic law covering norms relative to vehicles and air space, international air law, organizations, etc  
p0021 A72-12622
- Airport planning in West Germany discussing surface transport facilities and pollution  
[DGLR-PAPER-71-075] p0430 N72-24986
- GLANDS (SEALS)**  
Characteristics of self-acting seal for range of simulated gas turbine engine conditions  
[NASA-TN-D-6563] p0093 N72-12419  
Determination of optimum gland dimensions and ring packings to eliminate leakage in aircraft brake piston seals  
[AD-728216] p0094 N72-12437
- GLASS**  
**NT GLASS FIBERS**  
Aircraft windshield design, discussing high impact strength glass, electroconductive film, transparency service life and weight reduction.  
p0305 A72-27006  
Chemically strengthened glass for eject-through frangible canopy design in aircraft emergency escape systems, noting protection against ejection injuries  
p0306 A72-27016  
Ethylene terpolymer material used as thermoplastic transparent adhesive for bonding polycarbonate to glass  
[AD-728174] p0094 N72-12520  
Evaluation of bisphenol polyether, styrene acrylate, and chlorinated rubber alkyl as coatings for airfield runway marking  
[AD-734320] p0279 N72-19644
- GLASS FIBERS**  
Fiberglass replacement by organic fiber for L-1011 interior sandwich panels and laminates, considering Nomex fiber in woven fabric  
p0313 A72-28099  
Fiberglass reinforced plastic fuselage production for AN-2m aircraft, noting plastic-plastic and metal-plastic joints  
p0354 A72-29462  
Ballistic-damage-tolerant composite flight control components.  
[AHS PREPRINT 674] p0448 A72-34514  
Physical and structural properties of mixed-modulus composite materials of graphite and S-glass fibers  
[AD-732489] p0222 N72-17549
- GLAUERT COEFFICIENT**  
**U AERODYNAMIC FORCES**  
**U MACH NUMBER**
- GLAZES**  
Transparent aircraft polycarbonate glazing systems shielding properties for projectile and bird impacts  
p0306 A72-27015
- GLIDE ANGLES**  
**U GLIDE PATHS**
- GLIDE LANDINGS**  
Tactical approach landing radar tests for low lift drag ratio aircraft in unpowered flight, using P-104D as test aircraft  
p0395 A72-31694
- GLIDE PATHS**  
Parachutes flow characteristics in low speed free descent, discussing glide angle effect on total drag and water channel flow pattern studies  
p0007 A72-10309  
Computed performance of ILS glide slope transmitting arrays sited over flat ground planes of one dimensional perfectly conducting strips in free space  
p0123 A72-16559  
Optimal angle selection of commercial aircraft glide path, taking into account vertical velocity, propulsion units operation and landing procedure  
p0361 A72-30814  
Microwave scale model of ILS glide path, considering interference and aircraft taxiing effects  
p0363 A72-30944  
Equations of motion for reentry trajectories and glide path of aircraft  
p0204 N72-15965  
Operational evaluation of portable scanning beam guidance system for improved instrument landing capability  
[FAA-RD-72-26] p0280 N72-19720  
Development of ultrahigh frequency glide path system  
[AD-733694] p0281 N72-19726  
Minimum suitable scan rates for azimuth and elevation functions of microwave landing guidance system  
[AD-737339] p0389 N72-23669  
Evaluation of STOL modular instrument landing system  
[FAA-NA-72-11] p0436 N72-25605  
Performance tests of instrument landing system localizer to include system and monitor stability and monitor operation under degraded system performance  
[FAA-RD-72-50] p0485 N72-27694  
Analysis of pilot performance in establishing specific glide path by reference to oblong diamond marks on runway  
[FAA-NA-72-57] p0485 N72-27702  
Simulator evaluation of instrument landing system back course approaches and comparison with front course approaches to determine flyability problems with glide slope  
[FAA-FS-600-8] p0537 N72-29671

# SUBJECT INDEX

# GROUND EFFECT MACHINES

1970

## GREAT CIRCLES

Great circle intermediate waypoint computation method for inertial navigation equipped aircraft p0398 A72-32205  
Great circle navigation for inertial equipped aircraft, describing procedure for determining waypoint coordinates with reference to VORTAC stations p0567 A72-42949

## GROUND BASED CONTROL

### NT AIR TRAFFIC CONTROL

### NT RADAR APPROACH CONTROL

Computed performance of ILS glide slope transmitting arrays sited over flat ground planes of one dimensional perfectly conducting strips in free space p0123 A72-16559  
Ground based Doppler navigation system for wide range elevation and azimuth aircraft approach guidance, using linear directive antenna array for conical surface definition p0142 A72-18183

Solid state modular ground based distance measuring equipment /DME/ receiver for en route aircraft navigation and landing p0411 A72-33521

Flight-test experience in digital control of a remotely piloted vehicle. [AIAA PAPER 72-883] p0510 A72-40059

## GROUND CREWS

Rotary wing and VTOL aircraft induced downwash effects on ground personnel, considering injuries, body heat loss, work capability impairment and sound pressure effects p0360 A72-30425

## GROUND EFFECT

Ground focus line location of sonic bang propagating in stratified atmosphere with wind for transonically accelerating aircraft p0184 A72-19645

Sonic boom effects on structures, discussing ground motion, direct excitation by shock waves and damages p0234 A72-23318

Lift and induced drag characteristics of jet flapped finite span wings in close proximity to ground, using method of matched asymptotic expansions p0404 A72-32827

Calculation of the recirculation flow of VTOL lift engines. [ICAS PAPER 72-42] p0555 A72-41167

German monograph - Studies of the ground effect on the noise levels and their frequency distribution in the near field of an engine jet directed vertically against the ground. p0568 A72-43060

Ground effect on slender wing rolling moment during landing approach and its consequence on aircraft lateral control [ABC-CP-1152] p0088 A72-11961

Aerodynamic characteristics of model helicopter hovering in ground effect flow [NASA-TT-P-13938] p0150 A72-13986

Numerical analysis of influence of camber and nonplanar wake on change of lift, vortex drag, and center of pressure of airfoil in ground effect [TT-71-12] p0201 A72-15947

Wind tunnel tests to determine effects of ground proximity on aerodynamic characteristics of V/STOL aircraft model [NASA-TM-X-2212] p0251 A72-18008

Development of theory for optimum performance of rotary wing hovering out of ground effect [NASA-TM-X-62138] p0367 A72-22019

Evaluation of methods to predict in ground effect performance of rotary wing aircraft [AD-736925] p0385 A72-23036

Computation of aerodynamic characteristics for airfoils of varying plan configuration moving near ground effect surface [JPRS-56629] p0571 A72-29996

Effect of ground proximity in wind tunnel using fixed board noting boundary layer influence [ABC-R/M-3689] p0582 A72-30997

Effect of proximity of earth surface to aerodynamic coefficients

p0618 A72-32006

Analysis of low speed normal force and pitching moment of slender wings operating in ground effect [ESDU-71007] p0635 A72-32988

## GROUND EFFECT MACHINES

### NT HOVERCRAFT GROUND EFFECT MACHINES

Transoceanic helium cooled thermal reactor powered air cushion freighter of gross weight 4500 metric tons, discussing design and performance characteristics p0052 A72-14431

Potential effects of air cushion vehicle /ACV/ multithousand ton freighter on city development p0115 A72-15776

Nuclear energy for power and transportation, discussing ship, submarine, air cushion vehicle, aircraft and rocket propulsion applications p0115 A72-15777

Composite propeller blades with carbon fiber reinforced plastics spar for hovercraft, presenting mechanical properties test data for different composite configurations p0181 A72-19062

Hovercraft noise and vibration source and reduction for improved crew and passenger comfort p0184 A72-19648

Nonlinear computerized simulation of air cushion vehicle dynamics, using bond graph techniques p0187 A72-20343

Physical principles, design and operation of air cushion vehicles for passenger transportation over water p0188 A72-20371

Hovercraft internal and external aerodynamic forces, discussing control, suspension, yawing moments, directional and roll stability and random surfaces performances p0231 A72-22824

Airfoil ram-wing air-water hybrid vehicle X-113 Am design and operational principles based on aerodynamic ground effect, discussing flight tested performance characteristics p0232 A72-22971

Ground effect wing vehicles stability in forward motion, deriving characteristic equations by linear analysis p0244 A72-24844

Air cushion aircraft landing systems advantages and suitability for arctic transportation applications p0346 A72-28793

Hovercraft state of development and utilization potential, comparing performance to other transportation modes p0361 A72-30818

Arctic environment surface effect vehicle design, considering structures, drag, lift, propulsive power and range p0397 A72-32125

Air cushion landing system application for civil air transportation, discussing operation, braking and parking p0406 A72-33184

On the prediction of acceleration response of air cushion vehicles to random seaways and the distortion effects of the cushion inherent in scale models. [AIAA PAPER 72-598] p0458 A72-36538

Optimization of the wing parameters of a glider hovercraft p0509 A72-39902

Aerodynamic characteristics of flat-bottomed, semicircular wing in close proximity to ground or solid boundary [PB-203602] p0218 A72-17003

Air cushion and secondary suspension for support and guidance of linear induction motor on tracked research vehicle [PB-204440] p0219 A72-17010

Simulation needs and recommendations related to proposed amphibious assault landing craft in Navy program to develop high speed air cushion vehicles [AD-740851] p0533 A72-29222

Mathematical analysis of relative motions between ACV landing craft and different amphibious assault ships during cargo transfer [AD-741245] p0535 A72-29539

Development of theories for speed, stability, maneuverability, and seaworthiness of ground effect machines  
[AD-742425] p0574 N72-30023

Resistance characteristics in smooth water of hulls of planing and hydrofoil craft  
[AD-742752] p0588 N72-31311

Static load deflection and vertical drop tests of quarter scale model of CC-115 aircraft equipped with air cushion landing system  
[AD-743829] p0624 N72-32056

**GROUND HANDLING**

Air cargo intermodal and interline containers handling in warehouse storage, transportation and distribution, considering total pack and interlock requirements  
p0405 A72-33174

Simulation of an air cargo handling system  
p0443 A72-34472

Terminal airspace navigation and aircraft ground handling control, discussing air traffic controllers and pilots functions in context of workload and automation  
p0549 A72-40546

Air freight ground handling and distribution terminal facilities and methods, discussing future technical and organizational developments for efficient handling of increased traffic volume  
p0593 A72-43246

Frankfurt/Main international airport central terminal facilities, describing efficiency oriented layout for large volume passenger and baggage handling and links to rail and road nets  
p0593 A72-43247

Simulation of turnaround operation of passenger aircraft using critical path method for improving aircraft/terminal utilization  
p0341 N72-21970

**GROUND OPERATIONAL SUPPORT SYSTEM**

A method of solving the operational planning problem for an engineering aircraft base  
p0545 A72-40178

**GROUND RESONANCE**

**U GROUND EFFECT**

**GROUND RUN-UP**

**U ENGINE TESTS**

**U GROUND TESTS**

**GROUND SPEED**

Possibilities and limitations of rotary and fixed wing compatible Doppler sensor designs  
p0083 N72-11923

**GROUND STATIONS**

Army data analysis system for fixed and rotary wing aircraft flight testing, including airborne and computer controlled ground stations equipment  
p0019 A72-12408

Aircraft distance measuring equipment with VOR radio receivers and ground station transponder for pulse interrogation  
p0307 A72-27105

Communication aspects of aeronautical satellite system, considering aircraft equipment, ground stations, ATC, type of access and frequency assignment  
p0310 A72-27658

A time-frequency localization system applied to acoustic certification of aircraft.  
[AIAA PAPER 72-836] p0505 A72-39091

Great circle navigation for inertial equipped aircraft, describing procedure for determining waypoint coordinates with reference to VORTAC stations  
p0567 A72-42949

**GROUND SUPPORT EQUIPMENT**

**NT GROUND OPERATIONAL SUPPORT SYSTEM**

Airborne traffic display system using beacon and radar surveillance network and ground computer processing  
p0137 A72-17329

Integrated airborne-ground based instrumentation system for variable stability X-22A aircraft flying qualities research, discussing telemetry, mobile van, landing aids and airplane design  
p0411 A72-33628

Integrated civil/military ATC system for upper airspace control /UAC/ center at Karlsruhe  
p0416 A72-34108

Mediator plan for joint civil/military ATC organization at London center, discussing

sectorization, control and radar facilities, flight plan processing and communications  
p0416 A72-34109

Analysis of facilities, equipment, and tools to maintain large commercial aircraft  
p0040 N72-11023

Development and characteristics of coordinated, in-flight and on-ground fault isolation system for maintenance of large commercial aircraft  
p0040 N72-11027

Preparation of specification for hydraulic fluid filters for aircraft ground support equipment  
[AD-730027] p0160 N72-14506

System for evaluation of aircraft diagnostic and inspection equipment performance characteristics  
[AD-733283] p0255 N72-18041

Development of integrated system for performing checkout of space launchers and aircraft systems  
p0278 N72-19489

Forecasts of instrument flight rules air traffic controlled by FAA control centers for determining requirements for manpower, facilities, and equipment  
[BEPT-72-00186] p0376 N72-22646

Development of automatic inspection, diagnostic, and prognostic system of maintenance for military aircraft - Vol. 1  
[AD-736754] p0384 N72-23029

Concept formulation for automatic inspection, diagnostic, and prognostic procedures applied to maintenance of military aircraft - Vol. 2  
[AD-736755] p0384 N72-23030

**GROUND SUPPORT SYSTEMS**

Military aircraft operations and logistics computerized simulation for support and maintenance cost estimates  
p0141 A72-17974

Aircraft industry product support role in time delays minimization for aircraft operators, discussing malfunction report, minimum equipment decision and fault diagnosis  
p0401 A72-32456

Airborne equipment electric power supply standards to provide characteristics limits for compatibility with ground support systems  
[SAE AS 1212] p0458 A72-36535

**GROUND TESTS**

**NT COLD FLOW TESTS**

Concorde airworthiness certification, discussing ground and flight test programs for performance, flying qualities and structures fatigue properties evaluation  
[SAE PAPER 710756] p0004 A72-10253

Computer simulation techniques in aerospace ground equipment design for maintenance testing of avionics systems  
p0061 A72-14196

NP-8D aircraft variable stability system ground/inflight calibration for determination of flight control system dynamics effects on flying qualities  
p0125 A72-16660

Emergency Life Saving Instant Exit system in aircraft fuselage for use after crash landing, discussing design and ground testing  
p0195 A72-21583

Statistical correlation techniques applied to jet aircraft autoland system dynamic ground tests with simulated engine and aerodynamic characteristics  
p0412 A72-33641

Ground and air tests of flight inspection marker beacon receiving system  
[FAA-WA-71-29] p0033 N72-10173

High Reynolds number aerodynamic ground testing by moving test specimens on rocket sleds  
p0078 N72-11885

**GROUND WIND**

Airport meteorological instrumentation, discussing ground wind, visibility, cloud height, air temperature and humidity detectors and radar equipment  
p0246 A72-25093

Low level vertical wind shear effect on aircraft control, considering runway selection with respect to surface wind conditions  
p0348 A72-28862

Effect of ground wind shear on aircraft trailing vortices.

 [AD-738202] p0467 N72-26030  
 Simulation of UH-1 helicopter flight characteristics to evaluate performance of manual formation flight display system [AD-737313] p0475 N72-26995  
 Development and characteristics of system for providing short term attitude holding and stabilization of helicopters [AD-737707] p0530 N72-29019  
 Aerodynamic characteristics and performance of OH-6 helicopter with emphasis on flight loads imposed during combat operations p0530 N72-29020  
 [AD-738202] p0531 N72-29028  
 Development of methods for predicting hovering performance of single rotor helicopters p0534 N72-29480  
 [AD-738531] p0629 N72-32476  
 Analysis of flight loads on CH-53A helicopter to determine exceeding of design limits during actual operating situations p0636 N72-32995  
 [AD-739332] p0641 N72-33039  
 Compilation of technical reports on missile design, missile guidance, helicopter stability, VTOL aircraft, and wind tunnel design - Vol. 3 [SBN-11-470153-9] p0641 N72-33047  
 Application of computer program to determine stability and control derivatives for UH-1C helicopter model [AD-740774] p0641 N72-33047  
 Computer simulation of helicopter flight conditions to determine dynamic effects of external load combinations on helicopter performance [AD-740772] p0641 N72-33047  
 Reliability engineering of H-3 helicopters based on failure analysis of transmission and rotor systems [AD-742248] p0641 N72-33047  
 Evaluation of time division multiplexing system for helicopter rotor tests [AD-740773] p0641 N72-33047  
 In flight monitoring system to measure and record helicopter performance in real time for all six degrees of freedom [AD-745118] p0641 N72-33047  
 Mathematical model and computer program for determining helicopter main rotor wake geometry effects on rotor blade air loads and response in steady maneuvers - Vol. 1 [NASA-CR-2110] p0641 N72-33047  
 Flight tests to determine effectiveness of wing-mounted speed brakes on S-67 helicopter for increased dive angle and deceleration capability [AD-745214] p0641 N72-33047  
 Aerodynamic characteristics and operational experiences with various types of helicopter rotors [AD-745124] p0641 N72-33047  
 Development of model to represent induced flow through rotary wing of helicopter in descending flight [AD-745103] p0641 N72-33047  
 HELICOPTER PROPELLER DRIVE  
 New hubs for multi-bladed tail rotors. [AHS PREPRINT 602] p0445 A72-34491  
 Hydraulic systems for driving helicopter tail rotors. II p0458 A72-36524  
 Ballistic impact tests to determine vulnerability of boron/epoxy double-wall drive shafts for helicopter rotors [AD-737285] p0388 N72-23509  
 Reliability engineering of H-3 helicopters based on failure analysis of transmission and rotor systems [AD-742248] p0531 N72-29028  
 Development and fabrication of UH-1 helicopter tail rotor drive shaft from graphite/epoxy composite materials [NASA-TN-X-67739] p0637 N72-33011  
 HELICOPTER ROTORS  
 U ROTARY WINGS  
 HELICOPTER WAKES  
 Warm fog dissipation by helicopter downwash mixing, heat, hygroscopic particle and polyelectrolytes seeding p0064 A72-14694  
 The wake geometry of a hovering helicopter rotor and its influence on rotor performance. [AHS PREPRINT 620] p0446 A72-34497  
 Analytical prediction of vortex-ring boundaries for helicopters in steep descents. p0503 A72-38949  
 Main results of nonlinear rotor theory p0594 A72-43419  
 Turbulent and laminar jet flow in rotating environments noting application to jet mixing flow in tip driven rotor wakes p0028 N72-10008  
 Lifting rotor flow noting wake models p0037 N72-11002  
 Variable geometry rotor system for direct control over wake vortex [NASA-CASE-LAR-10557] p0039 N72-11018  
 Helicopter rotor hover performance and wake geometry characteristics [AD-728835] p0149 N72-13982  
 Mathematical models for helicopter rotary wing near wake and influence on rotary wing lifting characteristics [RAE-TR-71046] p0164 N72-14996  
 Wind tunnel investigation of sound pressure intensity level in wake of oscillating airfoil and flat plate during helicopter stall [NASA-CR-1948] p0201 N72-15943  
 Mathematical model and computer program for determining helicopter main rotor wake geometry effects on rotor blade air loads and response in steady maneuvers - Vol. 1 [NASA-CR-2110] p0636 N72-32995  
 HELICOPTERS  
 NT COMPOUND HELICOPTERS

## SUBJECT INDEX

## HELICOPTERS CONTD

## NT MILITARY HELICOPTERS

## NT RIGID ROTOR HELICOPTERS

Helicopter antenna placement, using scale models for three dimensional radiation pattern semiautomatic recording under free space conditions

p0001 A72-10149

Helicopter elastomeric bearing rotors, discussing downtime and cost reduction, maintenance, endurance and inspection

p0001 A72-10150

Helicopter rotor tip drag relief estimate based on two dimensional drag divergence with Mach number, airfoil parameters and flight conditions

p0024 A72-12882

Hybrid computing techniques in helicopter simulation, taking into account complex dynamic systems nonlinear effects

p0232 A72-22936

Helicopter landing on ships, discussing wind, visibility limitations and flight deck motions vs aircraft stability and handling characteristics

p0309 A72-27413

Integral equation for calculation of unsteady aerodynamic forces on helicopter lifting rotor blades, taking into account air compressibility [ONERA, TP NO. 1081]

p0356 A72-29671

Structural design and electrical drive mechanism of helicopter hoist for rescue operations

p0358 A72-30097

Twin-turboprop transport aircraft, helicopter and all-terrain ground vehicle simulators, discussing control load, visual attachment, cabin motion and sound subsystems

p0362 A72-30845

Nonlinear analysis of helicopter rotor blade free transverse vibration under air and centrifugal loadings during forward flight, using matrix method

p0394 A72-31407

Hierarchical system of helicopter service terminals, calculating passenger lots for single and multiloop arrangements under given stochastic input conditions

p0394 A72-31498

Cost-saving techniques in helicopter structural test methods, suggesting system simulation, component replacement time calculation and computer techniques

p0407 A72-33221

Russian book on flight dynamics covering horizontal flight, takeoff, climb and landing characteristics, meteorological conditions, helicopters, trajectory problems, stability and controllability analysis, etc

p0413 A72-33874

Helicopter testing of inertial navigation systems. [AHS PREPRINT 634]

p0443 A72-34478

Low level night operations of Army aircraft. [AHS PREPRINT 631]

p0444 A72-34481

Helicopters vibration reduction through fuselage nodalization, discussing analysis method and dynamic scale model and full scale flight test results

p0444 A72-34487

Exploration of aeroelastic stability boundaries with a soft-in-plane hingeless-rotor model. [AHS PREPRINT 610]

p0445 A72-34493

The wake geometry of a hovering helicopter rotor and its influence on rotor performance. [AHS PREPRINT 620]

p0446 A72-34497

The world speed records of the SA 341 - Gazelle. [AHS PREPRINT 651]

p0447 A72-34506

Helicopters technical and marketing projections for 1980s, emphasizing reliability, maintainability and maneuverability in design philosophy

p0449 A72-34926

Helicopters and turbotrains as space conserving alternatives for automobile urban transportation, emphasizing comfort and convenience

p0452 A72-35505

Russian book - Experimental studies of helicopter aerodynamics.

p0507 A72-39598

Flying crane helicopters utilization in construction industry for materials transport and structural erection work, discussing

technical and economic aspects

p0597 A72-43637

Helicopter lift margin system to aid in determining power requirements for takeoff and landing

[AD-725207] p0043 N72-11053

Analysis of helicopter tail rotor flow patterns in and out of ground effect

[AD-725591] p0044 N72-11060

Post-crash fire safety of helicopter turbine engine fuels

p0049 N72-11688

Breakdown of automatic pilots or auxiliary stabilization systems on helicopters

p0082 N72-11918

Possibilities and limitations of rotary and fixed wing compatible Doppler sensor designs

p0083 N72-11923

System for increasing helicopter stability

p0084 N72-11932

Advanced Doppler-inertial navigation system for transport helicopters

p0084 N72-11935

Helicopter use and heliport operations in Great Britain and elsewhere

[S12/222] p0087 N72-11952

Human tolerance to noise pollution created by helicopter landing site in central London

[P-184] p0087 N72-11953

Helicopter utilization in support of law enforcement activities

[ICR-71-2] p0087 N72-11954

Analysis of avionics system for helicopter search and rescue mission and crew functions

[AD-728043] p0090 N72-11974

Analytical synthesis and evaluation of avionic system with airborne displays and controls for hypothetical search and rescue helicopter of 1972 to 1974 era

[AD-728041] p0090 N72-11975

Equipment requirements and technology survey for airborne display and control systems of search and rescue helicopters

[AD-728042] p0091 N72-11976

Aerodynamics of helicopter rotor blade tip vortices

[NASA-CR-112009] p0101 N72-12992

Derivation of equations of transient motion of helicopter rotors during axial flight

[AD-728818] p0107 N72-13037

Design of color television camera for use on helicopters

[NHR-LABS-NOTE-142] p0109 N72-13360

Development and evaluation of dynamic antiresonant vibration isolator for damping vibration in helicopter rotors

[AD-729317] p0110 N72-13435

Aerodynamic characteristics of model helicopter hovering in ground effect flow

[NASA-TT-P-13938] p0150 N72-13986

Aerodynamic characteristics and performance of helicopter rotary wings

[AD-729587] p0152 N72-13999

Antitorque devices to replace tail rotor on single rotor shaft-driven helicopters

[AD-729860] p0152 N72-14001

Aerodynamic and control characteristics of helicopters in level flight and steep descents at low speeds

[AD-729847] p0154 N72-14010

Modular aircraft elements and rotor dynamic equations for stability and control of helicopters in steep approaches

[AD-729848] p0154 N72-14011

Development of methodology for determining auditory levels at which helicopters can be detected by human subjects

[AD-730788] p0155 N72-14017

Stability derivatives and transfer functions for YHC-1A and S-58 helicopters in steep approaches - Vol. 3

[AD-730362] p0155 N72-14019

Dispersion of ice fog using helicopter downwash

[AD-731215] p0171 N72-15591

Sound measurements and noise level in OH-58 helicopter

[AD-731467] p0206 N72-15985

Conference on shock and vibration effects on dynamic response of helicopter, aircraft, and spacecraft structures

# HELIPORTS

[AD-723349] p0215 N72-16802  
Structural response of AH-1G helicopter to minigun and 40mm grenade launcher fire

[AD-733430] p0215 N72-16821  
Vibration measurement of helicopters submitted to machine gun, grenade and rocket launcher fire

[AD-733430] p0215 N72-16822  
Helicopter fuselage vibration response analysis, using hybrid computer

[AD-733430] p0216 N72-16854  
Design of helicopter stability and control augmentation system using optimal control theory and computerized simulation

[AD-732911] p0220 N72-17013  
Flight tests of strapdown inertial navigation system in helicopter to determine feasibility for simulating systems using inertial navigation equipment

[AD-733430] p0262 N72-18663  
Aerodynamic performance of lifting helicopter rotor during vertical descent

[AD-734229] p0267 N72-19011  
Full scale wind tunnel investigation of advancing blade concept rotor system

[AD-734338] p0271 N72-19038  
Army helicopter accident analysis for defining impact injury problems and helicopter crashworthiness

[AD-734338] p0273 N72-19129  
Design and performance of filter resonators for helicopter noise reduction

[AD-734812] p0275 N72-19222  
Conference on helicopter operations in fire fighting

[AD-734078] p0284 N72-19986  
Attitude stabilization of Bell 47-G helicopter with adapted nonlinear V/STOL attitude regulator

[AD-734078] p0321 N72-20026  
Compilation of accidents involving helicopters and rotor craft for United States general aviation operations during 1969

[PB-204812] p0333 N72-21024  
Central digital computers for helicopter guidance and control systems

[AD-733430] p0336 N72-21223  
Flight test and simulation analysis of S-67 helicopter stabilator

[AD-735766] p0369 N72-22030  
Development and evaluation of technique for reducing vibration in helicopter fuselage using active transmission isolation system

[AD-736347] p0370 N72-22036  
Principles of helicopter flight with emphasis on main rotor performance and aerodynamic forces imposed on helicopter during maneuvers

[NASA-TT-P-676] p0383 N72-23024  
Evaluation of helicopter launching system for air to ground rockets

[AD-737177] p0384 N72-23034  
Evaluation of methods to predict in ground effect performance of rotary wing aircraft

[AD-736925] p0385 N72-23036  
Accidents involving rotorcraft in US general aviation for calendar year 1970

[NTSB-AAM-72-3] p0421 N72-24019  
Development of methods for determining lifetime of helicopter components based on working stress and stress-time functions

[NASA-TT-P-14280] p0425 N72-24531  
Explosive compaction and welding for low cost production of helicopter and turbine structural components

[AD-737719] p0425 N72-24542  
Applications of computers for flight test and evaluation of helicopters based on frequency analyses of load curves on main and tail rotors

[NASA-TT-P-14283] p0430 N72-24993  
Development and evaluation of variable direction thruster for application to helicopter rotors based on bidirectional jet flap device

[NASA-TM-X-62152] p0464 N72-26010  
Development of methods for predicting hovering performance of single rotor helicopters

[AD-738531] p0467 N72-26029  
Chafing characteristics of wire braided military helicopter hoses

[AD-738842] p0471 N72-26409  
Measurement of aerodynamic damping moment in pitch for hovering model helicopter rotary wing

[NAL-TR-256] p0479 N72-27028

# SUBJECT INDEX

Application of downwash from helicopter rotors for dissipation of fog

[AD-739487] p0481 N72-27042  
Development of criteria for application of composite materials in construction of helicopter synchronizing drive shafts

[AD-739429] p0481 N72-27043  
Analysis of secondary power system for use with advanced rotary wing aircraft for reliable production of electric power

[AD-739480] p0482 N72-27069  
Wind tunnel tests to determine aerodynamic characteristics of rectangular shaped containers carried as external stores on helicopters

[NASA-TM-X-62169] p0513 N72-27995  
Computer program for determining natural frequencies and normal modes existing in helicopter rotary wings

[NASA-CR-112071] p0513 N72-27999  
Structural analysis of rotor system of hot gas-jet helicopter

[NASA-TT-P-14281] p0513 N72-28001  
Application of jet-flap to reaction drive rotor for heavy lift high speed helicopter

[NASA-CR-112030] p0513 N72-28002  
Acoustic measurements to determine effectiveness of insulation in reducing noise intensity with helicopter compartments

[DCIEM-839] p0515 N72-28014  
Application of reliability and maintainability trade-off considerations in design of main rotor blade for heavy lift helicopter

[AD-739582] p0516 N72-28021  
Surface stabilization of snow on helicopter landing fields by chemical treatment

[AD-738561] p0519 N72-28271  
Design analysis of rotating plate drive for 2500 horse power helicopter rotor gearbox

[NASA-TM-X-68117] p0521 N72-28504  
Effect of subsonic speed on drag characteristics of high speed wingless and winged helicopters with two different rotor head fairings

[AD-740771] p0529 N72-29010  
Wind tunnel tests to determine aerodynamic characteristics of folding helicopter rotor in various configurations

[NASA-CR-114464] p0573 N72-30013  
Helicopter rotary wing noise in hover and forward flight produced by Karman street type vortex shedding

[AD-741778] p0574 N72-30020  
Reduction of noise produced by helicopter geared power trains by application of vibration and acoustics technology

[AD-742735] p0586 N72-31031  
Base motion isolation characteristics of optical deflector with two axis gimbal support

[AD-743002] p0590 N72-31680  
Load-life model for calculating fatigue life and reliability of helicopter spur gear mesh

[AD-744504] p0629 N72-32507  
Development of methods for safely grounding helicopters to remove electrostatic charge buildup with emphasis on water spray discharge

[AD-745102] p0642 N72-33048

## HELIPORTS

Design of V/STOL ports.

[AD-745102] p0460 A72-36783  
Helicopter use and heliport operations in Great Britain and elsewhere

[S12/222] p0087 N72-11952  
Human tolerance to noise pollution created by helicopter landing site in central London

[P-184] p0087 N72-11953  
Congressional hearings concerning development, funding, and operation of heliport for District of Columbia

[AD-745102] p0475 N72-26985  
Analysis of existing heliports and heliport requirements to support short haul and commuter requirements

[PB-208395] p0586 N72-31032

## HELIXES

## U CURVES (GEOMETRY)

## HEURISTIC METHODS

Heuristic procedure solution for least cost commercial airline crew scheduling, emphasizing combinatorial space size reduction

[AD-745102] p0604 A72-44584

# SUBJECT INDEX

# HIGH TEMPERATURE TESTS

## HIERARCHIES

Hierarchical system of helicopter service terminals, calculating passenger lots for single and multiloop arrangements, under given stochastic input conditions p0394 A72-31498

## HIGH ALTITUDE

Soviet book on civil aircraft high altitude equipment covering air conditioning systems, oxygen equipment and cabin pressurization p0018 A72-12295

Pneumatically assisted parachute deployment at high altitudes with low accelerations p0240 A72-24273

The sweepback effect in the subsonic region in the lower atmosphere and in the hypersonic region at high altitudes p0611 A72-44983

## HIGH ALTITUDE BREATHING

Technique for predicting etiology of decompression sickness in unpressurized aircraft above 20,000 feet [AD-731118] p0273 N72-19106

## HIGH ALTITUDE ENVIRONMENTS

Silicon carbide rotating rectifier alternator with solid lubricated bearings for high altitude environments, noting applicability to supersonic aircraft p0453 A72-35565

Physiological effects of high altitude flight and development of life support systems for civil aircraft environmental control [JPRS-55454] p0322 N72-20107

## HIGH ALTITUDE FLIGHT

### U HIGH ALTITUDE

### HIGH ASPECT RATIO

Large scale high aspect ratio multielement suppressor nozzle arrays testing for augmentor wings and internally blown flaps [AIAA PAPER 72-131] p0130 A72-16888

Theoretical performance of jet flap rotor at advance ratios greater than 1.0 [AD-726706] p0030 N72-10037

## HIGH ASPECT RATIO WINGS

### U SLENDER WINGS

## HIGH ENERGY PROPELLANTS

Possible high energy fuels for supersonic aircraft p0047 N72-11670

## HIGH EXPLOSIVES

### U EXPLOSIVES

## HIGH FREQUENCIES

Requirements for high frequency aircraft antennas [AD-735886] p0335 N72-21176

## HIGH LATITUDES

### U POLAR REGIONS

## HIGH LIFT DEVICES

### U LIFT DEVICES

## HIGH MELTING COMPOUNDS

### U REFRACTORY MATERIALS

## HIGH PRESSURE OXYGEN

Aircraft high pressure oxygen cylinder system filler valve optimum standards, discussing automatic fill rate and pressure sensitive closing control, design, construction and performance [SAE AS 1225] p0008 A72-10385

## HIGH SENSITIVITY

### U SENSITIVITY

## HIGH SPEED

The world speed records of the SA 341 - Gazelle. [AHS PREPRINT 651] p0447 A72-34506  
Computer control of the General Dynamics High Speed Wind Tunnel. p0564 A72-42697

Applying dimensional analysis techniques to containment/deflection problem of bursting high-rpm rotating parts of turbojet engines [NASA-CR-120841] p0172 N72-15713

Application of jet-flap to reaction drive rotor for heavy lift high speed helicopter [NASA-CR-112030] p0513 N72-28002

Influence of aerodynamic heat transfer on design of high speed flight vehicles [ESDU-69009] p0637 N72-33008

## HIGH SPEED FLIGHT

### U HIGH SPEED

## HIGH STRENGTH

Composite materials fabrication, emphasizing high strength/stiffness to weight ratio as critical

performance requirements

p0312 A72-28082

## HIGH STRENGTH ALLOYS

### NT MARAGING STEELS

High strength Ti alloys for aircraft accessories structural materials, comparing room temperature physical properties of ultrahigh tensile steels and other alloys p0058 A72-13617

High strength bimetallic rivets produced by inertia welding Al-Ti alloy shank with pure Ti tail, noting weight and cost reduction for aerospace vehicle production [SAWE PAPER 902] p0595 A72-43452

Fabrication of high strength-high temperature superalloys for turbine blades [AD-734304] p0279 N72-19647

Mechanism of fatigue enhancement in selected high strength aluminum alloys related to unique microstructures [AD-738450] p0484 N72-27584

## HIGH STRENGTH STEELS

### NT MARAGING STEELS

### HIGH TEMPERATURE ALLOYS

### U HEAT RESISTANT ALLOYS

## HIGH TEMPERATURE ENVIRONMENTS

Intense noise measurement device for heat flow environments, discussing applications to jet engines, nozzle exits, turbine exhausts and volcanic craters [ONERA, TP NO. 1010] p0118 A72-16025

Hot corrosion resistant Pt-Al coating for high temperature aircraft engine Ni alloy components, presenting cyclic sulfidation and thermal shock test results p0184 A72-19573

Composite turbopfan blades for high temperature applications, discussing weight reduction and design procedure p0313 A72-28102

## HIGH TEMPERATURE FLUIDS

### NT HIGH TEMPERATURE GASES

### HIGH TEMPERATURE GASES

Cascading turbomachine blades vibration measurement in subsonic and sonic high temperature gas flows, describing test facility p0147 A72-18689

Recirculation mechanism in jet powered V/STOL aircraft [BMVG-PBWT-71-12] p0036 N72-10828

## HIGH TEMPERATURE LUBRICANTS

Aircraft gas turbine engines synthetic lubricants thermal stability characteristics, describing coke deposition test apparatus and results [ASLE PREPRINT 72AM 14] p0350 A72-28971

Assessment of high temperature stability of synthetic lubricants for aircraft gas turbines p0050 N72-11695

Analysis of lubricant system used in civil supersonic gas turbine engine p0050 N72-11697

Synthetic high temperature lubricants thickened by complex esters for supersonic aircraft p0050 N72-11701

## HIGH TEMPERATURE MATERIALS

### U REFRACTORY MATERIALS

## HIGH TEMPERATURE RESEARCH

Evaluation of bearing materials, shaft materials, and lubricants for airframe applications by simulating loads, motions, and temperatures on bearings in normal operation [AD-733705] p0259 N72-18505

## HIGH TEMPERATURE TESTS

Thermal simulation tests for kinetic heating of aerospace structures and materials, describing facilities for supersonic flight and atmospheric reentry p0404 A72-32897

High temperature resins for use in graphite fiber composites for jet engines [NASA-CR-72983] p0324 N72-20508

Fatigue and thermal static strength development tests performed on sections of Concorde supersonic transport aircraft p0542 N72-29915

High temperature tests of aircraft turbine engine lubricants [AD-744841] p0644 N72-33498

## HOMING DEVICES

Location identification system with ground based transmitter and aircraft borne receiver/decoder  
[NASA-CASE-ERC-10324] p0433 N72-25173

Development of para-foil high glide steerable parachute controlled by ground and airborne electronics homing systems for delivery of military equipment  
[AD-742294] p0574 N72-30019

## HONEYCOMB CORES

A crack stopper concept for filamentary composite laminates.  
p0597 A72-43498

## HONEYCOMB STRUCTURES

NT HONEYCOMB CORES

Metal-skin honeycomb composite structure design and manufacture for Concorde rudder, noting structural adhesive bonding in aircraft construction  
p0069 A72-15090

## HORIZON SCANNERS

Safety factors of aircraft flight instruments, discussing altimeter and artificial horizon reading errors and modifications  
p0060 A72-13698

## HORIZON SENSING

U HORIZON SCANNERS

## HORIZONTAL FLIGHT

Passive detection radar system for bombers, calculating target distance during horizontal flight  
p0302 A72-26316

Propagation of ballistic noise from aircraft in nonperturbed atmosphere -aircraft in horizontal flight at constant velocity, applied to turning flight  
[ISL-12/70] p0081 N72-11914

Helicopter model tests for determining ground proximity aerodynamics in level and descending forward flight  
[AD-730364] p0155 N72-14021

Jet aircraft noise measurements during level flights, using 727, KC-135, 707-320B, and DC-9  
[AD-739870] p0482 N72-27050

Helicopter rotary wing noise in hover and forward flight produced by Karman street type vortex shedding  
[AD-741778] p0574 N72-30020

## HORIZONTAL STABILIZERS

U STABILIZERS (FLUID DYNAMICS)

## HORIZONTAL TAIL SURFACES

European A300B airbus flap and slat systems and tailplane actuator for longitudinal pitch trim control  
p0009 A72-10725

Low subsonic region unsteady interference effects on harmonically oscillating wing-tailplane model with variable sweep wing  
[DGLR PAPER 71-081] p0022 A72-12709

Lifting surface linearized potential theory for unsteady aerodynamic forces on wing and horizontal tail surfaces, using computer program  
p0057 A72-13541

All-moving tail plane parameters influence on glider static and dynamic characteristics, discussing lateral and longitudinal stability, maneuverability and pilot induced oscillations  
p0196 A72-21632

A-4 Skyhawk horizontal stabilizer experimental graphite-epoxy composite construction, describing design, manufacturing and testing techniques  
[AIAA PAPER 72-358] p0350 A72-28954

Jaguar powered flight controls, discussing wing spoilers, slab tailplane, rudder, autostabilization system and integrated packaging of actuators  
p0417 A72-34144

Graphite/epoxy composite I beam and box beam components for horizontal tail stabilizers  
[AD-729050] p0107 N72-13039

Flight test and simulation analysis of S-67 helicopter stabilator  
[AD-735766] p0369 N72-22030

Development, stress analysis, and manufacturing of horizontal stabilizer for A-4 aircraft using graphite-epoxy laminates in primary structure  
[AD-738900] p0481 N72-27040

## HORIZONTAL TAILS

U HORIZONTAL TAIL SURFACES

U TAIL ASSEMBLIES

## HORSEPOWER

Altitude-velocity dependence of turboprop engine equivalent horse power, propeller output and specific fuel consumption, discussing performance characteristics relation to ambient air temperature  
p0136 A72-17100

Noncontact rotating shaft horsepower measurement, using phase displacement technique  
[ASME PAPER 72-GT-29] p0295 A72-25625

## HOSES

Lightweight low pressure plastic hose assemblies in aircraft and missile petroleum base fuel and synthetic lubricating oil systems at 395-710 R and up to 200 psi  
[SAE ARP 1180] p0008 A72-10388

Chafing characteristics of wire braided military helicopter hoses  
[AD-738842] p0471 N72-26409

## HOT CYCLE PROPULSION SYSTEM

U TIP DRIVEN ROTORS

## HOT GAS SYSTEMS

U HIGH TEMPERATURE GASES

## HOT GASES

U HIGH TEMPERATURE GASES

## HOT JET EXHAUST

U HIGH TEMPERATURE GASES

## U JET EXHAUST

## HOT-WIRE ANEMOMETERS

Small scale atmospheric turbulence measurement with airborne hot-wire anemometer, discussing optimal choice of experimental parameters

p0227 A72-22435

Hot-wire analysis of wake in hypersonic helium wind tunnel

[AD-729881]

p0159 N72-14325

Wind tunnel test data of velocity measurements with hot wire anemometer in wake of CV-990

aircraft model

[NASA-TN-X-62148]

p0419 N72-23994

## HOT-WIRE FLOWMETERS

Jet noise intensity reduction by screen across nozzle exit, using acoustic and hot wire

measurements

p0185 A72-19873

## HOT-WIRE TURBULENCE METERS

U HOT-WIRE FLOWMETERS

## HOUSINGS

NT COWLINGS

NT RADOMES

## HOVERCRAFT

U GROUND EFFECT MACHINES

## HOVERCRAFT GROUND EFFECT MACHINES

Internal noise reduction in hovercraft.

p0458 A72-36574

Comparative analysis of the operative costs of large amphibious hovercraft

p0462 A72-37212

Design, development, and characteristics of light hovercraft requiring amphibious capability

[AD-726163]

p0081 N72-11911

Influence of aerodynamic characteristics on handling of amphibious hovercraft

[CRANFIELD-AERO-7]

p0249 N72-17992

## HOVERING

HH-53 rescue helicopter automatic approach and hover coupler for automatic transition from forward flight at constant deceleration and rate of descent

p0124 A72-16653

The wake geometry of a hovering helicopter rotor and its influence on rotor performance.

[AHS PREPRINT 620]

p0446 A72-34497

Main results of nonlinear rotor theory

p0594 A72-83419

Analysis of operational requirements and feasibility of system for precise IFR helicopter hovering

p0084 N72-11934

Aerodynamic characteristics of model helicopter hovering in ground effect flow

[NASA-TT-P-13938]

p0150 N72-13986

Analytical predictions compared with experimental results of motion effects on pilot performance in IFR hovering task

[NASA-CR-1933]

p0165 N72-14999

Application of programmed pilotage techniques to vary aerodynamic parameters during flight for enhancement of level flight speed characteristics of VTOL aircraft

[AD-736537]

p0334 N72-21032

Evaluation of integrated flight display for hovering phase of IFR landing of VTOL aircraft

p0374 N72-22631

Development of methods for predicting hovering performance of single rotor helicopters

[AD-738531]

p0467 N72-26029

Simulation study of lift-roll coupling on handling qualities of hovering VTOL aircraft using thrust for roll control

[NASA-TN-D-6906]

p0516 N72-28020

Destabilization effects of flap-lag coupling in hingeless rotor blade oscillations during hover

[NASA-TN-X-62179]

p0572 N72-30003

Evaluation of translational rate for V/STOL aircraft in hover condition using six degree of freedom motion simulator

[NASA-TN-X-62194]

p0639 N72-33026

## HOVERING STABILITY

Optimal fixed point hovering rotor design for improved static performance by pulse theory

p0119 A72-16350

Helicopter automatic flight control approach/hover coupler systems, hands off stability and handling qualities

p0310 A72-27522

V/STOL weapon system VJ-101 design, discussing one axis rocking device, suspension structure and hovering flight thrust control

p0405 A72-33049

Stability and control dynamics of helicopter hovering with heavy sling load, analyzing maneuvers for minimal excitation of pendulous motion

[AHS PREPRINT 630]

p0445 A72-34488

Optimization of the wing parameters of a glider hovercraft

p0509 A72-39902

Manual stabilization and positioning of hovering VTOL aircraft using indicating instrument and artificial horizon

[REPT-61]

p0324 N72-20437

Mathematical model for influence of lift engine position on eigenmotion of lift jet powered VTOL aircraft in hovering flight

[DLR-FB-71-112]

p0422 N72-24028

Effects of blade section camber and blade planform taper on helicopter rotary wing hovering performance

[AD-743232]

p0586 N72-31033

## HP-115 AIRCRAFT

HP-115 slender wing research aircraft linear motion and undamped Dutch roll oscillations at high angles of attack

[AIAA PAPER 72-62]

p0132 A72-16932

Approximate analysis for solving fourth order nonlinear equation of motion of HP-115 aircraft at low speed

[ARC-R/M-3674]

p0270 N72-19034

Inflight measurement of yawing moment of inertia of HP-115 aircraft using wing-tip parachutes

[ARC-R/M-3691]

p0585 N72-31025

## HUBS

Hub and shroud boundary layer growth in centrifugal compressor vaneless diffusers, comparing predicted and measured performance at high pressure ratio per stage

[ASME PAPER 72-GT-54]

p0296 A72-25645

New hubs for multi-bladed tail rotors.

[AHS PREPRINT 602]

p0445 A72-34491

The development of inlet flow distortions in multi-stage axial compressors of high hub-tip ratio.

[ICAS PAPER 72-20]

p0553 A72-41145

Rotary wing head weight estimation for helicopter preliminary design and parametric studies, deriving semiempirical trend formula

[SAE PAPER 914]

p0596 A72-43461

## HUGHES AIRCRAFT

Hughes 500 and OH-6 helicopter tail rotor cambered blades, comparing thrust and stall characteristics with symmetrical blades

p0359 A72-30290

## HUGHES MILITARY AIRCRAFT

U HUGHES AIRCRAFT

U MILITARY AIRCRAFT

## HUMAN BEHAVIOR

Behavioral inaction under stress conditions similar to survivable aircraft accident, tabulating hesitation statistics

p0194 A72-21570

Historical development of right and left hand patterns in horsemanship, land vehicle, ship and aircraft control and navigation

p0462 A72-37050

## HUMAN CENTRIFUGES

Simulation of dynamic spin of F-4 aircraft under pilot control using human centrifuge facility

[AD-739326]

p0483 N72-27278

## HUMAN ENGINEERING

U HUMAN FACTORS ENGINEERING

## HUMAN FACTORS ENGINEERING

Aircraft ride comfort problem in turbulent air, comparing free and fixed wing aircraft responses

p0015 A72-11720

Instructor station design for automated flight training systems, considering human factors and informational requirements

p0183 A72-19277

Crashworthy upper torso restraint systems for general aviation, incorporating strap takeup

- devices p0195 A72-21578
- Anthropotechnical aspects of V/STOL aircraft control, discussing instrument and control systems concepts based on development and flight tests of experimental Do-31 VTOL aircraft p0230 A72-22784
- Aircraft pilot seating protection from dynamic environment by active vibration isolation, discussing human frequency response characteristics p0302 A72-26391
- Computerized navigator training simulator for complete array of air navigation instruments, discussing design and human factors p0398 A72-32208
- Human factors engineering techniques in pilot-aircraft-environment adaptation to ease workload and in performance efficiency improvement p0455 A72-35792
- Historical development of right and left hand patterns in horsemanship, land vehicle, ship and aircraft, control and navigation p0462 A72-37050
- Area navigation and its affect on aircraft operation and systems design. [AIAA PAPER 72-754] p0498 A72-38125
- Analysis of flight control system requirements for helicopters and design of pilot assisted control system [AD-725590] p0044 A72-11057
- Technological forecasting of future pilot-aircraft interface requirements p0104 A72-13010
- Annotated bibliography on human engineering configurations in arrangement of controls and displays in aircraft [AD-729840] p0149 A72-13983
- Numerical analysis of methods for reducing discomfort of passengers on commercial aircraft under turbulent conditions [NASA-CR-116775] p0149 A72-13984
- Human comfort measured from vibration ride environments of STOL aircraft and high speed train [NASA-TM-X-67586] p0174 A72-15841
- Effects on ejection seat catapult performance of using live load as compared to equivalent rigid load [AD-730635] p0205 A72-15978
- Analysis of human factors problems associated with air traffic control systems with emphasis on impact caused by automation [NASA-CR-1957] p0273 A72-19102

of hypersonic aircraft  
[NASA-TN-D-6577] p0032 N72-10045

Kerosene-type fuel for supersonic and hypersonic  
aircraft p0047 N72-11671

Using heat pipe structures for cooling leading  
edges of hypersonic cruise aircraft  
[NASA-CR-1857] p0099 N72-12949

Aerodynamic technology for developing hypersonic  
cruise aircraft p0103 N72-13000

Forecasting technology of aircraft structural  
components for hypersonic cruise flight  
p0103 N72-13004

Technological forecasting for development of  
hypersonic transports p0105 N72-13020

Water-glycol convective cooling system for Mach 6  
hypersonic transport airframe  
[NASA-CR-1918] p0251 N72-18011

Weight estimation and analysis of major structural  
components of hypersonic, liquid hydrogen fueled  
aircraft [NASA-TN-D-6692] p0264 N72-18911

Pressure tight seal for superalloy used in  
hypersonic aircraft fuel tank joints  
[NASA-CASE-LAR-10170-1] p0338 N72-21471

Design, development, and evaluation of active  
cooling systems for Mach six hypersonic  
transport aircraft [NASA-CR-1917] p0368 N72-22024

Wind tunnel tests to determine effects of  
variations in body shape on aerodynamic  
characteristics of all-body hypersonic aircraft  
configuration [NASA-TN-D-6821] p0419 N72-23996

Aerodynamics and hypersonic inviscid flow  
p0617 N72-31995

Optimization methods for determining aerodynamic  
shapes of hypersonic transport vehicles  
p0617 N72-31996

Aerodynamic drag and hypersonic aircraft propulsion  
p0618 N72-32000

Economic analysis of hypersonic transport aircraft  
to show projected operating costs and return on  
investment [NASA-TN-X-62193] p0639 N72-33025

Comparison of turbojet, turborocket, and ramjet  
engines for long distance hypersonic cruising  
flight [DLR-PB-72-38] p0647 N72-33750

## HYPERSONIC BOUNDARY LAYER

Laminar three dimensional boundary layer  
nonequilibrium effects at hypersonic wing swept  
leading edge with intensively cooled surface,  
considering sweep induced crossflow effect  
[VPI-E-71-23] p0020 A72-12422

Viscous interaction over concave and convex  
surfaces at hypersonic speeds. p0602 A72-44308

## HYPERSONIC FLIGHT

Design and evaluation of cooling systems for wings  
on hypersonic cruise vehicles  
[NASA-CR-1916] p0251 N72-18010

## HYPERSONIC FLOW

- Supersonic and hypersonic flows with attached shock waves over delta wing at angle of attack, deriving unified theory for flow field  
p0017 A72-12030
- Hypersonic flow past final thickness delta wing, presenting conical flow equations with boundary value solution  
p0142 A72-18128
- Rarefied hypersonic flow characteristics of delta wings and trailing edge spoilers.  
p0450 A72-35229
- Unified area rule for hypersonic and supersonic wing-bodies.  
p0450 A72-35251
- Triangular and conical wings in hypersonic flow with Mach reflection of shock waves from leading edge with optimal L/D ratio.  
p0460 A72-36893
- Hypersonic boundary layer separation of delta wing in shock tunnel using color and monochrome schlieren photography  
[NPL-AERO-NOTE-1097]  
p0029 N72-10022
- Surface heat transfer rates on sharp-flat plate with helium at Mach 22.8 to 86.8, and local heat transfer rates in corner flow formed by plates and sharp leading edges with air at Mach 19  
[NASA-CR-124695]  
p0112 N72-13909
- Aerodynamic characteristics of delta wings with or without trailing-edge flap in rarefied hypersonic gas flow.  
[REPT-71-2]  
p0149 N72-13980
- Flow field analysis of aircraft configurations using finite difference technique for numerical solution to three dimensional, unified, supersonic/hypersonic, small disturbance equations  
[NASA-CR-1926]  
p0221 N72-17207
- Flow charts, subroutines, and computer program for solving unified supersonic/hypersonic, small disturbance equations for flow around aircraft configurations  
[NASA-CR-1927]  
p0222 N72-17208
- Structure of hypersonic flow field of blunt slab delta wing at moderately high angle of attack  
p0327 N72-20851
- Experimental method for measuring heat transfer in hypersonic aerodynamic models  
[REPT-32]  
p0438 N72-25918
- Aerodynamics and hypersonic inviscid flow  
p0617 N72-31995

## HYPERSONIC FORCES

- Hypersonic nonlinear aerodynamic loading effect on panel flutter, examining stability for various initial conditions  
[AIAA PAPER 72-345]  
p0286 A72-25374

## HYPERSONIC REENTRY

- Ablation phase duration during spacecraft decelerated hypersonic reentry flight, using theoretical model based on quasi-steady assumptions  
p0300 A72-25815

## HYPERSONIC SPEED

- Sonic boom induced flow field at supersonic/hypersonic speeds, using shock expansion method and hypersonic equivalence principle for sharp and blunt nosed bodies  
[AIAA PAPER 72-652]  
p0415 A72-34082
- Laminar and turbulent boundary-layer studies at hypersonic speeds.  
[ICAS PAPER 72-09]  
p0552 A72-41134
- Analysis of inviscid flow on windward side of flat, sharp-edged delta wing at hypersonic speed and angles of attack near maximum lift  
[AD-731763]  
p0202 N72-15955

## HYPERSONIC VEHICLES

## NT HYPERSONIC AIRCRAFT

## NT LIFTING REENTRY VEHICLES

- Area rule for change in lift/drag ratio of hypersonic delta wing due to conical body addition on compression side  
p0018 A72-12270
- Hypersonic vehicles lateral dynamics during great circle flight, using linearized equations of motion and Newtonian theory for stability derivatives estimation  
p0195 A72-21603
- Theoretical and experimental study of a dual-mode ramjet /flight range from Mach 3.5 to 7/  
[ICAS PAPER 72-24]  
p0553 A72-41149

Shock tunnel measurements of aerodynamic forces on thin delta wings for performance prediction of hypersonic vehicle cruising flight.  
[ARC-CP-1148]  
p0080 N72-11905

Aerodynamic problems of designing optimum hypersonic vehicles  
[AGARD-15-42-VOL-1]  
p0617 N72-31994

## HYPERSONIC WIND TUNNELS

## U HYPERVELOCITY WIND TUNNELS

## HYPERSONICS

Nonequilibrium boundary layer flow at leading edge of highly swept hypersonic infinite span wing  
[PB-204710]  
p0328 N72-20975

Waverider prediction of hypersonic behavior of wing planforms  
p0617 N72-31997

## HYPERVELOCITY WIND TUNNELS

## NT CASCADE WIND TUNNELS

## NT SHOCK TUNNELS

Magnetic balance measurements of aerodynamic forces on spheres and slender cones in hypersonic low density wind tunnels, noting sting effect  
p0243 A72-24771

Hypersonic gun tunnel balance and pressure measurements on sharp leading edge delta wings, comparing experimental coefficients and shock angles with predicted values  
p0299 A72-25735

Pressure distribution over delta wing with blunted edges at small angles of attack in hypersonic wind tunnel tests  
p0363 A72-31022

The S4MA hypersonic wind tunnel - Its use for tests of ramjet engines with supersonic combustion of hydrogen  
p0493 A72-37823

Hot-wire analysis of wake in hypersonic helium wind tunnel  
[AD-729881]  
p0159 N72-14325

Trends in aerothermodynamic simulation at very high Reynold numbers for hypersonic aircraft-space shuttles and planetary entry  
p0387 N72-23221

Effect of wind tunnel disturbances on boundary layer transition process at hypersonic speed and development of low noise level wind tunnel  
[NASA-TM-X-2566]  
p0469 N72-26239

Hypersonic wind tunnel tests on delta wing models at high incidence for pressure distribution determination  
[ARC-CP-1198]  
p0476 N72-27004

## HYPOTHESES

## NT EXPECTANCY HYPOTHESIS

## HYSTERESIS

Iron rotational hysteresis effect in cold magnetic balance wind tunnel system for spinning aircraft configurations and subsonic flow regimes  
p0244 A72-24776

## I BEAMS

Graphite/epoxy composite I beam and box beam components for horizontal tail stabilizers  
[AD-729050]  
p0107 N72-13039

## IBM 7040 COMPUTER

Time sharing system for teleprocessing of wind tunnel measurements with IBM 7040 computer as central processor  
[DLR-PB-70-68]  
p0168 N72-15186

## ICE FORMATION

Thunderstorm flight testing for evaluation of rain, ice, lightning and turbulence effects on aircraft, engine and systems operating characteristics  
p0147 A72-18500

Federal Air Regulations procedures for civil transport aircraft flight testing under natural and/or simulated icing conditions  
p0147 A72-18501

Gas turbine engine icing, discussing atmospheric conditions, damage due to ice ingestion and anticice systems  
[ASME PAPER 72-GT-6]  
p0293 A72-25609

Ice formation on helicopter rotor blades, discussing atmospheric moisture and temperature conditions, blade surface temperature, centrifugal and aerodynamic forces and

# ICE PREVENTION

# SUBJECT INDEX

preventive measures p0309 A72-27414

Mathematical criteria for probable and potential aircraft icing occurrence, using radiosonde and empirical climatological data p0348 A72-28856

Liquid and solid precipitation on aircraft structure surfaces, discussing potential hazards to engine components and aircraft controls due to ice formation p0603 A72-44339

Modification of turbine engine test cell to provide simulated altitude icing conditions and 1200 pound per second air flow [AD-729205] p0157-N72-14279

Analysis of causes for carburetor ice formation and recommended procedures to prevent icing [NTSB-AAS-72-1] p0369 N72-22028

Epoxy and silicone rubber molding of ice structures and ice-coated airplane wings [MEMO-82] p0426 N72-24611

**ICE PREVENTION**

Aircraft engine anti-icing tests and evaluation describing ground and airborne techniques [AIAA PAPER 72-162] p0128 A72-16828

JT15D turbofan engine antiicing system development, discussing icing test program and results p0176 A72-18765

Gas turbine engine icing, discussing atmospheric conditions, damage due to ice ingestion and antiice systems [ASME PAPER 72-GT-6] p0293 A72-25609

Ice formation on helicopter rotor blades, discussing atmospheric moisture and temperature conditions, blade surface temperature, centrifugal and aerodynamic forces and preventive measures p0309 A72-27414

Calculation procedure for reaction thrust of semibounded turbulent jet in boundary layer blowing and blow type antiicing systems p0345 A72-28728

Analysis of causes for carburetor ice formation and recommended procedures to prevent icing [NTSB-AAS-72-1] p0369 N72-22028

Use of polyethylene thin films for ice prevention and ice-shedding on helicopter rotary wings [RAE-TR-71238] p0640 N72-33032

**ICING**

**U ICE FORMATION**

**IDEAL FLUIDS**

Book on fluid dynamics covering theories of perfect, viscous and compressible fluids, infinite and finite span wings, boundary layer flow, etc p0070 A72-15357

Nonlinear calculation of three dimensional flow of perfect incompressible fluid around wing of finite span with arbitrary form p0071 A72-15558

Plane stationary flow of ideal incompressible fluid past large camber profiles of arbitrary shape and thickness, using computerized Fourier expansion p0180 A72-18976

Book on ideal and real compressible fluid dynamics covering supersonic flow past airfoils and shock wave interaction with laminar boundary layer p0233 A72-23045

Investigation of the interaction between a circular wing and a flow of ideal liquid p0598 A72-43796

Plane stationary flow of ideal incompressible fluid past large camber profiles of arbitrary shape and thickness, using computerized Fourier expansion p0611 A72-45002

**IDEAL GAS**

Downwash behind lifting surface related to loading in ideal incompressible gas by equations of motion linearization p0182 A72-19110

Acoustic shock wave diffraction at moving or static plate immersed in ideal gas p0357 A72-30011

**IDENTIFYING**

Air traffic density effect on secondary surveillance radar operation in ATC for aircraft

identification and position determination, proposing selective address system p0547 A72-40289

Analysis of discrete address beacon system operation for air traffic control to identify problems created by interrogation scheduling [AD-737294] p0389 N72-23671

**IFR (RULES)**

**U INSTRUMENT FLIGHT RULES**

**IGNITION**

**BT ELECTRIC IGNITION**

Jet engine fuel fire hazard evaluation by controlled laboratory tests, analyzing ignition characteristics under simulated survivable aircraft crash accidents [SAE PAPER 720324] p0290 A72-25587

Supersonic combustion of liquid fuels, hydrogen and propane, discussing initiation and stabilization in supersonic flow p0311 A72-27686

Theoretical analysis of fuel ignition by hot projectile and ignition delay time as function of temperature and width of hot gas region p0048 N72-11683

Crash safe turbine fuel program, using gelled fuels p0049 N72-11687

Lightning discharge ignition of fuel vapors beneath titanium alloy aircraft skin [NASA-CR-120827] p0224 N72-17949

Water vapor effect on ignition delay in gaseous hydrogen combustion airstream [AD-741581] p0542 N72-29962

**IGNITION LIMITS**

Safe aircraft fuels crashworthiness evaluation in terms of ignition susceptibility parameter, noting full scale crash environment simulation [ASME PAPER 72-GT-27] p0294 A72-25623

Incendiary projectile ignition limits of jet engine fuel [AD-730343] p0225 N72-17964

Fuel vapor spontaneous ignition in Concorde fuel tank for maximum oxygen concentration determination to limit ignition pressure [ARC-CP-1209] p0537 N72-29799

**IGNITION TEMPERATURE**

Ignition characteristics of aircraft fluids impinging on hot surfaces under air flow conditions found during flight [AD-734238] p0283 N72-19964

**IL-62 AIRCRAFT**

Technical experience in operating the equipment in the IL-62 aircraft p0454 A72-35791

IL-62 aircraft propulsion system design and installation details, operational surveillance system and maintenance operations p0597 A72-43639

**ILLINOIS**

Environmental impact statement on airport development in Effingham, Illinois [PB-205790-F] p0643 N72-33256

**ILS (LANDING SYSTEMS)**

**U INSTRUMENT LANDING SYSTEMS**

**ILYUSHIN AIRCRAFT**

U.S.S.R. high-subsonic freight transport jet aircraft IL-76 for arctic areas, Siberia and Far East, noting independence of large airports availability p0056 A72-13471

**IMAGE CONTRAST**

Image contrast enhancement of cathode ray tube cockpit displays with micromesh optical filters [DLR-FB-71-73] p0322 N72-20216

**IMAGE ENHANCEMENT**

Image contrast enhancement of cathode ray tube cockpit displays with micromesh optical filters [DLR-FB-71-73] p0322 N72-20216

**IMAGE FILTERS**

Optical image filtering to simplify and facilitate automatic aerial photointerpretation processes p0233 A72-23310

**IMAGE INTENSIFIERS**

Low level light TV camera with Si intensifier target tube for fire control system to improve AH-1G Cobra helicopter night reconnaissance and attack capabilities p0452 A72-35555

 In-flight warning meter for solar and cosmic radiation dose equivalent measurements for radiological protection in SST aircraft [CERN-71-16] p0017 A72-12078  
 Soviet book on in-flight studies of aircraft stability and controllability covering dynamic characteristics, measurements, balancing curves, aerodynamic forces and limiting and special flight regimes p0021 A72-12542  
 Aircraft in-flight monitoring instruments for meteorological service in U.S. p0064 A72-14687  
 Bayesian analysis of onboard computer controlled aircraft avionics subsystem built-in test for failure detection p0123 A72-16574  
 Incipient wing stall detection by unsteady pressure monitoring via flush-mounted microphones, discussing flow patterns on models p0182 A72-19093  
 DC-10 aircraft automatic landing performance and failure assessment monitor system p0190 A72-21003

## IN-FLIGHT THRUST MEASUREMENT

## SUBJECT INDEX

Automation in planning and execution of flights, considering navigation, communication, flight instruments monitoring, control/stabilization and warning systems p0230 A72-22780

Pulse operated multichannel annunciator system for pilot warning of aircraft systems malfunctions, describing circuit design [SAE PAPER 720333] p0291 A72-25593

Avionics effects on airline operations timekeeping, considering gains due to all-weather capability and engine monitoring vs possible losses due to equipment failures p0402 A72-32461

The use of airborne magnetic tape recorders for fatigue life monitoring. p0449 A72-34812

Engine condition monitoring - The Pan Am approach: Phase II. p0450 A72-35324

Determination of the radiation characteristics of aircraft antennas in flight p0549 A72-40534

In-flight and flight-line monitor system to detect foreign object damage in jet engines. p0564 A72-42690

Variable impedance transducer measuring instruments for in-flight aircraft performance tests under environmental thermal effects p0565 A72-42711

**IN-FLIGHT THRUST MEASUREMENT**

**U IN-FLIGHT MONITORING**

**U THRUST MEASUREMENT**

**INCENDIARY AMMUNITION**

Incendiary projectile ignition limits of jet engine fuel [AD-730343] p0225 N72-17964

**INCOMPRESSIBLE FLOW**

Viscous incompressible flow past longitudinally cambered small aspect ratio slender wing near solid interface p0119 A72-16215

Two dimensional airfoil unsteady stall in incompressible flow, comparing calculated loading during transient and sinusoidal pitching motions with measured values [AIAA PAPER 72-37] p0130 A72-16899

Jet flaps for high turning compressor cascades in incompressible axial flow, calculating blade pressure and jet slope distributions [ASME PAPER 72-GT-16] p0293 A72-25615

Unsteady aerodynamic forces on flat plate in locally perturbed incompressible potential flow, investigating angle of attack frequency response to periodic local perturbations p0303 A72-26579

Incompressible potential flow model of porous parachute canopy flow field, using Stokes stream function for axisymmetric vortex sheet in uniform steady stream p0313 A72-28123

Inviscid incompressible flow past longitudinally curved small aspect ratio slender wing, investigating aerodynamic characteristics p0345 A72-28729

Incompressible boundary layer velocity profile on swept wings, comparing critical Reynolds number to straight wing value p0356 A72-29639

French monograph on velocity profile in laminar boundary layer on semiinfinite flat plate in harmonic oscillation of uniform incompressible flow p0363 A72-30949

Aerodynamic properties prediction procedure for thin jet-flapped airfoil in incompressible inviscid flow bounded by different types of boundaries p0397 A72-32147

Vortex induced wing loads. p0450 A72-35257

The inviscid flowfield of an unsteady airfoil. [AIAA PAPER 72-681] p0452 A72-35481

Prediction of the stalling of a wing section in incompressible flow [ONERA, TP NO. 1088] p0492 A72-37760

Uniformly exact solution of the problem of the flow past a slender profile p0509 A72-39904

Calculation of separation points in incompressible turbulent flows. p0593 A72-43328

Velocities induced by distributions of infinite kinked sources and vortex lines representing wings with sweep and dihedral in incompressible flow [ARC-R/M-3667] p0277 N72-19332

Analysis of basic flow elements involved in unsteady stall of two dimensional airfoil rotary wing in incompressible flow [NASA-CR-2009] p0366 N72-22005

Numerical procedure for predicting airfoil stall occurrence in incompressible flow conditions. [ONERA-TP-1088] p0463 N72-26003

Computer program for coordinates, incompressible inviscid section characteristics, and two dimensional drag-rise for NACA airfoils [AD-738623] p0484 N72-27332

**INCOMPRESSIBLE FLUIDS**

Nonlinear calculation of three dimensional flow of perfect incompressible fluid around wing of finite span with arbitrary form p0071 A72-15558

Nonlinear unsteady potential flow of incompressible fluid past slender wing, using linearized vortex distribution method p0119 A72-16214

Plane stationary flow of ideal incompressible fluid past large camber profiles of arbitrary shape and thickness, using computerized Fourier expansion p0180 A72-18976

Downwash behind lifting surface related to loading in ideal incompressible gas by equations of motion linearization p0182 A72-19110

Plane laminar semibounded incompressible fluid jet propagation into slipstream along moving plate, solving boundary layer equations p0247 A72-25136

Turbulent flow between rotating disk and turbine engine body calculated from equations of axisymmetric viscous incompressible fluid flow p0395 A72-31702

Plane stationary flow of ideal incompressible fluid past large camber profiles of arbitrary shape and thickness, using computerized Fourier expansion p0611 A72-45002

Vortex distribution technique applied to three-dimensional bodies moving through incompressible fluid [AD-732953] p0324 N72-20333

Nonlinear theory of lifting surfaces applied to problem of forces acting on rectangular wing in stream of incompressible fluid p0618 N72-32008

**INCONEL (TRADEMARK)**

Forged Inconel alloy 718 metal powder preforms for dense aircraft engine compressor rotor blades p0014 A72-11441

Hot corrosion effects on Inconel-700 and Inconel-X gas turbine rotor blades during burning of high sulfur concentration residual oil fuels [ASME PAPER 72-GT-87] p0298 A72-25662

data for computer graphics presentation  
[PAA-RD-71-92] p0427 N72-24673

Navigation performance of high cross-range space shuttle orbiter during approach and landing using optimally augmented inertial navigation system  
[NASA-TM-X-62123] p0472 N72-26516

Numerical analysis of cause and effect of errors in inertial navigation systems based on gyro horizon operation  
p0472 N72-26522

Kalman-Schmidt filters applied to optimal control of air submarine inertial navigation systems  
[NASA-CR-127253] p0486 N72-27706

Measuring air velocity and temperature for inertial navigation using DHC 5 aircraft  
[NCAR-TN/EDD-74] p0523 N72-28675

Improved navigation by combining VOR/DME information with air or inertial data  
[NASA-CR-124826] p0578 N72-30586

Analysis of factors affecting accuracy of inertial air navigation systems  
[JPBS-51241] p0589 N72-31639

**INERTIAL PLATFORMS**

Inertial platform pursuant to ARINC-571 specifications, noting capability for integration into surface navigation system or autonomous operation  
p0493 A72-37799

Autonomous navigation systems, discussing Doppler navigation, inertial platforms and onboard computers  
p0546 A72-40283

In-flight alignment and calibration of inertial measurement units. I - General formulation. II - Experimental results.  
p0551 A72-41079

**INERTIAL REFERENCE SYSTEMS**

System methodology application to filter design for inertial reference unit calibration in digital test station for FB-111 aircraft navigation system  
p0237 A72-23820

**INFINITE SPAN WINGS**

Rotor downwash variation by changing vortice diameter, flapping, rotor speed, and radius and placing infinite span wing in flow field  
p0037 N72-11003

Numerical analysis of velocity potential of subsonic flow past semi-infinite plane sector based on linearized theory of subsonic flow  
[ARC-R/M-3630] p0366 N72-22002

**INFLATABLE DEVICES**

**U INFLATABLE STRUCTURES**

**INFLATABLE STRUCTURES**

**NT BALLOONS**

**NT BALLUTES**

**NT TETHERED BALLOONS**

Development of an inflatable fabric structure for the early stabilization of the B-1 crew escape capsule.  
[AIAA PAPER 72-801] p0510 A72-40053

**INFLATING**

Parachute opening shock and filling time calculation based on aerodynamic drag, air mass and effective porosity time functions, using momentum and continuity equations  
p0007 A72-10310

Parachute inflation loads and times, presenting calculation method based on unsteady pressure distribution on decelerating inflating parabolic shell of revolution with unsteady starting vortex  
p0007 A72-10311

**INFLUENCE COEFFICIENT**

Supersonic aerodynamic influence coefficients matrices calculation for wings of arbitrary planform, constructing computer program  
p0314 A72-28142

Computer program for gas turbine characteristics and influence coefficients calculation, allowing for cascade loss distribution during flow choking  
p0314 A72-28151

Statistical analysis of influence coefficients and unbalance forces measurement errors in balancing of rotors  
p0556 A72-41229

**INFORMATION**

Information measurement tests and development for aircraft maintenance jobs

[AD-725814] p0094 N72-12427

Information measurement tests for review of aircraft maintenance job aids  
[AD-725815] p0094 N72-12428

**INFORMATION DISSEMINATION**

Cost effectiveness model for evaluating general aviation weather dissemination techniques, stressing design variables and time periods  
p0349 A72-28871

Engineering information service for aeronautical engineering, mechanical engineering, chemical engineering, industrial fluid mechanics, and stress and strength  
p0649 N72-33962

**INFORMATION FLOW**

Aircraft optimal control for case of continuous data flow on time, variable flight conditions  
p0181 A72-18979

The Gander automated air traffic system.  
p0492 A72-37748

**INFORMATION RETRIEVAL**

United Air Lines computerized information retrieval system for message switching, flight planning and monitoring and aircraft parts inventory control  
[IEEE PAPER 23,3] p0072 A72-15713

**INFORMATION SYSTEMS**

**NT MANAGEMENT INFORMATION SYSTEMS**

United Air Lines computerized information retrieval system for message switching, flight planning and monitoring and aircraft parts inventory control  
[IEEE PAPER 23,3] p0072 A72-15713

Instructor station design for automated flight training systems, considering human factors and informational requirements  
p0183 A72-19277

Ground based ATC information processing systems analysis, considering controllers work load.  
p0229 A72-22778

Avionics systems electrical interface connection design information document creation and dissemination, using EMPRENT computer program  
p0244 A72-24864

Computerized weight data storage, recording and information system to aid in aerospace vehicle design  
[SAE PAPER 933] p0596 A72-43473

Controller, independent of other intake controllers and aircraft data systems, and wind tunnel testing of supersonic intake control system  
p0212 N72-16706

**INFORMATION THEORY**

Information theory approaches to air navigation, discussing ATC, collision avoidance and computer applications  
p0350 A72-29013

Development of schematic representation of pilot workload and functions for various portions of aircraft flight and reaction to various stimuli  
p0621 N72-32035

**INFORMATION TRANSMISSION**

**U DATA TRANSMISSION**

**INFRARED DETECTORS**

Basic requirements for airborne infrared forest fire detection system  
[AD-726953] p0034 N72-10396

Cd-Te photodetectors for high temperature infrared detectors of aircraft engine fires  
[AD-734785] p0278 N72-19536

**INFRARED HORIZON SCANNERS**

**U HORIZON SCANNERS**

**U INFRARED SCANNERS**

**INFRARED IMAGERY**

Airborne remote CAT detection equipment, examining pulsed Doppler laser and IR radiometry  
p0068 A72-14831

**INFRARED INSTRUMENTS**

**NT INFRARED DETECTORS**

**NT INFRARED SCANNERS**

**NT INFRARED SPECTROPHOTOMETERS**

IR measurement of hot jets turbulence intensity axial and transverse profiles, noting application to sound sources detection  
p0242 A72-24656

**INFRARED PHOTOGRAPHY**

Infrared photographic apparatus and rotating systems, for measuring surface temperature of turbine vanes and blades

# INLETS (DEVICES)

# SUBJECT INDEX

Steady state radial inlet pressure distortion index for axial flow compressor, examining radial velocity, continuity equation and mathematical model  
[ASME PAPER 72-GT-109] p0299 A72-25673

Inlet random pressure fluctuation effects on turbojet engine stall characteristics  
p0478 N72-27022

Generalized, steady state, radial inlet pressure distortion index  
[AD-742446] p0580 N72-30783

**INLETS (DEVICES)**  
U INTAKE SYSTEMS  
INORGANIC COATINGS  
NT ANODIC COATINGS

**INPUT/OUTPUT ROUTINES**  
Development of structural optimization algorithm for obtaining near optimum distributions of material for structural idealizations  
[AD-726112] p0051 N72-11820

Development of theory for designing optimal inputs to identify parameters in linear dynamic systems and application to avionics installations - Part 2  
[AD-744116] p0625 N72-32065

**INSENSITIVITY**  
U SENSITIVITY

**INSEQUENT STREAMS**  
U STREAMS

**INSERTS**  
NT NOZZLE INSERTS

**INSPECTION**  
NT X RAY INSPECTION  
Metal fatigue damage nondestructive detection, discussing inspection methods, equipment, advantages, limitations and test results  
[AD-741977] p0020 A72-12498

Approaches to verification and solution of magnetic particle inspection problems.  
p0610 A72-44903

Ground and air tests of flight inspection marker beacon receiving system  
[FAA-NA-71-29] p0033 N72-10173

Development of technique for graphic presentation of fault isolation and problem correction for maintenance of large commercial aircraft  
p0040 N72-11028

Responsibilities of fixed base operators regarding aircraft inspection  
p0252 N72-18016

Development of integrated system for performing checkout of space launchers and aircraft systems  
p0278 N72-19489

Inspection and maintenance schedules of commercial transport aircraft to detect structural deterioration and to prevent catastrophic failure  
p0541 N72-29913

Development of adaptive scheduling procedure for aircraft maintenance and inspection planning  
[AD-743284] p0586 N72-31029

Analysis of runway surface conditions at Sherman Army Airfield, Fort Leavenworth, Kansas  
[AD-743912] p0643 N72-33258

**INSTABILITY**  
U STABILITY

**INSTALLATION**  
U INSTALLING

**INSTALLING**  
Flight test of modified F-106B aircraft with underwing engine nacelles to study airframe installation effects on 3 variable-flap ejector nozzles  
[NASA-TN-X-2478] p0162 N72-14791

**INSTRUCTIONS**  
U EDUCATION

**INSTRUMENT APPROACH**  
Aircraft pilot performance during instrument approach in low visibility conditions  
p0179 A72-18832

Civil aviation approach and landing guidance systems evolution, discussing ILS development, state of art and future requirements  
p0350 A72-29014

A pilot's opinion - VTOL control design requirements for the instrument approach task.  
[AHS PREPRINT 644] p0447 A72-34504

Simulation of PA-30 Comanche light aircraft performance and autopilot operation during final approach configuration  
[AD-733757] p0255 N72-18043

Operational evaluation of portable scanning beam guidance system for improved instrument landing capability  
[FAA-BD-72-26] p0280 N72-19720

Development of simulation model for instrument landing system and equations of motion for light aircraft during instrument landing conditions  
[DOT-TSC-FAA-71-11] p0320 N72-20019

Evaluation of instrument landing system for use with short takeoff and landing aircraft  
[FAA-BD-72-15] p0326 N72-20587

Report of aircraft accident involving Beechcraft 99 air taxi at Allentown, Pennsylvania on 24 October, 1971  
[NTSB-FAA-72-3] p0331 N72-21002

Flight evaluation of vectored-thrust-jet V/STOL aircraft during simulated instrument approaches using Kestrel (XV-6A) aircraft  
[NASA-TN-D-6791] p0420 N72-24012

Application of discrete address beacon for surveillance system used with independent landing approaches to closely spaced runways  
[ATC-13] p0578 N72-30587

Evaluation of instrument landing system ground guidance equipment and glide slope presentation  
[FAA-NA-72-13] p0646 N72-33641

**INSTRUMENT COMPENSATION**  
Aircraft altitude two-loop feedback control system designed by compensation parameter variation technique, determining correlation between system sensitivity computations and observations  
p0189 A72-20592

Zero velocity lag servomechanism transient response sensitivity from intuitive approach to convolution problem, noting feedback compensation advantages in sensitivity reduction  
p0189 A72-20593

Integrated inertial-VOR-DME or inertial-TACAN navigation system, presenting slant range and bearing adjustment procedure via least squares method  
p0416 A72-34136

ASW aircraft magnetic anomaly detection /MAD/ system range limitation due to residual maneuver noise, discussing real time compensation for geomagnetic gradient interference  
p0560 A72-42322

Optimal control of the speed of a two-shaft helicopter turbine  
p0600 A72-44278

**INSTRUMENT DRIFT**  
U DRIFT (INSTRUMENTATION)

**INSTRUMENT ERRORS**  
Optimal stochastic /Kalman/ filters application to integrated air and submarine navigation systems, discussing measurement errors modeling as bias and colored noise  
p0017 A72-12050

Coordinate and speed error dependence on instrumental errors of inertial navigation system using gyrohorizoncompass  
p0414 A72-33960

Around-the-world atomic clocks - Observed relativistic time gains.  
p0455 A72-35839

Bearing azimuth measurement accuracy improvement by ATC beacon system/secondary surveillance radar using monopulse technique  
p0461 A72-37047

The impact of gradiometer techniques on the performance of inertial navigation systems.  
[AIAA PAPER 72-850] p0504 A72-39079

Error analysis of hybrid aircraft inertial navigation systems.  
[AIAA PAPER 72-848] p0504 A72-39081

In-flight alignment and calibration of inertial measurement units. I - General formulation. II - Experimental results.  
p0551 A72-41079

Statistical analysis of influence coefficients and unbalance forces measurement errors in balancing of rotors  
p0556 A72-41229

Evaluation of flight instrumentation for the identification of stability and control derivatives.  
[AIAA PAPER 72-963] p0561 A72-42346

Engine compressor face rake for flight test instrumentation F-14A/TF-30.

# SUBJECT INDEX

# INSTRUMENT LANDING SYSTEMS

- Performance tests on aerodynamically compensated pressure heads for BAC 221 aircraft noting pressure sensing errors [ARC-CP-1167] p0564 A72-42686
- Analysis of instrumentation error effects on identification accuracy of aircraft parameters [NASA-CR-112121] p0042 N72-11046
- Digital computer program for investigating effects of instrument error on aircraft stability and control derivatives from flight test data [NASA-CR-112122] p0622 N72-32040
- INSTRUMENT FLIGHT RULES**
- German Federal Republic territorial air traffic regulations covering general, VFR and IFR rules, equipment and personnel examination and certification, safety, takeoff and landing, accidents, etc p0021 A72-12621
- UFO sighting case history and analysis, discussing bright light approaching on collision course during night instrument flight rules p0229 A72-22646
- Aircraft collision near misses under IFR and VFR conditions, discussing ATC coordination, equipment failure and personal and planning problems p0233 A72-22972
- General aviation aircraft structural safety studied with 1547 accident histories, noting IFR and turbulent weather conditions predominance [SAE PAPER 720308] p0289 A72-25572
- Low cost flight simulator for general aviation pilot training, containing IFR instrumentation and turbulence injection device p0399 A72-32211
- Prototype interurban IFR STOL transportation system demonstration project, considering area navigation, scanning beam microwave landing systems and STOLport planning [ICAS PAPER 72-41] p0555 A72-41166
- Evaluation of simulated pilot/system performance in manually controlled IFR formation flight task for UH-1 helicopter under various environmental and operational conditions [AD-725209] p0031 N72-10044
- Theory and operation of proposed helicopter IFR flight path control system p0084 N72-11933
- Analysis of operational requirements and feasibility of system for precise IFR helicopter hovering p0084 N72-11934
- Analytical predictions compared with experimental results of motion effects on pilot performance in IFR hovering task [NASA-CR-1933] p0165 N72-14999
- Planning and management of air traffic control system based on random sample of flight plans filed at flight service stations during calendar year 1970 [AD-735970] p0339 N72-21641
- Analysis of alternative display formats to establish systems requirements for manually controlled steep angle approach under IFR conditions with vertical lift aircraft [AD-736247] p0370 N72-22038
- Evaluation of integrated flight display for hovering phase of IFR landing of VTOL aircraft p0374 N72-22631
- Forecasts of instrument flight rules air traffic controlled by FAA control centers for determining requirements for manpower, facilities, and equipment [REPT-72-00186] p0376 N72-22646

- STRADA landing trajectory recording system for real time flight path restitution during approach and landing, using computer and lidar techniques p0404 A72-32895
- Autoland system flight testing in Trident 3B and British Civil Aviation Authority approval for ICAO Cat 3a weather p0411 A72-33539
- Log periodic dipole antenna systems for ILS localizers, noting reduced sensitivity to snow and ice p0489 A72-37279

# INSTRUMENT PACKAGES

# SUBJECT INDEX

All weather landing for a STOL system.  
[AIAA PAPER 72-788] p0495 A72-38105

Microwave landing system effect on the flight guidance and control system.  
[AIAA PAPER 72-755] p0510 A72-40057

ILS replacement by microwave landing system, considering landing phase range from acquisition to touchdown, terminal approach handling by airborne navigation system and economic advantages  
p0547 A72-40294

Automatic landing and microwave guidance system potential.  
p0551 A72-41072

Future trends in air traffic control and landing.  
[ICAS PAPER 72-04] p0552 A72-41129

Prototype interurban IPR STOL transportation system demonstration project, considering area navigation, scanning beam microwave landing systems and STOLport planning  
[ICAS PAPER 72-41] p0555 A72-41166

Dala /Sweden/ regional airport, describing planning and financing, approach lighting, ILS system and facilities for tourist traffic and industrial development  
p0593 A72-43248

Possible impact of area navigation upon MLS requirements for azimuth angular coverage and range.  
p0606 A72-44643

Airborne recording of ILS guidance signals and determination of beam bending effects  
[RAE-TR-70222] p0096 N72-12590

Operational evaluation of portable scanning beam guidance system for improved instrument landing capability  
[FAA-RD-72-26] p0280 N72-19720

Development of simulation model for instrument landing system and equations of motion for light aircraft during instrument landing conditions  
[DOT-TSC-FAA-71-11] p0320 N72-20019

Evaluation of instrument landing system for use with short takeoff and landing aircraft  
[FAA-RD-72-15] p0326 N72-20587

Aircraft accident involving FR-227-B commercial transport during landing approach at Albany County Airport, New York, on March 3, 1972  
[SB-72-23] p0368 N72-22021

Development of analytical model for determining probability of successful instrument landing and assessment of interaction of factors with flight crew  
[NASA-CR-2022] p0370 N72-22099

Development and characteristics of simulation of continuous error of localizer beam of conventional instrument landing system used with space shuttle  
[NASA-TN-X-62116] p0376 N72-22648

Development of method for determining appropriate longitudinal and lateral decision height dispersion limits for aircraft during instrument landing approach  
[NASA-CR-2024] p0376 N72-22651

Design, development, and characteristics of aircraft approach control system and application to typical jet transport aircraft  
[NASA-CR-2023] p0376 N72-22652

Development of mathematical model to illustrate multipath transmission of instrument landing system  
[DOT-TSC-FAA-72-7] p0376 N72-22653

Criteria for installation of instrument landing systems and effects of siting on operation of system  
[DOT-FAA-6750.16] p0423 N72-24338

Requirements for channel splitting to accommodate increased VHP omnirange navigation instrument landing systems, and distance measuring equipment facilities  
[PAPER-54-71/SC122-3] p0436 N72-25602

Evaluation of STOL modular instrument landing system  
[FAA-NA-72-11] p0436 N72-25605

Instrument landing system simulator including special signal generator for environment simulation  
[RAE-TR-71145] p0436 N72-25607

Performance tests of instrument landing system localizer to include system and monitor stability and monitor operation under degraded system performance

[FAA-RD-72-50] p0485 N72-27694

Methods for determining measuring system requirements for low visibility instrument landing  
[AD-739932] p0523 N72-28678

Aircraft accident involving DC-3 aircraft during instrument landing approach to La Guardia Airfield, New York on 4 Jan. 1971  
[NTSB-ACC-71-11] p0528 N72-29008

Simulator evaluation of instrument landing system back course approaches and comparison with front course approaches to determine flyability problems with glide slope  
[FAA-PS-600-8] p0537 N72-29671

Microwave ILS scanning beam data rate analysis for low visibility approach of H-53 helicopter  
[AD-743612] p0624 N72-32057

Evaluation of instrument landing system ground guidance equipment and glide slope presentation  
[FAA-NA-72-13] p0646 N72-33641

**INSTRUMENT PACKAGES**

Airborne external instrumentation pod containing IR scanner and associated test equipment for land and water surveys  
p0412 A72-33635

TCE-71A area navigation system based on modular design with provision for 20 waypoints parameter storage, describing computer, control display and automatic data entry units  
p0546 A72-40278

Aircraft instrument panel redesign to alleviate crew task, proposing integral displays and controls for flight information  
p0547 A72-40291

**INSTRUMENT TRANSFORMERS**

Choice of optimal geometrical relationships in a transformer-type angle converter  
p0559 A72-41805

**INSTRUMENT TRANSMITTERS**

Pressure transmitter for flow parameter measurements of aerodynamic nozzles and static pressure taps rotating on turbine rotor blades  
p0560 A72-42250

**INSTRUMENTAL ANALYSIS**

**U AUTOMATION**

**INSTRUMENTATION**

**U INSTRUMENTS**

**INSTRUMENTS**

Operational evaluation of device for measuring aircraft taxi speed and distance to determine accuracy and limitations  
[AD-730096] p0219 N72-17009

Implementation of instrumentation techniques for service testing of aircraft and airborne equipment to meet military requirements  
[AD-734306] p0276 N72-19300

Characteristics of flight test instruments and techniques for overcoming limitation and sources of error  
p0329 N72-20984

**INSULATING MATERIALS**

**U INSULATION**

**INSULATION**

**NT ELECTRICAL INSULATION**

**NT THERMAL INSULATION**

Low conductivity insulating coating /graded thermal barrier/ to cool gas turbine engine with high pressure ratio and inlet temperature  
[AIAA PAPER 72-361] p0286 A72-25389

**INTAKE SYSTEMS**

**NT AIR INTAKES**

**NT ENGINE INLETS**

**NT INTERNAL COMPRESSION INLETS**

**NT SUPERSONIC INLETS**

Gas generator performance shifts involving military trim level variations by TF-30 engines in high relative humidity environment caused by condensation in inlet duct  
p0176 A72-18759

Electrical analog simulation of internal combustion engines intake and exhaust systems nonstationary gas flow, considering cylinder, turbine and supercharger operation  
p0351 A72-29136

Mathematical model for gas turbine engine inlet noise caused by shock wave impingement, noting dynamic wave system with overpressure and distortion  
p0355 A72-29576

- Three dimensional boundary layer separation on slender bodies, delta wings and propulsion intake systems, reviewing computing techniques for interfering inviscid flow fields p0404 A72-32826
- In-flight investigation of installation effects and aerodynamic characteristics of local flow field on auxiliary inlet ejector nozzle on underwing engine nacelle [NASA-TM-X-2396] p0051 N72-11711
- Jet blowing for intake boundary layer control in V/STOL aircraft p0210 N72-16697
- Performance criteria, including engine air flow matching requirements, of axisymmetric mixed compression intake for supersonic transport p0211 N72-16703
- Free jet tests of full-scale supersonic intake/engine combination of Concorde power plant p0211 N72-16704
- Turbine engine aerodynamics research on higher inlet temperature and blade loading [NASA-TM-X-68016] p0264 N72-18782
- Design problems of inlets and nozzles used in supersonic and V/STOL propulsion systems [NASA-TM-X-67741] p0340 N72-21819
- INTEGRAL EQUATIONS**
- NT SINGULAR INTEGRAL EQUATIONS
- NT VOLTERRA EQUATIONS
- Aerodynamic behavior of thin jet-flapped airfoil, investigating integrodifferential equation solution p0015 A72-11669
- Thin wing harmonic oscillation in subsonic flow, developing analytical form of kernel function in generalized Possio integral equation p0126 A72-16707
- Integrodifferential equation for rigid tunnel walls effect on supercavitating flow past thin jet flapped airfoil, noting lift coefficient derivatives p0241 A72-24562
- Nonlinear integral equations solution for heavily loaded actuator disk induced flow field, taking into account blade tip vortices and thrust coefficient effects p0303 A72-26577
- Integral equation for calculation of unsteady aerodynamic forces on helicopter lifting rotor blades, taking into account air compressibility [ONERA, TP NO. 1081] p0356 A72-29671
- Extension of Gersten nonlinear wing theory to transonic flow [BMVG-FBWT-71-21] p0164 N72-14994
- INTEGRAL TRANSFORMATIONS**
- NT FOURIER TRANSFORMATION
- NT LAPLACE TRANSFORMATION
- INTEGRATED CIRCUITS**
- DC 9 aircraft integrated data system simulator to facilitate interacting systems checking, input circuit integrity, performance degradation and calibration p0143 A72-18284
- ATC IC transponder used with secondary surveillance radar, discussing design features p0461 A72-37048
- An all solid-state MIC transmit-receive module p0489 A72-37268
- Single and dual gate GaAs PET integrated amplifiers in C band p0489 A72-37270
- Development and characteristics of microelectronic equipment for improved reliability and reduced weight and size of electronic components p0278 N72-19484
- Design and evaluation of reliable integrated termination devices [AD-744476] p0626 N72-32245
- INTEGRATION (REAL VARIABLES)**
- U MEASURE AND INTEGRATION
- INTERODIFFERENTIAL EQUATIONS**
- U DIFFERENTIAL EQUATIONS
- U INTEGRAL EQUATIONS
- INTELLIGIBILITY**
- Improving intelligibility of voice communication in high acoustic noise environments as exists inside helicopters [AD-733431] p0256 N72-18171
- INTENSIFICATION**
- U AMPLIFICATION
- INTENSIFIER TUBES**
- U IMAGE INTENSIFIERS
- INTENSIFIERS**
- NT IMAGE INTENSIFIERS
- INTERCEPTION**
- Pontryagin minimum principle applied to aircraft heading change and aircraft interception [ETN-4] p0420 N72-24007
- INTERCEPTOR AIRCRAFT**
- U FIGHTER AIRCRAFT
- INTERCONNECTION**
- U JOINING
- INTERFACES**
- Digital computer equipped facility for training simulators environmental simulation capability testing, describing electronics interface, control and display equipment p0567 A72-42928
- INTERFERENCE**
- Aerodynamic interference between aircraft components - Illustration of the possibility for prediction. [ICAS PAPER 72-49] p0556 A72-41174
- Analysis of a lateral-directional airframe/propulsion system interaction of a Mach 3 cruise aircraft. [AIAA PAPER 72-961] p0561 A72-42348
- Problems of interference between oscillating surfaces in subsonic flow p0598 A72-43809
- Higher-order theory of two-dimensional subsonic wall interference effects on flow past airfoil between perforated wind tunnel walls [LR-553] p0207 N72-16205
- Program design for study of engine-aircraft interference problems p0209 N72-16686
- INTERFERENCE DRAG**
- An experimental investigation of a jet issuing from a wing in crossflow. p0613 A72-45332
- Jet engine simulation with low speed wind tunnel models for interference drag measurement p0027 N72-10005
- Jet interference effects on yaw stability for SAAB 37 and 105 wind tunnel models p0027 N72-10006
- Vertical takeoff aircraft wind tunnel model with high pressure ejectors to determine jet interference on aerodynamic coefficients p0028 N72-10007
- Jet interference and lift drag ratio of swept wing aircraft with turbofan above wing [RAE-TM-AERO-12711] p0028 N72-10009
- Influence of jet interference on aerodynamic coefficients of rectangular and swept wings mounted above the engine p0028 N72-10010
- Impinging inclined jet effect on aerodynamic characteristics of control surface in VTOL longitudinal stability p0028 N72-10011
- European airbus wind tunnel model aerodynamic force and downwash measurements noting jet interference reduction p0028 N72-10012
- Multipropeller slipstream and wing interference, noting lift, drag, pitching moment, normal force distribution, and wakes p0029 N72-10015
- Mutual aerodynamic interference effects on flow field beneath aircraft with external stores examined by cross flow corrections method [AD-735655] p0328 N72-20974
- Aerodynamic interference between wing and surface of velocity discontinuity in nonuniform potential flow field [NAL-TR-254] p0476 N72-27000
- Interference problems of airframe engine integration in aircraft design optimization [AGARD-LS-53] p0478 N72-27016
- Engine airplane interference corrections in calculating model aircraft performance from wind tunnel test data p0478 N72-27017
- Integration of forebody and forebody/wing flow fields into airplane design criteria

## INTERFERENCE GRATING

## SUBJECT INDEX

- Wind tunnel models for determining inlet interference and performance of inlet/airframe combination in supersonic aircraft design p0478 N72-27018
- Wind tunnel test results of exhaust nozzle/airframe interference drag for optimization of subsonic aircraft design p0478 N72-27019
- Wind tunnel test requirements for simulating nozzle parameters and nozzle airframe interference characteristics p0478 N72-27020
- Determination of thrust and drag characteristics for integrated aircraft engine design optimization p0478 N72-27021
- INTERFERENCE GRATING
- Surface evaluation of airfoils via contouring. p0490 A72-37605
- INTERFERENCE LIFT
- Low subsonic region unsteady interference effects on harmonically oscillating wing-tailplane model with variable sweep wing [DGLR PAPER 71-081] p0022 A72-12709
- A new method for the evaluation of slotted wind tunnel interference parameters applicable to subsonic oscillatory tests. p0559 A72-41642
- An experimental investigation of a jet issuing from a wing in crossflow. p0613 A72-45332
- Multipropeller slipstream and wing interference, noting lift, drag, pitching moment, normal force distribution, and wakes p0029 N72-10015
- Aerodynamic lift characteristics of oscillating two dimensional airfoil subjected to sinusoidal gust [AD-726132] p0039 N72-11017
- Determination of interference lift, aerodynamic coefficients, and pitching moment for cruciform wings by iterative solution [BMVG-FBWT-71-18] p0166 N72-15009
- Aerodynamic interference between wing and surface of velocity discontinuity in nonuniform potential flow field [NAL-TR-254] p0476 N72-27000

## NT WANKEL ENGINES

- Electrical analog simulation of internal combustion engines intake and exhaust systems, nonstationary gas flow, considering cylinder, turbine and supercharger operation p0351 A72-29136

## INTERNAL COMPRESSION INLETS

- Tolerance of Mach 2.50 axisymmetric mixed-compression inlets to upstream flow variations causing changes in free stream Mach number and angle of attack [NASA-TN-X-2433] p0099 N72-12979

## INTERNAL FRICTION

- Applicability of methods for determining internal drag and momentum loss for small ducts [NASA-TN-X-62143] p0323 N72-20272

## INTERNAL STRESS

## U RESIDUAL STRESS

## INTERNATIONAL COOPERATION

- UHP aeronautical satellite system, presenting ATC trends, international aspects, available flight levels, weather conditions and long haul conflicts p0019 A72-12383

- R and D requirements for international standard vhf instrument landing system for Category I, II and III operations in next decade p0068 A72-14827

- Flight safety and ATC planning in German Federal Republic and on international level, discussing regional control stations, radio frequencies, navigation systems, automation, etc p0127 A72-16738

- Aerosat program for ATC and communications via four geostationary satellites over Atlantic and Pacific Oceans, discussing technical and financial international provisions p0191 A72-21203

- Legal aspects of international cooperation on aircraft design and production, discussing work distribution, project management and liabilities sharing p0245 A72-24881

- Collaborating parties cooperation with outsiders, examining relationship with government organizations, airworthiness authorities, financial institutions and marketing agencies p0245 A72-24882

- Book on world airlines economic regulation, analyzing multilateral international agreements, national aviation interests and competitive situation p0300 A72-25923

- European Airbus program, noting international cooperation juridical sources, content and organization, aircraft performance, financing, project chronology and Franco-German agreement p0346 A72-28795

- International survey of air pollution by aircraft engines and fuels [AGARD-AR-40] p0338 N72-21590

- European unity and cooperation for development of advanced aerospace technology [NASA-TT-P-14354] p0526 N72-28980

- International air transportation problems p0581 N72-30978

- Operational problems of chartered transatlantic air transportation p0581 N72-30979

## INTERNATIONAL LAW

- Air law concept as totality of legal regulations related to atmosphere use by flying devices, discussing relation to international environmental protection p0011 A72-11107

- Legal aspects in prevention of aircraft unlawful seizure in view of international cooperation, noting German Democratic Republic agreements p0308 A72-27272

- The onboard authority of the aircraft commanding officer as provided by the 1963 Tokyo Convention p0454 A72-35763

- Congressional hearings concerning undetected flight of civilian aircraft from Havana, Cuba to New Orleans, Louisiana on October 26, 1971 p0475 N72-26987

## INTERNATIONAL RELATIONS

## NT INTERNATIONAL COOPERATION

## INTERNATIONAL TRADE

- Book on IATA organization and functions,

# SUBJECT INDEX

# ITERATIVE SOLUTION

- discussing international aviation history,  
conference machinery, enforcement of conference  
resolutions, air transportation economics,  
public corporations, etc  
p0237 A72-23846
- Markets for civil and military aircraft and  
missiles, airline operations, and exports and  
imports for European Economic Community, United  
Kingdom, and United States  
[REPT-7042-VOL-4] p0163 N72-14976
- INTERPLANETARY PROPULSION  
U ROCKET ENGINES
- INTERSECTIONS  
Nonlinear algebraic transformation to determine  
straight line and second order curve  
intersection point in aircraft lofting problem  
p0345 A72-28742
- INTERSTELLAR MICROWAVE SPECTRA  
U MICROWAVE SPECTRA
- INVENTORIES  
NT TIMBER INVENTORY
- INVENTORY MANAGEMENT  
Electronic data processing in airline materiel  
supplies operations, discussing procedural  
efficiency improvement through reduction of  
stochastic effects inherent in aircraft  
maintenance operations  
p0362 A72-30823
- INVERSIONS  
NT CENTRIFUGING STRESS
- INVERTERS  
NT STATIC INVERTERS
- INVESTIGATION  
NT ACCIDENT INVESTIGATION  
NT AIRCRAFT ACCIDENT INVESTIGATION
- INVISCID FLOW  
Turbulent boundary layer development for airfoil  
at high transonic speeds, discussing  
viscous-inviscid flow interaction  
[AIAA PAPER 72-5] p0129 A72-16863  
Combined viscous-inviscid analytical procedure for  
predicting boundary layer effects on supersonic  
inlet flow field  
[AIAA PAPER 72-44] p0134 A72-16975  
Inviscid incompressible flow past longitudinally  
curved small aspect ratio slender wing,  
investigating aerodynamic characteristics  
p0345 A72-28729  
Aerodynamic properties prediction procedure for  
thin jet-flapped airfoil in incompressible  
inviscid flow bounded by different types of  
boundaries  
p0397 A72-32147  
The inviscid flowfield of an unsteady airfoil.

Augmentor wing jet STOL research aircraft development progress report covering design, engine tests, performance prediction, control simulation and stability augmentation  
[SAE PAPER 710757] p0004 A72-10254

Handling qualities simulation program for augmentor wing jet STOL research aircraft considering control devices design  
p0015 A72-11654

Carrier system for controlled approach of Naval aircraft to provide pilot window to deck for tactical jet guidance for poor visibility landing  
p0018 A72-12323

Externally blown flaps for STOL characteristics in medium and heavy jet transport aircraft, demonstrating aerodynamic and flight mechanical feasibility  
p0020 A72-12502

Jet aircraft brake parachute loads under engine wake, evaluating velocity and drag coefficient influences  
p0021 A72-12504

U.S.S.R. high-subsonic freight transport jet aircraft IL-76 for arctic areas, Siberia and Far East, noting independence of large airports availability  
p0056 A72-13471

Trainer-combat turbojet or turboprop aircraft characteristics, comparing flight, weight, size, maintenance and development costs  
p0119 A72-16178

Dynamic stability, control and structural response of transonic jet transport to atmospheric turbulence  
p0119 A72-16348

Cockpit instrumentation for jet transport aircraft flight path management, emphasizing dependability, safety and economy  
p0193 A72-21524

Physiological evaluation of modified jet transport passenger oxygen mask from altitude chamber experiments  
p0194 A72-21571

Jet-STOL augmentor wing consisting of moderately thick airfoil with full span leading edge slat and double surface trailing edge flap

Mystere business jet aircraft flight instruments, acceleration, control and stall characteristics  
p0197 A72-21899  
p0197 A72-21900

Corrosion resistant fabrication methods in jumbo jetliners components to reduce maintenance and repair downtime, discussing clad wing and fuselage skins  
p0239 A72-24025

Combat jet helicopter maneuverability, considering aircraft flying characteristics, pilot capability, flight configuration, altitude and load factor  
p0245 A72-24923

Mitsubishi XT-2 jet trainer aircraft, presenting design, structural and performance data  
p0246 A72-25107

NASA aerodynamic technology program, emphasizing airframe and engine development for next generation subsonic CTOL jet transport requirements  
[SAE PAPER 720319] p0290 A72-25582

VPW 614 twin jet transport aircraft flight test program, detailing general task plan, test equipment installations and test schedule  
p0360 A72-30679

Dynamic input to cargo in turbojet aircraft studied during C141 and C5A flights, discussing instrumentation, test procedures, data reduction processes and results  
p0403 A72-32625

Jet aircraft gas turbine engine technology impact on safety, reliability, airline profitability and international trade  
p0408 A72-33315

Statistical correlation techniques applied to jet aircraft autoland system dynamic ground tests with simulated engine and aerodynamic characteristics  
p0412 A72-33641

Numerical study of the characteristic magnitudes of turbulence on the far sound field radiated by a subsonic jet  
[ONERA, TP NO. 1058] p0492 A72-37761

Flyover noise testing of commercial jet airplanes.  
[AIAA PAPER 72-786] p0495 A72-38103

High performance jet aircraft variable feel flight control systems for simulation of aerodynamic reaction forces proportional to dynamic pressure  
p0551 A72-41069

Description and use of a method for characterizing noise sources in jets  
[ICAS PAPER 72-35] p0555 A72-41160

Empty weight and cruise performance of very large subsonic jet transports.  
[SAE PAPER 919] p0596 A72-43466

Full scale wind tunnel tests of small unpowered jet aircraft with T tail  
[NASA-TN-D-6573] p0030 N72-10031

Description of maintenance procedures used on Beechcraft Hawker 125 commercial jet aircraft  
p0041 N72-11032

Synthesis and properties of aliphatic ester for turbine lubrication in jet aircraft  
p0050 N72-11696

Normal acceleration data for jet aircraft and trainers  
[AD-725840] p0089 N72-11968

Polarization observations of outer corona from NC-135 aircraft over Gulf of Mexico  
[LA-DC-12495] p0098 N72-12812

Development and flight test of survivable aircraft control system using fly-by-wire and integrated actuator package techniques  
[AD-729207] p0108 N72-13041

Lateral-directional handling qualities and roll control power requirements of jet aircraft in landing approach  
[AD-725461] p0153 N72-14008

Flight tests of heavy jet transport aircraft to determine characteristics of vortex systems generated within ground effect and vortex systems descending into ground effect  
p0166 N72-15006

Long time-history characteristics of vortex systems of four engine jet transport aircraft in terminal area-type operations  
p0166 N72-15007

## SUBJECT INDEX

## JET AIRCRAFT NOISE

- Force survival model for analysis of strategic bomber basing concepts in prelaunch survival mode [AD-732193] p0217 N72-16991
- Fly by wire and integrated actuator package techniques for developing survivable flight control system in jet aircraft [AD-733582] p0255 N72-18040
- Application of differential games technique to determine aircraft propulsion versus engagement parameters [AD-731578] p0255 N72-18046
- Special events of meteorological origin affecting civil jet aircraft operations obtained from flight recorders for period Jan. 1966 to Nov. 1968 [ARC-CP-1188] p0280 N72-19687
- Bibliography of control devices to provide improved tactical agility for jet fighter aircraft [AD-737694] p0423 N72-24036
- Tests of pneumatic servomechanism for use in aircraft control systems [AD-738345] p0425 N72-24544
- Numerical analysis of finite amplitude waves generated by aircraft trailing vortices to indicate growth of waves on pair of parallel infinite vortices [AD-737859] p0432 N72-25012
- Statistical analysis of flight time, takeoff and landing weight, fuel weight at takeoff and landing for transport jet aircraft [TB-88] p0480 N72-27035
- Design integration and noise reduction for jet STOL transport aircraft - Vol. 1 [NASA-CR-114471] p0514 N72-28007
- Analysis of problems encountered by pilots of jet aircraft and application of engineering psychology to eliminate difficulties [NASA-TT-P-14351] p0514 N72-28008
- Calculation of required controls for minimum time-to-turn based on three dimensional formulation for aircraft dynamics [AD-742266] p0531 N72-29027
- Development of thrust augmentor device to assist in takeoff of jet aircraft p0538 N72-29810
- Analysis of parameters affecting service life of jet powered civil transport aircraft p0541 N72-29911
- Aerodynamic characteristics and performance of Russian M-4 supersonic long range aircraft [AD-744159] p0623 N72-32051
- Analysis of engine and airframe characteristics used in determining performance of turbine powered aircraft [ESDU-70020] p0636 N72-33003
- Configuration and specifications of integrated engine-generator mounted on turbine engine shaft for secondary electric power generation [NASA-TN-X-68139] p0643 N72-33058
- JET AIRCRAFT NOISE**
- Liquid-base foam sound absorbing properties for jet aircraft noise reduction p0001 A72-10160
- Acoustic power radiated by jet aircraft fuselage structure exposed to turbulent boundary layer pressure field, evaluating noise reduction treatments p0002 A72-10216
- Jet aircraft turbofan engine fan compressor noise reduction by acoustic linings, giving R and D results [BAS PAPER 71 SA6] p0003 A72-10223
- Jet noise reduction technology, hardware and tests for NASA Quiet Engine Program to develop low noise subsonic civil transport aircraft propulsion system [SAE PAPER 710774] p0005 A72-10266
- High speed jet noise source physical properties interpretation by theory and scale-model experiments for supersonic transport aircraft noise suppression problem p0016 A72-11973
- Q/STOL jet aircraft engines design for low noise levels, describing takeoff thrust, bypass ratio and turbine stages p0020 A72-12501
- Aladin 2 noiseless STOL jet aircraft project, describing exhaust nozzle configuration, design and economics p0021 A72-12503
- Jet noise suppression near airports, discussing noise physical description, source relation to engine technology and ICAO certification standards p0054 A72-13097
- Air breathing propulsion systems for reducing engine noise level, discussing stoichiometric gas turbine engines, V/STOL propfans and variable-geometry supersonic inlet and exhaust nozzles p0057 A72-13486
- NASA Quiet Engine experimental program for jet aircraft noise reduction, discussing aerodynamic and acoustic evaluation and tests of three fans p0059 A72-13679
- French jet aircraft noise reduction research facilities, discussing in-flight and overfly noise measurements, various silencer configurations and Concorde engine tests p0059 A72-13680
- Turbojet engine noise causes and reduction techniques, noting U.S. antinoise standards p0069 A72-14925
- Jet aircraft noise reduction, discussing engine design modifications p0070 A72-15167
- Noise generation from turbulent supersonic shear layers, including low supersonic and transonic ranges for jet noise applications p0072 A72-15566
- Turbofan multiple pure tone noise analysis, discussing rotor geometry, relative Mach number and incidence angle effect on sound emission [AIAA PAPER 72-127] p0128 A72-16824
- Directionality and far field structure of combustion generated noise, using premixed turbulent flame models [AIAA PAPER 72-198] p0129 A72-16875
- Jet noise simple-source theory experimental verification, determining relation of measured sound power and jet pressure levels of turbojet engine p0140 A72-17856
- Hybrid computer method of nonstationary spectrum analysis of aircraft noise, applying to flyover and jet aircraft noise abatement under operational conditions p0178 A72-18778
- Spectral measurements of jet turbulence noise in core and annular mixing region, using subsonic test experiments [AIAA PAPER 72-158] p0180 A72-18957
- Ground focus line location of sonic bang propagating in stratified atmosphere with wind for transonically accelerating aircraft p0184 A72-19645
- Jet noise intensity reduction by screen across nozzle exit, using acoustic and hot wire measurements p0185 A72-19873
- Circular jets sound generation analysis, using Lighthill equation and Michalke spectral method [DFVLR-SONDDR-179] p0186 A72-20100
- Turbojet and turbofan engines noise signatures and sonic boom effects, discussing frequency spectra, atmospheric attenuation and noise suppression systems p0186 A72-20163
- Olympus engine flight testing for relighting and antiicing, engine control and noise and vibration assessments in support of Concorde aircraft development p0197 A72-21898
- Subsonic jet noise directivity prediction from acoustic pressure measurements p0301 A72-26041
- Supersonic jet noise and sonic boom sources, propagation and reduction, considering airport community disturbances, aircraft cabin noise and fatigue problems p0355 A72-29578
- Stress levels and fatigue in aircraft structures subjected to jet noise, noting stress calculation for skin panels and control surfaces p0355 A72-29579
- Supersonic jet exhaust noise radiation from turbulent shear layer instability waves, noting acoustic energy flux dependence on streamwise distance p0355 A72-29581

- Maximum overpressures of supersonic aircraft maneuvering-produced sonic booms occurring at geometrical acoustic ray focus points/caustic cusps/ p0355 A72-29586
- Tu-104 turboprop aircraft flight noise measurements and spectral changes at different distances from landing strip, evaluating public nuisance and resident reactions p0360 A72-30446
- Hypersonic commercial aircraft operational problems, considering passenger physiology limits flight profile, sonic pollution, traffic demands, route structure, etc p0362 A72-30830
- Noise measurements during shock free and underexpanded operation modes of supersonic cold model jet at moderate exit Mach number p0395 A72-32017
- Aerodynamic noise and structural fatigue failure research and test facility, concerning supersonic jet and V/STOL aircraft p0405 A72-32900
- Rotating flow introduction effects on jet noise levels, combustion and turbulent mixing processes and flame stability [AIAA PAPER 72-645] p0416 A72-34087
- Jet noise reduction by screen placed across jet flow, investigating acoustic properties, velocity and pressure in mixing zone [AIAA PAPER 72-644] p0416 A72-34088
- Acoustic attenuation and thrust loss incurred by shrouded multistage supersonic jet noise suppressor [AIAA PAPER 72-642] p0416 A72-34090
- Supersonic jet noise mechanisms and scaling laws, studying acoustic fields for rectangular and axisymmetric nozzle configurations [AIAA PAPER 72-641] p0416 A72-34091
- Sonic jet noise pressure source model for radiated sound power and jet pressure frequency spectra ratio derivation with application to noise suppression p0457 A72-36414
- Noise generated by STOL core-jet thrust reversers. [AIAA PAPER 72-791] p0496 A72-38108
- Forward flight effects on mixer nozzle design and noise considerations for STOL externally blown flap systems. [AIAA PAPER 72-792] p0496 A72-38109
- Flight evaluation of three-dimensional area navigation for jet transport noise abatement. [AIAA PAPER 72-814] p0497 A72-38116
- Jet aircraft noise sources in subsonic and supersonic exhaust mixing process, suppressing noise via turbofan exhaust speed reduction p0503 A72-38380
- Advanced technology applications to present and future transport aircraft. [AIAA PAPER 72-759] p0510 A72-40051
- Hypersonic transports commercial applications, examining economic and noise and air pollution aspects [ICAS PAPER 72-32] p0554 A72-41157
- NASA Quiet Engine program R and D on conventional takeoff and landing subsonic cruise aircraft engine noise [ICAS PAPER 72-48] p0556 A72-41173
- Noise control technology for jet-powered STOL vehicles. [ICAS PAPER 72-50] p0556 A72-41175
- Jet noise generation theory /Lighthill-Pfowcs Williams/ verification by model tests, discussing means of reducing or eliminating shock cells [ICAS PAPER 72-55] p0559 A72-41852
- Vibration measurements of an airplane fuselage structure. I - Turbulent boundary layer excitation. II - Jet noise excitation. p0567 A72-42912
- German monograph - Studies of the ground effect on the noise levels and their frequency distribution in the near field of an engine jet directed vertically against the ground. p0568 A72-43060
- NASA's quiet engine programs. p0569 A72-43152
- Community noise levels of the L-1011 Tristar Jet Transport. p0607 A72-44677
- Annotated bibliography on aircraft noise pollution - Vol. 1 [AD-724850] p0030 N72-10036
- Sound generation in very low and very high turbulent jet flows from exhaust nozzle p0034 N72-10253
- Sound generation and scale model experiments to suppress noise in turbulent jet flow eddies of supersonic transport aircraft [ARC-32723] p0034 N72-10254
- Noise generation by rotating blades of axial flow fan in infinite annulus [AD-726126] p0051 N72-11714
- Reduction of jet aircraft noise around airports by use of two-segment landing approach [NASA-TN-X-62098] p0149 N72-13985
- Structure of turbulence in noise-producing region of round subsonic jet [NASA-CR-126483] p0171 N72-15625
- Quiet aircraft engine design and preliminary fan and engine test results [NASA-TN-X-67988] p0213 N72-16719
- Jet noise suppression by splitting supersonic nozzle flow into separate jets by overexpansion into multilobed divergent nozzle [NASA-TN-D-6667] p0249 N72-17990
- Noise data obtained with small scale model of externally blown flap of type being considered for STOL aircraft [NASA-TN-D-6636] p0269 N72-19025
- Jet aircraft noise pollution in airport vicinity p0270 N72-19031

## JET ENGINE FUELS

viscosity and additive effects on jet engine fuel  
antiwear properties improvement p0016 A72-11968

Jet fuels hydrocarbon composition effect on  
thermal stability, considering nonaromatic  
components influence on aromatic hydrocarbons  
oxidation products coagulation p0024 A72-12800

Surface active agent detection by device using  
ultrasonic vibrating mechanism to emulsify water  
with fuel, determining water retention or  
turbidity by photoelectric cell p0062 A72-14419

Fuels and lubricants development trends for  
subsonic and supersonic aircraft, discussing  
thermostable hydrocarbons, ramjet fuels, esters,  
oxidation inhibitors, metal deactivators, high  
pressure lubricant additives, etc p0127 A72-16739

JP-5 fuel sulfur content effect on aircraft engine  
turbine blades hot corrosion under marine  
environmental conditions p0175 A72-18752

Jet engine fuel fire hazard evaluation by  
controlled laboratory tests, analyzing ignition  
characteristics under simulated survivable  
aircraft crash accidents [SAE PAPER 720324] p0290 A72-25587

Jet engine fuel modification to decrease fire  
hazard in survivable aircraft crashes [ASME PAPER 72-GT-25] p0294 A72-25621

Jet fuel hydrocarbon group chemical composition  
effects on antiwear characteristics in sliding  
friction and rolling simulation experiments p0350 A72-29073

Continuous NDT of coalescers /jet fuel filters/ by  
liquid crystals, detecting split seams, cap  
leaks, cracks, material imperfections and epoxy  
filled voids [ASME PAPER 72-DE-25] p0362 A72-30867

Properties of pyrolytic oil hydrogenated aromatic  
fraction, noting suitability for jet fuels  
applications p0363 A72-31075

Review of jet engine emissions. p0491 A72-37645

Effect of fuel on gas corrosion in jet engine  
combustion chambers p0495 A72-38091

Static electricity in fueling of superjets. p0557 A72-41375

Supersonic jet engine fuels production by gasoline  
vapor pyrolysis, discussing physico-chemical  
characteristics and combustion properties p0606 A72-44625

Jet fuel specifications for military and civil  
aircraft p0046 A72-11669

European jet fuel lubricity evaluation p0048 A72-11679

Flammability properties of jet fuels and  
techniques for fire and explosion suppression  
under simulated hostile operating environment  
conditions p0048 A72-11681

Effect of sulfur in JP-5 fuel on hot corrosion of  
turbine blade materials operating in marine  
environment [AD-725619] p0050 A72-11706

Evaluation of safety performance of emulsified and  
gelled aviation fuels in simulated full scale  
aircraft crash environment [AD-729330] p0161 A72-14784

Service testing of aviation turbine fuels [AD-729544] p0162 A72-14785

Trace amounts of fuel-soluble metal compounds  
affecting thermal stability of JP-7 fuel [AD-736475] p0340 A72-21813

Effects of additives on hydrocarbon jet fuel  
stability [AD-737833] p0427 A72-24806

Analytical measurements of exhaust emissions from  
aircraft turbine engines using Jet A fuel [BM-RI-7634] p0435 A72-25584

Influence of test time and contact stresses on  
antiwear properties of jet fuels under rolling  
friction [AD-738883] p0471 A72-26471

Hydrocarbon fuel systems for ramjet-powered vehicles [AD-738634] p0524 A72-28801

Extinguishing aircraft jet engine fuel fires [AD-745122] p0643 A72-33255

Development and application of instrument for  
measuring coke tube deposits based on beta ray  
backscatter [AD-743308] p0644 A72-33467

## JET ENGINES

### NT PULSEJET ENGINES

### NT RAMJET ENGINES

### NT SUPERSONIC COMBUSTION RAMJET ENGINES

### NT TURBOFAN ENGINES

### NT TURBOJET ENGINES

### NT TURBOPROP ENGINES

Nondestructive radioactive gas penetrant tests for  
porosity and fatigue damage in jet engine castings p0009 A72-10813

Electrodischarge and electrochemical machining  
applications in continuous repetitive production  
of aircraft jet engine components p0013 A72-11150

Jet engine component overhaul procedures for  
fatigue damage repair, detailing distressed  
metal removal, replacement and welding techniques p0020 A72-12499

Automated jet engine development facility,  
discussing assembly and test area and computer  
controlled operation [ASME PAPER 71-WA/GT-6] p0116 A72-15899

Jet engine test facilities for JT9D experimental  
and production models [ASME PAPER 71-WA/GT-12] p0117 A72-15904

High intensity combustion chamber design for gas  
turbine of jet engine, considering primary,  
secondary and dilution zones p0122 A72-16491

Papers on critical and exploratory flight testing  
covering rotary wings, lifting bodies and jet  
engine airstart p0145 A72-18487

Airstart flight testing for single engine  
fighter/attack aircraft, including flight  
conditions, windmilling, fuel flows, gas  
temperature, ignition and acceleration p0146 A72-18496

Statistical evaluation for forged jet engine parts  
tensile tests cost reduction, using regression  
analysis p0184 A72-19484

Friction coefficient, standard wear and surface  
layer temperature of seal for dry friction pairs  
in jet engines, investigating crystal lattice  
parameters p0185 A72-19768

Deterministic model for new product innovation  
adoption rate in commercial aircraft jet engine  
market p0186 A72-20269

Twin spool jet engine system, predicting shaft  
speed effects on whirling frequencies due to  
gyroscopic action with computer model p0199 A72-22130

Pod-mounted jet engine follower force instability,  
analyzing two degrees of freedom system dynamics p0232 A72-22938

Two spool geared fan jet engine design and  
development for general aviation, discussing  
performance, reliability and ecological aspects [SAE PAPER 720351] p0292 A72-25602

Jet turbine engine front fans with and without  
snubbers, estimating flow field by streamline  
curvature technique [ASME PAPER 72-GT-4] p0293 A72-25607

Mixing parameter design of high loading spray type  
combustor for lift jet engine, using primary zone [ASME PAPER 72-GT-99] p0298 A72-25668

Propulsion system/airframe matching in hybrid  
V/STOL airplanes, stressing thrust vector  
management, lift engine bypass ratio and power  
plant packaging design [ASME PAPER 72-GT-106] p0299 A72-25671

Open-air jet engine test stand for flame  
stabilization, jet and compressor noise studies,  
noting provisions for rapid installation changes p0309 A72-27416

Surface integrity machining practices application  
to jet engines production, noting cost reduction  
and process selection and quality control

## LANDING GEAR

- Carrier system for controlled approach of Naval aircraft to provide pilot window to deck for tactical jet guidance for poor visibility landing p0018 A72-12323
- Microwave aircraft landing system development, discussing contract definition, feasibility, prototype development, management planning and program costs p0019 A72-12377
- Airline schedule keeping by Sud Lear all-weather landing system, discussing crew training p0064 A72-14688
- All-weather landing aids for civil VTOL aircraft and helicopters, discussing Doppler and inertial navigations, instrument landing systems and ground visibility improvement p0127 A72-16780
- V/STOL development for short haul air transportation, discussing requirements for quiet pollution-free operation, ATC systems, navigation and landing aids p0190 A72-21010
- Aircraft and airports weather instrumentation for all-weather landing and takeoff, discussing application of laser technology and digital presentation p0193 A72-21522
- Minimum safety flight altitudes for aircraft landing systems and lateral deviations for correction maneuver p0308 A72-27269
- Airport lights system design for optical landing aids, discussing runway illumination conditions p0309 A72-27402
- Civil aviation approach and landing guidance systems evolution, discussing ILS development, state of art and future requirements p0350 A72-29014
- Airport lighting for pilot guidance during approach and landing under category I-III visibility conditions, discussing runway layouts and power requirements p0360 A72-30621
- Air cushion landing system application for civil air transportation, discussing operation, braking and parking p0406 A72-33184
- Runway marking requirements for visibility under day and night conditions, considering night reflection value, color stability, durability, noninterference with flight operations, etc p0442 A72-34243
- Helicopter/ship dynamic interface testing for launch and recovery capabilities under sea environment conditions, discussing visual landing aids, wind, visibility and ship motions [AHS PREPRINT 650] p0447 A72-34505
- Computer control of aircraft landing. p0455 A72-35950
- Microwave holographic imaging techniques for aircraft landing aids and airport security applications, discussing real time operation p0491 A72-37625
- Aircraft accidents during nonprecision approaches under adverse weather conditions, discussing landing aids use for corporate jet aircraft p0508 A72-39745
- Meteorological and takeoff and landing information transmission by proposed automated meteorological and information service, discussing air-ground data link p0547 A72-40287
- Characteristics and prospects for a new landing guidance system. p0547 A72-40293
- Suitability evaluation of fog simulator for weather conditions during flight approach [FAA-NA-71-44] p0033 N72-10233
- Requirements for using Talar 4 landing aid as portable ground station in tactical helicopter operations p0083 N72-11925
- Development, testing, and evaluation of visual landing aids [NBS-10606] p0095 N72-12583
- Lift devices for improved takeoff and landing performance of civil transport aircraft p0102 N72-12997
- Development and characteristics of microwave scanning beam instrument landing system for short takeoff and landing aircraft and airports [AD-725705] p0111 N72-13595
- Investigation of landing accident of DC-9 commercial aircraft at Louisville, Kentucky, September 8, 1970 [NTSB-AAA-71-15] p0150 N72-13990
- Performance of vertical contact analog display system used in carrier landing [AD-730464] p0167 N72-15013
- Operational evaluation of aircraft landing aid stabilization system installed on aircraft carrier [AD-732446] p0221 N72-17199
- Electro-optical attitude sensing device for landing approach of flight vehicle [NASA-CASE-XMS-01994-1] p0222 N72-17326
- Development and characteristics of microwave scanning beam approach and landing system phased array antenna [DOT-TSC-FAA-71-29] p0339 N72-21627
- Development of discrete address beacon system to improve operation of microwave landing system for high density terminal area surveillance [DOT-TSC-FAA-71-26] p0339 N72-21628
- Magnetic method for detection of aircraft position relative to runway [NASA-CASE-ARC-10179-1] p0373 N72-22619
- Nuclear instrument landing system for accurate aircraft position data during last phases of descent [SAN-828-1] p0377 N72-22655
- Cost analysis of microwave landing system program for civil ground systems [AD-737036] p0389 N72-23668
- Performance and problems of microwave guidance systems for aircraft approach and landing [RAE-TR-71186] p0436 N72-25606
- Development and characteristics of visual landing aids systems [NBS-10-837] p0523 N72-28673
- Reliability engineering methods for design of landing mats simulating aircraft operations [AD-743161] p0588 N72-31297
- Evaluation of tricolor visual approach path indicator for suitability as part of two segment visual approach slope indicator system [FAA-ARD-72-49] p0590 N72-31653
- Evaluation of visual approach system to determine improvements resulting from change in color density and hue of transition zone [FAA-ARD-72-91] p0590 N72-31654
- National plan for development of civil/military microwave landing system [NASA-TM-X-68637] p0646 N72-33633
- LANDING GEAR**
- European A300B airbus flying control hydraulic system and landing gear design for safety and reliability, fatigue life, weight and maintenance p0009 A72-10724
- B-1 strategic supersonic bomber design, emphasizing variable sweep wing, landing gear, control and instrumentation p0018 A72-12226
- Pressure determination in kinematic pairs of spatial landing gear mechanism, describing rotatory and spherical pairs reactions to various combinations of momenta p0135 A72-17057
- Carrier suitability testing for aircraft landing, considering landing gear and supporting structure under simulated shipboard conditions p0146 A72-18497
- F-111 aircraft landing gear and speedbrake hydraulic system control by single dual-function valve, describing design features and performance characteristics p0190 A72-21024
- Aircraft landing gear wheel damage and antiskid mechanisms under operational conditions p0192 A72-21485
- Carbon/epoxy composite reinforced plastic materials feasibility for application to aircraft landing gear wheel fabrication p0196 A72-21686
- Higher order forces effect on shock absorbing systems of masses interconnected by elastic and damping members of aircraft landing gears p0231 A72-22861

# LANDING INSTRUMENTS

# SUBJECT INDEX

Runway unevenness and landing gear characteristics effects on SST vibration during taxiing, taking off and landing

p0235 A72-23459

Aircraft wheel mechanics, discussing freely turning and braked wheels, tire drift and antiskid braking systems for landing gear

p0285 A72-25287

Cessna 210 aircraft electrically driven hydraulic power pack for landing gear system, noting engine and flight tests

[SAE PAPER 720327] p0291 A72-25589

Runway motion stability of aircraft with three wheel landing gear, assuming elastic response to moment induced drift

p0307 A72-27235

Air cushion aircraft landing systems advantages and suitability for arctic transportation applications

p0346 A72-28793

Aircraft landing gears structural systems design, taking into account different design criteria imposed by various national impact load norms

p0357 A72-30025

Aluminum aircraft wheels ultrasonic inspection, noting reliability, simplicity and time economy as compared to eddy current or fluorescent penetrant methods

p0357 A72-30037

Welded steel airframe residual fatigue life tests by nonstationary random loading, applying to jet trainer aircraft landing gear

p0358 A72-30277

Aircraft landing gear stress spectrum and design data during ground loading on airport runways, using linearized theory for model investigation

p0359 A72-30283

Undercarriage loadings of three aircraft - Porter PC-6, Venom DH-112 and Mirage IIIS.

p0609 A72-44738

Design and development of air cushion landing system to replace landing gear on conventional aircraft

[AD-728647] p0090 N72-11971

Statistical evaluation of operational load forces on undercarriage of F-104 aircraft

[RAE-LIB-TRANS-1591] p0101 N72-12989

OV-10A aircraft used in tests to determine interaction of landing gear and soft soil during landing and takeoff

[AD-729685] p0152 N72-14002

Feasibility analysis of active vibration isolation in landing gear system of aircraft to reduce wing fatigue from ground induced vibration during taxiing

[AD-730141] p0155 N72-14016

Damage to aircraft tires produced by grooved runway surfaces when impacted at various sink rates, vertical loadings, inflation pressures, and ground speeds

[NASA-TN-D-6690] p0219 N72-17007

Development of automatic braking system for aircraft based on sensing and controlling braked wheel decelerations

[NASA-TN-D-6953] p0638 N72-33018

Design, fabrication, and evaluation of aircraft wheel constructed of fibrous graphite and epoxy resin

[AD-745130] p0642 N72-33046

## LANDING INSTRUMENTS

### NT APPROACH INDICATORS

Operational requirements of instrument landing systems, interferometers, correlation protected instruments, landing guidance systems and navigation aids

p0056 A72-13421

Soviet book on aircraft radio equipment covering transmission and reception, velocity and coordinates measurements, siting and navigation, flying target interception, reconnaissance, landing systems, etc

p0122 A72-16530

Microwave Doppler scanning landing guidance system with radar beam comparison and signal format simplification suggestion

p0144 A72-18398

Computerized aircraft landing measurement system for civil airport, using optical, seismic and IR sensors

Possible impact of area navigation upon MLS requirements for azimuth angular coverage and range. p0411 A72-33627

Performance of vertical contact analog display system used in carrier landing [AD-730464] p0606 A72-44643

LANDING LOADS p0167 N72-15013

Dutch monograph - Analysis of dynamic aircraft landing loads, and a proposal for rational design landing load requirements.

p0550 A72-40925

Modern landing impact load calculations and old-fashioned requirements.

[ICAS PAPER 72-31] p0554 A72-41156

Undercarriage loadings of three aircraft - Porter PC-6, Venom DH-112 and Mirage IIIS.

p0609 A72-44738

Effects of gusts, maneuvers, and landing impacts on four-engine cargo aircraft during commercial airlines operation

[NASA-TN-D-6790] p0421 N72-24015

Measurement of ground loads on OV-1 aircraft during landings on smooth and rough fields

[AD-737752] p0422 N72-24030

Performance of MO-HAT 158 reinforced plastic as aircraft landing mat

[AD-738137] p0519 N72-28274

## LANDING RADAR

Aircraft radar for weather data, ground mapping, avoidance modes and independent landing monitor function, presenting straight and slant approach simulation data

p0547 A72-40290

## LANDING SIMULATION

Feedback gains for STOL aircraft display pilot interactive flight director design, using computerized approach-touchdown simulation and optimal control theory

[ASME PAPER 71-WA/AUT-9] p0117 A72-15956

Simulator for physical forces experienced by carrier aircraft during catapult launches and arrested landings, considering external stores safe suspension

p0403 A72-32620

Statistical correlation techniques applied to jet aircraft autoland system dynamic ground tests with simulated engine and aerodynamic characteristics

p0412 A72-33641

Direct lift control feasibility for integration into F-14A automatic carrier landing system /ACLS/, using moving-base six-degree-of-freedom simulation

[AIAA PAPER 72-873] p0505 A72-39127

Accuracy of vertical contact analog display in simulating carrier landings, and error contributed by display resolution, temporal loading, and control complexity

p0375 N72-22642

Landing simulation to determine effects of turbulence on roll of swept fighter aircraft at low speed

[ARC-R/M-3697] p0582 N72-31001

## LANDING SITES

Booster launch vehicle guidance scheme for critical aborts from staging through burnout, minimizing aerodynamic phases for different landing sites

p0397 A72-32182

## LANDING SYSTEMS

### U LANDING AIDS

### LANDSCAPE

### U TERRAIN

### LANGUAGES

### NT FORTRAN

### LAP JOINTS

Stress distribution and displacements in adhesive bonded lap-jointed aerospace structures, presenting approximate solution.

p0462 A72-37214

## LAPLACE OPERATORS

### U LAPLACE TRANSFORMATION

### LAPLACE TRANSFORMATION

Real time flight flutter testing via Z-transform analysis technique.

[AIAA PAPER 72-784] p0495 A72-38101

Laser recording real time imagery for use in tactical reconnaissance aircraft  
p0239 A72-23928  
Air traffic control radar beacon systems and laser warning systems  
[AD-725743] p0035 N72-10543  
Spatial Fourier transform for wave scattering from rough surfaces  
[AD-734044] p0278 N72-19576  
Application of lasers to rotary gyroscope vibration interferometry, gyroscope balancing, and gravimetric accelerometers  
[REPT-59] p0372 N72-22524  
Aerodynamic testing of wing sections, using laser Doppler velocimeter and conventional pressure measuring techniques  
[AD-740901] p0577 N72-30418  
Modified Mach-Zehnder velocimeter and modified Rayleigh velocimeter  
[AD-740652] p0577 N72-30419
- LATERAL CONTROL**  
Three dimensional roll-controlled missile trajectory model for simple time-sharing digital or analog simulation, using wind-to-inertial axis transformation  
p0011 A72-10964  
STOL aircraft roll moment control possibility for externally-blown jet flap due to engine failure  
p0015 A72-11700  
Combat aircraft lateral aiming performance optimization and evaluation based on criterion of bullet stream response to pilot roll commands  
p0124 A72-16657  
Minimum safety flight altitudes for aircraft landing systems and lateral deviations for correction maneuver  
p0308 A72-27269  
Flight test of direct side force control by rudder deflection and asymmetrical drag on T-33 airplane, noting use in dive bombing  
p0310 A72-27520  
An analysis of aircraft lateral-directional handling qualities using pilot models.  
[AIAA PAPER 72-962] p0561 A72-42347  
Lateral flight path control during aircraft landing in gusty cross-winds by lateral thrust deflection, discussing design optimization  
p0613 A72-45330  
Ground effect on slender wing rolling moment during landing approach and its consequence on aircraft lateral control  
[ARC-CP-1152] p0088 N72-11961  
Pressure distribution on 45 deg swept half wing including effectiveness of upper surface spoiler as roll control  
[ARC-CP-1184] p0270 N72-19032  
Flight simulator facility emphasizing lateral-directional control  
[NASA-TN-X-62155] p0423 N72-24335  
In-flight simulation investigation of lateral directional handling qualities in landing approach  
[AD-744831] p0641 N72-33035
- LATERAL OSCILLATION**  
Approximate analysis for solving fourth order nonlinear equation of motion of HP-115 aircraft at low speed  
[ARC-R/M-3674] p0270 N72-19034  
General purpose airborne simulator evaluation of roll characteristics of transport aircraft during landing approach  
[NASA-TN-D-7062] p0638 N72-33019
- LATERAL STABILITY**  
Hypersonic vehicles lateral dynamics during great circle flight, using linearized equations of motion and Newtonian theory for stability derivatives estimation  
p0195 A72-21603  
Hovercraft internal and external aerodynamic forces, discussing control, suspension, yawing moments, directional and roll stability and random surfaces performances  
p0231 A72-22824  
State sensitivity functions in aircraft parameter identification for lateral dynamics under aileron deflection from model response and in-flight test data  
p0236 A72-23807  
Analysis of a lateral-directional airframe/propulsion system interaction of a Mach 3 cruise aircraft.  
[AIAA PAPER 72-961] p0561 A72-42348  
Approximation for towed unbanked body lateral stability in zero lift conditions  
[ARC-R/M-3675] p0527 N72-28995

Symmetrically deformed delta wing in supersonic flow, considering leading edge flow separation induced vortices effects on downwash, pressure distribution and aerodynamic characteristics p0072 A72-15741

Laminar/turbulent boundary layer transition on parabolic wing profile in supersonic wind tunnel, noting critical Reynolds number increase with leading edge thickness p0227 A72-22407

Supersonic flow around thin cruciform wing with antisymmetrical angle of attack distribution and horizontal plane with leading edge, considering flow separation at edges p0246 A72-25118

Linearized method of characteristics application to supersonic flow past oscillating flat plate cascades with supersonic leading edge locus [AIAA PAPER 72-377] p0287 A72-25401

Initial dihedral wing-body interaction for supersonic leading edges, determining expansion of velocity potential on root chord p0360 A72-30365

Pressure distribution over delta wing with blunted edges at small angles of attack in hypersonic wind tunnel tests p0363 A72-31022

Leading edge boundary layer flow separation and reattachment processes in airfoil dynamic stall, considering effect of angle of attack rate of change p0396 A72-32024

Leading edge serrations effect on rotor noise and aerodynamic characteristics, noting vortex and rotational noise reduction and overall efficiency decrease [AIAA PAPER 72-655] p0415 A72-34079

Quasi-homogeneous approximation for wing with curved subsonic leading edges at supersonic speeds. [ICAS PAPER 72-54] p0556 A72-41176

Using heat pipe structures for cooling leading edges of hypersonic cruise aircraft [NASA-CR-1857] p0099 N72-12949

Free flight measurement of blunt leading edge caret wing pressure and heat transfer at supersonic speeds [ARC-R/H-3679] p0267 N72-19007

Nonequilibrium boundary layer flow at leading edge of highly swept hypersonic infinite span wing [PB-204710] p0328 N72-20975

VTOL propellers with blowdown edges for increased hovering ability [DGLR-71-023] p0382 N72-23016

Analysis of leading edge flow separation resulting from airfoils oscillating in uniform flow field at low Reynolds numbers [AD-738304] p0434 N72-25320

Aerothermodynamic integration model, including flow paths, leading edges, and ducts [NASA-CR-112059] p0437 N72-25714

Optimized design of conically cambered triangular wings with subsonic leading edges and supersonic trailing edges for drag reduction without leading edge suction [ARC-TR-2] p0571 N72-29992

Wind tunnel tests to determine aerodynamic effects of leading edge serrations on two dimensional airfoil [NASA-TN-X-2643] p0581 N72-30992

Calculations for inviscid flow past slender wings in form of rhombic cones with leading edge separation [ARC-R/H-3694] p0582 N72-30999

Numerical computation of transonic flow around leading edge of wing profile [NASA-TT-P-14285] p0618 N72-32010

Analysis of spanwise distribution leading edge tangential suction forces on thin sixty degree delta wing obtained in low speed wind tunnel [KTH-AERO-TN-58] p0618 N72-32011

Flow characteristics about uncambered, slender delta wing at 15 deg incidence with high energy blowing from leading edge slots [CRANFIELD-AERO-9] p0635 N72-32992

Wind tunnel tests to determine effects of leading edge camber on low speed aerodynamic characteristics of thin, sharp-edge delta wing [NASA-CR-2002] p0636 N72-32996

Application of leading-edge-suction analogy to prediction of longitudinal load distribution of vortex lift for delta wings [NASA-TN-D-6994] p0636 N72-32997

## LEAKAGE

Performance of self-sealing breakaway valves in preventing fuel spillage and fires in survival aircraft crashes [AD-738204] p0425 N72-24547

Standard formula for allowable cabin leakage in military aircraft [AD-739687] p0482 N72-27048

## LEAR JET AIRCRAFT

Aircraft landing accident involving Learjet Model 25 at Victoria, Texas on 18 Jan. 1972 [NTSB-AAR-72-24.] p0639 N72-33022

## LEARNING

## NT ASYMPTOTIC METHODS

## NT ITERATIVE SOLUTION

## NT PROBLEM SOLVING

## LEAST SQUARES METHOD

Development of technique for curve fitting experimental aerodynamic normal-force and pitching-moment coefficient data as function of angle of attack [AD-732834] p0218 N72-17001

## LEE WAVES

Winds aloft forecast use to predict southwestern mountain lee wave behavior for general aviation cross country flights p0348 A72-28863

## LEGAL LIABILITY

Common law liability of aviation manufacturers, discussing safety, airworthiness, maintenance, reporting, modifications and inspection requirements and evidence of negligence p0189 A72-20671

- Legal aspects of international cooperation on aircraft design and production, discussing work distribution, project management and liabilities sharing  
p0245 A72-24881
- Legal aspects in prevention of aircraft unlawful seizure in view of international cooperation, noting German Democratic Republic agreements  
p0308 A72-27272
- LEGENDRE CODE**  
U COMPUTER PROGRAMMING
- LENGTH**  
Length and weight estimates of powerplant components for V/STOL propulsion systems  
[NASA-TM-X-2406] p0097 N72-12785
- LENS ANTENNAS**  
Communication and data relay satellites multibeam antennas characteristics, discussing multiple feed reflectors, bootlace lens configuration and phased arrays  
[AIAA PAPER 72-530] p0308 A72-27355
- LETHALITY**  
Remotely manned vehicles /RMV/ application in aerial warfare, considering anti-aircraft defenses lethality increase, equipment costs and role of man during combat mission  
p0344 A72-28451
- Analysis of three commercial aircraft accidents to determine factors affecting survival of passengers under emergency conditions  
[FAA-AH-70-161] p0150 N72-13989
- LEVEL (QUANTITY)**  
NT EFFECTIVE PERCEIVED NOISE LEVELS
- LIABILITIES**  
NT LEGAL LIABILITY
- LIAPUNOV FUNCTIONS**  
Liapunov functional stability analysis in structural dynamics problems including wave equations with nonlinear damping  
p0235 A72-23457
- LIDAR**  
U OPTICAL RADAR
- LIFE (DURABILITY)**  
NT FATIGUE LIFE  
NT SERVICE LIFE
- LIFE SUPPORT SYSTEMS**  
NT EMERGENCY LIFE SUSTAINING SYSTEMS  
Physiological effects of high altitude flight and development of life support systems for civil aircraft environmental control  
[JPERS-55454] p0322 N72-20107
- Analysis, design, fabrication, and testing of integrally armored crashworthy seats for aircrews  
[AD-742733] p0586 N72-31030
- Management of life support and transportation systems in Arctic regions  
[AD-744669] p0649 N72-33980
- LIFEBOATS**  
Aircraft emergency evacuation systems, discussing door designs, inflatable escape slide and slide/lifeboat combination  
p0563 A72-42520
- LIFT**  
NT INTERFERENCE LIFT  
NT JET LIFT  
NT ROTOR LIFT  
NT ZERO LIFT
- Sound radiation from axial flow fans running in turbulent flow, evaluating fluctuating lift on rotor blades due to incident gusts  
p0003 A72-10220
- Area rule for change in lift/drag ratio of hypersonic delta wing due to conical body addition on compression side  
p0018 A72-12270
- Drag and lift experimental determination for low aspect ratio rectangular wings with blunt trailing edges at Mach numbers 0.5-2.2  
[DGLR PAPER 71-114] p0023 A72-12712
- Inverse integral Fourier transforms to solve steady periodic motions of wing close to solid surface, deriving equations of lift and principal moment  
p0196 A72-21701
- Unsteady lift on airfoils in moving cascades with inlet axial flow disturbances, estimating lift on reference blade between blade channels  
[ASME PAPER 72-GT-5] p0293 A72-25608
- Lift and pressure fluctuations of cambered airfoil under periodic longitudinal and transverse gusts, applying to axial flow turbomachines  
[ASME PAPER 72-GT-30] p0295 A72-25626
- Rotating airfoil experimental test program for verification of Himmelskamp and Dwyer-McCroskey theoretical analysis, presenting graphs of lift coefficient vs angle of attack  
p0313 A72-26124
- Contracting or diverging stream flow mean velocity change effects on airfoil pressure distribution, circulation and lift, deriving vortex distribution expression  
p0396 A72-32023
- Lift and induced drag characteristics of jet flapped finite span wings in close proximity to ground, using method of matched asymptotic expansions  
p0404 A72-32827
- Rotary wings lift and efficiency increase by circulation control via tangential blowing about bluff trailing edge airfoils  
[AHS PREPRINT 603] p0445 A72-34492
- Angle of attack increase of an airfoil in decelerating flow.  
p0459 A72-36773
- A vortex model for the study of the flow at the rotor blade of a helicopter  
p0461 A72-36975
- Prediction of the stalling of a wing section in incompressible flow  
[ONERA, TP NO. 1088] p0492 A72-37760
- Three-dimensional structure and equivalence rule of transonic flows.  
p0507 A72-39631
- The lift coefficient of a supercavitating jet-flapped foil in a free jet.  
p0556 A72-41236
- Lift on airfoils with separated boundary layers.  
p0557 A72-41264
- Turbofans under wings to provide lift and thrust for STOL aircraft  
[NASA-CASE-LEW-11224-1] p0030 N72-10033
- Helicopter lift margin system to aid in determining power requirements for takeoff and landing  
[AD-725207] p0043 N72-11053
- Numerical analysis of transonic flow about thin lifting wings and analytic expressions for far field conditions  
[NASA-TN-D-6530] p0045 N72-11289
- Low speed wind tunnel measurements of lift and pitching moments of NACA 0012 rotary wing profiles including measurements during pitching oscillations at stall  
[ARC-CP-1145] p0080 N72-11903

[NASA-TN-D-6627] p0149 N72-13978
- Maximum lift coefficient airfoils developed through optimization of pressure distribution  
[NASA-TM-X-67591] p0164 N72-14992
- Nonlinear lift evaluated from pressure distribution on fuselage and two body-wing configurations in transonic flow  
[BMVG-FBWT-71-24] p0166 N72-15011
- Development of technique for measuring steady state lift loads on aircraft with T-tail configuration and determination of flutter speed  
[RAE-TR-71035] p0249 N72-17991
- Lifting potential flow in terms of doublet distribution over body surface and trailing vortex sheet  
[NAL-TR-243] p0258 N72-18281
- Wind tunnel determination of lift induced on swept wing by two-dimensional partial-span deflected jet at Mach numbers from 0.20 to 1.30  
[NASA-TM-X-2529] p0365 N72-21997
- Review of work on external flow jet flaps noting lift coefficient  
[ARC-CP-1194] p0431 N72-24998
- Simulation study of lift-roll coupling on handling qualities of hovering VTOL aircraft using thrust for roll control  
[NASA-TN-D-6906] p0516 N72-28020
- Development of potential flow and boundary layer methods for calculation of performance of lift systems with significant flow separation  
[AD-740476] p0531 N72-29025

# LIFT AUGMENTATION

# SUBJECT INDEX

Lift curve slope and aerodynamic center position of wings in inviscid supersonic and subsonic flow [ESDU-70012] p0617 N72-31990

Numerical analysis of lift coefficient increment due to full-span split flap chord for various thickness/chord ratios of wings [ESDU-01.01.04] p0635 N72-32990

**LIFT AUGMENTATION**

Disk shaped lift engine providing additional thrust during takeoff and transition phases of V/STOL aircraft, returning to ground by jet after task accomplishment p0025 A72-12900

TU-154 lift and drag augmenting devices for takeoff and landing characteristics improvement p0056 A72-13472

Closed loop fluidic bidirectional jet flap airfoil lift control system, considering application to helicopter rotor blades p0124 A72-16659

Three dimensional wind tunnel investigation of vortex augmented unswept wing with leading edge cusp flap and split upper and lower trailing edge flaps [SAE PAPER 720321] p0290 A72-25584

The flight mechanics of STOL aircraft. p0442 A72-34241

Methodology for estimating STOL aircraft high lift systems characteristics. p0500 A72-38138

Lift and control augmentation by spanwise blowing over trailing edge flaps and control surfaces. [AIAA PAPER 72-781] p0500 A72-38140

Augmentor wing design for Buffalo STOL aircraft, discussing operational principle and wind tunnel test results p0550 A72-40684

An improved solution of the two-dimensional jet-flapped airfoil problem. p0594 A72-43329

Kinetic jet engine energy as lifting force on turbojet wings [JPRS-54785] p0100 N72-12984

Thrust lift augmentation and noise reduction characteristics of compact ejectors with applications to V/STOL aircraft [AD-732842] p0220 N72-17025

Lift increase of small span-chord ratio wings with lateral fluid jets directed along span [AD-733858] p0267 N72-19010

Forward speed effect on lift power of two dimensional jet ground effect support p0476 N72-27006

**LIFT COEFFICIENTS**

**U AERODYNAMIC COEFFICIENTS**

**U LIFT**

**LIFT DEVICES**

Lifting surface linearized potential theory for unsteady aerodynamic forces on wing and horizontal tail surfaces, using computer program p0057 A72-13541

Steady and oscillatory subsonic aerodynamic loads prediction based on Doublet-Lattice method and method of images, determining chord and spanwise loading on lifting surfaces [AIAA PAPER 72-26] p0131 A72-16917

Two dimensional lift characteristics of multielement airfoils, using potential flow method based on surface source distribution and finite difference boundary layer method [AIAA PAPER 72-3] p0132 A72-16935

Wind tunnel investigation of Reynolds number effects on boundary layer separation incidence and maximum lift coefficient of high-lift device equipped aircraft model p0242 A72-24657

Propulsion system/airframe matching in hybrid V/STOL airplanes, stressing thrust vector management, lift engine bypass ratio and power plant packaging design [ASME PAPER 72-GT-106] p0299 A72-25671

L-1011 propulsion, fuel, flight control, navigation, avionics, communication, electrical, environmental control and auxiliary power systems, discussing structure and high lift devices p0400 A72-32427

Analysis of the interaction of jets and airfoils in two dimensions.

[AIAA PAPER 72-777] p0499 A72-38136

Methodology for estimating STOL aircraft high lift systems characteristics. p0500 A72-38138

[AIAA PAPER 72-779] p0500 A72-38138

Potential flow calculations to support two-dimensional wind tunnel tests on high-lift devices. [ICAS PAPER 72-13] p0553 A72-41138

The sweepback effect in the subsonic region in the lower atmosphere and in the hypersonic region at high altitudes p0611 A72-44983

Transonic wind tunnel tests of effectiveness of high lift devices on swept and straight wings in controlling flow separation p0074 N72-11860

Prediction of high lift wing characteristics in relation to detachment phenomena [NASA-TT-F-14073] p0100 N72-12983

Lift devices for improved takeoff and landing performance of civil transport aircraft p0102 N72-12997

Noise measurements of jet augmented lift systems for use on proposed STOL aircraft [NASA-TN-D-67101] p0319 N72-20011

Numerical solution for potential transonic flow past lifting airfoil p0469 N72-26217

Leaned stator configuration design for highly loaded multistage fan drive turbine [NASA-CR-2096] p0523 N72-28793

**LIFT DISTRIBUTION**

**U FORCE DISTRIBUTION**

**U LIFT**

**LIFT DRAG RATIO**

Tactical approach landing radar tests for low lift drag ratio aircraft in unpowered flight, using F-104D as test aircraft p0395 A72-31694

Book on airfoil section designs for light aircraft covering wind tunnel studies of lift drag ratio as function of angle of attack p0399 A72-32250

Triangular and conical wings in hypersonic flow with Mach reflection of shock waves from leading edge with optimal L/D ratio p0460 A72-36893

Jet interference and lift drag ratio of swept wing aircraft with turbofan above wing [RAE-TM-AERO-1271] p0028 N72-10009

Transonic wind tunnel determination of blunt trailing edge effects on drag and lift characteristics of wing profile p0074 N72-11862

Limitations on approach flight paths of V/STOL aircraft including limits on descent angle due to maximum lift drag ratio [NASA-CR-1901] p0165 N72-15001

Flight tests of low lift to drag ratio approach and landing using CV 990 aircraft with similar size and performance characteristics of proposed space shuttle vehicle [NASA-TN-D-6732] p0268 N72-19022

Wind tunnel tests of forward-mounted overwing turbofan engine model with determination of jet interference effects and lift-dependent drag [ARC-CP-1207] p0527 N72-28998

**LIFT FANS**

Leaning vanes for fan noise reduction, discussing rotor-stator plane fluctuating pressure amplitude decrease and radial distribution modification [AIAA PAPER 72-126] p0128 A72-16823

Cross flow effect on lifting fan noise at subsonic blade tip speeds, analyzing radiation pattern change due to inlet flow distortion [AIAA PAPER 72-128] p0131 A72-16921

STOL and V/STOL transport aircraft design requirements consideration based on common propulsion and lift engine types use, noting fan lift solution superiority p0244 A72-24865

Integral and remote powered lift fan engines design for large civilian VTOL transports [ASME PAPER 72-GT-65] p0297 A72-25654

Turboprop lift fan design developed for XV-5 VTOL research aircraft, reviewing changes for future commercial and research transport systems [ASME PAPER 72-GT-111] p0299 A72-25674

# LIQUID DYNAMICS

# SUBJECT INDEX

leaks, cracks, material imperfections and epoxy filled voids  
[ASME PAPER 72-DE-25] p0362 A72-30867  
Development of air navigation system using liquid crystals and electronic equipment to determine direction to selected VOR station  
[NASA-CR-112062] p0389 N72-23664

## LIQUID DYNAMICS

### U FLUID DYNAMICS

### LIQUID INJECTION

### NT WATER INJECTION

### LIQUID METALS

Liquid metal regenerator design and test evaluation for gas turbine engine fuel consumption improvement  
[ASME PAPER 72-GT-33] p0295 A72-25629  
Cryogenic and liquid metal technology applications in industry and for ground transportation  
[NASA-TN-X-68092] p0486 N72-27737

### LIQUID NITROGEN

Testing of liquid nitrogen as aircraft engine fire extinguishant  
[FAA-RD-71-58] p0085 N72-11940  
Flight tests to determine effectiveness of liquid nitrogen fuel tank inerting system for fire prevention on DC-9 aircraft  
[FAA-RD-72-53] p0579 N72-30769

### LIQUID OXYGEN

LOX supply systems installation for civil transport aircraft crew and/or passenger breathing oxygen  
[SAE AIR 1223] p0301 A72-26030

### LIQUID PROPELLANT ROCKET ENGINES

Soviet book on thermal and gas dynamic design of gas turbines in aircraft and liquid propellant rocket engines, covering three dimensional flows, temperature distribution, component cooling, etc  
p0070 A72-15246

Mirage 3E liquid propellant auxiliary rocket engine, discussing intercept performance enhancement  
p0126 A72-16708

Liquid propellant rocket engines for racing cars and aircraft  
p0525 N72-28966

### LIQUID ROCKET PROPELLANTS

### NT CRYOGENIC ROCKET PROPELLANTS

### LIQUID-GAS MIXTURES

### NT FOG

Hydrothermodynamic foundations of hydrofoil engines employing gas-water mixtures and gas turbine generators, analyzing thrust coefficient and power efficiency  
p0247 A72-25128

## LIQUIDS

### NT CRYOGENIC ROCKET PROPELLANTS

### NT HYDRAULIC FLUIDS

### NT LIQUID METALS

### NT LIQUID OXYGEN

## LITERATURE

### NT BIOGRAPHY

### NT DOCUMENTATION

Summary of literature on altimeter display relating to aircraft height  
[FAA-RD-72-46] p0434 N72-25426

### LOAD DISTRIBUTION (FORCES)

Airport apron surface pavement strain measurements under field loading conditions, considering static and dynamic loads with finite element method  
p0002 A72-10192

Structural sandwich panel design, establishing simple stress and deflection formulas under transverse loading based on tests evaluating balsa as laminate core  
p0009 A72-10723

Shear and direct stresses on fuselage model cross section due to concentrated radial loads on frame comparing measurement with prediction by matrix force analysis  
p0144 A72-18322

Wilga 3 aircraft structure service life from structural fatigue theory and tests, emphasizing operational load distribution measurement  
p0196 A72-21634

Wing load distribution and induced drag control by warping, summarizing linear theory and wind

tunnel test results

p0240 A72-24218  
A consistent approach for treating distributed loading in the matrix force method.  
p0557 A72-41261

Application of leading-edge-suction analogy to prediction of longitudinal load distribution of vortex lift for delta wings  
[NASA-TN-D-6994] p0636 N72-32997

### LOAD FACTORS

### U LOADS (FORCES)

### LOAD TESTS

Structural Acoustic Monitor system for airframe structural proof testing, providing multichannel recording and aural monitoring of acoustic data derived from aircraft mounted accelerometers  
p0240 A72-24146

Low temperature environmental chamber for F-111 proof load testing, describing components of cold air forced convection recirculation system with liquid nitrogen injection  
p0402 A72-32612

### LOADING FORCES

### U LOADS (FORCES)

### LOADING MOMENTS

Simulation of flight maneuver-load distributions utilizing stationary, nonGaussian random load histories  
[NASA-TN-D-6570] p0098 N72-12908

### LOADING OPERATIONS

Super Guppy four engine aircraft characteristics, performance and loading device for bulky cargo air transportation  
p0300 A72-25812

### LOADING WAVES

### U ELASTIC WAVES

### U LOADS (FORCES)

### LOADS (FORCES)

### NT AERODYNAMIC LOADS

### NT SHOCK LOADS

### NT STATIC LOADS

### NT THRUST LOADS

### NT TRANSIENT LOADS

### NT VIBRATORY LOADS

### NT WING LOADING

Stability and control dynamics of helicopter hovering with heavy sling load, analyzing maneuvers for minimal excitation of pendulous motion  
[AHS PREPRINT 630] p0445 A72-34488

The New Zealand light aircraft fatigue meter program.  
p0609 A72-44735

Statistical evaluation of operational load forces on undercarriage of F-104 aircraft  
[BAE-LIB-TRANS-1591] p0101 N72-12989

### LOCALIZATION

### U POSITION (LOCATION)

### LOCATION

### U POSITION (LOCATION)

### LOCKHEED AIRCRAFT

### NT ELECTRA AIRCRAFT

### LOCKHEED MILITARY AIRCRAFT

### U MILITARY AIRCRAFT

### LOCKS (FASTENERS)

Development of sprayable urethane sealant for protection of heated areas on aircraft structures  
[AD-727592] p0035 N72-10489

### LOFTING

Computer calculation of second order curve segment discriminant in geometrical problem associated with aircraft lofting, assessing method accuracy  
p0345 A72-28739

Nonlinear algebraic transformation to determine straight line and second order curve intersection point in aircraft lofting problem  
p0345 A72-28742

## LOG PERIODIC ANTENNAS

Log periodic dipole antenna systems for ILS localizers, noting reduced sensitivity to snow and ice

p0489 A72-37279

## LOGIC CIRCUITS

Improvements in aircraft maintenance procedures based on solid state electrical power management and solid state contactless switching circuits

p0041 N72-11034

Development of data insertion techniques for automatically providing pilot with heading and attitude command information

[AD-731804]

p0206 N72-15981

Associative process and cellular logic in memory circuits for avionics computer

[AD-736710]

p0387 N72-23169

## LOGIC DESIGN

Digital computer memory system for real time processing of air and naval traffic data, discussing logic design, time comparisons and optimum use

p0022 A72-12647

Future trends of airborne computers.

[AIAA PAPER 72-895]

p0505 A72-39109

Development and evaluation of an energy-oriented guidance logic for air combat models.

[AIAA PAPER 72-949]

p0562 A72-42354

Logical design of associative processor for avionics digital computer

[AD-737188]

p0387 N72-23169

## LOGIC NETWORKS

## U LOGIC CIRCUITS

## LOGISTICS

Military aircraft operations and logistics computerized simulation for support and maintenance cost estimates

p0141 A72-17974

The heavy lift helicopter - An operations research/technology/performance blend.

p0604 A72-44581

## LOGISTICS MANAGEMENT

## NT INVENTORY MANAGEMENT

Concorde on-time operation as total management problem from design to airline operations, discussing techniques for in-flight failure diagnosis and onward reporting

p0402 A72-32460

Management of life support and transportation systems in Arctic regions

[AD-744669]

p0649 N72-33980

## LONG RANGE NAVIGATION

## U LORAN

## U LORAN D

## LONGITUDINAL CONTROL

Aft center of gravity travel effects on aircraft longitudinal control response characteristics

[SAE PAPER 720318]

p0290 A72-25581

An experimental investigation of STOL longitudinal flying qualities in the landing approach using the variable stability X-22A aircraft.

[AHS PREPRINT 642]

p0447 A72-34502

Multiloop piloting aspects of longitudinal approach path control.

[ICAS PAPER 72-46]

p0555 A72-41171

Control requirements for control configured vehicles.

p0614 A72-45349

Wind tunnel tests to determine effectiveness of cyclic pitch control on V/STOL aircraft for longitudinal control during hover and transition

[AD-734237]

p0271 N72-19039

Wind tunnel tests to determine longitudinal control capability of four propeller, tilt wing aerodynamic configuration with cyclic pitch propellers

[AD-734236]

p0271 N72-19040

Wind tunnel tests to determine effectiveness of cyclic pitch propellers as low speed longitudinal control system for V/STOL tilt wing transport-type aircraft

[AD-734068]

p0272 N72-19047

Performance of cyclic pitch propellers for longitudinal control of V/STOL tilt wing aircraft

[DGLR-71-019]

p0381 N72-23012

## LONGITUDINAL STABILITY

Pitching moments effect on phugoid and height mode stability of aircraft in supersonic flight

p0236 A72-23622

Problems and solutions related to the design of a control augmentation system for a longitudinally unstable supersonic transport.

[AIAA PAPER 72-871]

p0505 A72-39128

Aerodynamic characteristics of the slotted fin.

p0557 A72-41262

Aircraft longitudinal stability under conditions of varying atmospheric density, thrust force and velocity, determining critical altitude for vanishing oscillations

[AIAA PAPER 72-951]

p0562 A72-42358

Low speed wind tunnel longitudinal stability tests on cambered wings of mild gothic planform of 1/4 aspect ratio

[ARC-CP-1163]

p0081 N72-11907

Wind tunnel longitudinal stability tests of AVRO 720 scale model with determination of up-elevon and leading edge notch effects

[ARC-CP-1140]

p0088 N72-11962

Wind tunnel tests to determine static longitudinal aerodynamic characteristics of close-coupled wing-canard configurations at Mach numbers from 1.60 to 2.86

[NASA-TN-D-6597]

p0165 N72-15000

Effect of thickness on subsonic longitudinal stability characteristics of 70 deg sweepback delta wings

[ARC-R/M-3673]

p0202 N72-15950

Longitudinal stability and control derivatives of jet fighter aircraft extracted from flight test data by utilizing maximum likelihood estimation

[NASA-TN-D-6532]

p0252 N72-18013

Control and perturbation transfer function coefficients as function of aircraft derivatives for uncontrolled longitudinal motion in turbulence

[DLR-MITT-71-11]

p0366 N72-22010

## LONGITUDINAL WAVES

Probability distribution of vertical longitudinal shear fluctuations.

p0599 A72-44146

## LOOK ANGLES

## U AZIMUTH

## LOOP ANTENNAS

Radiation patterns from adaptive loop antenna arrays for aircraft communication systems

[AD-735096]

p0275 N72-19230

## LORAN

## NT LORAN C

## NT LORAN D

Fighter bomber Loran-inertial data processing with digital computer to combine navigation, guidance and weapon delivery into fully integrated system

p0407 A72-33246

An area navigation system for a long range airplane.

p0546 A72-40281

## LORAN C

Application of airborne digital computers to Loran C/D and Omega navigation and guidance systems

p0336 N72-21225

Development of precision air navigation system based on Loran C system and digital barometric altimeter

[AD-740894]

p0579 N72-30597

## LORAN D

Application of airborne digital computers to Loran C/D and Omega navigation and guidance systems

p0336 N72-21225

## LOUNGES

Lounge planning model for airport terminal design simulation, taking into account scheduled arrivals and departures, aircraft types, passenger number, gate assignments, etc

p0141 A72-17979

## LOW ALTITUDE

Low altitude gust load spectra above Czechoslovak territory interpreted in terms of equivalent velocity cumulative frequencies for light aircraft

p0358 A72-30282

Low-altitude atmospheric turbulence around an airport.

p0613 A72-45334

Crew compartment vibration environment in B-52 aircraft during low altitude, high speed flight

[AD-727023]

p0033 N72-10127

Integrated low altitude flight control system for military helicopters

p0083 N72-11924

Terrain avoidance radar for US Army rotary wing aircraft

# LOW ASPECT RATIO

# SUBJECT INDEX

Flight tests of ribbon parachutes with 2000 lb store at low altitude [SC-DC-71-4022] p0083 N72-11927

Measurement of B-58 crew compartment vibration environment during high speed, low altitude flight [AD-730288] p0151 N72-13994

Meteorological data acquisition procedures for monitoring changes in atmospheric parameters at low altitudes to support aircraft flyover noise measurements [NASA-CR-1945] p0166 N72-15004

Low altitude airdrop system using inflation-aided recovery parachutes for extraction [AD-735375] p0332 N72-21013

## LOW ASPECT RATIO

Viscous incompressible flow past longitudinally cambered small aspect ratio slender wing near solid interface p0119 A72-16215

Slender body theory for flow calculation past low aspect ratio delta wing with straight trailing edge, noting lifting vortices distribution p0247 A72-25131

Design of low pressure ratio fan lift engines for civilian VTOL transport aircrafts [NASA-TM-X-67977] p0162 N72-14793

Lift increase of small span-chord ratio wings with lateral fluid jets directed along span [AD-733858] p0267 N72-19010

## LOW ASPECT RATIO WINGS

### NT DELTA WINGS

Force and pressure distribution measurements on delta wing-body combination in compressible flow, investigating Reynolds number effect [DGLR PAPER 71-118] p0022 A72-12707

Drag and lift experimental determination for low aspect ratio rectangular wings with blunt trailing edges at Mach numbers 0.5-2.2 [DGLR PAPER 71-114] p0023 A72-12712

Tip clearance effect on compressor blade aerodynamic characteristics, applying Bolland analysis to low aspect ratio rectangular wing p0024 A72-12825

Aerodynamic center and center of pressure of slender small aspect ratio wing near solid or free surface, determining angle of attack effect p0351 A72-29131

Calculation of a thin-walled small-aspect-ratio wing beyond the limit of proportionality p0598 A72-43654

Woodward panel method used to calculate loads on slender bodies with small aspect ratio wings for supersonic flow [PPA-AU-635-PT-1] p0317 N72-19995

Calculating downwash angles behind wings with small span-chord ratios moving at subsonic speeds using nonlinear algebraic equations p0618 N72-32009

## LOW DENSITY MATERIALS

High strength, stiffness and low density properties of boron/aluminum matrix composites in flight structures p0065 A72-14745

## LOW DENSITY WIND TUNNELS

Magnetic balance measurements of aerodynamic forces on spheres and slender cones in hypersonic low density wind tunnels, noting sting effect p0243 A72-24771

## LOW FREQUENCIES

Flight test method for determination of stability and performance characteristics from maneuvers in low and intermediate frequencies [VTH-163] p0267 N72-19009

## LOW LEVEL TURBULENCE

Aircraft flight conditions effect on low altitude critical air turbulence in terms of gust velocity components for CAT prediction p0348 A72-28861

## LOW PASS FILTERS

Low pass filter requirements and performance in variable speed constant frequency system for aircraft electric power supplies [RAE-TR-71088] p0434 N72-25273

## LOW PRESSURE

Low pressure ratio Q-FAN propulsor noise reduction tests on wind tunnel model, discussing source components and design configurations

[ASME PAPER 72-GT-40] p0295 A72-25634

## LOW SPEED

Supersonic transport aircraft and BAC 221 aircraft piloted flight simulation near zero rate climb velocity for determining aircraft maneuver controllability at low speed [ARC-CP-1165] p0043 N72-11048

Aerodynamic and control characteristics of helicopters in level flight and steep descents at low speeds [AD-729847] p0154 N72-14010

Wind tunnel/flight simulation of slender delta wing aircraft dynamic response to Dutch roll at low speed [ARC-R/M-3669] p0204 N72-15970

Approximate analysis for solving fourth order nonlinear equation of motion of HP-115 aircraft at low speed [ARC-R/M-3674] p0270 N72-19034

Airborne simulator used to determine lateral-directional handling qualities for V/STOL aircraft in low speed maneuvering flight [AD-735420] p0332 N72-21014

Landing simulation to determine effects of turbulence on roll of swept fighter aircraft at low speed [ARC-R/M-3697] p0582 N72-31001

Wind tunnel tests to determine effects of leading edge camber on low speed aerodynamic characteristics of thin, sharp-edge delta wing [NASA-CR-2002] p0636 N72-32996

## LOW SPEED HANDLING

### U CONTROLLABILITY

### U LOW SPEED

## LOW SPEED STABILITY

Low speed flight simulation of slender wing BAC 221 research aircraft and comparison with flight tests [RAE-TR-69257] p0204 N72-15971

## LOW SPEED WIND TUNNELS

### NT SUBSONIC WIND TUNNELS

Base pressure drag reduction on rectangular wings with blunt trailing edges from low speed wind tunnel measurements [DPVLR-SOWDDR-219] p0244 A72-24842

Jet engine simulation with low speed wind tunnel models for interference drag measurement p0027 N72-10005

Low speed wind tunnel measurements of lift and pitching moments of NACA 0012 rotary wing profiles including measurements during pitching oscillations at stall [ARC-CP-1145] p0080 N72-11903

Low speed wind tunnel tests of supersonic air intake with various auxiliary intakes, using twin engine aircraft configuration p0213 N72-16718

Low speed wind tunnel test on low-drag airfoil at half a million Reynolds number, noting aerodynamic coefficients [ARC-CP-1187] p0270 N72-19033

Flow quality of non-return wind tunnels of concern at low test speeds required for V/STOL testing [NASA-TM-X-62170] p0587 N72-31286

Analysis of spanwise distribution leading edge tangential suction forces on thin sixty degree delta wing obtained in low speed wind tunnel [KTH-AERO-TN-58] p0618 N72-32011

## LOW TEMPERATURE TESTS

Low temperature environmental chamber for F-111 proof load testing, describing components of cold air forced convection recirculation system with liquid nitrogen injection p0402 A72-32612

## LOW TURBULENCE

Low turbulence wind tunnel with closed circuit design and pressure gradient adjustment capability for turbulent boundary layer studies p0139 A72-17713

## LOW VELOCITY

### U LOW SPEED

## LOW VISIBILITY

Pilot perception tests on estimating flight path inclination, ground image and touchdown time under poor visibility p0119 A72-16180

Aircraft pilot performance during instrument approach in low visibility conditions p0179 A72-18832

- Autoland system flight testing in Trident 3B and British Civil Aviation Authority approval for ICAO Cat 3a weather p0411 A72-33539
- Investigation of data rate requirements for low visibility approach with a scanning beam landing guidance system. p0453 A72-35562

p0384 N72-23029

Concept formulation for automatic inspection, diagnostic, and prognostic procedures applied to

maintenance of military aircraft - Vol. 2

[AD-736755]

p0384 N72-23030

Application of reliability and maintainability trade-off considerations in design of main rotor

blade for heavy lift helicopter

[AD-739582]

p0516 N72-28021

Statistical analysis of maintenance policies on utilization rate of transport aircraft

[AD-741410]

p0529 N72-29015

Inspection and maintenance schedules of commercial transport aircraft to detect structural

deterioration and to prevent catastrophic failure

p0541 N72-29913

Reliability engineering methods for design of landing mats simulating aircraft operations

[AD-743161]

p0588 N72-31297

**MALFUNCTIONS**

Aircraft industry product support role in time delays minimization for aircraft operators,

discussing malfunction report, minimum equipment

decision and fault diagnosis

p0401 A72-32456

**MAN MACHINE SYSTEMS**

Computer-aided interactive graphic displays for ATC, discussing subsystems, data processing flow

and operational capabilities

p0020 A72-12420

Tactical ATC display system for airport surveillance, precision approach and landing and

operator/aircraft/machine operations by using

terminal Area Surveillance Radar

p0020 A72-12421

Aircraft design interactive computer graphics technique, using human decision input response

to computer output information

[DGLR PAPER 71-107]

p0024 A72-12733

Pilots in aircraft systems management involving machine and air traffic environment

p0055 A72-13419

Automatic flight control systems value to aircraft pilot, stressing man machine interface

p0056 A72-13420

Automated navigation aids interface with human operator, discussing Apollo flight experience

and technology utilization in air and marine

navigation

p0144 A72-18288

Instructor station design for automated flight training systems, considering human factors and

informational requirements

p0183 A72-19277

Man and technology in orientation and navigation Conferences, Essen, Germany, October 1971

p0229 A72-22776

Development trends in airborne man machine flight control, discussing optimal division between

human pilot and machine in relation to total

system performance and economic factors

p0230 A72-22781

Interactive computer graphics with three dimensional real time CRT display of air combat

maneuvers for fighter pilot training

p0302 A72-26291

Integrated display system design with navigation update, weapon delivery, reconnaissance, bomb

damage assessment, threat and terrain avoidance

capabilities for multicrew military aircraft

p0302 A72-26292

Aircraft microminiature ILS with transmitter and localizer antenna to provide pilot with bearing

and glide slope information for alignment with

runway

**MANNED SPACECRAFT**  
NT SPACE SHUTTLES

**MANPOWER**  
Aircraft maintenance operations and personnel requirements planning for optimal economic effectiveness, formulating relations between work productivity, downtime and aircraft utilization  
p0361 A72-30822

**MANUAL**  
Computer operators manual for intercity air transportation effectiveness programs  
[PB-200478] p0107 N72-13032  
Manual for programming intercity air transportation effectiveness model  
[PB-200482] p0107 N72-13036

**MANUAL CONTROL****NT VISUAL CONTROL**

Dynamic manned vehicle cockpit simulator for visual and aural effects and acceleration changes, discussing STOL and VTOL characteristics  
p0143 A72-18246  
Optimal solutions for apportionment between automatic and manual flight control, considering number and types of displays required  
p0230 A72-22783  
Historical development of right and left hand patterns in horsemanship, land vehicle, ship and aircraft control and navigation  
p0462 A72-37050  
An optimal model-following flight control system for manual control.  
p0501 A72-38228  
An investigation of parameters and factors governing manual control of STOL aircraft in landing approach.  
[AIAA PAPER 72-987] p0615 A72-45415  
Procedures for predicting pilot-vehicle-flight control system performance  
[AD-729869] p0153 N72-14007  
Manual stabilization and positioning of hovering VTOL aircraft using indicating instrument and artificial horizon  
[REPT-61] p0324 N72-20437

**MANUALS**

DC-10 nondestructive testing manual, detailing section/subject format, methods, planned area accessibility and aircraft maintenance  
p0012 A72-11109  
Development of procedures for improving readability of maintenance manuals and evaluation of reading difficulty level  
p0039 N72-11021  
VHF/UHF ground-air-ground communications siting criteria and field manual  
[FAA-BD-71-76] p0092 N72-12087  
Manual for programmers for intercity air transportation effectiveness computer programs  
[PB-200479] p0107 N72-13033  
User manual for propeller noise detectability program  
[AD-729435] p0156 N72-14223  
Mark 7 arresting engine alignment measuring system and procedures for correcting misalignment  
[AD-732445] p0257 N72-18272  
Casting instruction manual for steels and aluminum, magnesium and copper alloys in aeronautical manufacturing  
[RAE-LIB-TRANS-1557] p0259 N72-18501  
Computer manual for approximation satellite terminal system evaluation model  
[AD-737334] p0388 N72-23229

**MANUFACTURING**

Aircraft design producibility to reduce production cost and enhance product profitability, using joint engineering and manufacturing team  
[SAE PAPER 710748] p0003 A72-10247  
Semi-finished product production technology influence on heat resistant alloys mechanical properties, considering forging, rolling, casting, melting, diffusion welding and powder metallurgy  
p0147 A72-18647  
Design and development of numerically controlled machine for laying composite tape used in building aircraft structured from filament reinforced resin matrix composite materials  
[AD-725765] p0035 N72-10425

**MAP MATCHING GUIDANCE**

Applications and operational experience with projected map navigation systems in military helicopters  
p0085 N72-11938

**MAPPING**

U.S. Navy cartography, describing RA-3B Skywarrior capabilities and photographic instrumentation  
p0196 A72-21699  
Wake and clear air turbulence, wind shear, upsets, thunderstorms, and turbulence mapping  
[AD-732117] p0222 N72-17579  
Flight tests of air navigation equipment to determine accuracy of position location for small area mapping and aerial reconnaissance in Arctic regions  
[AD-740607] p0579 N72-30596

## MAPS

## NT RADAR MAPS:

- Light evaluation of inertial/DME/DME map display system onboard Convair 580  
[AD-735015] p0326 N72-20596
- Airborne map display systems using direct view, projected, combined map/CRT, and electronically generated map displays p0374 N72-22634

## MARAGING STEELS:

- Constant high tensile stress and rapid aerodynamic heating effect on maraging steels and Ti and Al alloys, evaluating test and simulation procedures for design data development p0009 A72-10749

## MARINE NAVIGATION

## U SURFACE NAVIGATION

## MARINE PROPULSION

- Nuclear energy for power and transportation, discussing ship, submarine, air cushion vehicle, aircraft and rocket propulsion applications p0115 A72-15777
- Development of theories for speed, stability, maneuverability, and seaworthiness of ground effect machines  
[AD-742425] p0574 N72-30023

## MARINE TECHNOLOGY

- Marine and aerospace engineering - Conference, Paris, May 1971 p0071 A72-15551
- Development of theories for speed, stability, maneuverability, and seaworthiness of ground effect machines  
[AD-742425] p0574 N72-30023

## MARKET RESEARCH

- Commercial transport market and technology forecasting, considering all-cargo, STOL, SST and CTOL aircraft  
[SAE PAPER 710750] p0003 A72-10249
- Deterministic model for new product innovation adoption rate in commercial aircraft jet engine market p0186 A72-20269
- Mathematical models for passenger aircraft market forecast, discussing stock measurement and life expectancies p0358 A72-30125

## MARKETING

- Air cargo growth potential, marketing and profitability, considering need for improvements in ground handling, rate structure, container standardization, documentation, etc p0344 A72-28452
- Helicopters technical and marketing projections for 1980s, emphasizing reliability, maintainability and maneuverability in design philosophy p0449 A72-34926

## MARKING

- Runway marking requirements for visibility under day and night conditions, considering night reflection value, color stability, durability, noninterference with flight operations, etc p0442 A72-34243

## MARKOV PROCESSES

- Application of Markov game approach to planar air combat problems  
[NASA-CR-1979] p0218 N72-17006

## MARTIN MILITARY AIRCRAFT

## U MILITARY AIRCRAFT

## MARYLAND

- Short term airport access improvements in Baltimore-Washington area with service brochure implementation  
[PB-200686] p0033 N72-10232

## MASKS

## NT OXYGEN MASKS

## MASS FILTERS

## U FLUID FILTERS

## MASS FLOW

- Design and operation of first-stage and two-stage of small, low cost turbofan engine to determine specific work, torque, mass flow, and efficiency  
[NASA-TN-D-6967] p0626 N72-32072
- Curves for use with total heat and static pressure sampling methods for gross thrust, mass flow, and choking pressure ratio of air breathing engines in flight  
[ESDU-69008] p0631 N72-32746

- Gross thrust and nozzle mass flow measurements for air breathing, ducted flow engines  
[ESDU-69007] p0631 N72-32747

## MASS RATIOS

- Helicopter design figure of merit weight ratios definition in terms of rotor thrust coefficient, substituting pure airframe structure weight for conventionally used empty weight  
[SAE PAPER 916] p0596 A72-43463

## MASS TRANSFER

- Book on heat and mass transfer, covering research results over 1953-1969 on supersonic aircraft and missiles cooling problems, rarefied gas dynamics boundary layer flow, etc p0120 A72-16399

- Mass reduction of moderator and neutron flux response for in-flight radiation warning system for SST p0223 N72-17719

## MASSACHUSETTS

- Simulation study of airspace control corridor for Boston terminal area  
[AD-739130] p0472 N72-26526

## MATERIAL REMOVAL (MACHINING)

## U MACHINING

## MATERIALS

- Stress corrosion cracking in aircraft structures and various materials - historical review p0341 N72-21901

## MATERIALS EROSION

## U EROSION

## MATERIALS HANDLING

## NT GROUND HANDLING

- Air cargo growth potential, marketing and profitability, considering need for improvements in ground handling, rate structure, container standardization, documentation, etc p0344 A72-28452
- Terminal handling environment and air cargo requirements for noncontainerized freight p0406 A72-33175
- Boeing 747-F cargo aircraft, describing onboard and ground facilities for freight handling and loading p0593 A72-43245
- Air freight ground handling and distribution terminal facilities and methods, discussing future technical and organizational developments for efficient handling of increased traffic volume p0593 A72-43246
- Flying crane helicopters utilization in construction industry for materials transport and structural erection work, discussing technical and economic aspects p0597 A72-43637
- The heavy lift helicopter - An operations research/technology/performance blend. p0604 A72-44581
- Analysis of accomplishments in public transportation developments and predictions of future requirements p0634 N72-32982

## MATERIALS SCIENCE

- Materials science - Conference, Los Angeles, April 1972 p0311 A72-28076

- Russian book - Handbook of aircraft materials. p0548 A72-40459

## MATERIALS TESTS

- Aerospace wire and cables testing methods standards for evaluating mechanical, electrical and chemical properties, coating thicknesses, continuity flaws, flammability, geometrical characteristics, etc  
[SAE AS 1198] p0008 A72-10384
- Structural sandwich panel design, establishing simple stress and deflection formulas under transverse loading based on tests evaluating balsa as laminate core p0009 A72-10723
- Aircraft interior materials selection relative to fire hazards and smoke emission properties  
[PI PAPER, 18] p0054 A72-13249
- Nondestructive testing for materials inspection and monitored aircraft maintenance programs. p0062 A72-14201
- Flame resistant materials for aircraft fire fighter protective clothing from systems approach tests

# **SUBJECT INDEX**

# **MATHEMATICAL MODELS**

- p0195 A72-21585  
Surface patterns from ablating, melting and flowing materials in supersonic flow of wind tunnel, rocket motor and flight test environments, comparing with theory [AIAA PAPER 72-313]
- p0285 A72-25247  
Lightning current tests of aircraft glass/carbon fiber reinforced plastics materials
- p0357 A72-30040  
Analysis of response of textiles, wood, and earth materials to fragment impact as basis for designing fragment protection devices [AD-730673]
- p0163 A72-14931  
Evaluation of bearing materials, shaft materials, and lubricants for airframe applications by simulating loads, motions, and temperatures on bearings in normal operation [AD-733705]
- p0259 A72-18505  
Development and evaluation of cooling systems and materials for controlling structural temperature of turbine engines [REPT-21-C-71F]
- p0428 A72-24822  
**MATHEMATICAL ANALYSIS**  
U APPLICATIONS OF MATHEMATICS  
**MATHEMATICAL LOGIC**  
NT ALGORITHMS  
NT FORMULAS (MATHEMATICS)  
NT SET THEORY  
NT THRESHOLD LOGIC  
Computer programs for analyzing axial compressor aerodynamic test data [AD-744503]
- p0631 A72-32756  
**MATHEMATICAL MODELS**  
NT ANALOG SIMULATION  
NT DIGITAL SIMULATION  
Three dimensional roll-controlled missile trajectory model for simple time-sharing digital or analog simulation, using wind-to-inertial axis transformation
- p0011 A72-10964  
Multivortex model of vortex sheet development on slender axisymmetric bodies at angle of attack
- p0053 A72-12919  
Differential and difference equations approximate solutions in finite state machine form, developing adaptive gain changer model in aircraft stability control system
- p0054 A72-13164  
Finite element discrete model for large aspect ratio wing transverse vibrations, using inhomogeneous elements with various stiffness-length relations
- p0054 A72-13189  
Computer aided intrasystem electromagnetic compatibility prediction programs, discussing mathematical models and program philosophies
- p0061 A72-14039  
ATC for North Atlantic air transportation, emphasizing collision risk model for safety standards assessment
- p0062 A72-14484  
Slat-airfoil combinations aerodynamics modeled by single point vortex to represent leading edge slat, discussing on-line computer graphics program [AIAA PAPER 72-221]
- p0127 A72-16798  
Computerized analytical model of two dimensional multicomponent airfoil in viscous subsonic flow [AIAA PAPER 72-2]
- p0129 A72-16861  
Turbulent boundary layer analogy mathematical model for turbulent mixing and buoyancy effects on aircraft trailing vortex wake motion and persistency [AIAA PAPER 72-42]
- p0130 A72-16903  
Adaptive model following control systems design by hyperstability approach for flight control and simulation [AIAA PAPER 72-95]
- p0134 A72-16956  
ATC study by computerized simulation, using successive approximation models
- p0141 A72-17975  
Model-following control for nonlinear multivariable plants, considering implicit algorithm solution and application to variable stability aircraft control synthesis
- p0185 A72-19708  
Linear equations with periodic coefficients in mathematical models for systems with rotating components, discussing methods for obtaining closed form solutions
- p0186 A72-20204  
Deterministic model for new product innovation adoption rate in commercial aircraft jet engine market
- p0186 A72-20269  
Airfield surface system fast-time computer simulation model for airport planning systems analysis
- p0187 A72-20341  
Computer simulation requirements for air and ground transportation system, emphasizing mathematical models capable of system performance relation to design parameters
- p0188 A72-20362  
Real time computer simulation of command and control in transportation systems, detailing models, and programming technique and ATC controller effectiveness evaluation
- p0188 A72-20363  
Acoustical theory application to jet engine noise reduction, developing mathematical model for blade shock wave spacing in noise generation process
- p0189 A72-20542  
Carrier based attack aircraft allocation model formulation and solution for maximum inflicted target damage, using sequential unconstrained minimization technique with nonlinear programming [AD-736073]
- p0192 A72-21469  
Aerodynamic noise generation mechanism of ideally expanded supersonic jet based on large scale flow instabilities, deriving mathematical model
- p0241 A72-24331  
Turbojet engine oil circuit contamination rate determination by spectrometric analysis, obtaining mathematical theory for data interpretation [SAE PAPER 720303]
- p0288 A72-25567  
Steady state radial inlet pressure distortion index for axial flow compressor, examining radial velocity, continuity equation and mathematical model [ASME PAPER 72-GT-109]
- p0299 A72-25673  
Ablation phase duration during spacecraft decelerated hypersonic reentry flight, using theoretical model based on quasi-steady assumptions
- p0300 A72-25815  
Interdiction bombing mission effectiveness model for bad and good weather aircraft type selection depending on weather conditions at target site
- p0344 A72-28400  
Multiscale numerical model for local weather development simulation, noting forecasting for long distance air travel
- p0348 A72-28857  
Mathematical model for gas turbine engine inlet noise caused by shock wave impingement, noting dynamic wave system with overpressure and distortion
- p0355 A72-29576  
Mathematical models for passenger aircraft market forecast, discussing stock measurement and life expectancies
- p0358 A72-30125  
Aircraft landing gear stress spectrum and design data during ground loading on airport runways, using linearized theory for model investigation
- p0359 A72-30283  
Linear mathematical model for twin shaft gas turbine with isolated turbocompressor, calculating dynamic constants as function of operational modes
- p0360 A72-30581  
ATC systems fast-time simulation, emphasizing importance of human operator performance realistic modeling
- p0396 A72-32097  
Blade characteristics of axial flow fan with orifice fan guide investigation by theoretical model with flat plate parallel to wing tip surface
- p0397 A72-32142  
Simulation of an air cargo handling system
- p0443 A72-34472  
Pilot-fighter aircraft system mathematical model relating pilot performance to air to ground weapon delivery accuracy
- p0453 A72-35564

Sonic jet noise pressure source model for radiated sound power and jet pressure frequency spectra ratio derivation with application to noise suppression

p0457 A72-36414

A vortex model for the study of the flow at the rotor blade of a helicopter

p0461 A72-36975

STOL ride quality criteria - Passenger acceptance. [AIAA PAPER 72-790]

p0496 A72-38107

A method for increasing thrust reverser utilization on STOL aircraft. [AIAA PAPER 72-782]

p0500 A72-38141

An optimal model-following flight control system for manual control.

p0501 A72-38228

An investigation of vehicle dependent aspects of terminal area ATC operation.

p0502 A72-38256

Linear acoustic model to predict axial flow turbomachinery aerodynamic sound generation including flow effects on radiation

p0503 A72-38568

Ground and torque relation to swivel angle and lateral displacement of wheel rim plane, using string model for tire

p0557 A72-41260

Application of wall corrections to transonic wind tunnel data. [AIAA PAPER 72-1009]

p0558 A72-41591

An analysis of aircraft lateral-directional handling qualities using pilot models. [AIAA PAPER 72-962]

p0561 A72-42347

Equations of motion appropriate to the analysis of control configured vehicles. [AIAA PAPER 72-952]

p0562 A72-42353

A stability analysis for tethered aerodynamically shaped balloons.

p0594 A72-43332

Reliability analysis of a jet engine fuel system with the aid of an analog computer using operational data

p0600 A72-44282

Mathematical model for dynamics simulation of aircraft turboprop engines, using digital, analog and hybrid computers

p0601 A72-44288

A digital model of jet engine hydraulic fuel controller

p0602 A72-44291

Statistical forecasting models for USAF CONUS outbound cargo airlift requirements by averaging and exponential smoothing models

p0604 A72-44578

Lockheed airline system simulation and aircraft scheduling models.

p0604 A72-44579

Lifting rotor flow noting wake models

p0037 N72-11002

Linear aerodynamic rotor theories showing effect of applied vortex model on exactitude of numerical analysis

p0038 N72-11005

Mathematical models for studying incoherent and coherent structures of aerodynamically generated noise

p0041 N72-11036

Equivalent body of revolution for simulating high Reynolds number effect on transonic flow past two dimensional airfoil

p0076 N72-11874

Fan and compressor noise evaluation, and model formulation and testing

p0086 N72-11946

Development of analytical flow configuration models for designing supersonic air breathing propulsion systems

p0109 N72-13331

Equicontrollability and application to linear time-invariant model-following problem

p0110 N72-13505

Extension of Gersten nonlinear wing theory to compressible flow

p0164 N72-14993

Mathematical models for helicopter rotary wing near wake and influence on rotary wing lifting characteristics

p0164 N72-14996

Mathematical model for computing aerodynamic forces acting on hinged helicopter rotor blades using digital computer

[DLR-FB-71-67]

p0166 N72-15008

Lumped mass model of long airborne trailing wire antenna and derivation of equations of motion

p0217 N72-16899

Massless-spring modeling of suspension-line elasticity during parachute unfurling process using Runge-Kutta integration technique

[NASA-TB-D-66711]

p0224 N72-17930

Model of completed successful missions of V/STOL versus CTOL aircraft systems

[AD-732681]

p0254 N72-18031

Aerodynamic characteristics of bomb in steady, incompressible, potential flow based on model

[AD-733325]

p0254 N72-18037

Mathematical model for effects of conical thickness distribution on separated flow past slender delta wings with small thickness/span ratios and sharp leading edges.

[ARC-CP-1189]

p0267 N72-19006

Linearized mathematical models with stability derivatives and equations of motion for two representative STOL aircraft

[AD-733756]

p0270 N72-19036

Linear and angular acceleration terminology, human acceleration simulation, airplane airbag restraint systems, and mathematical models of automobile crash loads

p0274 N72-19155

Computerized simulation model for studying performance of air bag

[PB-204170]

p0275 N72-19184

Mathematical model for lifting rotors in vertical flight using matched asymptotic expansions

[PFA-118]

p0320 N72-20022

Vortex distribution technique applied to three-dimensional bodies moving through incompressible fluid

[AD-732953]

p0324 N72-20333

Mathematical models for determining flight performance of Concorde aircraft

p0328 N72-20978

Conventional and reliability theories for analyzing safe fatigue life and safe inspection intervals for military and civil aircraft

[ARL/SM-335]

p0372 N72-22495

Development and characteristics of simulation of continuous error of localizer beam of conventional instrument landing system used with space shuttle

[NASA-TM-X-62116]

p0376 N72-22648

Mathematical model for influence of lift engine position on eigenmotion of lift jet powered VTOL aircraft in hovering flight

[DLR-FB-71-112]

p0422 N72-24028

Vortex model for calculating airstream at rotor blade of helicopter

[NASA-TT-F-14228]

p0430 N72-24990

Dynamic theory of flutter for rotation of rigid wing

[ARL/SM-332]

p0430 N72-24996

Development of mathematical model for evaluating compatibility of flight crew personnel and aircraft crew stations - Vol. 4

[AD-738008]

p0433 N72-25017

Mathematical models for analyzing quasi-one-dimensional flow across face seals and narrow slots of turbine engines

[NASA-TM-D-6668]

p0435 N72-25468

Mathematical model for multipath analysis from analog magnetic recordings generated during experimental flights

p0486 N72-27707

Mathematical models for determining effects of voice communication constraints on air traffic control in terminal control sector

p0517 N72-28171

Gradient technique for determining improved aircraft flight paths to reduce kill probability by anti-aircraft gunfire

[AD-741373]

p0530 N72-29018

Mathematical model for predicting radiated rotational noise of lifting rotor or propeller

[AD-740816]

p0579 N72-30611

Load-life model for calculating fatigue life and reliability of helicopter spur gear mesh

[AD-744504]

p0629 N72-32507

# SUBJECT INDEX

# METHOD OF CHARACTERISTICS

- Meteorological information assistance for Concorde aircraft test flights, discussing high tropospheric turbulence and lower stratospheric temperature predictions and instruments p0063 A72-14680
- Airport meteorological instrumentation, discussing ground wind, visibility, cloud height, air temperature and humidity detectors and radar equipment p0246 A72-25093
- Aeronautical requirements for meteorological reporting and instruments at aerodromes, discussing surface wind, visibility, runway range, weather, temperature and pressure observations p0349 A72-28868
- Application of thermistor mass flow rate sensor to aircraft meteorological instruments [AD-736152] p0338 A72-21622
- ## METEOROLOGICAL PARAMETERS
- Acoustic echo sounder as real time monitor of airport environmental meteorological parameters p0013 A72-11137
- Acoustic ray path method for computing atmospheric conditions effect on aircraft noise propagation, using digital computer p0347 A72-28840
- Low flight altitude atmospheric parameters spatial and temporal variability effects on aircraft flyover noise measurement p0347 A72-28841
- Synoptic meteorological parameters vs CAT encountered in stratosphere by XB-70 airplane, presenting frequency distributions and probability tables p0349 A72-28867
- Meteorological information requirements for V/STOL aircraft design, airport location, runway orientation, aircraft operations and ATC simulation p0349 A72-28869
- Stratospheric meteorological characteristics effects on Concorde supersonic flight performance, fuel consumption, dynamic behavior and passenger comfort p0349 A72-28876
- Meteorological data analysis for CAT encounter of Boeing 747 flight over Nantucket Island on 4 November 1970 p0411 A72-33525
- Meteorological effects on SST performance, considering temperature, wind, turbulence, hydrometeors, ozone and radiation effects p0454 A72-35790
- Analysis of meteorological conditions under which condensation trails are formed by water in aircraft engine exhaust [NASA-TT-P-14047] p0095 A72-12550
- Meteorological data acquisition procedures for monitoring changes in atmospheric parameters at low altitudes to support aircraft flyover noise measurements [NASA-CR-1945] p0166 A72-15004
- Development of method for predicting occurrence of fog and stratus formations at Eglin Air Force Base, Florida [AD-732289] p0208 A72-16501
- Special events of meteorological origin affecting civil jet aircraft operations obtained from flight recorders for period Jan. 1966 to Nov. 1968 [ARC-CP-1188] p0280 A72-19687
- Development of techniques and equipment for conducting programs to identify presence of clear air turbulence and warn high altitude, high speed aircraft [DOT-TSC-FAA-71-19] p0325 A72-20554
- Influence of atmospheric structure and composition on supersonic flight [NASA-TT-P-693] p0578 A72-30551
- Meteorological parameter comparison for aircraft and rawinsonde measurements [AD-743710] p0646 A72-33616
- ## METEOROLOGICAL RADAR
- Aviation weather forecasting improvements due to radar, computer, satellites and high speed communications contributions p0179 A72-18838
- Single engine aircraft-borne weather radar with electronically scanned steerable phased array antenna [SAE PAPER 720315] p0289 A72-25579
- Aircraft radar for weather data, ground mapping, avoidance modes and independent landing monitor function, presenting straight and slant approach simulation data p0547 A72-40290
- Radar observation of weather conditions for aircraft flight [OHM-264-TP-148] p0044 A72-11147
- ## METEOROLOGICAL SATELLITES
- Aviation weather forecasting improvements due to radar, computer, satellites and high speed communications contributions p0179 A72-18838
- Military weather forecasting requirements by 1980, discussing decision making, data processing, satellite data, mission and terminal forecasts, display and computer flight planning p0246 A72-25096
- ## METEOROLOGICAL SERVICES
- Meteorological information assistance for Concorde aircraft test flights, discussing high tropospheric turbulence and lower stratospheric temperature predictions and instruments p0063 A72-14680
- Aircraft in-flight monitoring instruments for meteorological service in U.S. p0064 A72-14687
- Automated meteorological telemetry and interrogation response system with terminal extensions for Paris airport p0064 A72-14695
- Aerospace and aeronautical meteorology - AMS Conference, Washington, D.C., May 1972 p0346 A72-28801
- Pacific Ocean meteorological data collection from military and civil aircraft in-flight reports, discussing computer processing for daily analysis and monthly and seasonal means p0349 A72-28874
- Automatic position reporting, ATC communication, weather information and message identification via digital ground-air-ground data link, discussing operational and maintenance requirements p0546 A72-40286
- Meteorological and takeoff and landing information transmission by proposed automated meteorological and information service, discussing air-ground data link p0547 A72-40287
- ## METEOROLOGY
- NT AEROLOGY
- NT MICROMETEOROLOGY
- NT NUMERICAL WEATHER FORECASTING
- NT SYNOPTIC METEOROLOGY
- NT TROPICAL METEOROLOGY
- NT WEATHER FORECASTING
- Handbook on aviation meteorology covering atmospheric structure and composition, standard atmospheres, heat transfer, adiabatic processes, winds, cloud formations, precipitation, ice formation, fog, visibility, etc p0192 A72-21479
- ## METERS
- U MEASURING INSTRUMENTS
- ## METHACRYLATE RESINS
- U ACRYLIC RESINS
- ## METHANE
- Supersonic diffusion flame in duct configuration to study mixing with combustion of two parallel methane and air flows p0057 A72-13545
- Slush, boiling methane and methane mixture characteristics, noting advantages as potential rocket, aircraft and motor vehicle fuels p0071 A72-15542
- Design and tests of two insulation systems for liquid methane fuel tanks for supersonic cruise aircraft [NASA-CR-120930] p0473 A72-26545
- ## METHOD OF CHARACTERISTICS
- Linearized method of characteristics application to supersonic flow past oscillating flat plate cascades with supersonic leading edge locus [AIAA PAPER 72-377] p0287 A72-25401
- Inward radial flow turbines under unsteady flow conditions with full and partial admission,

# MODULATORS

# SUBJECT INDEX

## MODULATORS

Ferrite component for waveguide commutator used as microwave switching element and modulator, noting application in navigation instruments and avionics

p0598 A72-43768

## MODULES

NT ELECTRONIC MODULES

NT SERVICE MODULES

## MOHR CIRCLES

U FRACTURE MECHANICS

## MOIRE EFFECTS

Flat beam linear vibration analysis from mode measurement and moire technique, applying to prototype turbine compressor blade

p0457 A72-36375

## MOISTURE CONTENT

NT ATMOSPHERIC MOISTURE

Free and dissolved water contents determination in light petroleum products by modified Karl Fischer method using ethylene glycol solvent mixture

p0125 A72-16669

## MOISTURE METERS

NT HYGROMETERS

## MOLDING MATERIALS

Epoxy and silicone rubber molding of ice structures and ice-coated airplane wings

[MEMO-82]

p0426 N72-24611

## MOLECULAR FLOW

NT TRANSITION FLOW

## MOLECULAR SPECTRA

NT VIBRATIONAL SPECTRA

## MOLIERE FORMULA

U SPATIAL DISTRIBUTION

## MOBENT DISTRIBUTION

Inverse integral Fourier transforms to solve steady periodic motions of wing close to solid surface, deriving equations of lift and principal moment

p0196 A72-21701

Calculation of nonstationary lift and moment coefficients for vibrating cascade of blades

p0158 N72-14292

## MOMENTS

NT BENDING MOMENTS

NT LOADING MOMENTS

NT MOMENTS OF INERTIA

NT PITCHING MOMENTS

NT ROLLING MOMENTS

NT STABILITY DERIVATIVES

NT TORQUE

NT VARIANCE (STATISTICS)

NT YAWING MOMENTS

## MOMENTS OF INERTIA

Natural inertia moment effect of balance weight at wing tip on critical flutter rate

p0191 A72-21092

Development of techniques and equipment for determining moment of inertia of aircraft as applied to A-37 and P-1127 aircraft

[FTC-TM-71-10011]

p0331 N72-21007

Inflight measurement of yawing moment of inertia of HP-115 aircraft using wing-tip parachutes

[ARC-R/M-36911]

p0585 N72-31025

## MOMENTUM

NT ANGULAR MOMENTUM

Pressure determination in kinematic pairs of spatial landing gear mechanism, describing rotatory and spherical pairs reactions to various combinations of momenta

p0135 A72-17057

Applicability of methods for determining internal drag and momentum loss for small ducts

[NASA-TM-X-62143]

p0323 N72-20272

## MOMENTUM ENERGY

U KINETIC ENERGY

## MOMENTUM THEORY

Helicopter rotor boundary layer, comparing analytical shear stress and velocity distributions obtained by momentum integral techniques with hot wire probe experimental data

[AIAA PAPER 72-38]

p0130 A72-16900

Critique of general momentum theory of propeller actuator disk model, showing flow field determination from nonlinear elliptic differential equation solution

p0301 A72-25998

Momentum theory for optimum design of wing surfaces

p0618 N72-31999

## MOMENTUM TRANSFER

Wave energy exchanger for hybrid propulsion system.

[ICAS PAPER 72-47]

p0555 A72-41172

## MONITORS

Acoustic echo sounder as real time monitor of airport environmental meteorological parameters

p0013 A72-11137

ATC radar performance monitoring, considering advances in radar signal processing and digital display techniques

p0193 A72-21525

Aircraft maintenance and reliability monitoring and control on scheduled airlines, considering component failure rate and mode analysis, sampling inspection and remedial action

p0231 A72-22901

Structural Acoustic Monitor system for airframe structural proof testing, providing multichannel recording and aural monitoring of acoustic data derived from aircraft mounted accelerometers

p0240 A72-24146

Rank correlation coefficient method for complex control plants parameters selection, applying to aircraft power system monitoring

p0302 A72-26442

Aircraft CRT electronic displays discussing operational flexibility versus control and monitor complexities, economics, reliability and human factors

p0404 A72-32636

Monitor and regulator for automatic speed control and flow velocity measurement in wind tunnel

p0411 A72-33609

An advanced strain level counter for monitoring aircraft fatigue.

p0564 A72-42688

Multipoint real time all-day computerized noise monitoring system for diagnostic evaluation of airport, discussing design and applications

p0607 A72-44684

Instruments for measuring air pollution emitted by aircraft engines

[PB-204794]

p0338 N72-21592

## MONOCOQUE CYLINDERS

U CYLINDRICAL SHELLS

U MONOCOQUE STRUCTURES

## MONOCOQUE STRUCTURES

Papers on aerospace structure by N. J. Hoff covering aircraft framework, stress analysis, structural stability, shell theories, bending, buckling, monocoque and sandwich structures, etc

p0070 A72-15238

Russian book - Design principles in aircraft construction.

p0560 A72-42074

## MONOLITHIC CIRCUITS

U INTEGRATED CIRCUITS

## MONOPLANES

NT BUCCANEER AIRCRAFT

NT ELECTRA AIRCRAFT

NT JINDIVIK TARGET AIRCRAFT

NT VISCOUNT AIRCRAFT

## MONOPOLE ANTENNAS

Numerical analysis of surface current density distribution and electromagnetic fields of conducting body, noting radiation patterns of radial dipole and quarter wavelength monopole

p0344 A72-28541

## MONOPULSE RADAR

Bearing azimuth measurement accuracy improvement by ATC beacon system/secondary surveillance radar using monopulse technique

p0461 A72-37047

## MORTARS (MATERIAL)

Boron/potassium nitrate parachute mortar design for aircraft and spacecraft applications, comparing with high-low propellant

p0189 A72-20783

Coefficient of linear thermal expansion and curing shrinkage of epoxy resin mortars for airfield pavements

[AD-742212]

p0576 N72-30257

## MOSFET

U FIELD EFFECT TRANSISTORS

## MOTION

Mathematical analysis of relative motions between ACV landing craft and different amphibious

# SUBJECT INDEX

NT ROTARY STABILITY  
Sensitivity functions for differential equations  
describing aircraft perturbed motion, noting  
dependence on time derivatives, system  
parameters and coordinates p0180 A72-18977

Motion stability of inertial navigation gyroscopic  
system with gyro horizon compass, noting  
constant and time dependent coefficients of  
motion equations p0490 A72-37320

Helicopter rotor blade flapping motion stability,  
applying perturbation technique to linear  
equations of motion for different advance ratios  
and Lock numbers  
[AIAA PAPER 72-955] p0562 A72-42351

**MOTORS**  
NT ELECTRIC MOTORS  
Air cushion and secondary suspension for support  
and guidance of linear induction motor on  
tracked research vehicle  
[PB-204440] p0219 N72-17010

**MOUNTAINS**  
Mountain stations wind measurement usefulness for  
small aircraft traffic guidance p0072 A72-15625

Winds aloft forecast use to predict southwestern  
mountain lee wave behavior for general aviation  
cross country flights p0348 A72-28863

Ka-26 helicopter operational flight testing in  
high mountain environment, discussing takeoff,  
landing and climb performance as function of  
altitude dependent engine characteristics p0597 A72-43638

Aircraft flights in stratosphere over western USA  
investigating mountain wave propagation for  
stratospheric turbulence forecasting  
[ARC-CP-1159] p0095 N72-12554

**MTBF**  
Aircraft flight control system MTBF field  
operational and MIL-STD-781 testing,  
establishing data baseline for reliability  
predictions p0125 A72-16662

Training cockpit TL-29 mean time of failure-free  
operation from measurement data during  
development tests and two year guarantee,  
calculating avionics devices reliability p0358 A72-30281

Analysis of failure rate for rotary wings on CH-47  
helicopter and determination of  
mean-time-between-failure leading to final  
replacement  
[AD-739568] p0516 N72-28022

**MULTICHANNEL COMMUNICATION**  
Aircraft and water vehicles mobile communications  
via stationary satellite, discussing optimum  
multiple access and repeater configuration  
[AIAA PAPER 72-565] p0308 A72-27376

Multichannel voice recorder-reproducer sets for  
air traffic control

## NASA PROGRAMS

### NT QUIET ENGINE PROGRAM

### NT TILT ROTOR RESEARCH AIRCRAFT PROGRAM

NASA aerodynamic technology program, emphasizing  
airframe and engine development for next  
generation subsonic CTOL jet transport  
requirements  
[SAE PAPER 720319] p0290 A72-25582  
NASA R and D for STOL short haul transportation  
systems, discussing propulsive lift, blown flap  
and augmentor wing concepts, noise reduction, etc  
p0441 A72-34238  
Flight safety research, discussing NASA aviation  
hazards R and D programs involving fire,  
lightning and static, steep approaches, aircraft  
wakes, fog and visibility  
p0507 A72-39742

### NATIONAL AIRSPACE UTILIZATION SYSTEM

Aircraft proximity control for ATC system using  
national secondary surveillance radar /SSR/ for  
CAS-PWI functions  
p0137 A72-17330  
Air traffic flow control - Problems and approaches.  
p0501 A72-38254

### NATIONAL AVIATION SYSTEM

National Aviation System technology, discussing  
wide body jets, smokeless turbofans, all-weather  
operational capability, collision avoidance and  
noise reduction  
p0067 A72-14824

Nationwide real time automated ATC system  
interconnected by data transmission links,  
discussing radar signal acquisition/transfer and  
computer complex  
p0143 A72-18283  
Air traffic flow control - Problems and approaches.  
p0501 A72-38254

Congressional hearing concerning penetration of US  
defense system by Cuban aircraft on flight from  
Havana, Cuba to New Orleans, Louisiana, 26  
October 1971  
p0475 N72-26986  
National plan for development of civil/military  
microwave landing system  
[NASA-TM-X-68637] p0646 N72-33633

### NATURAL FREQUENCIES

### U RESONANT FREQUENCIES

### NAVIER-STOKES EQUATION

Pressure and convective heat transfer distribution  
at air inlet central body surface, reducing  
Navier-Stokes equations to partial differential  
equations with similar solutions  
p0069 A72-14971  
Navier-Stokes equations solution for unsteady  
viscous flow around oscillating elliptic airfoil  
in turbomachinery flutter analysis, obtaining  
pressure and shear stress distributions  
p0117 A72-16002

automatic navigation  
[AD-733397] p0262 N72-18664

### AVIGATION AIDS

### NT AIRPORT BEACONS

### NT BEACONS

### NT GYROCOMPASSES

### NT NAVIGATION INSTRUMENTS

### NT RADAR BEACONS

### NT RADIO BEACONS

### NT RADIO DIRECTION FINDERS

Air transportation system design for safety and  
efficiency, discussing navigation facilities and  
surveillance systems employment for blunder  
prevention  
p0012 A72-11117

Inertial navigation role in automatic ATC systems,  
discussing path control accuracies,  
environmental conditions, noise and air  
pollution, etc  
p0012 A72-11118

Airfield Vehicle Obstacle Indication Device short  
range high-definition radar system for aircraft  
navigation aid  
p0017 A72-12042

Optimal stochastic /Kalman/ filters application to  
integrated air and submarine navigation systems,  
discussing measurement errors modeling as bias  
and colored noise  
p0017 A72-12050

Airborne pictorial navigation systems for visual  
indication of aircraft position in addition to  
digital readout  
p0018 A72-12106

Soviet book on course-indicating systems and  
automatic navigation aids for civil aviation  
aircraft covering design, operation principles,  
error analysis and reliability  
p0018 A72-12298

Radio aids to maritime and aerial navigation -  
Conference, Trieste, June 1971  
p0021 A72-12640

L band in satellite system for aerial navigation  
aid, discussing position accuracy, data  
transmission and voice communication and  
modulation methods  
p0021 A72-12642

Radio aids for air navigation and traffic control  
in Italy, discussing facilities development  
p0024 A72-12748

Satellite navigational aid system technical and  
operational characteristics, emphasizing voice  
communications links in L band  
p0053 A72-12972

Operational requirements of instrument landing  
systems, interferometers, correlation protected  
instruments, landing guidance systems and  
navigation aids  
p0056 A72-13421

Automated navigation aids interface with human  
operator, discussing Apollo flight experience  
and technology utilization in air and marine  
navigation  
p0144 A72-18288

Low light television camera tubes application to  
navigation safety in congested areas,  
reconnaissance and other watchkeeping system  
p0181 A72-19070

V/STOL development for short haul air  
transportation, discussing requirements for  
quiet pollution-free operation, ATC systems,  
navigation and landing aids  
p0190 A72-21010

Area navigation systems, discussing VOR/DME,  
Doppler and inertial systems, CRT displays, data  
links, etc  
p0193 A72-21523

Automated navigation management in cockpit,  
considering modular navigation /MONA/ dual  
channel system of L-1011 TriStar  
p0234 A72-23450

Area navigation for Chicago-New York region,  
evaluating Decca Omnitrac 1A RNAV system  
installation in Boeing 727 aircraft  
p0236 A72-23467

Operational aviation meteorological requirements,  
reviewing aircraft categories, ATC systems and  
avionics and navigational aids  
p0246 A72-25078

Integrated display system design with navigation  
update, weapon delivery, reconnaissance, bomb  
damage assessment, threat and terrain avoidance  
capabilities for multicrew military aircraft  
p0302 A72-26292

# SUBJECT INDEX

# NAVIGATION SATELLITES

- Skyguide airborne computer navigation system for airline applications, discussing system components, flight crew monitoring and optimization  
p0304 A72-26999
- Great circle intermediate waypoint computation method for inertial navigation equipped aircraft  
p0398 A72-32205
- Hybrid area navigation and microwave instrument landing system, discussing approach control and terminal guidance  
p0398 A72-32206
- V/STOL flight control - Trend and requirements.  
p0442 A72-34240
- OMEGA air and maritime navigation system development, test phase and application potential, discussing operational modes, propagation parameters, solar activity effects and signal loss  
p0493 A72-37796
- Precision navigation for approach and landing operations.  
p0501 A72-38253
- Reduction of air traffic congestion due to corridor effect of present airway route pattern through area navigation /R-NAV/ based on VOR/DME inputs  
p0508 A72-39750
- An area navigation system for a long range airplane.  
p0546 A72-40281
- Applications and operational experience with projected map navigation systems in military helicopters  
p0085 N72-11938
- Technologies of computerized flight management and control systems, automated communications systems, and navigation and surveillance systems in future avionics  
p0104 N72-13011
- Analysis of adequacy of omnirange and distance measuring equipment for navigation of V/STOL aircraft in Los Angeles, California area [FAA-RD-71-96]  
p0111 N72-13586
- Congressional legislation concerning safety improvements for airports in Appalachian area  
p0113 N72-13927
- Design, development, and evaluation of locator equipment to provide aircraft position information for flight inspection of navigation facilities [FAA-RD-72-3]  
p0170 N72-15434
- Radiation patterns and comparisons of propagation models for use with interference predictions for VHF/UHF air navigation aids [AD-718465]  
p0171 N72-15598
- Harrier aircraft navigation display and computer unit with projected moving map, means of storing and selecting coordinates, and numerical data superimposed on map  
p0374 N72-22633
- Airborne map display systems using direct view, projected, combined map/CRT, and electronically generated map displays  
p0374 N72-22634
- Requirements for channel splitting to accommodate increased VHF omnirange navigation instrument, landing systems, and distance measuring equipment facilities [PAPEB-54-71/SC122-3]  
p0436 N72-25602
- Kalman-Schmidt filters applied to optimal control of air submarine inertial navigation systems [NASA-CR-127253]  
p0486 N72-27706
- Application of time/frequency collision avoidance system for ground obstacle avoidance and minimum altitude protection zone around airports  
p0522 N72-28672
- Development of plan for navigation systems improvements for civil aviation and maritime requirements [AD-741944]  
p0579 N72-30592
- Flight tests of air navigation equipment to determine accuracy of position location for small area mapping and aerial reconnaissance in Arctic regions [AD-740607]  
p0579 N72-30596
- Low altitude flight test to determine accuracy of VOR Tacan air navigation aid  
p0630 N72-32642
- Concept for automating air traffic control in terminal area with navigation and guidance system primarily dependent on airborne equipment [NASA-TN-D-6992]  
p0646 N72-33644
- NAVIGATION INSTRUMENTS**  
NT ATTITUDE INDICATORS  
NT GYRO HORIZONS  
NT GYROCOMPASSES  
NT RADIO ALTIMETERS  
NT RADIO DIRECTION FINDERS
- Flight testing of automated modular area navigation system for L-1011, describing computer, data storage and control-display units and electronic automatic chart system  
p0240 A72-24271
- Small aircraft navigation over 10-400 mile course segments by raw OMEGA phase information dc presentation on conventional ID-249 course deviation indicator  
p0353 A72-29201
- Configuration and flight test of the only operational Air Force area navigation system.  
p0543 A72-35557
- Development of STOLAND, a versatile navigation, guidance and control system.  
[AIAA PAPER 72-789]  
p0496 A72-38106
- Error analysis of hybrid aircraft inertial navigation systems.  
[AIAA PAPER 72-848]  
p0504 A72-39081
- Modular navigation /MONA/ dual channel automatic area navigation system, describing computer, flight data storage and control/display units  
p0545 A72-40277
- TCE-71A area navigation system based on modular design with provision for 20 waypoints parameter storage, describing computer, control display and automatic data entry units  
p0546 A72-40278
- Operational implementation of area navigation.  
p0546 A72-40279
- Present status of self-contained navigation systems combining Doppler velocity sensors and attitude/heading references.  
p0546 A72-40282
- ILS replacement by microwave landing system, considering landing phase range from acquisition to touchdown, terminal approach handling by airborne navigation system and economic advantages  
p0547 A72-40294
- Autonomous navigation system for SA-330 helicopter and flight test methods  
p0084 N72-11929
- Development of precision, all-weather, low-level navigation system based on ground station using rubidium clock stabilized low frequency transmissions [AD-729358]  
p0161 N72-14674
- Performance of AM/FM radio navigation equipment for military aircraft [AD-729533]  
p0161 N72-14678
- Analysis of inertial navigation system performance to determine effects on aircraft safety and collision avoidance during flight over North Atlantic Ocean [AD-733753]  
p0263 N72-18670
- Proceedings of conference on Omega navigation system and recommendations for modified hyperbolic navigation system [NASA-CR-125807]  
p0280 N72-19718
- Equipment specifications and environmental standards for air navigation systems based on development of minimum operational characteristics [DO-152]  
p0522 N72-28667
- Developments in air traffic control equipment to include radar technology, airborne graphical displays, influence of propagation effects on navigation, and microwave landing guidance systems [AD-740877]  
p0537 N72-29676
- Principles of construction and operation of heading indicators used in civil aviation [JPRS-57031]  
p0630 N72-32640
- Development and characteristics of navigation system for vertical and short takeoff aircraft with application to flight management experiments [NASA-TN-X-62183]  
p0646 N72-33642
- NAVIGATION SATELLITES**  
UHF aeronautical satellite system, presenting ATC trends, international aspects, available flight levels, weather conditions and long haul conflicts

# NAVIGATORS

Satellite navigational aid system technical and operational characteristics, emphasizing voice communications links in L band p0019 A72-12383

Single satellite angle system and multiple satellite ranging and range difference systems in short haul air navigation, comparing with VORTAC p0053 A72-12972

Trends in civil ATC discussing plans to increase terminal capacity, surveillance system and use of multiple synchronous satellites for ocean travel efficiency improvement p0138 A72-17335

Technical and operational aspects of L-band satellite system for air navigation, discussing verbal communication, direction finding and noise interference problems p0307 A72-27103

Ranging signals for aeronautical satellite systems p0417 A72-34138

Geostationary satellite system for air navigation via voice and data communication, discussing ground facilities and avionics p0450 A72-35220

Navigation satellite system based on triangular distance measurement between two satellites and aircraft, noting simplification of air- and satellite-borne equipment requirements p0546 A72-40284

Estimates of maximum number of aircraft likely to be airborne simultaneously over Pacific for planning operational satellite service p0546 A72-40285

Air traffic control using 621 B satellites [AD-731170] p0096 A72-12588

VHF ranging and position fixing techniques using ATS 1 and ATS 3 for ship and aircraft navigation [NASA-CR-125538] p0171 A72-15600

VHF ranging and position fixing techniques using ATS 1 and ATS 3 for ship and aircraft navigation - executive summary [NASA-CR-125537] p0209 A72-16510

Selection of computers for satellite based navigation and guidance system designed for aircraft users p0209 A72-16511

Simulation program for ESRO air traffic control network based on two navigation satellites [SESA-EX-5072-15.786/72] p0336 A72-21226

NAVIGATORS p0537 A72-29674

Military aviation navigator training, discussing objectives, methods, instructors and equipment p0398 A72-32207

Electronic displays with weapon aiming sensors in aircraft navigator-attack systems p0403 A72-32634

NAVION AIRCRAFT

Effects of variations in lift and drag response to longitudinal control on the ease and quality of landing. p0613 A72-45333

Maximum likelihood technique used to extract aerodynamic parameters of Navion airplane from flight data [NASA-TN-D-6643] p0268 A72-19019

NAVY

Critical review of Mil-P-83300 V/STOL flying qualities specifications as applied to helicopter design and missions, suggesting inappropriateness for Navy helicopters [AHS PREPRINT 643] p0447 A72-34503

NEGATIVE FEEDBACK

NT SENSORY FEEDBACK

NERVOUS SYSTEM

NT SPINAL CORD

NETHERLANDS

Research projects conducted by National Aerospace Laboratory of Netherlands during 1971 p0634 A72-32973

NETWORK ANALYSIS

NT CRITICAL PATH METHOD

NETWORK SYNTHESIS

Subtraction circuit design for impulse noise elimination at front end of aircraft oriented OMEGA navigation system receiver p0354 A72-29204

# SUBJECT INDEX

Synthesis and analysis of a fly-by-wire flight control system for an F-4 aircraft. [ATAA PAPER 72-880] p0505 A72-39119

NEUTRON FLUX DENSITY

Measurement of neutron dose transmission factors around cockpit of F-102 aircraft [AD-728198] p0112 A72-13668

NEVADA

Community reaction to aircraft noise in vicinity of airports in Chattanooga, Tennessee, and Reno, Nevada [NASA-CR-2104] p0573 A72-30011

NEW JERSEY

Congressional hearings concerning New York-New Jersey airport compact p0587 A72-31287

NEW YORK

Metropolitan aircraft noise abatement policy study, John F. Kennedy International Airport, New York, New York [PB-200164] p0043 A72-11051

Investigation of air taxi crash, Binghamton, New York [NTSB-AAR-71-13] p0086 A72-11945

Effect of extending Kennedy Airport runways into Jamaica Bay [ISBN-0-309-01871-4-VOL-1] p0322 A72-20248

Improving environment and needs of air transportation near Jamaica Bay [ISBN-0-309-01871-4-VOL-2] p0323 A72-20249

Congressional hearings concerning New York-New Jersey airport compact p0587 A72-31287

NEWTON THEORY

Hypersonic vehicles lateral dynamics during great circle flight, using linearized equations of motion and Newtonian theory for stability derivatives estimation p0195 A72-21603

Mechanics fundamentals in aerodynamical aircraft analysis, noting force concept and Newton theory p0361 A72-30817

NEWTON-RAPHSON METHOD

Determining stability and control derivatives of airplanes from flight data using modified Newton-Raphson minimization technique [NASA-TN-D-6579] p0279 A72-19659

NICKEL ALLOYS

NT INCONEL (TRADEMARK)

NT UDINET ALLOYS

Ceramic fiber reinforced Ni base alloy for gas turbine blades, improving creep resistance at high temperatures p0227 A72-22396

Aircraft gas turbine engine Ni base alloy disks and shafts thermomechanical treatment, considering yield strength and high and low cycle fatigue resistance p0407 A72-33299

Composite Al- and Ni-base alloys strengthened by B and W/Ho fibers respectively for reduced weight wing spars and high temperature applications p0569 A72-43139

Development of nickel base superalloys for powder metallurgy application as compressor and turbine discs in jet engines [NASA-CR-72968] p0110 A72-13468

Thermal, tensile, and creep rupture properties of nickel based alloys for airfoils [NASA-TN-X-68051] p0425 A72-24585

Effect of oxidation-resistant coatings on fatigue strength of nickel-based alloy for turbine engine blades [JPBS-55972] p0426 A72-24608

NICKEL COATINGS

Developments in vacuum braze coating of aero-engine nozzle guide vanes. p0449 A72-34937

NIGHT AIRGLOW

U AIRGLOW

U NIGHT SKY

NIGHT E LAYER

U NIGHT SKY

NIGHT F LAYER

U NIGHT SKY

NIGHT SKY

Outer magnetosphere near midnight at quiet and disturbed times. p0603 A72-44513

# SUBJECT INDEX

# NOISE INTENSITY

- NIGHT VISION**  
Low level night operations of Army aircraft.  
[AHS PREPRINT 631] p0444 A72-34481
- NIOBIUM ALLOYS**  
High strength oxidation resistant tungsten reinforced niobium alloy composites for use in gas turbine engines  
[AD-740844] p0536 N72-29615
- NITRATES**  
Boron/potassium nitrate parachute mortar design for aircraft and spacecraft applications, comparing with high-low propellant  
p0189 A72-20783
- NITRIC OXIDE**  
Nitric oxide production in stratosphere from natural sources and SST operation  
[REPT-101] p0469 N72-26287

NT NITROGEN OXIDES  
NT NITROUS OXIDES  
NT POLYIMIDES  
NT SILICON NITRIDES
- NITROGEN OXIDES**  
NT NITRIC OXIDE  
NT NITROUS OXIDES  
Aircraft gas turbine engine emission reduction, showing nitrogen oxide control with water injection  
[ASME PAPER 71-WA/GT-9] p0116 A72-15902  
Stratospheric, subsonic and supersonic aircraft emission estimation for water vapor and nitrogen oxides  
p0346 A72-28838  
Stratospheric pollution by SST exhaust gases, discussing water vapor and nitrogen oxides, effects on ozone concentration  
p0451 A72-35327  
Possible catalytic reduction of stratospheric ozone by nitrogen oxides emitted from SST aircraft  
[UCRL-20568] p0045 N72-11334
- NITROUS OXIDES**  
NO production in relation to eddy diffusion coefficient in stratosphere  
[A-N-90-1971] p0159 N72-14382
- NOBLE METALS**  
NT GOLD  
Turbine inlet temperature sensor for gas turbine engines, using noble metal thermoelements with high signal level  
[SAE PAPER 720160] p0136 A72-17322
- NODES (STANDING WAVES)**  
Helicopters vibration reduction through fuselage modalization, discussing analysis method and dynamic scale model and full scale flight test results  
[AHS PREPRINT 611] p0444 A72-34487
- NOISE (SOUND)**  
NT AERODYNAMIC NOISE  
NT AIRCRAFT NOISE  
NT ENGINE NOISE  
NT JET AIRCRAFT NOISE  
NT ROCKET ENGINE NOISE  
NT SONIC BOOMS  
NT THERMAL NOISE  
Blowdown wind tunnel internal and external noise fields prediction by empirical method, considering valves, burners, turbulent boundary layers and exhaust jets as sources  
[AIAA PAPER 72-668] p0414 A72-34070  
Annotated bibliography on acoustics  
[NPL-AERO-AC-47] p0035 N72-10589  
Fan and compressor noise evaluation, and model formulation and testing  
[FAA-RD-71-73] p0086 N72-11946  
Application of multiple pure tone noise properties to determination of nonuniformities in turbojet aircraft engines - Part 1  
[NASA-CR-1831] p0092 N72-12223  
Measurement of noise levels on aircraft carrier deck during aircraft operations and effects on deafness risk and verbal communication interference  
[AD-729067] p0107 N72-13038
- Measurement of impulsive noise, rotor noise, rotor blade dynamics, and rotor blade pressure of CH-53 helicopter under cruise and hover conditions  
[AD-730359] p0155 N72-14018  
User manual for propeller noise detectability program  
[AD-729435] p0156 N72-14223  
Sound measurements and noise level in OH-58 helicopter  
[AD-731467] p0206 N72-15985  
Effect of noise on structural design of aircraft parts  
[ESDU-72001] p0648 N72-33902
- NOISE ATTENUATION**  
U NOISE REDUCTION
- NOISE ELIMINATION**  
U NOISE REDUCTION
- NOISE GENERATORS**  
Circular jets sound generation analysis, using Lighthill equation and Michalke spectral method  
[DFVLR-SONDDR-179] p0186 A72-20100  
Acoustical theory application to jet engine noise reduction, developing mathematical model for blade shock wave spacing in noise generation process  
p0189 A72-20542  
Pressure sensor measurements of fluctuating aerodynamic forces on rotor blades related to compressor noise generation  
[ASA PAPER H 6] p0192 A72-21486  
Aerodynamic noise generation mechanism of ideally expanded supersonic jet based on large scale flow instabilities, deriving mathematical model  
p0241 A72-24331
- NOISE HAZARDS**  
U HAZARDS  
U NOISE (SOUND)
- NOISE INTENSITY**  
Aircraft engine noise effects in airport vicinities, discussing measurement scales, turbofan sources, noise reduction and future air traffic  
p0016 A72-12022  
Jet noise suppression near airports, discussing noise physical description, source relation to engine technology and ICAO certification standards  
p0054 A72-13097  
Aircraft and other transient noise levels temporal characteristics effect on noise assessment  
p0069 A72-14843  
Aerospace vehicle noise induced structural vibration, presenting propellers, turbojet engine exhausts and sonic boom waves  
p0123 A72-16597  
Aircraft flyover house noise reduction data, noting application to indoors noise level estimation  
[SAE AIR 1081] p0301 A72-26029  
Aircraft noise sources, showing noise intensity relationship to airfoil velocity and pressure ratio  
p0354 A72-29568  
Design requirements for a quiet helicopter.  
[AHS PREPRINT 604] p0444 A72-34484  
Aircraft noise duration correction for effective perceived noise level /EPNL/ computation, eliminating mathematical anomaly incurred by present FAA and ICAO prescribed method  
p0567 A72-42909  
German monograph - Studies of the ground effect on the noise levels and their frequency distribution in the near field of an engine jet directed vertically against the ground.  
p0568 A72-43060  
Statistical analysis of the sound level distribution of aircraft noise as a function of time  
p0603 A72-44337  
Community noise levels of the L-1011 Tristar Jet Transport.  
p0607 A72-44677  
Data acquisition and analysis of atmospheric absorption coefficients from acoustic flight tests of commercial aircraft  
[NASA-CR-1891] p0087 N72-11957  
Analysis of noise levels created by military aircraft, ground support equipment, and terminal facilities  
[AD-728454] p0090 N72-11972

# NOISE MEASUREMENT

Accuracy of aircraft noise rating procedure relative to perceived sound levels  
[NASA-CR-1883] p0101 N72-12988

Measurement of noise levels on aircraft carrier deck during aircraft operations and effects on deafness risk and verbal communication interference  
[AD-729067] p0107 N72-13038

Flight tests to determine methods for reducing airport community noise based on operationally optimum approach profiles  
[NASA-CR-114417] p0250 N72-18001

Experimental estimation methods for noise spectra and intensity from round jet  
[AD-734042] p0277 N72-19338

Acoustic measurements to determine aerodynamic noise characteristics of single stage fan with 1.5 pressure ratio and 1160 feet per second tip speed  
[NASA-CR-120789] p0365 N72-21994

Acoustic properties of radiated sound for near and far-field conditions and numerical analysis of aerodynamic sound production  
p0382 N72-23020

Analysis of noise pollution created by aircraft operations in San Francisco, California area  
p0515 N72-28013

Acoustic measurements to determine effectiveness of insulation in reducing noise intensity with helicopter compartments  
[DCIEM-839] p0515 N72-28014

Analysis of data on land uses around airports and application of computer program for data processing  
p0532 N72-29210

Analysis of aircraft noise generation and optimization of flight paths to minimize effects of aircraft noise during takeoff  
[NASA-TT-F-14468] p0622 N72-32042

Development of advanced technology for identifying and minimizing sources of noise in aircraft engines  
[NASA-TM-X-68131] p0622 N72-32043

Numerical analysis of total sound pressure field emitted by stationary rotating jet and sound field from same jet in motion observed at fixed point on ground  
[NASA-TT-F-14489] p0623 N72-32047

# NOISE MEASUREMENT

## U ACOUSTIC MEASUREMENTS

### NOISE METERS

California airport noise standards instrumentation, discussing battery operated measurement of hourly and community noise equivalent levels  
p0184 A72-19490

Multipoint real time all-day computerized noise monitoring system for diagnostic evaluation of airport, discussing design and applications  
p0607 A72-44684

### NOISE POLLUTION

Portable detector-recorder for automobile, blast furnace, railroad car, engine room and helicopter infrasonic noise measurements, discussing peak frequencies and subjective effects  
p0001 A72-10157

Air transportation evolution and relation to atmospheric and noise pollution  
p0061 A72-14151

Aircraft operations effects on community noise pollution, discussing ATC airline operational procedures modifications in terms of noise reduction  
p0067 A72-14819

New York-New Jersey megalopolis offshore jetport feasibility, considering noise, air-water pollution, land conservation, cost, etc  
p0346 A72-28792

Acoustical environment pollution control, considering noise annoyance effects due to industry and construction, surface and air traffic, alarm devices, radio and TV, etc  
p0354 A72-29554

Private and governmental regulatory aspects of environmental noise abatement and control, discussing legal efforts and trends at local, state and federal levels  
p0403 A72-32614

# SUBJECT INDEX

Hypersonic transports commercial applications, examining economic and noise and air pollution aspects  
[ICAS PAPER 72-32] p0554 A72-41157

VTOL aircraft noise reduction through design methods and flight path management in terminal area, evaluating acoustical annoyance to surrounding community  
[ICAS PAPER 72-34] p0554 A72-41159

Aircraft gas turbine engines environmental effects, considering thermal radiation, acoustic emissions and exhaust gases in relation to propulsion system design parameters  
p0602 A72-44296

Annotated bibliography on aircraft noise pollution - Vol. 1  
[AD-724850] p0030 N72-10036

Aircraft noise effects on land use around airports  
[PB-201195] p0032 N72-10050

Human tolerance to noise pollution created by helicopter landing site in central London  
[P-184] p0087 N72-11953

Environmental impact and adverse environmental effects of Navy F-14 aircraft operation  
[PB-199851-F] p0206 N72-15983

Noise pollution, structural failure, transonic speed engineering, and aircraft design  
p0214 N72-16766

Proceedings of conference on environmental effects of aircraft operation with emphasis on air and noise pollution  
[PB-202038] p0217 N72-16992

Air and noise environmental pollution from B-1 aircraft  
[PB-201711-F] p0254 N72-18033

Aviation noise evaluations and projections for San Francisco Bay region  
[PB-204035] p0254 N72-18035

Environment pollution of turbine engine aircraft  
p0270 N72-19030

Jet aircraft noise pollution in airport vicinity  
p0270 N72-19031

Urban noise sources and need for unified noise control legislation  
p0327 N72-20956

Noise exposure forecasts for airport vicinity in land use management  
[ISAS-476-VOL-37-NO-2] p0424 N72-24344

Correlation of total sound power and peak sideline overall sound pressure level for subsonic and supersonic jets of aircraft engine exhaust  
[NASA-TM-X-68059] p0427 N72-24711

Analysis of noise pollution created by aircraft operations in San Francisco, California area  
p0515 N72-28013

Effects of operational aircraft noise on land development around military airport  
[AD-740393] p0529 N72-29011

Hearing concerning noise pollution, and Noise Control Act  
p0573 N72-30014

Noise pollution, impact on environment and living things, noise reduction, and noise abatement legislation  
[S-DOC-92-63] p0578 N72-30559

Reactions of people and community to noise pollution  
[N7ID300.3] p0579 N72-30604

**NOISE PROPAGATION**

Turbojet engine noise causes and reduction techniques, noting U.S. antinnoise standards  
p0069 A72-14925

Cross flow effect on lifting fan noise at subsonic blade tip speeds, analyzing radiation pattern change due to inlet flow distortion  
[AIAA PAPER 72-128] p0131 A72-16921

Acoustic ray path method for computing atmospheric conditions effect on aircraft noise propagation, using digital computer  
p0347 A72-28840

Supersonic jet noise and sonic boom sources, propagation and reduction, considering airport community disturbances, aircraft cabin noise and fatigue problems  
p0355 A72-29578

Tone noise from rotor/stator interactions in high speed fans.  
p0610 A72-44917

Propagation of ballistic noise from aircraft in nonperturbed atmosphere - aircraft in horizontal

## SUBJECT INDEX

## NOISE REDUCTION

- flight at constant velocity, applied to turning flight  
[ISL-12/70] p0081 N72-11914
- Annual report 1969 of Institute of Sound and Vibration Research including aircraft, engine and turbo machinery noise, audiology, and structural vibration p0112 N72-13615

- Sound attenuation in lined rectangular ducts with uniform steady flow, considering aircraft engine noise reduction p0070 A72-15267
- Aircraft noise measurement units and methods, discussing engine design for noise reduction p0118 A72-16026
- Leaning vanes for fan noise reduction, discussing rotor-stator plane fluctuating pressure amplitude decrease and radial distribution modification [AIAA PAPER 72-126] p0128 A72-16823
- Rotorcraft based on VTOL concept for aircraft noise reduction in urban transportation p0143 A72-18248
- Hybrid computer method of nonstationary spectrum analysis of aircraft noise, applying to flyover and jet aircraft noise abatement under operational conditions p0178 A72-18778
- Externally blown flap noise tests at various nozzle exhaust velocities for STOL aircraft noise reduction [AIAA PAPER 72-129] p0180 A72-18962
- Engine fan-compressor maximum noise reduction for given aircraft configuration by acoustic linings on nacelle inlet and exhaust walls p0183 A72-19268
- Hovercraft noise and vibration source and reduction for improved crew and passenger comfort p0184 A72-19648
- Jet noise intensity reduction by screen across nozzle exit, using acoustic and hot wire measurements p0185 A72-19873
- Turbojet and turbofan engines noise signatures and sonic boom effects, discussing frequency spectra, atmospheric attenuation and noise suppression systems p0186 A72-20163
- Acoustical theory application to jet engine noise reduction, developing mathematical model for blade shock wave spacing in noise generation process p0189 A72-20542
- Sonic boom minimization, obtaining positive phase signature pressures as function of altitude, Mach number, weight and length p0197 A72-21903
- Helicopter noise and vibration testing and cabin soundproofing for improved comfort p0199 A72-22141
- Aerodynamic noise produced by gas jet flow around airfoil, discussing sound reduction p0240 A72-24107
- Commercial applications of quiet light aircraft technology, discussing cost and noise reduction [SAE PAPER 720339] p0292 A72-25596
- Noise reduction effects of wake interaction between rotor blade rows in axial flow compressor, cancelling velocity defect at stator position [ASME PAPER 72-GT-15] p0293 A72-25614
- Low pressure ratio Q-FAN propulsor noise reduction tests on wind tunnel model, discussing source components and design configurations [ASME PAPER 72-GT-40] p0295 A72-25634
- NASA quiet engine program, discussing noise reduction technology for subsonic civil transport aircraft propulsion system [ASME PAPER 72-GT-96] p0298 A72-25667
- Aircraft flyover house noise reduction data, noting application to indoors noise level estimation [SAE AIR 1081] p0301 A72-26029
- STOL aircraft role in civil aviation, discussing short range operation, ATC, reduced noise and weather capability p0310 A72-27518
- Future short haul aircraft transportation systems, discussing aircraft forms, noise reduction technology and runway requirements p0311 A72-27660
- Subtraction circuit design for impulse noise elimination at front end of aircraft oriented OMEGA navigation system receiver

- p0354 A72-29204  
Building soundproofing codes for airport zoning ordinances, emphasizing wider latitude in land use options
- p0354 A72-29561  
Supersonic jet noise and sonic boom sources, propagation and reduction, considering airport community disturbances, aircraft cabin noise and fatigue problems
- p0355 A72-29578  
Bibliography on noise control covering surface transportation, machinery and aircraft noise, industrial criteria, biodynamics, legislation and measurement
- p0356 A72-29588  
Low noise aircraft-engine configuration feasibility, discussing turbofan engine noise reduction
- p0400 A72-32322  
RB 211 three-shaft turbofan engine for L-1011 airliner, describing design for noise reduction
- p0400 A72-32428  
Private and governmental regulatory aspects of environmental noise abatement and control, discussing legal efforts and trends at local, state and federal levels
- p0403 A72-32614  
STOL aircraft for civil transport applications, considering optimum design concepts, noise reduction and terminal facility requirements
- p0409 A72-33331  
STOL aircraft minimum noise takeoff trajectories determination, taking into account engine thrust and listeners distance from noise source
- p0414 A72-34072  
[AIAA PAPER 72-665]  
NASA/General Electric joint development of low noise propulsion technology, describing demonstrator engine A design, components development and aerodynamic/acoustic performance evaluation
- p0414 A72-34077  
[AIAA PAPER 72-657]  
Leading edge serrations effect on rotor noise and aerodynamic characteristics, noting vortex and rotational noise reduction and overall efficiency decrease
- p0415 A72-34079  
[AIAA PAPER 72-655]  
Sonic boom alleviation by flow field alteration near supersonic aircraft, considering finite rise times, reduced overpressures and shock pressure rises
- p0415 A72-34081  
[AIAA PAPER 72-653]  
Jet noise reduction by screen placed across jet flow, investigating acoustic properties, velocity and pressure in mixing zone
- p0416 A72-34088  
[AIAA PAPER 72-644]  
Acoustic attenuation and thrust loss incurred by shrouded multistage supersonic jet noise suppressor
- p0416 A72-34090  
[AIAA PAPER 72-642]  
NASA R and D for STOL short haul transportation systems, discussing propulsive lift, blown flap and augmentor wing concepts, noise reduction, etc
- p0441 A72-34238  
Design requirements for a quiet helicopter.
- p0444 A72-34484  
[AHS PREPRINT 604]  
Reduction of noise and acoustic-frequency vibrations in aircraft transmissions.
- p0448 A72-34508  
[AHS PREPRINT 661]  
Externally blown flap impingement noise.
- p0455 A72-35961  
[AIAA PAPER 72-664]  
Sonic jet noise pressure source model for radiated sound power and jet pressure frequency spectra ratio derivation with application to noise suppression
- p0457 A72-36414  
NASA R and D programs for quiet STOL aircraft and engines development
- p0457 A72-36503  
Internal noise reduction in hovercraft.
- p0458 A72-36574  
Forward flight effects on mixer nozzle design and noise considerations for STOL externally blown flap systems.
- p0496 A72-38109  
[AIAA PAPER 72-792]  
Flight evaluation of three-dimensional area navigation for jet transport noise abatement.
- p0497 A72-38116  
[AIAA PAPER 72-814]  
Aircraft noise problem in piston engine to turbofan turbo jet transports, discussing need for noise reduction research
- p0497 A72-38117  
[AIAA PAPER 72-815]  
Jet aircraft noise sources in subsonic and supersonic exhaust mixing process, suppressing noise via turbofan exhaust speed reduction
- p0503 A72-38380  
Quiet engine design for V/STOL and reduced takeoff and landing /RTOL/ aircraft, discussing various engine noise sources, countermeasures and tolerance levels
- p0509 A72-39819  
Supersonic aircraft wing form influence on sonic boom, discussing supersonic wind tunnel tests for noise reduction
- p0509 A72-39931  
Noise radiation from V/STOL aircraft.
- p0553 A72-41147  
[ICAS PAPER 72-22]  
VTOL aircraft noise reduction through design methods and flight path management in terminal area, evaluating acoustical annoyance to surrounding community
- p0554 A72-41159  
[ICAS PAPER 72-34]  
NASA Quiet Engine program R and D on conventional takeoff and landing subsonic cruise aircraft engine noise
- p0556 A72-41173  
[ICAS PAPER 72-48]  
Noise control technology for jet-powered STOL vehicles.
- p0556 A72-41175  
[ICAS PAPER 72-50]  
Jet noise generation theory /Lighthill-Pfowcs Williams/ verification by model tests, discussing means of reducing or eliminating shock cells
- p0559 A72-41852  
[ICAS PAPER 72-55]  
NASA's quiet engine programs.
- p0569 A72-43152  
Supersonic aircraft focused sonic boom suppression by slowing down during turning flight, obtaining conditions for focus cut-off at ground by atmospheric refraction
- p0599 A72-44125  
Design, fabrication, and ground tests of perforated stainless steel exhaust nozzle inserts for Boeing 707 aircraft noise reduction
- p0031 A72-10043  
[NASA-CR-1853]  
Sound generation and scale model experiments to suppress noise in turbulent jet flow eddies of supersonic transport aircraft
- p0034 A72-10254  
[ARC-32723]  
Noise reduction for climbing takeoff and V/STOL aircraft affecting stability
- p0042 A72-11040  
[DLR-FB-71-10]  
Cost effectiveness analysis to determine feasibility of using catapult launch systems for large commercial aircraft to reduce aircraft noise problem
- p0085 A72-11941  
[FAA-EQ-71-1]  
FAA aircraft noise abatement program
- p0088 A72-11958  
Requirements for governmental regulation of aircraft noise
- p0088 A72-11959  
[REPT-61]  
Technological and operational methods in aircraft noise abatement
- p0104 A72-13012  
Reduction of jet aircraft noise around airports by use of two-segment landing approach
- p0149 A72-13985  
[NASA-TM-X-62098]  
Research on noise reduction, flying simulators, and gust alleviators
- p0204 A72-15969  
Augmentor flap, wing ducting and augmentor nozzle, and noise reduction for jet-STOL aircraft
- p0210 A72-16698  
[NASA-CR-125540]  
Quiet aircraft engine design and preliminary fan and engine test results
- p0213 A72-16719  
[NASA-TM-X-67988]  
Investigating lift fan noise reduction by configuration modifications in LP336/A
- p0218 A72-17004  
[NASA-CR-1934]  
Thrust lift augmentation and noise reduction characteristics of compact ejectors with applications to V/STOL aircraft
- p0220 A72-17025  
[AD-732842]  
Flight tests to determine methods for reducing airport community noise based on operationally optimum approach profiles
- p0250 A72-18001  
[NASA-CR-114417]  
Noise suppression capability of mixer nozzle used with externally blown flap augmentation system

## SUBJECT INDEX

## NONCONSERVATIVE FORCES

- on STOL aircraft  
[NASA-TM-X-68021] p0252 N72-18014
- Design and performance of filter resonators for  
helicopter noise reduction  
[AD-734812] p0275 N72-19222
- Field noise measurements of HH-43B helicopters  
during flight to determine effects of  
modifications on noise reduction  
[NASA-TM-X-2226] p0318 N72-20005
- Transonic propulsion fan for turbofan engine with  
rotor blade spacing designed to minimize noise  
emission  
[NASA-CASE-LEW-11402-1] p0327 N72-20770
- Urban noise sources and need for unified noise  
control legislation  
p0327 N72-20956
- Aircraft noise reduction by extinction with  
reversed phase sound in acoustic interference

generation, propagation, and reduction studies  
p0436 N72-25632
- Recommendations for advanced technology program to  
develop long range transport aircraft to meet  
noise reduction standards - Vol. 2  
[NASA-CR-112093] p0464 N72-26007
- Procedures for reduction of noise generated by  
tilt-rotor aircraft during takeoff and landing  
phases of flight by flight path control  
[NASA-CR-2034] p0467 N72-26025
- Quiet nacelle for suppressing noise in TF-34  
turbofan engine  
[NASA-CR-120915] p0473 N72-26692
- Aerodynamic performance test data for  
high-bypass-ratio, single stage turbofan  
designed in experimental quiet engine program  
[NASA-CR-120858] p0474 N72-26695
- Acoustic measurement tests to determine reduction  
of aerodynamic noise by engine-over-wing concept  
for conventional and STOL aircraft  
[NASA-TM-X-68104] p0479 N72-27030
- Regulations and operational procedures for control  
of aircraft noise levels  
[FAA-RD-71-24] p0514 N72-28005
- Noise measurements obtained during visual approach  
monitor evaluation in 747 aircraft  
[NASA-CR-114478] p0515 N72-28010
- Acoustic measurements to determine effectiveness  
of insulation in reducing noise intensity with  
helicopter compartments  
[DCIEM-839] p0515 N72-28014
- Two stage fan engine for low noise and low  
emission operation of advanced technology  
transport aircraft  
[NASA-CR-120950] p0523 N72-28786
- Amendment to proposed noise control legislation  
[H-REPT-92-842] p0525 N72-28975
- Hearing concerning noise pollution, and Noise  
Control Act  
p0573 N72-30014
- Noise pollution, impact on environment and living  
things, noise reduction, and noise abatement  
legislation  
[S-DOC-92-63] p0578 N72-30559
- NASA quiet engine technology for reducing noise  
levels in conventional and subsonic aircraft  
[NASA-TM-X-68121] p0580 N72-30775
- Reduction of noise produced by helicopter geared  
power trains by application of vibration and  
acoustics technology  
[AD-742735] p0586 N72-31031
- Development of advanced technology for identifying  
and minimizing sources of noise in aircraft  
engines  
[NASA-TM-X-68131] p0622 N72-32043
- Concept for jet noise suppression for afterburning  
turbojet engine  
[NASA-TM-X-68144] p0632 N72-32763
- High bypass turbofan engines, based on TF-34, in  
heavily sound-suppressed nacelles studied for  
STOL commercial aircraft  
[NASA-CR-120914] p0647 N72-33743
- NOISE SPECTRA**
- Turbofan multiple pure tone noise analysis,  
discussing rotor geometry, relative Mach number  
and incidence angle effect on sound emission  
[AIAA PAPER 72-127] p0128 A72-16824
- Jet flap type exhaust flows acoustic and fluid  
dynamic characteristics, measuring sound power  
output and noise spectra for various  
configurations  
[AIAA PAPER 72-130] p0131 A72-16920
- Aerodynamic noise measurement, discussing physical  
units, spectral analysis, conversion and  
correction formulas  
p0136 A72-17195
- Hybrid computer method of nonstationary spectrum  
analysis of aircraft noise, applying to flyover  
and jet aircraft noise abatement under  
operational conditions  
p0178 A72-18778
- Spectral measurements of jet turbulence noise in  
core and annular mixing region, using subsonic  
test experiments  
[AIAA PAPER 72-158] p0180 A72-18957
- Turbojet and turbofan engines noise signatures and  
sonic boom effects, discussing frequency  
spectra, atmospheric attenuation and noise  
suppression systems  
p0186 A72-20163
- Measurement of spatially coherent and incoherent  
structure of axial compressor-generated noise  
modes propagating in duct  
[ONERA, TP NO. 1045] p0311 A72-28049
- Digital data processing techniques for aircraft  
engine noise data reduction, analyzing fan noise  
spectrum  
p0356 A72-29840
- Tu-104 turboprop aircraft flight noise  
measurements and spectral changes at different  
distances from landing strip, evaluating public  
nuisance and resident reactions  
p0360 A72-30446
- The estimation of nonstationary spectra from  
moving acoustic source distributions.  
[AIAA PAPER 72-667] p0452 A72-35486
- Description and use of a method for characterizing  
noise sources in jets  
[ICAS PAPER 72-35] p0555 A72-41160
- Statistical analysis of the sound level  
distribution of aircraft noise as a function of  
time  
p0603 A72-44337
- Basic directivity and spectra of jet noise with  
improved correction for refraction.  
p0607 A72-44678
- Coherent structure of discrete frequencies of  
compressor noise spectra  
[NASA-TT-F-14091] p0161 N72-14700
- Experimental estimation methods for noise spectra  
and intensity from round jet  
[AD-734042] p0277 N72-19338
- Method for computing noise generated by standing  
and flying jet aircraft.  
[ONERA-NT-187] p0437 N72-25636

nonself-adjoint aeroelasticity problems based on  
interpretation as mathematical formulation of

# **NONDESTRUCTIVE TESTS**

# **SUBJECT INDEX**

virtual work principle p0178 A72-18788

**NONDESTRUCTIVE TESTS**

Nondestructive radioactive gas penetrant tests for porosity and fatigue damage in jet engine castings p0009 A72-10813

Portable self contained ultrasonic field inspection equipment for nondestructive crack detection in T53 gas turbine compressor disks p0009 A72-10814

Integrity control procedures for machining, drilling and grinding of steel and Ti alloy aircraft parts, discussing nondestructive inspection method [SME PAPER IQ 71-238] p0011 A72-10969

Automatic ultrasonic testing equipment for NDT tests of helicopter rotor blades p0011 A72-11021

DC-10 nondestructive testing manual, detailing section/subject format, methods, planned area accessibility and aircraft maintenance p0012 A72-11109

Metal fatigue damage nondestructive detection, discussing inspection methods, equipment, advantages, limitations and test results [AD-741977] p0020 A72-12498

Nondestructive testing for materials inspection and monitored aircraft maintenance programs p0062 A72-14201

X ray, ultrasonic and eddy current nondestructive testing of aircraft structure for maintenance and special problems p0180 A72-18840

NDT of diffusion formed coatings on refractory alloys and superalloys, stressing eddy current technique p0302 A72-26287

NDT application to aircraft design and reliability, discussing fatigue life analysis and in-service monitoring for structural elements, components and airframes p0307 A72-27198

Continuous NDT of coalescers /jet fuel filters/ by liquid crystals, detecting split seams, cap leaks, cracks, material imperfections and epoxy filled voids [ASME PAPER 72-DE-25] p0362 A72-30867

The importance of service inspection in aircraft fatigue. p0609 A72-44740

NDT techniques selection, economics and organization for aircraft industry, considering ultrasonic holographic and adhesion tests p0612 A72-45292

Application of nondestructive testing procedures to maintenance of large commercial aircraft p0040 A72-11025

Stresses and wall thickness of turbine blades determined with laser holographic interferometry [AD-728802] p0110 N72-13446

Development of nondestructive test methods for detection of early fatigue and fracture damage in metals and alloys [AD-730348] p0224 N72-17937

Survey and analysis of application of nondestructive inspection methods to aircraft structures [AGARD-R-587-71] p0278 N72-19541

Nondestructive tests and their application for inspection of adhesive bonded structures, welded joints, and riveted or bolted joints. p0278 N72-19542

Aircraft industry survey for analysis of nondestructive inspection methods application to commercial aircraft for 1968 to 1970 p0278 N72-19543

Nondestructive test for failure inspection and quality control of composite structures and materials - conference [AGARD-R-590] p0429 N72-24934

Nondestructive tests applied to quality control of airframes made of boron composites p0429 N72-24936

Ultrasonic inspection of wing spar joints on Viscount aircraft [TR-7105.512] p0434 N72-25461

Nondestructive eddy current method for crack detection in turbine blades [AD-743105] p0591 N72-31786

Nondestructive tests of fuel filters and other turbine parts, using thermography [AD-743081] p0591 N72-31787

Experimental technique for measuring in-plane displacements by holographic interferometry [AD-744490] p0629 N72-32483

Application of nondestructive testing techniques for improving aircraft safety and aircraft accident reduction p0634 N72-32981

Development and application of instrument for measuring coke tube deposits based on beta ray backscatter [AD-743308] p0644 N72-33467

**NONEQUILIBRIUM DRAG**

**U FRICTION DRAG**

**NONEQUILIBRIUM FLOW**

Laminar three dimensional boundary layer nonequilibrium effects at hypersonic wing swept leading edge with intensively cooled surface, considering sweep induced crossflow effect [VPI-E-71-23] p0020 A72-12422

Theoretical design of maximum thrust nozzles with nonequilibrium, chemically reacting, supersonic gas flows [AD-737378] p0390 N72-23847

Vibrational and chemical nonequilibrium losses in stoichiometric turbojet engine using kerosene-air mixture [AD-742948] p0591 N72-31788

**NONFLAMMABLE MATERIALS**

Development and application of nonflammable and fire retardant materials for use with spacecraft and aircraft interiors p0208 N72-16419

High temperature resistant fabrics to replace current specification nylon and cotton fabrics in aircraft [AD-740600] p0536 N72-29612

**NONISOTHERMAL PROCESSES**

**U ISOTHERMAL PROCESSES**

**NONLINEAR EQUATIONS**

Approximate method for nonlinear differential equations of motion solution in flight dynamics, applying to control surface buzz and slender wing oscillations p0235 A72-23453

Nonlinear integral equations solution for heavily loaded actuator disk induced flow field, taking into account blade tip vortices and thrust coefficient effects p0303 A72-26577

Extension of Gersten nonlinear wing theory to compressible flow [BMV-FBWT-71-20] p0164 N72-14993

Calculating downwash angles behind wings with small span-chord ratios moving at subsonic speeds using nonlinear algebraic equations p0618 N72-32009

**NONLINEAR PROGRAMMING**

Carrier based attack aircraft allocation model formulation and solution for maximum inflicted target damage, using sequential unconstrained minimization technique with nonlinear programming [AD-736073] p0192 A72-21469

Nonlinear programming for air traffic control systems [AD-743569] p0630 N72-32596

**NONLINEAR SYSTEMS**

Free flight simulation tests for V/STOL aircraft nonlinear attitude control system adaptation to helicopter pitch and roll control [DGLR PAPER 71-060] p0023 A72-12714

Multiinput and multioutput linear and nonlinear dynamic system maximum likelihood identification based on state vector formulation and optimal filter use p0183 A72-19286

Model-following control for nonlinear multivariable plants, considering implicit algorithm solution and application to variable stability aircraft control synthesis p0185 A72-19708

Nonlinear dynamics of flight vehicle - Conference, University of Technology, Loughborough, England, March 1972 p0234 A72-23451

Nonlinear dynamic motion response analysis of flight vehicles typified by continuously

- changing vibration damping and frequency  
p0235 A72-23452
- Liapunov functional stability analysis in  
structural dynamics problems including wave  
equations with nonlinear damping  
p0235 A72-23457
- Random vibration of linearly elastic lumped mass  
systems containing, nonlinear damping to ideal  
stationary Gaussian white noise excitation  
p0235 A72-23460
- Development of theory of vibrations of linear and  
nonlinear systems and application to calculating  
vibrations in aircraft engines  
[AD-731351] p0172 A72-15721
- Attitude stabilization of Bell 47-G helicopter  
with adapted nonlinear V/STOL attitude regulator  
p0321 A72-20026
- Development of algorithm for solving problem of  
controlling time-varying linear avionic system  
with random parameters based on adaptive dual  
control strategy - Part 1  
[AD-744115] p0625 A72-32064
- NONLINEARITY**  
Extension of Gersten nonlinear wing theory to  
transonic flow  
[BMVG-PBWT-71-21] p0164 A72-14994
- NONREFLECTION**  
U ENERGY ABSORPTION
- NONRIGIDITY**  
U FLEXIBILITY
- NONSTABILIZED OSCILLATION**  
Destabilization effects of flap-lag coupling in  
hingeless rotor blade oscillations during hover  
[NASA-TN-X-62179] p0572 A72-30003
- NONSYNCHRONIZATION**  
SECANT midair collision avoidance system based on  
nonsynchronous microsec pulse transmission and  
receiving via randomly selected frequency,  
describing modular components and operating  
principles  
p0606 A72-44647
- NONUNIFORM FLOW**  
Hingeless rotor helicopter blade steady state  
response with nonuniform inflow and elastic  
blade bending  
[AIAA PAPER 72-65] p0132 A72-16933
- Nonuniform propeller streams effects on  
aerodynamic characteristics of high aspect ratio  
wing, using airfoil theory  
[AD-745477] p0182 A72-19092
- Analysis of nonsteady flow fields associated with  
rotor-stator interactions  
[NASA-CR-127765] p0533 A72-29227
- Design and performance data of technique for  
generating nonuniform flow similar to discharge  
of impulse supersonic compressor flow  
[NASA-CR-112097] p0588 A72-31303
- NONVISCIOUS FLOW**  
U TURBULENT FLOW
- NORMAL DENSITY FUNCTIONS**  
Rice exceedance statistics application to  
atmospheric turbulence, indicating strong  
nonGaussian second order distributions  
[AIAA PAPER 72-136] p0134 A72-16969
- NORMAL DISTRIBUTIONS**  
U NORMAL DENSITY FUNCTIONS
- NORMAL FORCE DISTRIBUTION**  
U FORCE DISTRIBUTION
- NORTH AMERICA**  
Present and proposed air traffic control concepts  
in North America and Europe  
[UTIAS-34] p0325 A72-20577
- NORTH AMERICAN MILITARY AIRCRAFT**  
U MILITARY AIRCRAFT
- NORTH ATLANTIC TREATY ORGANIZATION (NATO)**  
Aerodynamic testing at high Reynolds numbers and  
transonic speeds in NATO  
[AGARD-R-588-71] p0099 A72-12978
- NORTH CAROLINA**  
Environmental impact statement on proposed airport  
construction at West Jefferson, North Carolina  
[PB-206552-F] p0627 A72-32276
- NORTHERN HEMISPHERE**  
NT ARCTIC REGIONS
- NORTHROP MILITARY AIRCRAFT**  
U MILITARY AIRCRAFT
- NOSE WHEELS**  
Electromechanical nose wheel steering system for  
general aviation aircraft ground maneuverability  
improvement, describing design  
p0010 A72-10963
- Improved aircraft ground performance in slush and  
wet runway conditions by addition of extra nose  
wheel  
[ARC-CP-1206] p0432 A72-25009
- NOSES (FOREBODIES)**  
Al alloy plates and D-nosed specimens indentation  
and penetration under hail impact test  
p0176 A72-18764
- NOTCH SENSITIVITY**  
Stress-service life relations for duralumin  
samples from impact and nonimpact tensile tests  
with cyclic axial loads, noting notch sensitivity  
p0352 A72-29147
- NOTCH TESTS**  
Fatigue behavior of notched or cracked aircraft  
structure parts, examining service life  
prediction problem  
p0139 A72-17811
- Fatigue life under cyclic loads of notched  
aluminum-copper-magnesium airframe alloy  
[DLR-FB-71-23] p0170 A72-15530
- NOTCHED METALS**  
U NOTCH TESTS
- NOTCHED STEEL**  
U NOTCH TESTS  
U STEELS
- NOXIOUS MATERIALS**  
U CONTAMINANTS
- NOZZLE-COEFFICIENT**  
U NOZZLE FLOW
- NOZZLE DESIGN**  
Aladin 2 noiseless STOL jet aircraft project,  
describing exhaust nozzle configuration, design  
and economics  
p0021 A72-12503
- Forward flight effects on mixer nozzle design and  
noise considerations for STOL externally blown  
flap systems.  
[AIAA PAPER 72-792] p0496 A72-38109
- Thrust stand for evaluation of thrust vectoring  
nozzle performance.  
[AIAA PAPER 72-1029] p0615 A72-45406
- Design of flexible steel liners for adjustable  
transonic wind tunnel nozzle  
[NPL-AERO-NOTE-1098] p0030 A72-10023
- Design problems of inlets and nozzles used in  
supersonic and V/STOL propulsion systems  
[NASA-TN-X-67741] p0340 A72-21819
- Theoretical design of maximum thrust nozzles with  
nonequilibrium, chemically reacting, supersonic  
gas flows  
[AD-737378] p0390 A72-23847
- Quantitative method for determining jet mixing  
flow in turbojet inlet design optimization  
[AD-739858] p0524 A72-28797
- NOZZLE EFFICIENCY**  
Supersonic aircraft engine inlet performance in  
terms of pressure recovery, discussing oblique  
shock wave formation ahead of entrance to  
improve efficiency  
p0611 A72-44991
- Noise suppression capability of mixer nozzle used  
with externally blown flap augmentation system  
on STOL aircraft  
[NASA-TN-X-68021] p0252 A72-18014
- NOZZLE FLOW**  
Gas turbine nozzles aerodynamic throat area air  
flow measurement, describing accuracy,  
standards, reference nozzles and mounting flanges  
[SAE ARP 1195] p0008 A72-10390
- Convergent conical nozzle shape effect on  
propulsive performance and compressible flow  
field internal characteristics  
[ASME PAPER 71-WA/PE-3] p0117 A72-15937
- Aerodynamic throttling effect due to air jet flow  
interaction in throat region of mainstream two  
dimensional nozzle flow  
p0244 A72-24845
- Supersonic jet noise mechanisms and scaling laws,  
studying acoustic fields for rectangular and  
axisymmetric nozzle configurations  
[AIAA PAPER 72-641] p0416 A72-34091
- Swirling flows vortex breakdown in nozzles,  
diffusers and combustion chambers, considering  
analogy to boundary layer separation  
p0457 A72-36385
